how to use this book	lx
Introduction	xli
01	1
kanai desu <i>this is my wife</i>	
basic Japanese sentences, introductions and forms of address, simple questions, countries and nationality	
02	13
resutoran wa tōi desu ka? <i>is the restaurant far?</i>	
questions about where things are, adjectives, everyday greetings	
03	24
shī dī ga takusan arimasu ne <i>haven't you got a lot of compact discs!</i>	
there is and I have, arimasu for objects and imasu for living things, set phrases when entering someone's house	
04	32
bīru demo nomimashō ka? <i>shall we have a beer or something?</i>	
ordinary verbs, some new particles and more on wa , language for wining and dining	
05	44
Rondon de kaze o hikimashita <i>I caught a cold in London</i>	
past experiences, verbs of motion, time expressions, joining sentences, giving souvenirs, feminine sentence endings	
06	56
yūbe wa zuibun nonda deshō? <i>you had quite a lot last night, didn't you?</i>	
plain negative verb forms, uncertainty, probability and reason with plain forms, counting, telling the time, showing off!	

For UK order enquiries: please contact Bookpoint Ltd, 130 Milton Park, Abingdon, Oxon OX14 4SB. Telephone: +44 (0) 1235 827720. Fax: +44 (0) 1235 400454. Lines are open 09.00–18.00, Monday to Saturday, with a 24-hour message answering service. Details about our titles and how to order are available at www.teachyourself.co.uk

For USA order enquiries: please contact McGraw-Hill Customer Services, PO Box 545, Blacklick, OH 43004-0545, USA. Telephone: 1-800-722-4726. Fax: 1-614-755-5645.

For Canada order enquiries: please contact McGraw-Hill Ryerson Ltd, 300 Water St, Whitby, Ontario L1N 9B6, Canada. Telephone: 905 430 5000. Fax: 905 430 5020.

Long renowned as the authoritative source for self-guided learning – with more than 40 million copies sold worldwide – the **teach yourself** series includes over 300 titles in the fields of languages, crafts, hobbies, business, computing and education.

British Library Cataloguing in Publication Data: a catalogue record for this title is available from the British Library.

Library of Congress Catalog Card Number: on file.

First published in UK 1989 by Hodder Arnold, 338 Euston Road, London, NW1 3BH.

First published in US 1992 by Contemporary Books, a Division of the McGraw-Hill Companies, 1 Prudential Plaza, 130 East Randolph Street, Chicago, IL 60601 USA.

This edition published 2003.

Acknowledgements

We would like to thank Ms Tomoko Aoyama of the University of Queensland for her help and advice; responsibility for any mistakes, however, lies with us.

The publishers and authors would also like to thank the following for granting permission to reproduce material in this book: p. 72 Tōkyō Yomiuri Kyojin Gun; p. 93 Teito Kōsokudō Kōtsū Eidan.

You are advised to read the **Introduction** with care as it contains information that will be useful in learning the language, including an outline of how Japanese sounds are pronounced. You may find it useful to keep referring back to it as you work through the first few units.

Contents of a unit

Each unit starts with a brief description of what it contains.

Dialogues

Set in a wide variety of everyday situations, the dialogues (*kaiwa* in Japanese) form the core of each unit. They are generally divided into two or more sections, each preceded by a few sentences to set the scene. For the first four units, these sentences are in English, and after that in non-conversational Japanese. This will provide you with an opportunity to develop an understanding of this style, too, and a basis on which to go on to study written Japanese should you decide to do so.

English translations accompany the first two dialogues to ease you into the Japanese text; thereafter, only new vocabulary is given, with cross-references to explanations of new structures and language and society information.

True or false?

These serve to test your understanding of the dialogues; do not attempt them until you have a good grasp of the dialogue. If you find that your answer does not match the key, try working out where you went wrong by going over the dialogues again.

Structures

In order to get an idea of the points covered in a new unit, you may wish to read through this section first of all, but you will probably find it easier to look up structures as you are referred to them in the vocabulary boxes following the dialogues. New structures are often given in pattern form: for example, *A wa B desu* (*A is B*). An explanation will follow, telling you about things like the relationship between A and B, what kinds of words can be used in these positions, and how to form the negative of the new pattern. This approach is adopted here because of its suitability in illustrating differences in word order to Western students of Japanese. You will also see structures expressed in the form of, for instance, *[noun] o kudasai please give me [noun]*. Among other things, this is again useful for illustrating differences in word order between English and Japanese. When example sentences are very straightforward, we have not given an English equivalent.

Exercises and the Key to the exercises

The exercises (*renshū*) provide you with an opportunity to produce your own sentences on the basis of structures mastered in the unit. Checking your results against the key will help you to identify any problems in your understanding of new structures.

Language and society

The language of a people is intimately connected with its social organization and way of thinking, customs and habits; these are especially important for the understanding of a culture like that of Japan, which does not share a common heritage with the West. In this section, various pieces of information relating to the way of life of the Japanese people are given, often in combination with phrases or expressions that will be useful in such situations. Attention is also drawn to uses of language and non-verbal behaviour (body language), enabling you to grasp the meaning implicit in the ways people react in the dialogues, and acquire an insider's use of the language.

Use of this course with the recording

The recording available with the course contains pronunciation exercises, the dialogues of all units, plus some practice material. Pay particular attention to the pronunciation exercises at the

beginning, as they lay the foundation for a good pronunciation – mistakes are difficult to correct later on!

When starting a new unit, it is perhaps best if you listen to the dialogue once or twice to get a very general impression of the new material. Then you should read the explanation of what the unit contains, work out what the setting is (given in Japanese from Unit 5), and read through the vocabulary, Structures and Language and society sections before going back to the recording. Repeat this process until you have a good grasp of the new unit. Try to check your command of the new material by first speaking along with the recording, then stopping it at the relevant points to take over a dialogue part yourself.

Do not attempt the true or false questions or the recorded practice material until you have mastered the new unit. Finally check your understanding by doing the exercises.

Japanese is not a difficult language to learn, especially at the basic level. To begin with, pronunciation is easy, which makes it eminently suitable for self-study. The language is best suited to explanation based on sentence patterns or 'structures'; these are especially useful for the learner since new sentences can often be formed simply by substituting other words or expressions. This is possible because in Japanese you need not worry about making words agree in terms of distinctions between masculine/feminine or singular/plural as in languages such as French or German. New structures are listed in the vocabulary after each dialogue with a cross-reference if a further explanation is given. The following abbreviations are used:

S = Structures, LS = Language and society.

Japanese compared with European languages

Japanese is unrelated to Indo-European languages, so naturally there are a number of basic differences. It will facilitate your study of the language if you keep such differences in mind; you should therefore read the following with special care.

Word order

In English, verbs precede their objects (*I saw a man*), but in Japanese they normally follow their object, coming last in a sentence. Subjects (*I* in the English sentence above), and even objects (*man*) are often optional in Japanese, so a Japanese

sentence may consist of a verb only (*mita* can mean *I saw him/her/it* etc.). It is therefore fair to say that Japanese depends more on the context than English. Word order differences deserve special attention in the Japanese equivalents to English relative clauses and comparative sentences. Thus, *Yesterday I saw a man who had red trousers* turns out something like the following in Japanese word order: *Yesterday red trousers had man saw. He is bigger than I* usually has the order of *he than I bigger is*. Note, however, that except for the verb (which is always at the end of a sentence), Japanese word order is more flexible than English word order.

Particles

Relationships between parts of speech, which in English and other European languages are indicated by means of case endings or prepositions, are expressed in Japanese by 'particles', which are attached directly *after* the word they mark. In the structure notes this is indicated as, for instance [place] *e to* [place], which gives three pieces of information in this instance: (1) *e* is equivalent in meaning to *to*; (2) *to* comes in front of a noun in English whereas *e* is attached after the noun in Japanese; and (3) the noun used with *e* in this structure indicates a place.

Speech levels

Japanese uses different forms of verbs (and, occasionally, other words) for formal and informal levels of speech. Units 8, 16 and 18 specifically deal with this, but relevant information is given in various other places too, as this is an area that requires special attention from English speakers.

Writing system

The system of romanized script used in this book is usually called the modified Hepburn system, which is better suited for English speakers than the *kunrei* system officially used in Japan, although the differences are not great.

A few words on the nature of the Japanese writing system may be useful for the learner: Japanese is written in a mixture of Chinese characters (imported some 1,500 years ago) or *kanji*, as they are called in Japan, and *kana*, two syllabaries derived from *kanji*. Roughly speaking, *kanji* are used for those parts of the language that convey *meaning*, while *hiragana* (the cursive

variety of kana) are used for elements indicating the *functions* of words (particles, tense-endings and such like). The second, square-looking set of kana (katakana) is used in a way akin to our italics to give prominence to words. Katakana are particularly common for words of Western origin (for words of Chinese provenance, kanji are, of course, used), words depicting a sound (Japanese has a rich inventory of these – see Unit 12), and, traditionally, the texts of telegrams.

If you want to learn more about the Japanese script, look out for *Teach Yourself Beginner's Japanese Script*, which will give you a step-by-step introduction to reading and writing simple Japanese.

Pronunciation and syllable structure

The impression created by the sounds of Japanese on Western ears, often described as 'monotonous' or 'staccato', is largely caused by a combination of two factors: there is no clearly perceivable stress on sections of words or sentences, and syllables are uttered at equal length and speed. *YokoHAAma* or *SuZUUKi* are English versions of Japanese words that sound quite different in the original, which, in careful pronunciation, is more like *Yo-ko-ha-ma* and *Su-zu-ki*, without any section lengthened or stressed. (However, see p. xviii about Japanese accent.) These segments are, in fact, Japanese syllables.

Short and long syllables

Japanese differentiates between long and short syllables, and in order to make yourself understood it is vital that you distinguish these carefully in your pronunciation; all syllables in the above examples happened to be short, but this is not so, for instance, in the placenames *Tōkyō* and *Kyōto*, which may be cut up into *To-o-kyo-o* and *Kyo-o-to*. In slow, careful pronunciation a long syllable takes twice as long to pronounce as a short syllable (although at higher speeds the ratio is more like 60% longer). A short syllable in Japanese may be regarded as a basic unit of pronunciation.

Syllable structure

A Japanese syllable consists of a vowel alone (a, i, etc.), a combination of a consonant + vowel (e.g. ka, ta), or consonant + glide + vowel (kya, cha); these syllables can in principle be lengthened by doubling the short vowel. There are no syllabic

consonants, which are either used to double the consonant (other than n, m) in a non-initial syllable (to-te-mo → to-t-te-mo), or 'syllabic -n', which is used to double the consonants n and m, but also occurs at the end of another syllable or between other syllables without doubling them: sa-n, sa-n-kai (see the section on consonants below for pronunciation of syllabic -n).

The following table contains the basic Japanese syllable structure:

vowel	consonant + vowel														syllabic -n
a	ka	ga	sa	za	ra	da	na	ha	pa	ba	ma	ya	ra	wa	-n
i	ki	gi	shi	ji	chi		ni	hi	pi	bi	mi		ri		
u	ku	gu	su	zu	tsu		nu	fu	pu	bu	mu	yu	ru		
e	ke	ge	se	ze	te	de	ne	he	pe	be	me		re		
o	ko	go	so	zo	to	do	no	ho	po	bo	mo	yo	ro		
consonant + glide + vowel															
	kya	gya	sha	ja	cha		nya	hya	pya	bya	mya		rya		
	kyu	gyu	shu	ju	chu		nyu	hyu	pyu	byu	myu		ryu		
	kyo	gyo	sho	jo	cho		nyo	hyo	pyo	byo	myo		ryo		

Vowels

Japanese vowels are pure and clipped; the strong contraction of the throat that takes place at the beginning of English words starting with a vowel is almost unnoticeable in Japanese. Long vowels have the same quality as short ones; they are simply longer in duration.

Consonants

Most consonants are similar to English consonants, although k, g, s, z, t, d, p and b are all pronounced without the noticeable puff of air that accompanies the English sounds in accentuated position. Special attention is needed for the syllabic -n.

As the consonant in a consonant + vowel combination (na etc.), n causes no difficulties, however, syllabic -n requires some attention as its pronunciation changes according to the sound following it:

- Before p, b, m it is pronounced m:
an-pi (pron. ampi)
an-bai (pron. ambai)
an-ma (pron. amma)

- Before **t, ts, d, n, ch, j** it is pronounced **n** (the same sound as in *na* etc.):
antei, annai, enchō
- Before **k** and **g** it is pronounced **ng** (as in English *singer*):
ginkō, shingō
- Before all other sounds, or at the end of a word, it is pronounced as a nasal **n**. This sound is like the nasal French 'Jean', but as it constitutes a separate syllable in Japanese the preceding vowel is *not* nasalized. Before vowels and **y**, this syllabic nasal is marked by an apostrophe to distinguish it from the **n** in *na, no*, etc. Compare the following pairs:

kani	kan'i
kanō	kan'ō
kanyū	kan'yū

Syllable combinations to watch

Sound combinations that are difficult to distinguish for English speakers include the following:

- **kiya** versus **kya** etc. Whereas **ki-ya** is a combination of two syllables pronounced consecutively, **kya** is a single syllable. Pronounce the following pairs:

kiyaku	kyaku	biyōin	byōin
shiyōnin	shōnin	riyaku	ryaku
jikyūka	jūka	riyōshi	ryōshi

- **Single versus double consonants** Doubling means 'holding' the consonant for a syllable's length. Compare the following pairs:

a-ka	a-k-ka	a-na	a-n-na
Ma-sa-o	ma-s-sa-o	a-ma	a-n-ma
ma-ta	ma-t-ta	ta-ne-n	ta-n-ne-n
i-chi	i-t-chi		

Despite the spelling convention, **tch** represents simply a doubling of **ch**.

- **Single versus double vowels** Recall that a double vowel is a syllable longer. In the romanization used in this book, macrons are used over the short vowel for doubled **a** (**ā**), **o** (**ō**) and **u** (**ū**), whereas the double **e**-sound is written **ei**, and double **i**, **ii**. (In loanwords from English and other Western languages, however, **ē** and **ī** are used; **ē** is also used for the few items where **ee** occurs in Japanese spelling, such as **ē**

(yes).) Pronounce the following sets of words with long and short vowels:

asa	āsā	seki	seiki (NB pronounced sēki)
kita	kīta	koko	kōko kōkō
suki	sūki		

Whispered vowels

In Standard Japanese, which is based on the Tokyo dialect, a short **i** or **u** occurring between unvoiced consonants (**k, s, t, h, p**) becomes unvoiced too, making it scarcely audible (like a whisper), or even appearing to be totally absent:

k(i)sha	train	k(u)sa	grass
sh(i)ki	the seasons	s(u)koshi	a little
ch(i)kara	strength	ts(u)ki	moon
h(i)kōki	aeroplane	f(u)ton	futon
p(i)ttari	exactly	p(u)rin	pudding (crème caramel)

Unvoicing of the same vowels often takes place at the end of a word as well, although it is optional:

h(i)tots(u)/h(i)totsu	one
f(u)tats(u)/f(u)tatsu	two
mits(u)/mittsu	three
yotts(u)/yottsu	four
its(u)ts(u)/itsuts(u)	five
ikimas(u)	I (etc.) go.
Hādo des(u)	This is (Mr) Herd.

Foreign words

Japanese has a large stock of words that were originally introduced from China, the so-called Sino-Japanese vocabulary. Many terms associated with modern technology, such as **denwa** (telephone) and **hikōki** (aeroplane) are of Chinese coinage. The bulk of Sino-Japanese words, however, were brought to Japan long ago and may be said to play a role comparable to words derived from Latin or Classical Greek in present-day English.

For example, the difference in usage found between English words such as *to begin/to commence* or *of the night/nocturnal* has its parallels in expressions like **hajimeru/kaishi suru** and **yoru no/yakan no**, the second word being used in formal language or as a technical term.

In the wake of the impact of Western civilization on Japan, there has been an influx of words from European languages like Dutch, Portuguese and German over the past few centuries (e.g. *pan*, *bread* from Portuguese; *biru*, *beer* from Dutch, and *karute*, (*patient's*) *card* from German), but since the Second World War foreign loanwords have been taken almost exclusively from American English. It is important to make a habit of pronouncing these in the Japanese way, if communication is not to be seriously impaired. For example,

sutēki *steak* konpyūta *computer* supika *loudspeaker*

Often shortened forms are used:

biru *building* dejikame *digital camera*

Many English-type expressions are actually coined in Japan, often using truncated forms of English words in new combinations (*pansuto* 'panty stocking', i.e. *panty hose*).

Loanwords are generally adapted to Japanese syllable structure and sounds by inserting vowels between consonant clusters and after final consonants:

<i>Christmas</i>	ku-ri-su-ma-su	<i>lamp</i>	ranpu
<i>mat</i>	ma-t-to	<i>Tom</i>	Tomu

Exceptions are words or names ending in *-n* and *-ng*, which become (nasalized) *-n* in Japanese:

<i>Jane</i>	Jēn
<i>tongue</i>	tan (in food sense, used at the butcher's, in restaurants, etc.)

There are some syllables (not contained in the table) that are restricted to use in Western loanwords, such as *je* (Jēn, *Jane*) and *ti* (tī, *tea*).

Accent

The Japanese accent consists of differences in pitch, that is to say some syllables are relatively higher or lower than others. To our ears, these differences are rather slight in comparison to the quite marked stresses of English, and therefore difficult to pick up. Below are some examples of Standard Japanese accent (in dialects, you will often hear different accents for the same words):

Kyo-o	-to	Yo	-ko-ha-ma	Ni	-ho	-n	sa	-yo-o-na	-ra
-------	-----	----	-----------	----	-----	----	----	----------	-----

Particles attached to these words will be at the same level of pitch as the last syllable. Different endings attached to verbs and adjectives may bring about a change in accent (although the younger generation now tends to leave the adjacent accent on the same syllable), for example:

a-	ta-ra-shi	-i	<i>is new</i>	a-	ta ra	shi-ka-t-ta	<i>was new</i>
----	-----------	----	---------------	----	-------	-------------	----------------

The Japanese accent may be said to provide a natural sentence melody rather than distinguish items of vocabulary; failure to apply it correctly will not normally impede communication. While the higher/lower relations are almost exactly opposite between Standard Japanese and the dialects of Western Japan, this does not greatly seem to impede mutual understanding.

In this book, no accent markings are given, but many dictionaries indicate the accent of individual vocabulary items according to various systems. Although accent will differ greatly by area in Japan, do try to attempt to develop an ear for the subtle ups and downs in the speech of native speakers whenever you have the chance: this will give your Japanese the final polish.

List of people in this book

The Herd family

Tom Herd, a middle-aged British businessman in charge of the Tokyo end of a European trading company; Jill, his American wife who teaches English at a Tokyo language school; Ken, their sixteen-year-old son, attending an international school in Tokyo.

The Anzai family

Anzai-san, Tom Herd's dentist, a middle aged Japanese; his wife, currently engaged in looking after the family full-time;

Michiko-san, their sixteen year-old daughter, attending a Tokyo high school; Tarō-kun, their ten-year-old son, attending a Tokyo primary school.

Yamada-san, Tom Herd's secretary, a woman in her late twenties.

Tanaka-san, a former pupil of Jill Herd, a female company employee in her early twenties.

Suzuki-san, a senior employee of Yamanaka Māketingu, a Japanese firm based in Sendai, a middle-aged man who is a long-time business associate of Tom Herd.

(This list is given to clarify the sex, age, status and inter-relationships of the various characters in the book, since this affects the sort of Japanese which they use to each other.)

LS Language and society

S Structures

lit. literally

this is my wife
kanai desu

In this unit you will learn

- how to form some basic Japanese sentences
- how to introduce and address people
- how to identify things
- how to ask simple questions
- how to talk about countries, nationality, etc.

Dialogues

Tom Herd and his wife have gone into a Tokyo coffee shop. Tom thinks he recognizes someone sitting at a table reading a newspaper.

- Tom** Shitsurei desu ga ...
Anzai A, Hādo-san! Sh baraku desu ne.
Tom (to Anzai) Sensei (gestures in Jill's direction) -- kanai desu.
Jill Jiru to mōshimasu. Hajimete o-me ni kakarimasu.
Anzai Anzai desu. Hajimemashite.
Tom Anzai-sensei wa boku no ha-isha-san desu.
Jill Dōzo yoroshiku
- Tom** Excuse me, but ...
Anzai Well, Herd-san! It's been some time since we've met.
Tom Sensei -- my wife.
Jill My name is Jill. How do you do.
Anzai I'm Anzai. How do you do.
Tom Anzai-sensei is my dentist.
Jill Pleased to meet you.

a/ā well, eh!	[noun] wa • S1
[name]-san form of address	shibaraku desu ne • Unit 2 LS2
• LS2	boku / boku no [noun] my
sensei (here) form of address	[noun] (used by men only)
• LS2	[noun] no [noun] • S6
kanai (my) wife • LS2	ha-isha dentist (ha tooth + isha
desu is • S1	doctor)
Jiru to mōshimasu. Hajimete	dōzo yoroshiku • LS1
o-me ni kakarimasu./	
Hajimemashite. • LS1	

Tom and Jill join Anzai-sensei, and they talk a little.

- Tom** Kanai wa Eigo no sensei desu
Anzai Ā, sō desu ka. Hādo-san wa Igrisujin desu ne. Okusan mo Igrisujin desu ka?
Tom Iie, Igrisujin de wa arimasen. Amerikajin desu.
Tom My wife is a teacher of English/English teacher
Anzai Oh, is that so? You're (a) British (person) aren't you, Herd-san? Is your wife British too?
Tom No, she isn't British. She's (an) American.

東京

Tō kyō

Eigo English (language) • LS4
 sensei teacher
 sō desu that is so
 [sentence] ka? • S2
 Igrisujin British (person)
 [sentence] ne • S3

okusan (your/his) wife
 [noun] mo • S4
 iie/ie no
 de wa arimasen negative of
 Amerikajin American (person)

True or false?

- 1 Anzai-sensei wa Tomu-san no ha-isha desu.
- 2 Jiru san wa Eigo no sensei de wa arimasen.
- 3 Jiru-san wa Igrisujin desu.

▶ They all get up to go, leaving the newspaper on the table. Tom notices an umbrella on the floor and picks it up.

- Tom** (to Anzai) Kore wa sensei no kasa desu ka?
Anzai Hai, watashi no desu. Dōmo.
Jill Shinbun mo sensei no desu ka?
Anzai Iie, sore wa watashi no de wa arimasen.
Tom Isn't this your umbrella?
Anzai Yes, it's mine. Thanks.
Jill Is the newspaper yours too?
Anzai No, that's not mine.

kore this • S5	dōmo thanks
kasa umbrella	shinbun newspaper
hai yes	sore that (by you)
watashi I; watashi no [noun]	
my [noun] (used by both	
men and women)	

▶ Tom and Jill then take Anzai-sensei to a special fair of imported goods which Tom has helped to organize at a nearby exhibition centre.

- Anzai** Sore wa doko no chizu desu ka?

nan?	what?		something)
Igrisū	Britain		

True or false?

- 4 Anzai-sensei no shinbun desu ka? Hai, sō desu.
 5 Doko no chizu desu ka? Amerika no chizu desu.
 6 Nan no jamu desu ka? Ichigo no jamu desu.

Structures

1 A wa B desu A is B

は

the particle wa

Things or persons are identified in Japanese by using this pattern, which means *A is B*. The particle *wa* marks the thing or person (A) which is identified by means of B; *desu* (is) then completes the sentence.

Kore	wa	kasa	desu.	This is an umbrella.
Watashi	wa	Igrisujin	desu.	I am British.
Sensei	wa	Amerikajin	desu.	The teacher is (an) American.

The negative equivalent of this pattern is formed by replacing *desu* with *de wa arimasen*. Alternative forms are *ja arimasen*, *de wa nai desu*, and *ja nai desu*. All are commonly used and you should be able to recognize them.

Kore	wa	kasa	de wa arimasen.	This is not an umbrella.
Watashi	wa	Amerikajin	de wa arimasen.	I am not (an) American.

When [A] *wa* is understood, it is frequently omitted to avoid unnecessary repetition. For example, see the following sequence of sentences, both statements about A, with *watashi wa* omitted in the second sentence:

Watashi wa Amerikajin de I am not (an) American.
 wa arimasen. Igrisujin desu. I am British.

2 The question particle ka?: A wa B desu ka?

A statement of the type seen in 1 can be made into a question by attaching *ka?* to the end of the sentence. In speech, questions are normally accompanied by rising intonation similar to that used in an English question. (Note that no change in word order is necessary in Japanese, unlike English.)

Sensei wa Amerikajin desu. The teacher is (an) American.
 Sensei wa Amerikajin desu ka? Is the teacher (an) American?

This type of question is often called a 'yes/no question', as it calls for an answer beginning with *yes* (*hai*) or *no* (*ie*).

Hai, (sensei wa) Amerikajin desu.
 Ie, (sensei wa) Amerikajin de wa arimasen.

か

[A] *wa* will again be omitted in an answer.

the particle ka

3 The sentence-final particles yo and ne

Both of these are attached to the end of sentences to provide emphasis. *Yo* is used to alert the listener to the situation indicated by the sentence to which *yo* is attached, very much like an exclamation mark in English (the intonation in Japanese can be either rising, as in a question, for weak emphasis, or falling, but not as much as in English, for stronger emphasis):

Watashi desu yo.	<i>It's me!</i>
Kore wa jamu desu yo.	<i>This is jam!</i>
Sō ja arimasen yo.	<i>Oh no (that's not so)!</i>

Ne is used to solicit agreement from the listener, rather like *isn't it* in English (intonation can be slightly rising, or falling, especially in its lengthened form *nē*).

Kore desu ne.	<i>You mean (it is) this (one), don't you?</i>
Okusan wa Igrisujin de wa arimasen ne.	<i>Your wife isn't British, is she?</i>

4 The particle *mo*: A wa B desu. C mo B desu

Consider once again our basic pattern:

Yamada san wa	sensei	desu.	Mr Yamada is the teacher
---------------	--------	-------	--------------------------

If you want to go on to substitute another person, C, for A, *wa* is replaced by *mo* (*too, also*). You can make this statement into a question by adding *ka?*.

Watashi mo	sensei	desu.	<i>I am a teacher, too.</i>
Okusan mo	sensei	desu ka?	<i>Is your wife also a teacher?</i>

The answer to the question could be the following:

Hai, (kanai mo) sensei desu.
Iie, kanai wa sensei de wa arimasen.

Note that with the answer Yes, the repeated [A] *mo* is optional; when the answer is No, [A] *mo* cannot be used and it is usual to give [A] *wa*.

5 Words used to point at things (or sometimes persons)

Where we use the words *this* or *that* in English, Japanese has three words – *kore*, *sore* and *are*:

Kore for items closer to the speaker than the listener: *this*
Sore for items closer to the listener than the speaker: *that*
Are for items at a distance from both: *that over there*

Thus, if you enquire about an item that is on the salesperson's side of the sales counter you would ask:

Sore wa nan desu ka? *What is that? (lit. That is what?)*

If the salesperson wants to confirm which item you referred to by *sore*, he might sometimes point at it (or pick it up) and ask back:

Kore desu ka? *(You mean) this one?*

6 Combining nouns with *no*: A wa X no B desu

No can be used to extend our basic pattern A wa B desu. Compare the followings pairs of sentences.

Kore wa	Igrisu no	jamu desu.	<i>This is jam.</i>
Kore wa		jamu desu.	<i>This is British jam.</i>
Kanai wa		sensei desu.	<i>My wife is a teacher.</i>
Kanai wa	Eigo no	sensei desu.	<i>My wife is an English teacher.</i>
Kore wa		kasa desu.	<i>This is an umbrella.</i>
Kore wa	watashi no	kasa desu.	<i>This is my umbrella.</i>

In the second sentence of each pair, the noun (X) before *no* is providing further information about the noun after *no*. *No* can join any two nouns, leading to various English equivalents depending on the types of nouns involved:

a Where X stands for a person, *no* will indicate either ownership, if B is a thing, or, if B is a person too, it will indicate a personal relationship between X and B:

Watashi no Rōrusu-roisu	<i>My Rolls-Royce</i>
Tomu-san no sensei	<i>Tom's teacher</i>

(It might help you to get used to the word order if you think of *no* as equivalent to 's in English, though its use is much wider.)

b If the first noun is a place noun, it shows the place of origin of the second noun:

Furansu no jamu	<i>French jam</i>
Igrisu no kasa	<i>An English umbrella</i>

c If X is any other type of noun, it will describe the contents or make-up of B where B is a thing, or B's area of specialization where it is a person:

Nihongo no shinbun	<i>A Japanese newspaper</i>
Ichigo no jamu	<i>Strawberry jam</i>
Eigo no sensei	<i>A teacher of English</i>

The difference between a, b and c becomes clearer when A wa X no B desu type sentences become information-seeking questions. The place of X is taken by the questions words *dare?* (*who?*), *doko?* (*where?*), and *nan?* (*what?*), becoming respectively *dare no?* (*of who, whose*), *doko no?* (*from where, where from*), *nan no?* (*of what*).

- a Kore wa dare no kasa desu ka?
Whose umbrella is this?
- b Kore wa doko no jamu desu ka?
Where is this jam from? (lit. This is jam from where?)
- c Yamada-sensei wa nan no sensei desu ka?
What does Mr Yamada teach? (lit. What is Mr Yamada a teacher of?)

In the case of a and b only, and where the second noun (B) is *not* a person, B is commonly abbreviated where understood:

<i>Talking about cheese:</i>	Kore wa Furansu no desu.
<i>Talking about umbrellas.</i>	Sore wa watashi no de wa arimasen.

Exercises

You will need to read through the Language and society section before working through exercises 1, 2, 3 and 5.

Here is a list of some of the teachers employed at the language school where Jill Herd works, giving their names and countries of origin:

Michel Barre	France	Helmut Gläser	Germany
Jill Herd	America	Carla Santos	Spain
Lucia Verde	Italy	Má Xun	China

1 Using this list as a basis, complete the following to produce sentences giving the nationality of each teacher.

Example (rei): Hâdo-san wa Amerikajin desu.

- a Baru san
- b Gurêza-san
- c Santosu-san
- d Berude-san
- e Ma san

2 Again using the list, produce sentences in a similar order giving what each person teaches. (Assume that they all teach their respective native languages.)

Example: Hâdo-san wa Eigo no sensei desu.

3 Here are some more of the teachers:

John Brown	Australia	Pablo Torres	Mexico
Karl Schmidt	Austria		

Produce pairs of sentences similar to the following examples, using first *wa*, and then *mo*.

Example: Yamada-san wa Nihongo no sensei desu.
Tanaka-san mo Ninongo no sensei desu.

- a Hâdo-san
- b Gurêza-san
- c Santosu-san

4 At the trade fair there are also the following items: German cameras, Italian handbags, British umbrellas, and strawberry ice-cream. Complete Anzai sensei's questions and Jill's replies.

- Anzai Sore wa (a) _____ no kamera desu ka?
Jill (b) _____ desu ka? (c) _____ no desu
Anzai Are wa Iginisu (d) _____ handobaggu desu ka?
Jill Iie, (e) _____ wa Iginisu (f) _____ handobaggu (g) _____ Italia no (h) _____
Anzai Kasa (i) _____ Italia no desu ka?
Jill Iie, kasa wa Iginisu. (j) _____ desu.
Anzai Sore wa (k) _____ no aisukurimu desu ka?
Jill (l) _____ aisukurimu desu.

5 Give the Japanese equivalent for this conversation.

Tom	This is my French teacher.
Michel	My name is Barre. How do you do.
Tanaka	I'm Tanaka. How do you do.
Tom	Mr Tanaka is a German teacher
Michel	Pleased to meet you.

Language and society

1 Introducing people

As you will have noticed from the conversation passage, the (A wa) B desu pattern is used for introductions:

Kanai desu. *This is my wife.*

This may be preceded by the name of the person to whom B is being introduced, just as we say in English: *Tom – meet my wife.*

Tomu-san – kanai desu.

In reply, the set phrase *hajimemashite* (or its more formal equivalent *hajimete o-me ni kakarimasu*, both literally meaning *I meet you for the first time*) is used by the person introduced, normally after repeating his/her own name.

Jiru desu. Hajimemashite. *I am Jill. How do you do.*
 Jiru to mōshimasu. Hajimete *My name is Jill.*
 o-me ni kakarimasu. *How do you do.*

The phrase *dōzo yoroshiku* can be used after *hajimemashite* etc., or in its place; it may also be used to reply to the introduction.

The above expressions are accompanied by bows (where Westerners are involved, often handshakes *and* bows). Between professional people of any kind, an exchange of namecards (*meishi*), which are again tendered with a bow, is extremely common; such people are advised to have namecards made, preferably with a Japanese version of their name and position on one side and the English on the other.

2 Forms of address and reference

The Japanese equivalent of *Mr/Mrs/Ms/Miss* is *-san*; this is always attached to someone's name (surname or given), it cannot be used on its own. Neither can *-san* be used with one's own name or in reference to members of one's family.

Teachers, medical doctors and MPs are customarily addressed and referred to by *-sensei* (*teacher*) attached to their surname (teachers of any kind enjoy a very high social status!). *Sensei* can also be used on its own to address persons of the above description in the sense of *you*:

Kore wa sensei no kasa desu ka? *Is this your umbrella?*

You has no direct equivalent in Japanese; instead a variety of words are used, depending on the relative status levels and degree of intimacy of those involved. The problem of which word to use can, however, be avoided by using [name]-*san* and [name]-*sensei* in situations where one has to express the idea of *you* as in the sentence above, and otherwise, by quite legitimately abbreviating that part (A *wa*) of the sentence:

Hādo-san desu ka? *Are you Mr Herd?*

Okusan is another word that can be used for both address and reference. Depending on who is being addressed (the wife herself or her husband), the following sentences can have two meanings:

Okusan wa sensei desu ka? *Are you a teacher?!*
Is your wife a teacher?

As a question about a third person it could also mean *Is his wife a teacher?*

Okusan clearly incorporates *-san*. Just as *-san* cannot be used to refer to members of one's family, so *okusan* cannot be used by a husband with reference to his own wife. *Kanai* is used only when talking about one's own wife, although it, too, would not be used by a husband when addressing his own wife directly. For this purpose he would use his wife's given name (often without *-san*), *omae* (*you there*), or perhaps *kimi* (*intimate you*), while wives generally call their husbands *anata* (*you*).

In Japanese, given names are used much less than in English; instead, surnames are used, normally with *-san* attached (except when referring to a member of one's family or group, when the surname is used on its own: wives sometimes refer to their husband as *Anzai*, etc.). On the other hand, you will note a tendency to use the given name of foreigners rather than their surnames.

Male friends use *-kun* to address/refer to each other rather than *-san*; *-kun* is also used in the case of boys, and when men address or refer to men junior to them. Junior members of a family are generally addressed/referred to by their given name (*Tāro* etc.), sometimes with the diminutive *-chan* attached.

3 Countries, peoples and languages

If you add *-jin* (*person*) to the name of any country, you get the name for a person from that country; if you add *-go* (*word/ language*), you get the name for its language (note exceptions such as *Australia*, where the language is obviously English; incidentally, *Australian* English would be called *Ōsutoraria-Eigo*).

<i>Australia</i>	Ōsutoraria	Ōsutorariajin	Eigo
<i>China</i>	Chūgoku	Chūgokujin	Chūgokugo
<i>France</i>	Furansu	Furansujin	Furansugo
<i>Germany</i>	Doitsu	Doitsujin	Doitsugo
<i>Italy</i>	Itaria	Itariajin	Itariago
<i>Spain</i>	Supein	Supemjin	Supeingo

Note especially the following:

<i>Britain</i>	Igirisu/ Eikoku	Igirisujin/Eikokujin	Eigo
<i>Japan</i>	Nihon/ Nippon	Nihonjin/Nipponjin	Nihongo/Nippongo

Lastly, for foreign countries, foreigners and their languages in general:

gaikoku

gaikokujin/gaijin

gaikokugo

02

resutoran wa
tōi desu ka?
is the restaurant far?

In this unit you will learn

- how to ask and answer questions about where things are
- how to use adjectives in Japanese
- how to use everyday greetings

▶ Dialogues

Jill has been invited out to lunch by Tanaka-san, a friend who is also an ex-pupil. They meet as arranged.

- Jill Tanaka-san, konnichi wa. O-genki desu ka?
 Tanaka Hai, o-kage-sama de Sensei wa?
 Jill Totemo genki desu. Demo, Nihon no natsu wa atsui desu ne.
 Jill Tanaka-san, hello. Are you well?/How are you?
 Tanaka Yes, thanks for asking/I'm fine, thank you. And you, sensei?
 Jill I'm very well. But aren't Japanese summers hot?

konnichi wa	hello/good day	totemo	very • S2
• LS2		demo	but, however (at the beginning of a sentence)
genki na	healthy, well • S1, 2	natsu	summer
o-genki desu ka?	• LS1	atsu.i	hot • S1, 2
o-kage-sama de	thanks for asking		

▶ As they set off in the direction of the restaurant, Jill begins to feel very hungry.

- Jill Resutoran wa tōi desu ka?
 Tanaka Iie, ano takai biru no tonari desu.
 Jill (rather unenthusiastically) Furansu ryōri desu ka?
 Tanaka E ... Jā, Nihon ryōri wa ikaga desu ka? Asoko wa totemo oishii Nihon-ryōriya desu.
 Jill Is the restaurant far?
 Tanaka No, it's next to that high building
 Jill Is it French cuisine/a French restaurant?
 Tanaka Yes ... Well then, how about Japanese cuisine? Over there is a very good Japanese restaurant.

resutoran	restaurant	ryōri	cooking, cuisine
(specializing in Western style food)		ē	yes (less formal than hai)
tō.i	far	ja/jā/de wa, ...	(at the beginning of a sentence) well then/ if that's so,
ano [noun]	that [noun] (over there) • S3	ikaga?	how?
taka.i	high	[noun] wa ikaga desu ka?	
biru	building		How about/Would you like [noun]?
[noun] no tonari	next to, neighbouring [noun] • S5		

asoko over there/that place (over there) • S4
 o shi.i delicious; good (of restaurants, etc.)

[noun]-ya shop etc. dealing professionally in [noun] • LS3
 ryōriya eating place, restaurant

True or false?

- 1 Tanaka-san wa genki desu.
- 2 Ano Nihon-ryōriya wa oishii desu.

▶ Jill and Tanaka-san have decided on the Japanese restaurant and are now eating. Suddenly, Jill's face takes on a strange expression.

- Tanaka Sensei – daijōbu desu ka?
 Jill Kono hen na mono wa nan desu ka?
 Tanaka Tako desu. Ikaga desu ka?
 Jill Tako! Amari oishiku arimasen ne. ... (in a low voice)
 O-tearai wa doko desu ka?
 Tanaka Sugu soko desu.
 Tanaka Sensei – are you all right?
 Jill What's this strange thing?
 Tanaka It's octopus. How is it?/How do you like it?
 Jill Octopus! It's not very tasty, is it? Where is the ladies' toilet?
 Tanaka It's just there

daijōbu na	all right	amari [negative]	[not] very • S2
kono [noun]	this [noun]	o-tearai	toilet • LS4
hen na	strange	sugu	immediately/just
mono	thing	soko	there/that place (by you,
tako	octopus		

True or false?

- 3 Jiru-san wa daijōbu de wa arimasen.
- 4 Tako wa oishii desu.

おいしい
 o i shi i

Structures

1 A wa [adjective] B desu A is [adjective] B

As in English, adjectives can go either before or after the noun they are describing. First we will look at adjectives before nouns.

Kore wa oishii chizu desu.
Sore wa hen na tabemono
desu.

*This is delicious cheese.
That is strange food.*

There are two types of adjective in Japanese, one which ends in -i before nouns, and one which ends in na before nouns. We will call these i and na adjectives, and they will be identified in vocabulary lists as in the following examples:

-i adjective: atsu.i na adjective: genki na

Other common -i adjectives include:

atataka.i	warm
samu.i	(atmospheric) cold
tsumeta.i	cold (to the touch, or emotionally)
ōki.i	big
chiisa.i	small (used for young, i.e. small, children)
waka.i	young (teenagers, adults)
atarashi.i	new
furu.i	old (opposite of atarashii, not of wakai)
ii	good, all right
waru.i	bad
haya.i	quick, early
oso.i	slow, late

Many na adjectives are of foreign, primarily Chinese, origin. Common ones include:

benri na	convenient, useful
shizuka na	quiet, peaceful
shunsetsu na	kind
yūmei na	famous
kirei na	pretty, clean, neat
taisetsu na	important
taihen na	serious, awful
hansamu na	handsome

Na adjectives taken from Western languages such as English and French are often used to enhance the vocabulary of the advertising copy-writer:

ereganto na resutoran
shikku na burauzu

*an elegant restaurant
a chic blouse*

2 A wa [adjective] desu A is [adjective]

Note what happens to each type of adjective when it comes at the end of a sentence in normal polite speech:

Tanaka-san wa wakai desu. *Tanaka-san is young.*
Suzuki-san wa hansamu desu. *Suzuki-san is handsome.*

While the i- adjective remains exactly the same, the na adjective drops na before desu.

The two types of adjective also behave differently when forming the negative:

n -i adjectives. To turn an -i adjective into the negative, for example in order to say that British summers are not hot, you have to actually change its form:

Nihon no natsu wa atsu.i desu. *Japanese summers are hot.*
Igirisu no natsu wa atsu ku arimasen. *British summers are not hot.*
O.shi.i desu ka? *Is it tasty?/Does it taste good?*
Iie, oishi ku arimasen. *No, it isn't/doesn't.*

-i desu is replaced by -ku arimasen, or alternatively -kunai desu:

Igirisu no natsu wa atsu.i kunai desu.
Oishi.i kunai desu.

There is only one exception to this. ii desu becomes:

yo ku arimasen.
yo kunai desu.

n na adjectives. To turn a na adjective into the negative, for example in order to say that Yamada-san is not pretty, all you need to do is put desu itself into the negative:

Tanaka-san wa kirei desu
Yamada san wa kirei de wa arimasen/ja arimasen.

NOTE: i Before nouns, two -i adjectives, ōkii and chiisai, commonly have alternative na forms – ōki na and chiisa na i.e. you can say either ōkii resutoran or ōki na resutoran; chiisai o-tearai or chiisa na o-tearai.

ii Totemo, and the less colloquial taihen (here acting as an adverb not as a na adjective), can both precede a positive adjective to mean very:

Igirisu no jamu wa totemo
oishii desu.
Jiru-san wa taihen shinsetsu
na sensei desu.

British jam is very tasty.
Jill is a very kind teacher.

When an adjective is in the negative, however, amari must be used:

Fukuda sensei wa amari
wakaku arimasen.
Kore wa amari benri de wa
arimasen.

*Fukuda sensei is not
very young.*
This is not very useful.

3 Words to indicate which thing/person: **kono, sono, ano**

While kore, sore and are always stand by themselves, kono, sono and ano have a similar meaning, but are always in front of nouns: kono jamu (*this jam*); sono Rōrusu-roisu (*that Rolls-Royce, by you*); ano sensei (*that teacher, over there*); ano hito (*that person [hito], over there; he/she*).

Kono jamu wa taihen yūmei desu.
Ano shinbun wa dare no desu ka?

4 Indicating place: **koko, soko, asoko**

These words are parallel in meaning to kore, sore and are:

koko for places closer to the speaker than the listener:
here/this place
soko for places closer to the listener than the speaker:
there/that place
asoko for places at a distance from both:
over there/that place over there

To ask questions, doko?, meaning *where?/what place?*, is used. With the help of these and other place words, we can extend our basic A wa B desu pattern to indicate where A is. For example:

Hoteru wa koko de wa arimasen.	<i>The hotel (hoteru) is not here.</i>
Fukuda sensei wa doko desu ka?	<i>Where is Fukuda-sensei?</i>
(Fukuda-sensei wa) resutoran desu.	<i>He is in the restaurant.</i>
Jiru-san mo soko desu ka?	<i>Is Jill there too?</i>

(NOTE: Here soko refers to the place associated with/mentioned by the listener rather than physically closer to him/her. This is another function of the so- words.)

Similarly, we can indicate where B is:

Asoko wa yūmei na resutoran desu.	<i>Over there is a famous restaurant.</i>
--------------------------------------	-----------------------------------------------

If you are not sure where you are, you might ask:

Koko wa doko desu ka?	<i>Where is here?/Where are we?</i>
-----------------------	-----------------------------------------

There is another series of words referring to place which you will hear. These are kochira, sochira, achira, and dochira?. They act either as a more formal equivalent of koko etc., or to mean *this way/in this direction*, etc., according to context:

O-tearai wa kochira desu.	<i>The toilet is here/this way.</i>
---------------------------	-------------------------------------

They can also be used to address or refer to people politely:

Dochira-sama desu ka?	<i>Who is this? (on the telephone)</i>
Kochira wa Kimura-san desu.	<i>This is Kimura-san.</i>

(For another use of -sama with people, see Unit 16 Language and Society 1.)

5 Words to indicate position: **tonari** etc.

In Japanese, these words act as nouns. Where in English we would say *next to X*, in Japanese you say *X no tonari*. Other common position words are:

ch kaku	<i>nearby</i>
mae	<i>in front</i>
naka	<i>inside</i>
ushiro	<i>back, behind</i> (i.e. behind buildings, people, etc., rather than in front of them)
ura	<i>reverse/other side, behind</i> (i.e. behind in sense of rear side, of buildings, etc. but not of people)
ue	<i>on top, above</i>
shita	<i>underneath</i>

Resutoran wa kissaten no chikaku desu.	<i>The restaurant is near the coffee shop (kissaten).</i>
Jiru-san wa Tomu-san no ushiro desu.	<i>Jill is behind Tom.</i>
Jiru-san wa kissaten no ushiro/ura desu.	<i>Jill is behind/at the back of the coffee shop.</i>

Note that *next to this/that thing*, etc. is *kono/sono tonari*, etc., not *kore no/sore no tonari*, for example:

Shinbun wa ano zasshi no
shita desu.
Shinbun wa ano shita desu.

*The newspaper is under
that magazine.
The newspaper is under
that thing over there/under
there.*

Exercises

1 Complete the following sentences by filling in the blanks from the choices you are given in the box below.

- a _____ kissaten wa _____.
b Tanaka-san wa _____ Nihonjin desu.
c _____ wa _____ kasa desu.
d _____ wa _____ na hoteru desu.
e _____ no sensei wa taihen _____.

A taihen atarashii B yūmei C kono D kirei E ano Igrishujin
F sore G shinsetsu desu H asoko I ōkii desu J wakai

2 Use the words given to make short conversations as in the example, replying positively first, and then negatively. Do this with a friend if possible.

Example: Asoko, oishii, resutoran. → Asoko wa oishii
resutoran desu ka?
Hai, taihen oishu desu.
Iie, amari oishiku
arimasen.

- a Sore, shizuka na, hoteru.
b Are, furui, Rōrusu-roisu.
c Koko, yūmei na, kissaten.
d Kore, atatakai, sūpu (soup).
e Sore, hayai, kuruma (car).

車

kuruma

3 You are in a bad mood. Complain about the following, using the negative forms of adjectives.

Example: the jam you are eating → Kono jamu wa oishikunai desu.

- a the cool beer (biru) you have ordered
b the handsome Frenchman you had a blind date with

- c the automatic umbrella which takes an hour to open
d the restaurant with the over-enthusiastic jazz band
e the coffee shop with the dirty tablecloths

4 Practise the position words by explaining the location of objects in your room, and of shops, etc. in your local shopping centre.

Example: Jamu wa tēburu no ue desu. *The jam is on the table (teburu).*

If possible, do this in question and answer form with a friend:

Example: Kissaten wa doko desu ka? *Where is the coffee shop?*

Indo-ryōriya no tonari desu. *(It's) next to the Indian restaurant.*

You will find some relevant vocabulary in Language and Society 3. Other words which might come in useful are *enpitsu* (pencil), *todana* (cupboard), *yubinkyoku* (post office).

5 Give the Japanese equivalent for this conversation.

Tom Where is the hotel?
Suzuki It's that way.
Tom Is it far?
Suzuki No, it's not very far. It's near the station (eki).
Tom Is it a famous hotel?
Suzuki Yes, it's very famous.

駅

eki

Language and society

1 The use of o- in front of words

This makes a word polite, and will generally be found in front of certain words, such as those for traditional items of food and drink, or for things which were traditionally regarded as unclean, such as money:

o-tearai	toilet
o-kane	money
o-sake	sake/alcobol

Women tend to use o- in this way more than men, particularly if they want to emphasize their femininity:

o-niku	meat
o-sakana	fish

In polite speech, *o-* is also found in front of a wider range of words to indicate that they are connected to the person being spoken to, or (more rarely) to some third person of high status:

<i>o-namae</i>	<i>your name</i>
<i>o-shigoto</i>	<i>your work, business</i>
<i>o-tegami</i>	<i>the letter (you wrote, or which I am going to write to you)</i>
<i>o-hanashi</i>	<i>the talk (which you gave)/the conversation (I had with you)</i>

Similarly, note that *o-* is only used in the following exchange to refer to the health of the person being spoken to, not to the speaker's health:

<i>O-genki desu ka?</i>	<i>Are you well?/How are you?</i>
<i>Hai, genki desu.</i>	<i>Yes, I'm fine.</i>

With some words you will find *go-* used instead, with the same effect:

<i>go-shujin</i>	<i>your husband</i>
<i>go-hon</i>	<i>your book</i>
<i>go-jūsho</i>	<i>your address</i>

hon

This *go-* is also the first syllable of *gohan*, the word used for both a meal and for rice in its cooked state, as opposed to *o-kome*, the uncooked state in which you actually buy it.

2 Everyday greetings

The greetings in this section are normally used by acquaintances on meeting.

<i>Ohayō gozaimasu.</i>	<i>Good morning.</i>
-------------------------	----------------------

This is used by people when they meet for the first time in the morning, at home, on the way to work, or as the working day begins.

Bar hostesses will therefore use it to greet each other as they come to work in the evening.

<i>Konnichi wa</i>	<i>Good day (used from mid morning and during the afternoon)</i>
<i>Konban wa</i>	<i>Good evening (used after it begins to grow dark) (konban this evening, tonight)</i>

If it is some time since you last met, you may add *Shibaraku desu ne* or the more feminine *o-hisashiburi desu ne*, with the meaning *It's a long time since we met*, as occurs in the *kaiwa* in Unit 1.

3 The use of *-ya* after nouns

This usually indicates the shop where the noun is sold, or the person who sells it:

<i>niku</i>	<i>ya</i>	<i>butcher's shop/butcher's</i>
<i>sakana</i>	<i>ya</i>	<i>fishmonger's shop/fishmonger</i>
<i>saka</i>	<i>ya</i>	<i>wine shop/wine merchant (note the change in the final vowel of sake)</i>

Ryōriya (*restaurant*), formed using *ryori* (*cooking*), is slightly different from this basic pattern (as is, for example, *sushiya*, a restaurant specializing in *sushi*). Note that *ryoriya* is the word used when you want to specify that an establishment produces a particular national cuisine:

<i>Nihon ryōriya</i>
<i>Indo-ryōriya</i>
<i>Furansu-ryōriya</i>

Also note that there are exceptions, such as *kissaten*.

4 Words for 'toilet'

As in other languages, there are several words for this in Japanese, of varying degrees of delicacy. *Benjo* would only be used by men and is nowadays regarded as a rather unrefined term, having been replaced by *toire*. Women would probably use either *o-toire* or *o-tearai*. It is not unusual for public lavatories to lack both paper and hand-drying facilities, but you can buy small packets of tissues (*tisshu*), and may well be given them, by your bank for instance.

03

shī dī ga takusan
arimasu ne
haven't you got a lot of compact
discs!

In this unit you will learn

- two similar patterns to express the idea of *there is* and *I have*
- the verb *arimasu* for objects and *imasu* for living things
- set phrases used when entering someone's house

Dialogues

Michiko-san has met Ken at the station.
They are now on their way to her house.

家

16

- Ken Daibu arimasu ka?
Michiko Iie, sugu desu. Asoko ni tabakoya ga arimasu ne? Sono ura desu yo. (After turning two corners) Are ga watashi-tachi no ie desu.
Ken Rippa na ie desu ne.
Michiko Iie, tonde mo nai.

The two enter the entrance hall (genkan).

- Michiko Tadaima!
Okusan O-kaeri nasai! (Mrs Anzai comes to the entrance hall)
Michiko Okāsan, kochira wa Ken-san desu
Okusan Hajimemashite. Yoku irasshaimashita.
Ken Ken desu. Yoroshiku.
Okusan Dōzo, o-agari kudasai
Ken O-jama shimasu.

daibu a great deal

 petto pet
 hoka ni apart from this,
 in addition
 imasu = arimasu there is (but
 used with living things only)
 • S1, 2, 3

True or false?

- 3 Michiko-san no ototo-san wa ima uchi ni imasen.
 4 Michiko-san wa petto ga takusan imasu.

IC

the particle ni

Structures

1 Indicating location with A wa B ni arimasu/

In Unit 2 we saw that A wa B desu, where B is a place, tells you the whereabouts of A. Desu identifies A with the place indicated by B, in the same way that it identifies two things or two persons when B is not a place.

For indicating location, there is an alternative pattern, involving the verb arimasu. Used with ni (at/in/on), it has the meaning of to be at/in/on. Compare the following pairs of sentences:

Honya wa soko	desu.	(lit. The bookshop is that place)
	ni arimasu.	(lit. The bookshop is located in that place) The bookshop is there.

Watashi no heya wa nikai	desu.	(lit. My room is first floor)
	ni arimasu.	(lit. My room is located on the first floor) My room is on the first floor.

Notice that only a literal translation can capture the difference between the two versions; an idiomatic English translation will often be the same.

When A is inanimate (a thing or plant), arimasu is used, while imasu is normally used instead of arimasu if A is animate (a person, animal or insect):

Ototo wa nikai ni imasu.	My brother is upstairs.
Inu wa niwa ni imasu.	The dog is in the garden.

2 Indicating location with B ni A ga arimasu

It is possible to have the location (B ni) at the beginning of the sentence; in this case, A wa is changed to A ga, as A wa tends to be confined to the beginning of a sentence, whereas A ga has no such restriction. Compare the following pairs of sentences:

Tabakoya wa asoko ni arimasu.	The tobacco shop is over there.
Asoko ni tabakoya ga arimasu.	Over there is a tobacco shop.
Inu wa niwa ni imasu.	The dog is in the garden.
Niwa ni inu ga imasu.	There is a dog in the garden.

As can be gleaned from the differences in the translations (thela), wa is attached to an A that is already known or understood (either in the form of common knowledge, or because it has been mentioned earlier on in the conversation), whereas ga is attached to an A that the speaker notices for the first time. (For A ga B desu, see Unit 10 Structures 4a.)

Where the situation implies a contrast between two different As, then *wa* in *A wa B ni arimasu/imasu* can additionally signal the notion of contrast, even if only one A is actually mentioned. (See also Unit 10 Structures 4b.)

Inu wa niwa ni imasu.
Neko wa ie ni imasu.
Inu wa niwa ni imasu.

*The dog is in the garden,
the cat is in the house.
The dog is in the garden
(wherever the cat may be).*

3 Existence/possession with *B (ni) wa A ga arimasu/B (ni) wa A ga imasu*

These patterns literally mean *as far as B is concerned, there is an A*, or *B has an A*.

When B is a person, possession or ownership is indicated (note that all the elements except *arimasu* can be omitted):

	Shi dī ga	Takusan takusan	arimasu. (I) have (some). arimasu. (I) have a lot. arimasu. There are many CDs/(I) have many CDs.
Watashi wa	shi dī ga	takusan	arimasu. I have many CDs.
	O-kane ga	amari	arimasen. (I) don't have much money.
Ototo wa		takusan	arimasu. (My) brother has lots.

When A is a person too, the idea of *having* friends (*tomodachi*), relatives, etc. is expressed. Notice that *arimasu* can be used as well as *imasu*, even though B is animate. *Ni wa* can be used instead of *wa*.

Watashi (ni) wa	tomodachi ga	takusan	arimasu. (I) have many friends.
Watashi (ni) wa	tomodachi ga	amari	arimasen. I don't have many friends.
Watashi (ni) wa	otōto ga		imasu. I have a younger brother.

B will not always be a person; it could be a place, as in the following example:

Kono hoteru wa tenisu-kōto
ga arimasu ka?

*Does this hotel have a
tennis court?*

4 A kind of plural: *[noun]-tachi*

-tachi can be attached to certain personal nouns to indicate the plural:

watashi	I	watashi-tachi	we
kanojo	she	kanojo-tachi	they
hito	person, persons	hito-tachi	persons

When attached to people's names (with -san), the resulting meaning is somewhat different:

Anzai-san-tachi *Mr/Ms Anzai and those with him/her
(often the Anzai family)*
Ken-san-tachi *Ken and his group*

Exercises

1 Change the order of elements and the particle as shown in the example in order to change the meaning from *there is an A there* to *the A is there*.

Example: Asoko ni tabakoya ga arimasu. → Tabakoya wa asoko ni arimasu.

- Koko ni hon ga arimasu.
- Niwa ni inu ga imasu.
- Soko ni watashi no shi dī ga arimasu.
- Doko ni Michiko-san ga imasu ka?

2 Produce sentences as shown in the example by building up the elements given, and adding the appropriate particles (you should practise each sequence several times, keeping in mind that all the sentences you produce in this exercise, whether short or long, will be considered complete sentences in Japanese).

Example: *arimasu; takusan; o-kane; watashi* → *Arimasu; Takusan arimasu; O-kane ga takusan arimasu; Watashi wa o-kane ga takusan arimasu.*

- imasen; amari; tomodachi; otōto
- arimasu; takusan; shi dī; heya
- arimasu; nikai; heya; watashi no
- imasu; niwa; inu; ōki na

3 Say the following in Japanese, paying attention to the choice between wa and ga, and arimasu and imasu.

- a There is (some) money here. d Over there is a dog.
b The tobacco shop is here. e Michiko-san is over there.
c The books are over there.

4 With a friend, practise the various phrases used when a entering and b leaving people's homes as their guest (read the relevant sections in Language and Society first).

Language and society

1 Greetings between family members leaving and returning home

- a *Outgoing person*: Itte kimasu or itte mairimasu (the latter is more polite).
b *Remaining family member(s)*: Itte irasshai/itte'rasshai.
c *Returning person*: Tadaima.
d *Person(s) at home*: O-kaeri nasai.

c is normally said (or exclaimed if no one is within sight) as soon as the returning person has stepped inside the house at the front or back entrance. The order of a and b, and c and d can be reversed, as it may be the person at home who notices someone return, prompting him to say d, to which the reply then would be c. Visitors sometimes partake in this exchange together with the relevant family members.

2 Greetings between visitors and hosts on arrival and departure

Arrival:	Host	Dōzo, o-agari kudasai.
	Guest	O-jama shimasu/shitsurei shimasu.
Departure:	Guest	O-jama shimashita/shitsurei shimashita
	Host	Mata dōzo. (<i>Please come again.</i>)
	Guest	Arigatō gozaimasu. (<i>Thank you.</i>)
		Ja, shitsurei shimasu (<i>Please excuse me, good-bye.</i>)
	Host	Sayōnara

Japanese entrance doors are often kept unlocked when guests are expected, so people arriving without being escorted by a member of the family will often open the *genkan door* and call out for attention: gomen kudasai! (the standard reply to that is normally just hai!).

3 Entering a Japanese house

The *genkan* or entrance area in a Japanese house is generally at a lower level than the rest of the house, so that you have to step up in order to enter the living area (o-agari kudasai literally means *Please step up*). If invited in, you take off your shoes and your host(ess) will strategically place a pair of slippers so that you can step up into them as you enter the house proper.

A Japanese dream house

04

bīru demo nomimashō ka? shall we have a beer or something?

In this unit you will learn

- a wide range of ordinary verbs
- some new particles
- more on *wa*
- some words and phrases which will be useful in winning and dining

Dialogues

Tom has just finished a long discussion with Suzuki-san, a business associate from Sapporo.

Tom Sā ..., bīru demo nomimashō ka?
Suzuki Un, nomimashō. Doko ka i. tokoro ga arimasu ka?
Tom Ē, ch kaku ni totemo ii nomiya ga arimasu.
Suzuki Ja, soko ni shimashō.

(They arrive and sit down at the bar)

Mama-san Irasshaimase.
Tom Nan ni shimasu ka?
Suzuki Sō desu ne. (To proprietress) Bīru o kudasai.
Tom Boku mo bīru da.
Mama-san Wakarimashita. ... (produces beer and begins to pour) Hai, dōzo
Tom & Suzuki (raising their glasses) Kanpai!

 4 Suzuki-san wa raishū made Tōkyō ni imasu.

Structures

1 Verbs

So far, the only verbs you have met are *arimasu* and *imasu*. In the conversation for this unit we introduced several more verbs, and gave their present tense plain form in the vocabulary lists. (The present plain forms of *arimasu* and *imasu* are *aru* and *iru*, and of *desu*, *da*.) This form is the simplest form which a Japanese verb can have, and is the one that is used to list verbs in dictionaries. Polite (*-masu*) forms such as *arimasu* are the norm in ordinary adult conversation, and we would advise you to use such forms, except when talking to children (or to yourself). In both of these cases, plain forms, such as *aru*, would be appropriate; they will also be found in the non-conversational Japanese which is used to set the scene of the dialogues from Unit 5 onwards. More information on formal and informal Japanese occurs throughout the book. In the meantime, it is a good idea to learn both the plain and the *-masu* form whenever you encounter a new verb.

Almost all Japanese verbs fall into one of two groups. The first group, which we shall call *-iru/-eru* verbs, have a present plain form ending in either *-iru* or *-eru*. Their *-masu* form is obtained by dropping the *-ru* and adding *-masu*. In the vocabulary lists they are therefore identified by means of a dot before the *-ru*. Some common *-iru/-eru* verbs are:

oshie.ru	oshiemasu	teach, inform
tabe.ru	tabemasu	eat
i.ru	imasu	there is (animate), stay
mi.ru	mimasu	see

The second group, which we shall call *-u* verbs, obtain their *-masu* form by dropping the *-u* and adding *-imasu*. In the vocabulary lists they are therefore identified by means of a dot before the *-u*. Some common *-u* verbs are:

ar.u	arimasu	there is (inanimate)
wakar.u	wakarimasu	understand
owar.u	owarimasu	finish
kir.u	kirimasu	cut
nom.u	nomimasu	drink
yom.u	yomimasu	read
hatarak.u	hatarakimasu	work (i.e. labour)
kak.u	kakimasu	write
oyog.u	oyogimasu	swim
a.u	aimasu	meet
ka.u	kaimasu	buy

Note that *kir.u* looks like an *-iru/-eru* verb but is not, as the position of the dot shows. Also note that *-u* verbs ending in *-su* and *-tsu* obtain their *-masu* form as follows:

hanas.u	hanashimasu	speak, talk
mats.u	machimasu	wait for

The only 'irregular' verbs are *suru*, *shimasu* (*to do*), and *kuru*, *kimasu* (*to come*).

A number of 'action' nouns, like *benkyō*, can be turned into verbs with the addition of *suru*. Others are *ryokō* (*travel*), *kenbutsu* (*sightseeing*), and *kaimono* (*shopping*). Almost all the nouns which work like this are of foreign origin, either Chinese-derived like the ones above (with the exception of *kaimono*), or Western-derived, such as *dansu* (*dance*) or *tenisu* (*tennis*). They will be identified in the vocabulary lists by the addition of *suru* in brackets.

As you have already seen, whether in the plain or the *-masu* form, Japanese verbs stay the same whatever the subject, and the subject is often left out if understood. We have already had the negative of the *-masu* form (e.g. *arimasen*); the negative present plain form is introduced in Unit 6 Structures 1. In terms of tense, verbs ending in *-masu* or in the present plain form refer to habitual actions, general truths, or the definite future, according to the context:

Tomu-san wa maiban benkyō shimasu.	Tom studies every evening.
Yokohama wa Tōkyō no chikaku ni arimasu.	Yokohama is near Tokyo.

Raishū mata kakimasu.

I am going to write again next week.

2 The suggesting form of the verb: *-mashō*

This is used when suggesting a course of action:

Sā, tabemashō.

Well, let's eat.

Raishū mata hanashimasho.

Let's talk again next week.

Followed by the question particle *ka*, it occurs when in English we would use either *Shall I ...?* or *Shall we ...?*, according to the context:

Machimashō ka?

Shall I wait?

Owarimashō ka?

Shall we stop?

This is a polite form, but there is a plain form too, which we will come across in Unit 13 Structures 6.

3 Uses of *de* and *o*

O indicates that the noun which it follows is the object of the verb, or of *kudasai/dōzo*:

Jiru-san wa maiban shinbun o yomimasu.

Jul reads the newspaper every evening

Kōhī o nomimashō ka?

Shall we drink some coffee?

[Noun] *o kudasai* (or, more formally, *o-negai shimasu*) is used when asking for something; when offering something to someone else, *dōzo* should be substituted:

Pen o kudasai/

A pen, please.

o-negai shimasu.

Shinbun o dōzo.

Please take a look at the newspaper.

Note that *matsu* takes *o*:

Michiko-san o machimashō.

Let's wait for Michiko-san.

On the other hand, *au* takes *ni*:

Tomu-san wa raishū mata Suzuki-san ni aimasu.

Tom will meet Suzuki-san again next week.

In the dialogue, we introduced two uses of the particle *de*. The first use is after place nouns, when it indicates where the action of the sentence occurs. *Ni* is also used after place nouns, but this is only with a very limited number of verbs, most commonly *aru* and *iru*, which are concerned with static location rather than with action:

Tanaka-san wa doko ni
imasu ka?
Tanaka-san wa doko de
kaimono shimasu ka?

Where is Tanaka-san?

*Where does Tanaka-san
shop?*

Note that verbs such as *au*, *matsu*, and *benkyō suru* all work as verbs of action rather than of static location:

Eki de aimashō.

Let's meet at the station.

The other use is to indicate the instrument by means of which an action is performed:

Foku de tabemashō.
Kēki o naifu de
kirimasen ka?

*Let's eat with forks (fōku).
Won't you cut the cake
(kēki) with a knife (naifu)?*

Linked to this function of *de* is its use to indicate a means of communication, as in the following:

Nihongo de hanashumashō.
(as opposed to Nihongo o
hanashimashō.

Let's speak in Japanese.

Let's speak Japanese.)

Jiru-san wa maiban shinbun
de Amerika no nyūsu o
yomimasu.

*Every evening Jill reads the
news (nyūsu) about
America in the newspaper.*

(as opposed to Jiru-san wa
maiban shinbun o yomimasu.

*Every evening Jill reads
the newspaper.)*

4 Plain forms of adjectives

Like verbs, adjectives have plain forms; they occur at the end of sentences whenever the use of plain forms is appropriate. (Adjectives before nouns have the same form whatever the level of speech.)

In the case of *-i* adjectives, all that happens in the plain form is that *desu* is omitted, as when Tom was complaining to himself in the *kaiwa*, or as in:

A, kawaii!
Igrisu wa samui.

*How sweet!
Britain is cold.*

Na adjectives use the plain form of *desu*, *da*, instead of *desu* itself; in informal spoken Japanese, however, *da* is frequently avoided at the end of sentences, especially in women's speech (Unit 5 Language and Society):

Kore wa taisetsu da

*This is important.
(male speaker)*

Kore wa taisetsu yo.

*This is important.
(female speaker)*

In the case of the negative, the plain ending for both types of adjective is *nai*. This replaces *arimasen*, and the *-i* adjective *-nai* *desu* alternative, and is in fact the plain form of *arimasen* (Unit 6 Structures 1):

Kono hoteru wa amari
yokunai.

This hotel isn't very good.

Ano nomiya wa shizuka
ja nai.

That bar isn't peaceful.

5 The contrasting use of wa

This use of *wa*, which is linked to its main function of indicating the topic of a sentence, was introduced briefly at the end of Unit 2 Structures 2. The contrast can be explicit:

Jikan wa arimasu. Shikashi,
o-kane wa arimasen.

*I have time; however
(shikashi), I don't have
money.*

When only one element is mentioned, the contrast is implied:

A Chikaku ni resutoran ga
arimasu ka?

*Is there a restaurant
nearby?*

B Nomiya wa takusan
arimasu ga ...

*There are lots of bars
(but no restaurants).*

You also saw this in the dialogue:

Tobun wa shikata ga
arimasen.

*It's inevitable for the time
being (but things should
get better in the future).*

6 This/that sort of: *konna*, *sonna*, *anna*

Again, these words are parallel in meaning to *kore*, *sore* and *are*; they go in front of nouns in the same way as *kono*, *sono* and *ano*. The question equivalent is *donna*:

Konna handobaggu wa ikaga
desu da?

*How about this type of
handbag?*

Watashi wa anna tokoro de
wa tabemasen!

*I don't eat at places like
that (associated with
neither of us)!*

Donna kamera o kaimasu ka?

*What sort of camera will
you buy?*

Konna ni, sonna ni, etc. are found with adjectives and verbs, and indicate to *this/that/what extent*:

Atsu desu ne. Amerika no
natsu wa konna ni atsu
desu ka?

Watashi wa sonna ni
hatarakimasen.

*Isn't it hot! Are American
summers this hot
(hot to this extent)?*

*I don't work that much (to
the extent that you work/
that you think I work).*

7 Nan/nani? what?

Nan and nani are different ways of pronouncing the same word. The choice is quite irregular. Before *ga*, *o* and *mo* (Unit 6 Structures 8) for instance, *nan* is used, while before *no*, *de* (and *da/desu*) *nani* is used. Before *ka* (Structures 8) and *ni*, both will be heard, although *nani* is preferred on formal occasions.

Tōkyō de nani o kaimasu ka?

Kono kēki o nan de tabemashō ka?

8 Question word combinations *ka: dare ka, doko ka, nan(i) ka, itsu ka*

This has an effect similar to adding *some-* in English, *dare ka* being *someone*, *doko ka* *somewhere*, *nani ka* *something*, and *itsu ka* *sometime*.

Note that *o*, and usually *ga*, are omitted after [question word] *ka*:

Dare ka imasu ka?

*Is there someone (anyone)
there?*

Nani ka tabemashō ka?

Shall we eat something?

Raishū mata doko ka
de aimasho.

*Let's meet again somewhere
next week.*

Exercises

1 You are trying to cheer up a depressed friend. Join each noun in list A to a verb in list B, adding the appropriate particle, and putting the verb into the suggesting *-shō* form.

Example: 1 + e bīru o nomimashō

- A
- 1 bīru
 - 2 terebi (*television*)
 - 3 hanbaga
 - 4 Tokyo

- B
- a taberu
 - b yomu
 - c kaimono-suru
 - d oyogu

- A chūbun
B omu (*sea*)

- e nomu
f miru

1 Comp ete by putting particles into gaps, as appropriate.

1 Tomu san wa maiban nomiya (a) _____ bīru (b) _____
omu nasu ka?

2 Kono pen (c) _____ denwa bangō (d) _____ kakimashō

3 Doko (e) _____ Jiru san (f) _____ aimasu ka?

4 Chūbun (g) _____ kudasai.

5 Eigo (h) _____ hanashimashō. (Note that there are two possible answers.)

6 You are quarrelling with a friend. One of you contradicts something the other says, using *sonna ni* + the negative.

Example: (koko (totemo) (shizuka na)

A Koko wa totemo shizuka desu ne. *It's very quiet here, isn't it?*

B He, sonna ni shizuka ja arimasen. *No, it isn't that quiet.*

a Kono bīru (totemo) (tsumetai)

b Michiko-san (taihen) (kirei na)

c Ken-san (yoku) (benkyō suru) (yoku well, often)

d (Suzuki-san) (o-sake) (takusan) (nomu)

7 When Tom and Suzuki-san next meet it is the afternoon, so they decide to go to a coffee shop. They both order *burendo*, a blend of different types of coffee. Adapt the first half of the dialogue at the beginning of this unit to fit the new situation, leaving out the *kanpai*!

8 Give the Japanese equivalent for the following short dialogues:

Tanaka Do you study English every evening?

Yamamoto No, I haven't the time!

Jill Is there a good butcher's somewhere?

Michiko There is a good butcher's next to the wine shop.

Ken Let's meet sometime.

Michiko Shall I tell you my telephone number?

Language and society

Eating and drinking out in Japan

There is a great variety of places where you can eat and drink in Japan, from the very expensive and formal to the cheap and

informal. Many display incredibly realistic plastic versions of their wares which will help you if you cannot read the menu, although in Western-style establishments knowledge of katakana alone (and a good phonetic imagination) will get you a long way. Do not be surprised if you are greeted with a chorus of *Irasshaimase* (*Welcome*) from the staff as you enter; there is no need to reply.

Here are some useful words and phrases:

moningu	morning	} setto ('set' special deal of food + something to drink)
ranchi	lunch	
keki	cake	

At a Japanese restaurant, the equivalent of setto would be the *teishoku*. For instance, a *tempura teishoku* would consist of *tempura* + rice + soup + pickles + Japanese tea.

To call for attention:	Chottoi sumimasen. (Chotto) o negai shimasu.	} Excuse me, please.

Here are some possible dialogues:

Waiter	Nanmei-sama desu ka? How many are you?
You	Hitori/futari (etc.) desu. One, two, etc. (For counting people, see Unit 9 Structures 7)
Waiter	O-nomimono wa? What would you like to drink?
You	Biru/kōhi/(o-)mizu/wain (o) kudasai. Beer/coffee/ water/ wine, please.

At most establishments, the bill will automatically be placed on your table once your order has been fulfilled, and you should pay at the cash register (*reji*) near the exit as you leave. To ask for the bill, however, say:

Kanjō o o-negai shimasu.	The bill (kanjō) please
Ikura (desu ka)?	How much? (male speaker)
O-ikura (desu ka)?	How much? (female speaker)

メイン ディッシュ MAIN DISHES

05

Rondon de kaze o hikimashita

I caught a cold in London

In this unit you will learn

- how to talk about past experiences
- how verbs of motion work in Japanese
- various time expressions
- two ways of joining sentences
- about souvenir-giving
- about feminine sentence endings

Dialogues

Tanaka-san wa sengetsu Yōroppa e itta. Nishūkan gurai ryokō shite, ototoi kaetta. Soshite, kesa Jiru san ni atta.

Jiru Dō deshita ka, Yōroppa wa?
Tanaka Totemo yokatta desu.
Jiru O-tenki wa?
Tanaka Samukatta desu.
Jiru Sore wa zannen deshita ne

True or false?

- 3 Tanaka-san wa Jiru-san ni Rōma no shashin o miseta.
 4 Tanaka-san wa Italia de kaze o hiita.

Structures

1 [noun] e/ni/kara: indicating direction of action

In Unit 3 Structures 1 and 2 we saw [place] **ni** being used with **aru** and **iru**, verbs indicating a 'state', or the way things are, to specify a static location. With verbs indicating movement to or towards (rather than location *in*) a place, **ni** or **e** will specify the direction of the movement:

Tomu-san wa raishu Kyoto e/ni ikimasu.
 Ken san wa itsu Igrisu e/ni kaerimasu ka?

Tom is going to Kyoto next week
 When is Ken returning to Britain?

When the action is directed at a person rather than a place, for example in showing or giving things to people, **ni** is used rather than **e**:

Michiko-san wa okāsan ni Ken-san no tegami o misemashita

Michiko-san showed Ken's letter to her mother.

To indicate where an action comes from, **kara** is used:

Tomu-san wa itsu Kyōto kara kaerimasu ka?

When will Tom come back from Kyoto?

2 Past form of verbs

To put any -**masu** form of the verb into the past, all you need to do is turn -**masu** into -**dashita**:

tabe.ru ik.u suru	tabemasu ikimasu shimasu	tabemashita ikimashita shimashita
-------------------------	--------------------------------	-----------------------------------------

Suzuki-san wa biru o takusan nomimashita.
 Nani o mimashita ka?

Suzuki-san drank a lot of beer.
 What did you see?

The past form of **desu** is **deshita**. You can put the negative -**masen** form of any verb into the past just by adding **deshita**. Similarly, the past of **de wa arimasen** is **de wa arimasen deshita**:

oshie.ru ka.u kuru	oshiemasen kaimasen kimasen	oshiemasen deshita kaimasen deshita kimasen deshita
--------------------------	-----------------------------------	-----------------------------------------------------------

Kyōto e ikimasen deshita.
 Jiru-san wa tako o tabemasen deshita.

I didn't go to Kyōto.
 Jill didn't eat the octopus.

Sore wa Roma no shashin de wa arimasen deshita.

That wasn't a photograph of Rome.

The past plain form of -**iru/-eru** verbs is formed by substituting **ta** for -**ru**:

mise.ru oshie.ru tabe.ru i.ru mi.ru	miseta oshieta tabeta ita mita
-------------------------------------------------	--------------------------------------------

The past plain form of **-u** verbs, however, depends on the consonant preceding the **-u**, as you will see from the following groupings:

ar.u wakar.u tor.u kir.u	atta wakatta totta kitta	
nom.u yom.u	nonda yonda	also asob.u asonda (to play) yob.u yonda (to call/invite)
hatarak.u kak.u hik.u	hataratta kaita huta	(note, however, the exceptional ik.u itta,
oyog.u	oyoida	
hanas.u das.u	hanashita dashita	
mats.u	matta	

Verbs like **a.u**, which have a vowel in front of the **-u** rather than a consonant, go like this:

a.u ka.u	atta katta
-------------	---------------

The two irregular verbs behave like this:

suru kuru	shita kita
--------------	---------------

The plain past form of **desu** is **datta**. The plain present and past forms of the negative will be dealt with in the next unit. Information about some particular uses of the past tense in Japanese is given in Language and society 3.

3 Experiences in the past

The structure [verb (past plain form)] **koto ga arimasu** is used to refer to experiences in the past.

- A Tako wa dō desu ka? How (do) do you like the octopus?
 B Nihon ryōriya de tabeta I've had it at a Japanese
 koto ga arimasu. restaurant. It tasted
 Oishikatta desu. good

Note that in questions it is equivalent to English *Have you ever ...?*, and with **arimasen** rather than **arimasu** at the end, to *I (etc.) have never...*:

- A O-sake o nonda koto ga Have you ever drunk sake?
 arimasu ka?
 B Hai, (nonda koto ga) Yes, I have (drunk it).
 arimasu.
 Ie, (nonda koto ga) No, I haven't.
 arimasen.
 A Michiko-san no ototo Michiko-san's younger
 wa hansamu desu ne. brother is handsome isn't
 he?
 B /annen desu ga, atta It's a shame, but (=
 koto ga arimasen. unfortunately) I've never
 met him.

koto is a noun meaning (abstract) thing. You will meet other constructions in which **koto** follows the plain forms of verbs in Unit 13 Structures 3 and Unit 14 Structures 1, 2 and 5.

4 Joining sentences with the **-te** form and **ga**

The **-te** form is made by changing the vowel at the end of the past plain form from **-a** to **-e**:

oshieta owatta nonda kaita shita	oshiete owatte nonde kaite shite
----------------------------------------------	----------------------------------------------

The **-te** form of **da** is **de**.

The **-te** form has many uses, and is similar to the **-ing** form of the verb in English in that it has no tense and cannot form a full sentence by itself. A very common use is in joining sentences which form a consecutive sequence of events. Thus the sentences:

Suzuki-san wa maiban nomiya e ikimasu.
 Nomiya de o-sake o takusan nomimasu.

can be made into one by putting **ikimasu** into its **-te** form, **itte**:

Suzuki-san wa maiban nomiya Every evening Suzuki-san
 e itte, o-sake o takusan goes to a bar and drinks
 nomimasu. a lot of sake.

Similarly,

Tanaka-san wa shashin o dashimashita. Shashin o Jiru-san ni misemashita.

becomes

Tanaka-san wa shashin o dashite, Jiru-san ni misemashita.

Note that the tense of the whole sentence is given by the verb at the end.

b This *ga* has already appeared in several dialogues. It is different from [noun] *ga* which was introduced in Unit 3 Structures 2, and in meaning is similar to the English *but*:

Sumimasen <i>ga</i> , o-tearai wa dochura desu ka?	<i>Excuse me, but which way is the toilet?</i>
Zenbu tabemashita <i>ga</i> , oishiku arimasen deshita.	<i>I ate it all, but it didn't taste good.</i>

Note that the comma comes after *ga* rather than before. In speech as well, any pause will come after the *ga* rather than before.

Ga is also used where the first part of a sentence is setting the scene for the rest, and where *but* would not therefore be an appropriate English equivalent:

Kesa Ken-san ni aimashita <i>ga</i> , hansamu desu ne.	<i>I met Ken this morning; isn't he handsome!</i>
Kore wa tako desu <i>ga</i> , tabeta koto <i>ga</i> arimasu ka?	<i>This is octopus - have you ever eaten it?</i>

Note also how, as at the end of the dialogue in Unit 4, it is possible to stop talking after the *ga*, leaving your listener to work out what you were going to say. This can be a useful way of implying, rather than directly saying, something which might offend your listener:

Sore wa sô desu <i>ga</i> ...	<i>That is so, but (I don't totally agree...)</i>
-------------------------------	---------------------------------------------------

You will sometimes find *ga* at the beginning of a sentence, where it has the meaning of *but*, *however*. Demo (Unit 2, dialogue) and the more formal *shikashi* (Unit 4 Structures 5) are more common in this position, though they cannot be used to join two sentences together as *ga* can.

5 Past forms of adjectives

In English, adjectives themselves do not change according to tense, tense is shown by *is*, *was*, etc. In Japanese, *na* adjectives

work in a similar way. To indicate the past tense they therefore use *deshita*, the past form of *desu*:

Kono heya wa shizuka desu.	<i>This room is quiet.</i>
Roma no hōteru wa shizuka deshita.	<i>The hotel in Rome was quiet.</i>

Similarly, the negative past uses *de wa/ya arimasen deshita*:

Ano inu wa amari kirei de wa arimasen.	<i>That dog isn't very clean.</i>
Rondon no basu wa amari kirei de wa arimasen deshita.	<i>The London buses weren't very clean.</i>

In contrast, *i* adjectives actually change their form:

Ano resutoran wa oishii desu.	<i>That restaurant is good.</i>
Italia no tabemono wa oishikatta desu.	<i>The food in Italy was good.</i>
Michiko-san no uchi wa toî desu.	<i>Michiko-san's house is a long way away.</i>
Resutoran wa eki kara tōkatta desu.	<i>The restaurant was a long way from the station.</i>

As you can see, *-i desu* is replaced by *-katta desu*. Note that *ii desu* is again an exception, having the past form of *yokatta desu*.

With the negative past form of *-i* adjectives there are two possibilities, as with the negative present form. *-ku arimasen* becomes *ku arimasen deshita*. Since *nai*, the plain form of *arimasen*, itself acts like an *-i* adjective, *-kunai desu* becomes *-kunakatta desu*:

Ano resutoran wa amari oishiku arimasen.	} <i>That restaurant is not very good.</i>
Ano resutoran wa amari oishikunai desu.	
Igirisu no tabemono wa amari oishiku arimasen deshita.	} <i>The food in Britain was not very good.</i>
Igirisu no tabemono wa amari oishikunakatta desu.	

The plain past forms of adjectives follow on logically from the above:

<i>na</i> adjectives:	kirei da kirei de wa/ya nai	kirei datta kirei de wa/ya nakatta
<i>i</i> adjectives:	oishii oishikunai	oishikatta oishikunakatta

6 Expressions of time in Japanese

We have already been using various expressions of time. Most of them have been expressions of relative time, that is, words like *sengetsu last month*, which means last month relative to this month, and will refer to March in April, April in May, etc. Here are some common expressions of relative time:

	year	month	week	day
<i>last this next</i>	kyonen kotoshi rainen	sengetsu kongetsu raigetsu	senshū konshu raishu	kino (<i>yesterday</i>) kyō (<i>today</i>) ashita (<i>tomorrow</i>)
<i>every</i>	mainen (or maitoshi)	maigetsu (or maitzuki)	maishū	mainichi

These words can be followed by certain particles, for example by *wa* if some contrast is implied:

Kinō wa samukatta desu. *Yesterday was cold.*
Kyō wa ii o-tenki desu ne. *Isn't it lovely weather today!*

Usually, however, they are not followed by any particles at all:

Ashita nani o shimasu ka?

It is also worth noting at this stage that these relative expressions can act like nouns and be joined to other time words through the use of *no*:

kinō no yoru *yesterday night*
rainen no natsu *next (year's) summer*

There will be more information about time expressions, including how to tell the time, in Units 6 and 8.

7 Means of transport

[Vehicle] *de* is used with verbs of motion as follows. This is a natural extension of the use of *de* to indicate the instrument with which an action is performed:

Basu/densha de kaerimasho. *Let's go home by bus/tram (densha).*

Note that where English would say *on foot*, Japanese uses the -te form of the verb *aruku* (*to walk*), *aruite*:

Aruite kaerimashita. *I went home on foot.*

Exercises

1 Supply the missing particles and put the verbs into the past (-*masu*) form, making them positive unless otherwise indicated.

Example: Kinō resutoran (a) (taberu) → (a) *de*; tabemashita

- Tomu-san wa senshū basu (a) _____ Narita (b) _____ (iku).
- Michiko-san wa kinō Ken-san (c) _____ Kyōto no shashin (d) _____ (miseru).
- A Kesa shinbun (e) _____ (yomu) ka?
B *lie*, (yomu negative) _____.
- Kyōnen (f) _____ natsu doko (g) _____ (iru) ka?
- A Kinō uchi (h) _____ nani (i) _____ (benkyō suru) ka?
B (Benkyō suru negative); (asobu).

2 The Japanese like asking foreigners if they have had any authentic 'Japan experiences'. Use the [verb (past plain form)] *koto ga aru* construction to ask and answer about the following. (Do this with a friend if possible.)

Example: Seeing Mt Fuji (Fuji-san)
Fuji-san o mita koto ga arimasu ka?
Hai, (mita koto ga) arimasu.
Iie, (mita koto ga) arimasen.

- Eating octopus/raw fish (sashimi or sushi)
- Drinking sake/Japanese tea (o-cha)
- Going to Kyōto/Nara
- Seeing Noh/Kabuki drama
- Staying at a Japanese-style inn (ryōkan ni tomaru)

3 Join the following sentences using either the -te form of the verb or the ordinary sentence final form and *ga*.

Example: Yōroppa ni ikimashita. Shashin o takusan torimashita.
→ Yōroppa ni itte, shashin o takusan torimashita.
Yōroppa ni ikimashita. Kenbutsu shimasen deshita.
→ Yōroppa ni ikimashita ga, kenbutsu shimasen deshita.

- Tomodachi ni aimashita. Hanashimashita.
- Tomodachi o yobimashita. Kimasen deshita.
- Shashin o mimashita. Amari yoku arimasen deshita.
- Shashin o mimashita. Rondon o omoidashimashita.
- Jiru-san wa Nihongo de tegami o kakimashita. Tanaka-san ni misemashita.

4 Put the following sentences in the past.

Example: Rōma wa atsui desu. → Roma wa atsukatta desu.

- a Rondon wa amari atsukunai desu.
- b Okkusufodo wa shizuka desu.
- c Itaria no resutoran wa oishii desu.
- d Ano kissaten wa amari kirei de wa arimasen.
- e Tenki wa amari yoku arimasen.

Language and society

1 O-miyage souvenirs

The Japanese love travelling and travel has inevitably become ritualized. Commemorative photographs (*kinen shashin*) must be taken, and o-miyage must be bought, for one's neighbours, relatives and colleagues at school or work. If you go to Japan, particularly if you are going to stay with Japanese friends, or if someone is going to be looking after you in some way, you should arm yourself with a choice selection of o-miyage: from appropriately emblazoned keyrings to bottles of brandy and scarves or ties with famous designer names.

When presenting a gift to someone, it is usually appropriate to say: *Kore wa tsumaranai mono desu ga ...* (lit.) *This is a trivial (tsumaranai) thing but ...* In the case of an o-miyage, however, you would probably say: *(Kore wa) Igrisu/Amerika no o-miyage desu. Tsumaranai mono desu ga, dōzo ...* *This is a souvenir from Britain/America. It is a trivial thing, but please (accept it).* The happy recipient can respond in various ways, most simply, of course, with *Dōmo arigatō gozaimasu* (a polite *Thank you*).

2 Inverted sentences

You will come across these frequently in everyday spontaneous conversations. The speaker adds information as an afterthought to a sentence which is already complete, possibly to clarify the meaning or for emphasis:

Hansamu desu ne,	<i>Handsome isn't he,</i>
Ken-san wa.	<i>Ken I mean.</i>
Hoteru kara ikimashita,	<i>We went from the hotel,</i>
basu de.	<i>by bus.</i>
Rondon wa ame deshita,	<i>In London we had rain,</i>
mainichi.	<i>every day.</i>

(For inverted questions, see Unit 22 Structures 1 h.)

3 Special uses of the past tense of *wakaru* and *kuru*

In certain situations, the past forms of these verbs can take on a special meaning. When A, who is junior to B, has been listening to instructions or advice given by B, the reply *Hai, wakarimashita* will imply not only that A has understood, but also that he or she will carry out what B has said. (A more formal equivalent to *wakarimashita* in this context is *kashikomarimashita*.)

If you catch sight of the bus or train that you are waiting for, in English you say *It's coming!*. In Japanese, however, you say *Kimashita!* (lit. *It has come*). You may feel that this is a natural reflection of the greater speed and efficiency of Japanese transport systems ...

4 The feminine sentence endings *wa* and *no*

Differences between male and female speech are much more obvious in Japanese than in many other languages. In general, women tend to use polite endings more than men, and to use more honorific and humble forms, as we shall see. When women do use the plain form, with close friends, or when talking out loud to themselves, they will often soften it with a sentence ending. *Wa* is one of these, no another. (Note that they are unrelated to the *wa* and *no* which come after nouns and which we first met in Unit 1.) *No* is slightly more assertive than *wa*; in questions it replaces *ka*, which women otherwise omit in informal speech:

Ja, kaeru wa.	<i>Well, I'm going home.</i>
Samaku nai no.	<i>I'm not cold.</i>
Doko e iku no?	<i>Where are you going?</i>

Note that in front of *no*, *da* becomes *na*:

Dajiōbu desu ka? → *Dajiōbu na no?* *Are you all right?*

You will hear men using *no*, mainly if they are asking a woman with whom they are on close terms a question, and *wa* as well, particularly if they are from the west of Japan.

06

yūbe wa zuibun
nonda deshō?
you had quite a lot last
night, didn't you?

In this unit you will learn

- about plain negative verb forms
- how to express uncertainty, probability and reason with plain forms
- how to count
- how to show off!

Dialogues

True or false?

- 3 Anzai-sensei no okusan wa saki ni neta.
- 4 Jiru-san wa o-cha o nomanakatta.

Structures

1 Plain negative forms of verbs

The plain negative form of verbs is obtained in the following manner:

a With -ru/-eru verbs, substitute -nai for -ru to obtain the plain present negative, and to obtain the corresponding past tense

form, change -nai to -nakatta (recall the past tense formation of -i adjectives):

oki.ru tabe.ru mi ru	oki.nai tabe.nai mi.nai	oki.nakatta tabe.nakatta mi.nakatta
----------------------------	-------------------------------	-------------------------------------------

b With -u verbs, change the final -u to -a-, then attach -nai present tense, -nakatta for past:

tor.u hanas.u nom.u oyog.u	tora.nai hanasa.nai noma.nai oyoga.nai	tora.nakatta hanasa.nakatta noma.nakatta oyoga.nakatta
-------------------------------------	-------------------------------------------------	-----------------------------------------------------------------

Notice that verbs ending in -tsu change to -ta-, and verbs with a vowel before the -u, to -wa- (although awanai and other such forms sound in fact more like aanai in normal rapid speech):

mats.u a.u ka.u	ma.ta.nai a.wa.nai ka.wa.nai	ma.ta.nakatta a.wa.nakatta ka.wa.nakatta
-----------------------	------------------------------------	------------------------------------------------

c The two irregular verbs suru and kuru work as follows:

suru kuru	shi.nai ko.nai	shi.nakatta ko.nakatta
--------------	-------------------	---------------------------

d Notice that ar.u does not have regular negative forms (aranai does not exist); instead, nai/nakatta are used:

O-kane ga nai.
 Hon ga nakatta.

There is/I have no money.
 The book wasn't there.

2 Indicating probability with darō

Darō (and its polite equivalent deshō) means something like *probably is/was* or *is/was likely to* (there is no fixed English equivalent).

Darō is attached to nouns, adjectives and verbs in their present and past affirmative and negative forms as seen in the following table:

nouns		
Ano hito wa Nihonjin	datta ja nai ja nakatta	deshō. <i>That man probably is Japanese. was isn't wasn't</i>
na adjectives		
Kono heya wa shizuka	datta ja nai ja nakatta	deshō. <i>I expect this room is quiet. was isn't wasn't</i>
-i adjectives		
Natsu wa atsu i atsu- katta atsuku- nai atsuku- nakatta		deshō <i>Summer must be hot. have been hot be cool (not hot). have been cool (not hot).</i>
verbs		
Kanojo wa ik, u it- ta ika- nai ika- nakatta		deshō. <i>She probably will go. went won't go. didn't go.</i>

Note that so behaves like a noun (sō darō/deshō).

In questions ending in darō/deshō?, the speaker signals to the listener to confirm the assumption presented in the question:

- Yūbe wa zuibun nonda deshō? *You had quite a lot last night, didn't you?*
 O-furo ni hairanakatta deshō? *You didn't take a bath, did you?*
 Ha mo migakanakatta desho? *You didn't brush your teeth either, did you?*

When the question is about something associated with the speaker, the implication is often one of showing off (in this use falling intonation is generally used):

- (photo of boyfriend) Hansamu deshō? *Don't you think he's handsome?*
 (home-baked cake) Watashi no kēki wa oishi deshō? *My cakes are not bad, eh?!*

If ka? is attached after darō/deshō, the meaning normally is I wonder if:

- (Knock at the door) Dare darō ka? *Who might that be?*
 Kono sukāto wa takai deshō ka? *Is this skirt (sukāto) expensive, I wonder?*
 Ken-san mo iku deshō ka? *I wonder if Ken is going, too?*

When deshō is used instead of desu in a question (with normal question intonation), it results in a very polite question:

- It desu ka? *Is it all right?*
 It deshō ka? *Would it be all right?*
 O-tearai wa doko desu ka? *Where is the cloakroom?*
 O-tearai wa doko deshō ka? *Where would the cloakroom be, please?*

When said with a falling intonation, the speaker's doubt as to the validity of the assumption expressed in the question is expressed:

- It deshō ka? *I wonder if it's all right?*
 Kyō wa hontō ni nichiyōbi daro ka? *Is today really Sunday, I wonder?*

3 [sentence] kashira? and [sentence] ka mo shirenai indicating uncertainty

Ka mo shirenai/shiremasen literally means *there is no knowing whether*; it is used instead of darō where the speaker is less certain about the likelihood of an action or state occurring.

Ka mo shirenai is attached to the same forms as darō/deshō. Note the differences in meaning when compared to the sentences given in the table overleaf:

Ano hito wa Nihonjin	ka mo	... might/may be a
Kono heya wa shizuka datta	shiremasen.	Japanese.
Natsu wa atsukunai		... may have been quiet.
Kanojo wa ikanakatta		... may not be hot.
		... may not have gone.

Kashira? came up in Unit 5; as mentioned there, it is restricted to female speech in standard Japanese (although men use it regularly in certain dialects, such as those spoken in the Kyoto/Osaka area). With a meaning similar to *deshō ka?* (and the more masculine *darō ka?*), *kashira?* is attached to the same forms as *ka mo shirenai*. Some more examples are given below:

Dare kashira?	Who might that be?
Kono sukāto wa takai kashira?	Is this skirt expensive, I wonder?
Kono hoteru wa shizuka kashira?	I wonder if this hotel is quiet?
Ken-san mo iku kashira?	I wonder if Ken will go, too?
Kesa no shinbun wa konakatta kashira?	Am I right in thinking that the paper didn't come this morning?

4 Linking sentences with *kara*

In Unit 5, we saw the use of the *-te* form and *ga* to link two sentences in the sense of *and* and *but*. In the sequence S_1 *kara* S_2 , *kara* links two sentences in the sense of *because*. Note that in Japanese the reason is always given in the first (or subordinate) sentence, whereas in English the reason sentence can come second as well as first (recall the differences in basic word order between the languages).

Tenki ga ii kara ikimasu.	We will go because the weather is fine.
Futari wa osokatta kara sugu nemashita.	The two went straight to bed because it was late.
Heya ga shizuka datta kara, watashi wa yoku nemashita.	I slept well because the room was quiet.
Jiru-san ga kumashita kara, issho ni o-cha o nomimashita.	Because Jill came, we drank tea together.

In normal polite speech, *kara* is more likely to be attached to the plain forms of the verb and adjectives rather than to *desu/-masu* forms.

Note that the subject of the whole sentence (marked by *wa*) may come at the beginning of the sentence, or in the second half after *kara*. If the subordinate sentence has a different subject (*heya ga shizuka datta*), it is generally marked by *ga* (see Unit 10). This applies equally to sentences where the overall subject is understood, such as the first example given on p. 62. In full this would read as follows:

Tenki ga ii kara watashi-tachi wa ikimasu.

In English it is possible to say *Because Michiko-san didn't (go) in reply to a question such as Why didn't you go?*. Similarly, sentences consisting only of the part indicating the reason are possible in Japanese, too:

Michiko-san ga ikanakatta kara.

5 How to count

Japanese has two sets of numerals, an indigenous set and one imported from China. The Japanese set is used only for numbers up to and including 10.

Number	Japanese	Chinese (alternatives)
1	hito-tsu	ichi
2	futa-tsu	ni
3	mit-tsu	san
4	yot-tsu	shi (yon)
5	itsu-tsu	go
6	mut-tsu	roku
7	nana-tsu	shichi (nana)
8	yat-tsu	hachi
9	kokono-tsu	kyū/ku
10	tō	jū

The alternatives to the purely Chinese words, *yon* and *nana*, are derived from the Japanese set, and are more common than *shi* and *shichi*.

On their own, the Chinese numerals are used to count from 1 to 10, 1 to 100 and so on, for example in doing arithmetic. For counting things, it is normal to combine them with specific counters. (See Structures 6 about counting hours and minutes,

and Unit 9 for more information.) The Japanese set of numbers is also used to count things, but generally only in the case of objects which have no specific counter assigned to them. One could say that *-tsu* is the counter for such objects.

After 10, the tens are indicated by attaching *ni, san ...* before *jū*, while the ones are made up by attaching *ichi, ni ...* after *jū* (note that *yon* and *nana* are again used as common alternatives):

11	jū ichi	20	ni jū
12	jū ni	30	san jū
13	jū san	40	shi/yon jū
14	jū shi/yon	50	go jū
15	jū go	60	roku jū
16	jū roku	70	shichi/nana jū
17	jū shichi/nana	80	hachi jū
18	jū hachi	90	kyū/ku jū
19	jū kyū/ku		

The same principle applies with *hyaku* (a hundred) and *sen* (a thousand); thus the year 1984 would be *sen kyūhyaku hachijū yo-nen* (*-nen* = year; this is also the Japanese title of Orwell's *Nineteen Eighty-Four*), and 2001 *nisen ichi-nen*. Certain combinations undergo phonetic change, thus *sanbyaku* (not *sanhyaku*), *roppyaku* (not *rokuhyaku*), *happyaku* (not *hachihyaku*). Check Appendix 1 for a list of common phonetic changes.

The basic unit for large numbers is not 1,000 but 1,0000 (*ichi-man*); calculate by remembering that there are *four* noughts, not three, as with thousands:

20,000	ni man	(2,0000)
50,000	go man	(5,0000)
70,000	shichi/nana man	(7,0000)
100,000	jū man	(10,0000)
1,000,000	hyaku man	(100,0000)
10,000,000	is sen man	
	(not ichi-sen man)	(1000,0000)

6 Telling the time

The hours are indicated by adding *-ji* (meaning *o'clock/hours*) to the (mainly Chinese) numerals 1 to 12, or in formal announcements, 0 (*rei*) to 23:

ichi ji	1 o'clock	shichi ji	7 o'clock
ni ji	2 o'clock	hachi ji	8 o'clock
san ji	3 o'clock	ku ji	9 o'clock
yo ji	4 o'clock	jū ji	10 o'clock
go ji	5 o'clock	jūichi ji	11 o'clock
roku ji	6 o'clock	jūni ji	12 o'clock
rei ji	0 hours (midnight)	nijū ji	20 hours
juku ji	19 hours	nijusan ji	23 hours

Where necessary, the a.m./p.m. distinction can be indicated by putting *gozen* (a.m.) or *gogo* (p.m.) in front. Thus, *gozen ichi* is *one a.m.*

Half past is indicated by adding *han* (half): *sanji han* (half past three). Alternatively, you can say *sanji sanjuppun* (three thirty).

The minutes are expressed by combinations of the numerals 1–59 in combination with *-fun/-pun* (see Appendix 1 for combinations).

Hours and minutes are generally combined as follows:

Shichi gofun	7.05	Hachi yonjūgofun	8.45
Sanji jūgofun	3.15	Ichiji gojuppun	1.50
Kuji nijuppun	9.20	Yoji gojūgofun	4.55
Jūji sanjuppun/han	10.30	Jūichiji gojūhachifun	11.58

It is possible to attach *sugi* (past/after) to the minutes past the hour: *shichiji gofun sugi* five past seven.

After the half hour, it is also possible to give the minutes to the hour by adding *mae* (before):

Kuji jūgofun mae	Fifteen minutes to nine
Goji gofun mae	Five minutes to five
Niji juppun mae	Ten minutes to two
Juniji nifun mae	Two minutes to twelve

For approximate times, *goro* (about), *chikaku* (nearly) and *sugi* (past/after) can be used, while *chodo* (just/exactly) is attached before the hour:

Shichiji goro
Shichiji chikaku
Shichiji sugi
Chōdo shichiji desu.

Sevensh, about seven o'clock
Nearly seven
After seven
It's just on seven.

時^{-ji}

For asking the time, *nanji* (what time/hour) is used.

7 Ni with expressions of time

In this use, *ni* indicates that you are doing something at a specific time. It is therefore attached to specific times such as the hour of the day, the day of the week or month, and the month, year, etc. (These expressions are similar in that they indicate a point on a scale/dial/calendar and so on – see Language and society 2 and Appendix 1 for dates, the days of the week and the names of the months.)

Kesa rokuji ni okumashita.	<i>I got up at six this morning.</i>
Sanji ni ikumashō.	<i>Let's go at three o'clock.</i>
Gozen niji sugi ni kaerimashita.	<i>They came back after 2 a.m.</i>
Doyōbi ni kaimono shimashita.	<i>I did some shopping on Saturday.</i>

On the other hand, it cannot be used with relative times (recall Unit 5 Structures 6):

Mainichi biru o nomimasu.	<i>I drink beer every day.</i>
Kinō eiga o mimashita.	<i>I saw a film (eiga) yesterday.</i>

Other expressions of time are either specific or general in meaning; these can be used without *ni* in a general sense, or with *ni* to give them a more specific feel. This distinction does not exist in English – if in doubt use these expressions without *ni*.

Asa (morning)	(ni)	denwa shamashita.
Gogo	(ni)	kaerimashita.
Fuyu (winter)	(ni)	Rōma ni ikimasu.
Sanji goro	(ni)	ikimasu.

8 [question word] mo (dare mo, doko mo, nani mo) [+ negative]

This combination is similar in meaning to *no-* or *not any-* in English, *dare mo* being *no one* or *not ... anyone*, *doko mo* *nowhere* or *not ... anywhere*, and *nani mo* *nothing/not ... anything*. Particles *ga* and, usually, *o* are omitted; others such as *ni* combine with *mo* (preceding it). With *iku*, however, *ni/e* can be left out.

Dare mo kimasen deshita.
Dare mo yobimasen.
Dare ni mo aimasen deshita.
Doko (ni) mo ikimasen deshita.
Nani mo irimasen.

No one came.
I shall invite no one.
I didn't meet anyone.
We didn't go anywhere.
I don't want anything.

Note that *itsu mo* cannot be used with negative forms; it is, however, commonly used with positive forms in the sense of *always* (Unit 7): *Itsu mo shichiji ni kaerimasu. I/he always returns at seven.*

Exercises

1 Tell the time in Japanese as indicated (give two versions where possible).

2 Answer the [question word] *ka* questions by [question word] *mo* [+ negative] answers as shown in the model:

Example: Dare ka kumashita ka? → Iie, dare mo kimasen deshita.

- a Doko ka ni ikimashita ka?
- b Nani ka tabemashita ka?
- c Dare ka ni aimashita ka?
- d Nani ka kaimasu ka?

3 Show off about the following

Example: (girlfriend; pretty) → *Watashi no gārufurendo wa kirei deshō?*

- a (car; fast)
- b (room; big)
- c (blouse [burauzu]; pretty)
- d (jam; tasty)
- e (dog; cute)

4 Put these English sentences into Japanese.

- a I bought it because I had the money.
- b Because Ken went, I went too.
- c I got up early this morning because I went to bed early last night.

Language and society

1 Saying 'sorry' in Japanese: *su(m)imasen*, *dōmo*, and *gomen nasai*

Sumimasen (often shortened to *suimasen*) can be used (sometimes with *ga*) to attract people's attention in the sense of *excuse me*:

<i>Suimasen!</i>	<i>Excuse me!</i> (calling the waiter, etc.)
<i>Sumimasen – toire wa doko desu ka?</i>	<i>Excuse me, where is the toilet?</i>
<i>Suimasen ga, ima nanji deshō ka?</i>	<i>Excuse me, what is the time, please?</i>

In the sense of *I am sorry*, both (*domo*) *sumimasen* and *gomen nasai* (the latter tends to be used by females) are used in a wide range of situations: you may have trodden on someone's foot, caused a traffic accident or got caught by a police officer for not carrying your foreigner's registration card – in all these cases, *sumimasen* is the thing to say. More informally, *dōmo* is used by itself.

(*Dōmo*) *sumimasen* is also used to acknowledge people's kindness when receiving gifts or favours, and in its form *su(m)imasen deshita* it can refer to misdeeds or blunders committed in the past. *Shitsurei shimashita* can be used in the same situations.

Suteki na purezento o sumimasen.
Yūbe wa sumimasen deshita.
K nō wa dōmo shitsurei shimashita.

Thanks for the lovely (suteki na) present.
Sorry about last night.
I do beg your pardon about yesterday.

(The last two do not necessarily imply some grave social blunder – it may be that you were late for an appointment, or simply visited someone out of the blue!)

7月31日

-gatsu -nichi

2 Giving the date

In Japanese, the order of time expressions is from the general to the specific (the larger unit to the lesser): *kesa rokuji*, *gozen niji*, *sanji gofun*, etc. The same order applies with dates (year, month, day rather than vice versa)

15 December 1990: 1990 (sen kyūhyaku kyūjū)-nen 12 (jūni)-gatsu 15 (jūgo)-nichi

-*nen* is attached to the years, -*gatsu* (*month*) to the months, and -*nichi* (*day*) to the days. The months have no names, but are numbered from 1 to 12.

The year can also be indicated by the somewhat flowery name given to the era of an emperor's reign. If you ask someone when they were born, they will normally give you the relevant era rather than the year according to Western reckoning. The first year in an era is known as *gannen*. The current era is *Heisei* (*achieving peace*), while the previous era was *Shōwa* (*enlightened peace*). *Heisei gannen* corresponds to 1989, while *Shōwa gannen* is equivalent to 1926, *Showa ninen* to 1927, and so on. *Heisei* years can therefore be converted into Western calendar years by adding (19)88, and *Shōwa* years by adding (19)25. *Showa 55* (*Showa gojugo-nen*), for example, is 1980, and *Heisei 20* (*Heisei nijūnen/nisenhachi-nen*), 2008.

The days of the week are as follows:

<i>Getsuyōbi</i>	<i>Monday</i>	<i>Kin'yōbi</i>	<i>Friday</i>
<i>Kayōbi</i>	<i>Tuesday</i>	<i>Doyōbi</i>	<i>Saturday</i>
<i>Suiyōbi</i>	<i>Wednesday</i>	<i>Nichiyōbi</i>	<i>Sunday</i>
<i>Mokuyōbi</i>	<i>Thursday</i>	<i>Nan'yōbi</i>	<i>What day?</i>

You will hear people omitting the final -*bi*.

3 Japanese drinking habits

There is a great deal of drinking in Japan, unbridled by licensing hours. It forms an important part of the semi-official end of work or business negotiations (see Unit 4, dialogue), but is also rampant without any such excuse.

Entertainment of friends and customers generally takes place outside the home, and you will therefore find establishments of all descriptions (and prices!) from the humble *ippai nomiya* (small drinking places where locals have a drink at the counter) or *yakitoriya* (specializing in barbecued chicken and/or pork offal) through the more respectable *bā* (*bar*) to various types of restaurants, and establishments offering female companionship, such as *kyabare* (*cabaret*).

The constant round of social drinking explains why there is such a wide range of tonics, digestive aids and hangover cures on offer. Some of the better known brands are *Mamushi dorinku*, *Seirogan* and *Panshiron*, respectively.

yakyū o mi ni
ikimasen ka?
won't you come and see the
baseball?

- In this unit you will learn
- further uses of some particles
 - how to make explanatory statements
 - about public holidays

Dialogues

True or false?

- 3 Michiko-san wa yakyū no kippu ga aru.
- 4 Futari wa disuko ni ikanai.

Structures

1 The use of *iku* and *kuru*

These two verbs are used in a somewhat different way from English *come* and *go*. In English, *come* and *go* are used loosely in expressions such as *I'll come with you* or *I can't come tomorrow* when we actually mean *I'll go with you* or *I can't go tomorrow*; Japanese makes a more rigorous distinction: *iku* refers only to movement away from the speaker/the domain of the speaker, and *kuru* to movement toward the speaker.

- 1 Ashita ikimasu. *I'll come/go (to your place) tomorrow.*
- 2 Ashita kimasu. *I'll come (to your place) tomorrow.*
- 3 Issho ni ikimasen ka? *How about coming/going with us?*
- 4 Issho ni kimasen ka? *How about coming with us?*

The first example may be said on the telephone, or written in a letter, i.e. when the speaker is away from the listener; by contrast, the second sentence is only possible if the speaker is at the listener's place. The distinction between the third and fourth sentences is less clear-cut, but the implication in 4 is that the speaker asks the listener to join him/her to go to a place that is perceived as his/her domain, either by virtue of ownership (e.g. the speaker's country cottage) or habit (*we always go there in the summer*).

2 [-masu base] ni iku/kuru: indicating direction or purpose

The masu base of verbs is what remains when -masu is taken off.

tabe	:	
mi	:	
nomi	:	(masu)
ka1	:	
shi	:	

These forms may be understood as the noun-form of verbs, since the -masu base of some verbs can act as an independent noun, e.g. oyogi *swim(ming)*, asobi *play(ing)*, odori *dance/dancing*.

Ni can be attached to the -masu base of most verbs in combination with a following iku or kuru; the meaning is very similar to ni expressing the direction of an action, although by force of context the implication is often one of purpose. Compare the following pairs (note that e cannot be used to indicate purpose):

Shinjuku e/ni ikimasu.	<i>I am going to Shinjuku.</i>
Oyogi ni ikimasu.	<i>I am going swimming.</i>
Sensei ga uchi e/ni kimasu.	<i>The teacher is coming to our house.</i>
Sensei ga nomi ni kimasu.	<i>The teacher is coming to have a drink</i>

This structure can also be used when verbs have an object:

Eiga o mimasu.	<i>I am seeing a film.</i>
Eiga o mi ni ikimasu.	<i>I am going to see a film.</i>

Where directional e/ni and ni indicating purpose are used together, direction always comes first (to avoid repetition, e is sometimes preferred to ni):

Shinjuku e asobi ni ikimasu.

Umi e oyogi ni ikimasu.

Disuko ni odori ni ikimasu.

Tomodachi no ie ni tomari
ni ikimasu.

*I am going out to
Shinjuku.*

*I am going to the ocean
for a swim.*

*I am going dancing at a
disco.*

*I am going to a friend's
place to stay the night.*

3 Kara and made

These have come up already in the dialogues of Units 4 and 5, kara after a place word meaning *from*, and made with time words in the sense of *until*. In fact, both can be used after time or place words, just like *from/after* and *to/until* in English. Like the English prepositions, they are often found in pairs.

Getsuyobi kara kinyōbi made natarakimasu.	<i>I work from Monday to Friday.</i>
Asa kara ban made terebi o mimashita.	<i>I watched TV from morning till evening.</i>
Kaisha kara Okkusufōdo Dori made arukimashita.	<i>I walked from the office to Oxford Street.</i>

4 O with verbs of motion

In Unit 4, we saw how de was used to indicate the place of action; with verbs indicating motion such as aruku or oyogu, o is often used instead of de to indicate the area over which the motion takes place:

Kono michi o aruita koto ga arimasu.	<i>I have walked along this street (michi).</i>
Kōen o sanpo shimashita.	<i>I walked (sanpo/suru) through the park (kōen).</i>
Hyaku mētoru o oyogimashita.	<i>I swam 100 metres.</i>

De will still be used, however, if the meaning of covering a distance is not implied, or if the action takes place aimlessly:

Kōen de sanpo shimashita.	<i>I took a stroll in the park.</i>
---------------------------	-------------------------------------

5 [sentence] n' da/desu: adding emphasis

N' da/desu (and its more formal variant no da/desu) may be regarded as an emphatic equivalent of da/desu. Note the forms that nouns, adjectives and verbs take in front of n' desu:

Igrisu-jin	na datta ja nai ja nakatta	n' da/desu. <i>He is British, you see.</i> <i>was</i> <i>isn't</i> <i>wasn't</i>
na adjectives		
Shizuka	na datta ja nai ja nakatta	n' da/desu. <i>It is quiet, you see.</i> <i>was</i> <i>isn't</i> <i>wasn't</i>
-i adjectives		
Samu-i	katta kunai kunakatta	n' da/desu. <i>It is cold, you see.</i> <i>was</i> <i>isn't</i> <i>wasn't</i>
verbs		
Ik-u It-ta Ika-nai Ika-nakatta		n' da/desu. <i>I am going!</i> <i>did go!</i> <i>am not going!</i> <i>didn't go!</i>

NOTE: sō behaves like a noun (sō na n' da/desu).

The n' desu form has an explanatory/highlighting force (*it's a matter of ...*) that is most typically seen in question-answer exchanges between two speakers. As you may gather from the English equivalent to the answer, the meaning is not as strong as *because ...* (for that, *kara* is available); instead it may conveniently be thought of as equivalent to *you see*, or perhaps an exclamation mark:

(Dōshite) ikanai n' desu ka? (*Why*) aren't you going?
O-kane ga nai n' desu. { *I haven't got any money (you see).*
 I haven't got the money!

Here, an explanation is called for in the question, and is given in the reply. Statements ending in n' desu are not necessarily answers to questions; explanatory statements occur in other contexts as well.

Ken Sugoi hito desu! *What a crowd!*
Michiko Doyōb wa itsu mo kō na n' desu yo.
On Saturdays it's always like this!

Michiko Yokattara, issho ni ikimasen ka?
How about coming with us?

Ken Dōmo arigatō ... demo, watashi-tachi mo dekakeru
n' desu. *Thanks, but we are going away as well!*

Explanatory statements may also be attached by the same speaker to something he himself has said:

Michiko Ara, dochira e? *Oh, where to?*

Ken Karuizawa desu. Yama o aruku n' desu.
To Karuizawa. We are going hill-walking

6 Kō, sō, ā indicating the way things are

These words are parallel in meaning to *kore/sore/are*: kō means *this way*, while sō means *that way* (ā is rarely used).

Doyōbi wa itsu mo kō desu. *On Saturdays it's always like this.*

Kō shimashō. *Let's do it this way.*
(i.e. as follows)

Sō shimashō. *Let's do that.* (Sore o shimashō is *not* idiomatic Japanese)

Sō desu ka? *Is that so?*

Exercises

1 Answer the questions using the n' desu form.

Example: Dōshite konai n' desu ka?

(*I am busy*) → Isogashu n' desu.

- Dōshite eiga o minai n' desu ka?
(*I have work to do, lit. there is study*)
- Dōshite ikanai n' desu ka?
(*I have no time*)
- Dōshite disuko ni ikanai n' desu ka?
(*I have to be back by 9.30 - use mongen*)
- Dōshite kakanakatta n' desu ka?
(*I didn't have a pen!*)
- Dōshite shashin o totta n' desu ka?
(*It was pretty*)
- Dōshite sērā (sweater) o k. ta n' desu ka?
(*It/I was cold*)

2 After a domestic discord, you are in an obstinate mood and threaten to go out by yourself (use either [noun] *ni iku* or ([noun] *o*) *-masu base ni iku*).

Example. I'm going to see a baseball match! → *Yakyū o mi ni iku!*

- a I'm going to the pub!
- b I'm going to see a film!
- c I'm going to a restaurant to eat!
- d I'm going to stay overnight at a friend's place!

3 Tell a Japanese friend about what you did in Shinjuku yesterday, using *kara* or *made*, or both, as indicated by the arrows.

Example: *Ie* ↔ *eki*; *aruku*: *Ie kara eki made arukimashita.*

- a Shinjuku-eki ↔ depāto; *takushī (taxi) de iku.*
- b *Niji* → ; *depāto no resutoran de gohan o taberu.*
- c → *Tomodachi no ie; aruite iku.*
- d *Yoji* → : *tomodachi no ie de asobu.*
- e *Yoru no jūji* ↔ *jūni*; *disuko de odoru.*

Language and society

Kyūjitsu holidays

Japan has the following public holidays (*shukujitsu*):

January 1	Gantan (New Year's Day)
January (second Monday)	Seijin no hi (Coming-of-age Day)
February 11	Kenkoku kinēbi (National Foundation Day)
March (spring equinox)	Shunbun no hi (Vernal Equinox Day)
April 29	Midori no hi (Greenery Day)
May 3	Kenpō kinēbi (Constitution Day)
May 5	Kodomo no hi (Children's Day)
July (third Monday)	Umi no hi (Marine Day)
September 15	Keiro no hi (Respect-for-the-aged Day)
September (autumn equinox)	Shūbun no hi (Autumnal Equinox Day)
October (second Monday)	Taiiku no hi (Sports Day)

November 3
November 23
December 23

Bunka no hi (Culture Day)
Kinro kansha no hi (Labour Thanksgiving Day)
Tennō tanjōbi (Emperor's Birthday)

When any of the above falls on a Sunday, the following Monday is treated as a holiday (*furikae kyūjitsu transfer holiday*). During *gōruden uīku* (the week between April 29 and May 5), which contains three public holidays, most employers grant a week's holiday. Any day other than Sunday between May 3 and 5 also becomes a holiday.

Offices and banks are generally closed for a three- to five-day period over the New Year (*O-shōgatsu*), whereas shops are closed on 1st (and often 2nd) of January only. Shops and department stores are usually open all day on Saturdays and Sundays (they are normally closed on one weekday instead). Banks, post offices and government offices are now closed on Saturdays.

jūsu ga hoshii
I want some juice

In this unit you will learn

- how to express wishes and requests
- how to express likes and dislikes, including liking some things more than others
- some useful words and phrases for train journeys in Japan
- about informal speech and given names

Dialogues

Yatto gōruden uiku ni natta. Anzai-san-tachi wa eki ni iru. Kore kara, densha ni notte um. e iku no da keredomo, noriokureru ka mo shirenai ...

Structures

1 Adverbial forms of adjectives

Many Japanese adverbs, such as *sugu* and *takusan*, are fixed in their form. As in English, however, it is possible to turn adjectives into adverbs. With *na* adjectives, *na* becomes *ni*; with *-i* adjectives, *-i* is replaced by *-ku*, producing the form which you have already met in turning *-i* adjectives into the negative:

Jiru-san wa taihen shinsetsu ni Eigo o oshiemasu. *Jill teaches English very kindly.*
 Ken-san wa hayaku arukimashita. *Ken walked fast.*

Note that the adverbial form of *ii* is *yoku*:

Yoku benkyō shimashita! *You studied well!*
 Asoko e yoku ikimasu ka? *Do you go there a lot/often?*

The adverbial forms of some *-i* adjectives can act like nouns and join together with particles. *Chikaku* (Unit 2 Structures 5) and *ōku* are found in both **A** and **B** position in **A no B** patterns:

chikaku no nomiya *a nearby bar*
 nomiya no chikaku *near the bar*
 ōku no Nihonjin *most/many Japanese*
 Nihonjin no ōku *the majority of Japanese*

The others (*furuku*, *hayaku*, *osoku*, and *tōku*) can be found in the following common phrases:

furuku kara *from olden times* hayaku kara *from early on*
 osoku made *until late* tōku kara *from far away*

2 Nouns and adjectives with *naru/suru*

If you want to link a noun or an adjective to *naru* or *suru* in order, for example, to talk about something becoming cold, or about making something hot, you must do the following:

noun	noun	+	ni	} naru/suru
na adjective	na	→	ni	
-i adjective	-i	→	-ku	

Jiru-san wa sensei ni narimashita.	Jill became a teacher.
Uisukī ni shimashō ka?	Shall we have whisky (uisuki)?
Tomu-san wa sugu genki ni naru deshō.	I expect Tom will become well/recover very soon.
Heya o kirei ni shimashō.	Let's make the room clean/ Let's tidy the room.
Samuku narimashita ne?	Hasn't it got cold?
O-furo o atsuku shimashō ka?	Shall I make the bath hot?

Note that time words are often found with **ni naru** where English would probably use *come*:

Yatto haru ni narimashita.	Spring (haru) has come at last.
Niji ni narimashita. Ikimashō ka?	Two o'clock has come/It's two o'clock. Shall we go?

There are some further 'idiomatic' uses of **naru** in Unit 9 dialogues.

3 [noun] to: for joining nouns

To is used to join nouns (but not verbs or adjectives) in the same way as *and* in English. Note, however, that even when joining more than two nouns, to must be used between each word, and you will sometimes even find it after the last noun as well:

sake to bīru
Igrisu to Nihon to Ōsutoraria
jamu to chizu to aisukurīmu (to)

See how to works with the noun **issho**, used both with **desu**, and adverbially with **ni**:

Watashi wa tomodachi to issho desu.	I am with a friend.
Tanaka-san to issho ni ikimashita.	I went with Tanaka-san.

In sentences like the last one, it is in fact possible to leave out **issho ni**:

Tanaka-san to ikimashita. I went with Tanaka-san.

Note the similar use of **to** with some verbs, such as **asobu** and **hanasu**, in the same way as *with* in English:

Tarō-kun to asobimashō. Let's play with Tarō kun.
Suzuki-san to hanashimashita ka? Did you talk with Suzuki-san?

(Compare the latter with:

Suzuki-san ni hanashimashita ka? Did you talk to Suzuki-san?)

4 Expressing wishes: [noun] ga hoshii and [-masu base] -tai

a The **-i** adjective **hoshii** is used in expressing wishes for concrete things. Note that the basic pattern is **A wa X ga hoshii**, **A** being the person with the wish, and **X** the thing they wish for:

Watashi wa kōhī ga hoshii desu. I want some coffee.
Jiru-san, nani ga hoshu desu ka? Jill, what do you want?
Nani mo hoshikunai desu. I don't want anything.
Tomu-san wa bīru ga hoshii deshō. I expect Tom wants a beer.

b In order to express the wish to do something, rather than the wish for a concrete thing, you add the **-tai** ending to the **-masu** base (Unit 7 Structures 2) of the appropriate verb. The **-tai** ending has negative and past forms just like other **-i** adjectives:

Watashi wa hayaku kaeri ta i desu.
I want to get back early.
Michiko-san ni ai ta i kunai desu ka?
Don't you want to meet Michiko-san?
Ken-san wa Shimoda e iki ta i katta deshō.
I expect Ken wanted to go to Shimoda.

Note that **A wa X o suru** can become either **A wa X o shitai**, or **A wa X ga shitai** (compare **A wa X ga hoshii**):

Watashi wa Nihon de kamera ga/o kaitai desu. I want to buy a camera in Japan.
Jiru-san wa tako ga/o tabetakunai deshō. I expect Jill doesn't want to eat octopus.

In spoken Japanese, *hoshii* and the *-tai* ending are normally used to express the feelings of the speaker or, in questions, to ask about the feelings of the person being spoken to. They are not normally used to describe the wishes of third persons, unless in reported speech, or in sentences with endings equivalent to *it seems* or *apparently* (Unit 15 Structures 1, 3; Unit 17 Structures 6; also see Unit 14 Structures 4).

5 Expressing requests using *kudasai* and *nasai*

We have already met the structure [noun] *o kudasai* as a method of asking for concrete things (Unit 4 Structures 3). Verbs can be linked to *kudasai* in two ways in order to ask people to do things:

-te form o-[-masu base]	} kudasai
Motto yukkuri hanashite kudasai.	<i>Please speak more slowly (yukkuri).</i>
Soko ni go-jūsho o o-kaki kudasai.	<i>Please write your address there.</i>

The second way is the more formal. Also note the following, even more polite, alternatives:

Shōshō o-machi kudasaimase.	<i>Perhaps Sir/Madam would wait a little (shosho).</i>
O-namae o kaite kudasaimasen ka?	<i>Would you be kind enough to write your name?</i>

Kudasaimase is a more formal version of *kudasai*. *Kudasaimasen ka?* is polite because the request is framed indirectly, as a negative question (lit. *Wouldn't you please ...?*).

The structure using the [-masu base] *nasai* is more abrupt; you will be most likely to hear mothers using it to their children:

Hayaku tabe nasai!	<i>Eat it up quickly!</i>
--------------------	---------------------------

However, note that the phrase *O-yasumi nasai*, which literally means *Rest!*, is the Japanese equivalent of *Good night* and not at all abrupt.

The most straightforward way of forming negative requests, that is, of asking people not to do things, is as follows:

[present plain negative] de kudasai	
Kuruizawa e ika ₁ nai de kudasai.	<i>Please don't go to Kanazawa.</i>
Mi ₁ nai de kudasai.	<i>Please don't look.</i>

The verb form in front of *kudasai* is really a negative equivalent of the *-te* form (Unit 17 Structures 5).

Note that between friends and within families you will hear the positive and negative *-te* forms being used alone, without *kudasai*, as informal, friendly requests.

Chotto matte!	<i>Wait a bit!</i>
Shinaide yo!	<i>Don't do it! (feminine)</i>

6 Likes and dislikes: more on *wa - ga* patterns

The adjective *suki na* (used for likes) and its opposites *kirai na* and *iya na* (which is more specific and forceful) work in a way similar to *hoshii*:

Watashi wa Nihon no biru ga suki desu.	<i>I like Japanese beer.</i>
Ano sensei ga iya desu!	<i>I hate that teacher!</i>
Tako ga amari suki de wa nai n' desu ka?	<i>Don't you like octopus very much?</i>

So also do *jozu na/heta na*, which deal with being good/bad at particular skills such as a language or sport, and the slightly overlapping *tokui na/nigate na*, which deal with having/lacking confidence in one's ability in general areas, such as academic subjects as well as sports, etc. Note that you would never use *jozu* to refer to your own prowess at something, while *tokui* would be perfectly acceptable.

Michiko-san wa Eigo ga jōzu desu.	<i>Michiko-san is good at English.</i>
Nihongo ga o-jozu desu ne!	<i>Aren't you good at Japanese!</i>

(note the honorific *o-*; see *o-genki desu ka?* Unit 2
Language and society 1)

Ken-san wa tennis ga heta desu.	<i>Ken is bad at tennis.</i>
Watashi wa sūgaku ga nigate desu.	<i>I am hopeless at maths (sugaku).</i>

A similar structure is used as a basic way of giving more information about any noun *A*, particularly in describing people. This is really an extension of our very first pattern, *A wa B desu*, to *A wa B ga [adjective] desu*:

Michiko-san wa me ga kirei desu.	<i>Michiko-san has pretty eyes (me).</i>
Rondon wa tenka ga warui desu.	<i>The weather in London is bad.</i>

The following set phrases fall nicely into this pattern:

se ga takai/hikui	tall/short (se stature)
atama ga ii/warui	clever/stupid

Tomu san wa se ga takai desu.
Jiru-san wa atama ga ii desu.

Note also the behaviour of the -i adjectives *ōi* many, and *sukuna.i* few:

Igirisu wa ame ga ōi desu.	Britain has a lot of rain
Tōkyō wa koen ga sukuna.i desu.	Tokyo has few parks. (kōen park)

It might help you to grow used to this kind of *wa - ga* pattern if you think of it as meaning literally *As for A, B is ... (wanted, liked, disliked, pretty, many, few, etc.)*. More information on such patterns will be given in Unit 10 Structures 4.

7 Comparisons

Since adjectives in Japanese have no special comparative forms, comparison is indicated through the use of sentence structures based on the following:

Comparing two things, A and Y

i A wa Y yori [adjective] desu A is [adjective]-er than Y

In this pattern, A is described through comparison with Y. Yori is a particle equivalent to *than* in English.

Jiru-san wa Tomu-san yori shinsetsu desu.	Jill is kinder than Tom.
Rondon wa Rōma yori samukatta desu.	London was colder than Rome.

ii Y yori A no hō ga [adjective] desu A is [adjective]-er than Y

This gives us exactly the same information as the first pattern, but we are comparing A to Y rather than describing A by means of Y. Hō is a noun meaning *side/direction*, and is therefore joined to A by using *no*:

Tomu-san yori Jiru-san no hō ga shinsetsu desu.
Rōma yori Rondon no hō ga samukatta desu.

The factual content is the same, but rather than describing Jill's personality, or the weather in London, we have been talking about the relative qualities of Tom and Jill, Rome and London.

Note that although these are the basic structures, a wide number of variations are possible. For example:

Jiru-san wa Ken-san yori hayaku okimasu.	Jill gets up earlier than Ken.
---------------------------------------------	--------------------------------

[Adjective] hō works out as equivalent to *the [adjective]-er one* in English:

Yasui hō o kaimashō. *Let's buy the cheaper (yasui) one.*

Motto, equivalent to *more*, is used to reinforce comparisons, and to make a comparison clear when Y is not stated:

Tōkyō wa Shidonī yori motto ōki. desu.	Tokyo is bigger than Sydney.
Motto shizuka ni hanashite kudasai.	Please speak more quietly.

Comparing three or more things

(A to B to ... Z no naka de)	(Out of A, B, ... and Z) A
A ga ichiban [adjective] desu	is the [adjective]-est.

Ichiban is equivalent to English *most*.

Rondon to Pari to Rōma no naka de Rōma ga ichiban furui desu.	Out of London, Paris and Rome, Rome is the oldest.
---------------------------------------------------------------------	-------------------------------------------------------

If you are singling something out from a general category Q rather than from among specific alternatives, Q no naka de is sufficient:

Ginza no naka de koko ga ichiban takai desu.	This is the most expensive (taka.i) place in the Ginza area.
-------------------------------------------------	--------------------------------------------------------------------

With this structure too, many variations are possible:

Hādo-san tachī no naka de Jiru-san ga asa ichiban hayaku okimasu.	Jill is the first of the Herds to get up in the morning.
-------------------------------------------------------------------------	-------------------------------------------------------------

8 Expressing length of time

In Unit 5 Structures 6 and Unit 6 Structures 6, 7 and 8, you encountered various expressions concerned with the time at which things are done, that is with points of time. Here we are looking at expressions to do with how long things take. For instance, *-ji* is used to denote the hour at which something is done, while *-jikan* denotes the number of hours which something takes:

Ken-san wa yûbe ichipikan
denwa de hanashimashita.

*Ken talked on the phone for
an hour yesterday evening.*

No particle is needed with expressions of length of time, but *gurai/kurai* can be attached to give the idea of *about*, just as *goro/koro* is used with expressions of point of time:

Nijikan *gurai* machimashita.

*I waited for about two
hours.*

Note also that to ask about length of time you should use *dono gurai/kurai*:

Dono gurai kakarimasu ka?

How long does it/will it last?

See Appendix 1 for more expressions of length of time, and details of how they combine with numbers.

時間

-ji kan

Exercises

1 You are busy getting ready for an outdoor party and your rather nosy next-door neighbour, hoping to be invited, offers to help. With a friend if possible, supply both parts of the conversation, first accepting, then refusing.

Example: *o-sake o akeru (ake.ru to open)*

Neighbour: *O-sake o akemashô ka?* You: *Hai, akete kudasai.*
lie, akenaide kudasai.

- a *teburu o dasu*
- b *kyabetsu o kiru (kyabetsu cabbage)*
- c *chizu o kai ni iku*
- d *koppu o arau (koppu glass) (ara.u to wash)*

2 Here is a table showing the likes and dislikes and other pieces of information about some of our characters.

	suki	kirai	tokui	nigate	tokucho (special characteristics)
Jill	kôhî	tako	tenisu	Furansugo	nagai kami ¹
Jill	biru	jûsu	gitâ ²	ryôri	se ga takai
Ken	Michiko	benkyô	yakyû	ragubi ³	ôku karada ⁴
Michiko	Ken	niku	Eigo	piano	kirei na me

¹kami hair ²gitâ guitar ³ragubi rugby ⁴karada body

Use the **A wa X ga** [adjective] **desu** construction to make five sentences about each of them, and then make similar sentences about yourself.

Example: *Jiru-san wa kôhî ga suki desu; tako ga kirai desu; tenisu ga tokui desu; Furansugo ga nigate desu; sore kara kami ga nagai desu.*

3 Using the same table, work out their respective responses to the question *Nani o shimashô ka?* (NOTE: (here) *tenisu* (etc.) *o suru* play tennis (and other sports); *gitâ/piano o hiku* play the guitar/piano).

Example: (Jill) *Watashi wa kôhî ga/o nomitai desu or Watashi wa tenisu ga/o shitai desu.*

4 Again using the table, work out the probable response to each question of the person specified in brackets.

Example: *Biru ga suki desu ka?* (Jill)

lie, biru yori kôhî no hō ga suki desu.

- a *Kohî ga suki desu ka?* (Tom)
- b *Ragubi ga tokui desu ka?* (Ken)
- c *Furansu e ikitai desu ka?* (Michiko)
- d *Yakyû ga mitai desu ka?* (Jill)

5 Put the following dialogues into polite-style Japanese:

- a A How long do you study every day?
B Three hours.
- b A At what time are you meeting Michiko-san?
B At 5 o'clock.

- c A Apples are the fruit (kudamono) I like the best.
 B I like oranges rather than apples.
 d A Hasn't it become warm!
 B I expect you're glad we came to Shimoda.

1 Train journeys

The train is a vital form of transport in Japan, not only for commuting but also for going on holiday. If you are planning to travel by train during the peak season (at New Year, during Golden Week, and in August), it is advisable to book seats well in advance. These reserved seats are called *shiteiseki*; there are always carriages containing unreserved seats, *jiyūseki*, but you would have no chance of getting one of these unless you arrived very early at the station from which the train starts.

When going by train, the general term is *densha de iku*, the underground, or subway, is *chikatetsu*. *Kyūko* denotes an express train, and *tokkyū* a super-express. In 'Japanese English' the latter is confusingly known as a 'limited express'; this is short for 'limited-stopping express'. And, of course, we must not forget the *shinkansen*, Japan's famous 'bullet train'.

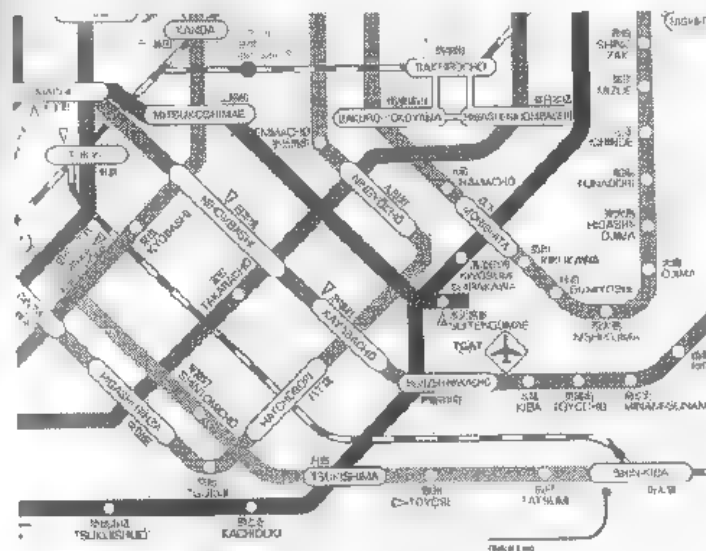

Tickets for normal journeys (*kippu* or *jōshaken*) can be purchased from automatic machines. If there is no romanized price chart, ask someone how much your ticket will cost: *X made ikura desu ka?* How much is it as far as X? Tickets for long distances, and the special tickets for travelling by express, etc. (*kyūkōken*, *tokkyūken*) which you need in addition to your *jōshaken*, must also be purchased either over the counter or by machine. You might find the following phrases of use. (Note that tickets are counted using *-mai*.)

Kyōto made ichimai.
 Shinkansen de Morioka
 made sanmai kudasai.
 Ōfuku desu ka?
 Iie, katamichi desu.

One to Kyoto.
 Three to Morioka by
 shinkansen please.
 Is that a return (ōfuku)?
 No, it's one way
 (katamichi) only.

Basic Fare Ticket	
Originating Station	東京
Destination	空港第2ビル
Departure Date	11月16日
Issuing Office	東京駅
Class	普通
Rate	1128円
Total Amount	1128円
Date of Issue	11月16日

No train journey in Japan would be complete without the purchase of a packed lunch (*o-bentō*) at the station or on the train. In the summer, you might try the packs of frozen mandarin oranges (*mikan*).

map of Tokyo underground

2 Verb combinations such as *noriokureru*

Noriokureru, to be late for a train, is formed by adding the *-masu* base of *noru*, to get on a train, to *okure.ru*, to be late. Many similar such combinations exist. Some examples include:

hanashi-au	to talk together, discuss (a.u meaning to match/harmonize, not to meet)
tori-dasu	to take out, produce
omoi-dasu	to remember (in the sense of take something out of your memory - omo.u to think, feel)

3 Some notes on informal speech

As a foreigner, you may not have much opportunity to use informal speech yourself, but you will hear it all around you, and may develop friendships with people of your own age and status, with whom its use would often be appropriate. Within the family, of course, the Anzais speak informally to each other. This involves using the plain forms of verbs and adjectives at the ends of sentences, although, like Mrs Anzai, the women in particular will use polite forms as well, and certainly say desho rather than darō. Da at the end of sentences will be avoided by women, even before yo, or softened by adding wa (Unit 5 Language and Society 4). In informal speech, both males and females will sometimes omit the particles wa, ga and o:

Kore wa kirei desho! → Kore kirei desho!
 Nodo ga kawakimashita. → Nodo kawaita.
 Gohan o tabemashita ka? → Gohan tabeta?

(For more information on informal speech, see Unit 22.)

4 Given names in Japanese

As we saw in Unit 1 Language and society 2, Japanese adults are addressed and referred to by their surnames rather than by their given names. When addressing or referring to a child, however, the given name is normally used. Common endings for girls' given names are -ko, -e and -mi (Yukiko, Kazue, Mayumi); for boys' names -rō, -o, -ya, and -hiko (Jirō, Kazuo, Shinya, Haruhiko). Note that in Japanese it is customary for the surname to precede the given name: Anzai Michiko rather than Michiko Anzai.

kono chairō no
 enpitsu wa
 ippon ikura desu
 ka?
 how much is one of these brown
 pencils?

In this unit you will learn

- how to ask prices and costs per unit
- how to count items
- colour terms
- how to go shopping in Japan

Dialogues

Ken-san wa Michiko-san to issho ni kaimono ni iku. Futari wa Ginza de chikatetsu o orite, chikaku no depāto made aruite iku. Depato ni haitte, sōdan suru.

Michiko Ken-san, donna mono ga kintai desu ka?
Ken Sō desu ne ... Iroiro arimasu ga, mazu sukoshi m tai desu
Michiko Sō desu ka? Ja, ikka kara mimasu ka?

kaimono shopping	depāto department store
Ginza famous shopping area in Tokyo; station on the Ginza, Marunouchi and Hibiya underground lines	sōdan (suru) to consult (each other)

True or false?

- 3 Gurin no enpitsu wa ippon hyaku-en desu.
4 Ken-san-tachi wa tshatsu o nima kaimashita.

Structures

1 Verbs with a choice between o and kara

Verbs like *ori.ru* and *de.ru* (to come/go out, leave) commonly take *o* to mark their object, i.e. the place one alights from, or comes/goes out of:

Kyōto de densha o orimashita.	We got off the train at Kyoto.
Futari wa Michiko-san no ie o demashita.	The two left Michiko-san's house.

Instead of *o*, *kara* also can be used in these sentences; the difference being that the idea of *out of* is emphasized with *kara*, so if you tell someone to get out of your room, *kara* is the one to use for maximum effect!

Watashi no heya kara dete yo! Get out of my room!

2 Colour terms

Words indicating colour may be *-i* adjectives (*aka.i*, *kiro.i*) or nouns (*chairo*, *gurin*). All colour adjectives have alternative noun forms (lacking the final *-i*), while not all nouns indicating colour have adjective forms. Thus the adjective *aka.i* has the noun form *aka*, whereas no adjective form is available for *midori* (the final *i* here is *not* an adjective ending) or *bēju* (see following list). Some noun colour terms have two forms because *iro* (colour) can optionally be attached to them, e.g. both *midori* and *midori-iro* are used.

Here is a list of some common colour terms and any alternative forms they have.

adjective	noun	English equivalent
aka.i	aka	red
ao.i	ao	blue/green
kuro.i	kuro	black
shiro.i	shiro	white
kiro.i	ki(iro)	yellow
chairo.i	cha(iro)	brown
	kon(iro)	navy blue
	midori(iro)	green
	murasaki(iro)	purple
	orenji(iro)	orange
	bēju(iro)	beige
	burū	blue
	gurē	grey
	gurin	green

Aoi/ao is a notoriously vague term, being used for colours such as that of the sky, the sea, the green of traffic lights, the pale green of young leaves, and even the paleness of a face. *Midori* is also used for colours normally observed in nature such as fully grown leaves and evergreens, while *gurin* and *burū* (and most other English-derived terms) are mainly used for the colour of dresses or shoes.

When *describing* the colour of some object, the adjective form is used where available; when a *choice* of colours is made (Ken's *aka no bando*), or something is described which has two colours or more, the noun form is used.

Kono shatsu (shirt) wa akai desu.	This shirt is red.
Kono shatsu no iro wa aka desu.	The colour of this shirt is red.
Kanojo wa itsumo shiro o kimasu.	She always wears white.
Shingō (traffic lights) wa aka deshita.	The traffic lights were at red.
Kon to aka no nekutai (tie) ga kaitai desu.	I want to buy a red and blue tie.

3 Use of *no* standing in for other nouns

In expressions such as *akai no*, *no* stands for *bando*, functioning in much the same way as *one* in English (e.g. *the red one*). Ken is able to avoid repeating *bando* as it is obvious what he is referring to.

When the salesperson later on says *komakai no*, it is clear from the context that *no* refers to *o-kane*, even though *o-kane* has not actually been mentioned. Adjectives preceding *no* in this sense take the same form as when preceding nouns.

Salesman	Kono nekutai wa ikaga desu ka?	How about this tie?
Customer	Motto kirei na no wa arimasen ka?	Haven't you got anything nicer?
OR	Motto yasui no wa arimasen ka?	Aren't there any cheaper ones?

4 *Wa* and *ga* with *ii*

Besides meaning *it is good*, *ii* can also mean *it's all right/I don't want it*. (Thus *ii desu* is often used to refuse an offer of something: *Kohi o nominasen ka? - Iie, ii desu.*)

Compare the meaning of the following pair of sentences, identical except for *wa* and *ga*:

Kore wa ii desu.
Kore ga ii desu.

Said by a customer to a salesperson, these two sentences will have a rather different effect: while the *wa* sentence means *I don't want this one*, the *ga* sentence means *This is what I want* (i.e. *I'll take it*; recall that *ii* can indicate choice or preference, Unit 8). The difference in meaning is largely due to the distinctive focus (see Unit 3 Structures 2 and Unit 10 Structures 4) provided by *wa* (*as far as this one is concerned, it's OK*) and *ga* (*this is the one that's good*).

5 'Humble' offers and statements with *o*-[*masu* base] *suru*

In Unit 8 we saw that *kudasai* (*mase*) can be used after *o*-[*masu* base] to make a (very) polite request.

Making 'humble' offers or statements is another way of being polite to people, as in effect you raise the listener's position by

lowering your own. Such offers or statements are formed by attaching *shimashō ka* or *shimasu* instead of *kudasai* to *o*-[*masu* base]. The implication is that the action is to be performed for the benefit of the listener:

O-tsuke	shimashō ka?	Shall I/would you like me to attach it?
O-mochi	shimashō ka?	Shall I hold (mots.u) it for you?
O-yomi	shimasu.	I shall read it for you.
O-machi	shimasu.	I shall wait for you.

See Unit 18 for more information on humble expressions; see also Language and Society 2 and 6 in this unit.

6 *De* with amounts of money

Here, *de* really indicates the instrument by means of which an action is performed (see Unit 4 Structures 3), in the sense of the action of buying (or selling) something for an amount of money:

Ichiman gosen-en de kaimashita. *I bought it for 15,000 Yen.*

Note that you can have two instances of *de* in a sentence, with the other one indicating the location of the action of buying.

Kono shatsu wa depōto de sanzen-en de kaimashita.	<i>I bought this shirt at a department store for 3,000 Yen.</i>
------------------------------------------------------	-------------------------------------------------------------------------

De is also used in giving the total sum of money from which one wants change:

Gosen en de o-tsuri ga arimasu ka?	<i>Do you have change from 5,000 Yen?</i>
---------------------------------------	-----------------------------------------------

7 Counters

In Japanese, most nouns are counted with the use of specific 'counters'; English only does this with some nouns, for instance bread, which is counted in either *loaves* or *slices*: *one loaf/slice of bread*.

Counters are normally attached to the Chinese set of numerals, although alternative forms using Japanese numerals are commonly used for the numbers 4 and 7. In some combinations, numerals and counters will assume slightly different forms due to phonetic change: thus *hon* becomes *-pon* or *-bon*. See Appendix 1 for a list of common combinations. (Counters which begin with the same consonant almost always undergo similar phonetic changes.)

Many counters are not restricted to use with one particular noun, but combine with a variety of nouns referring to things of common shape or type. Thus, *-hon* is used for long, thin, and often cylindrical, objects such as pencils, cigarettes, bottles, trees, legs and bananas. Belts, ties, and even wrinkles are also counted with *-hon*.

Flat things like sheets of paper, CDs, paper money, stamps, tickets and some items of apparel (flat in their folded state), like shirts and kimonos, are counted with *-mai*. For bound matter, like books, magazines and notebooks, *-satsu* is used.

Other useful counters include *-hai* for cup-, glass- and spoonfuls and such like; *-dai* for machines and appliances such as computers, cars, and TV sets; *-wa* for birds and fowl; *-hiki* for animals and insects, and, last but not least, *-nin* for the human species (note the irregular forms *hito-ni* and *futa-ni* for one and two persons respectively).

Some more abstract nouns (plans, problems, lectures and the like) lack specific counters; for these, *-tsu* (see Unit 6) is used with the Japanese numerals 1–9. Thus, 9 lectures would be counted as *kokono-tsu*, 10 as *to*, and 11 onwards with Chinese numerals (*jūichi*, *jūni*...). *-tsu* (or alternatively *-ko*) can also be used with some concrete objects like apples, pears, oranges, boxes and other things of varying shape. If you can't recall any specific counter for a noun, it is always worth trying *-tsu*!

Things like cigarettes and pencils can also be counted in packet- or boxfuls (*-hako*), and bottles in casefuls (*-kēsu*).

Weights, measures and currency units are also used like counters: *kiro* (kilogram/kilometre), *guramu* (gram), *en* (yen), *doru* (dollar), *pondo* (pound of weight/sterling).

Counters are most commonly used in basic structures such as (A ni) B ga aru/iru and (A wa) B o suru; in either structure the combination numeral+counter occupies the same position that adverbs of quantity like *takusan* would occupy; they are also similar in that no particles are attached.

Uchi ni	neko (cat)	ga	takusan	imasu.
Uchi ni	neko	ga	san-biki	imasu.
	Nihonjin no			
	tomodachi	ga	shichi-nin	imasu.
	Wan	ga	ni-hon	arimasu.
	Kami (paper)	ga	nan-mai	arimasu ka?
	Kōgi (lecture)	ga	iku-tsu	arimasu ka?

The first two sentences mean: *There are many cats at home; There are three cats at home.*

Watashi wa	jinzu (jeans)	o	ni-hon	kaimashita.
	Ringo	o	mit-tsu/san-ko	kudasai.
	Kohi	o	nihyaku-	
			guramu	kudasai.
	Biru	o	nan bon	kaimashō ka?

The first sentence means: *I bought two pairs of jeans.*

Counters are also commonly added to the enumerations. Note that *o* and *ga* are normally added to all items but the last.

Tishatsu to jisho o kaimashita.

→ Tishatsu o nimai to jisho o issatsu kaimashita.

Banana to remon to orenji ga arimasu.

→ Banana ga sanbon to remon ga ikko/hitotsu to orenji ga sanko/mittsu arimasu.

Apart from being used after the nouns they count, counters are also found before nouns, with *no* attached. This is especially common in titles of books or films, and other situations where a scene is being set:

Shichinin no samurai.

The Seven Samurai.

Futari no Amerikajin ga
chikatetsu o orimashita.

*Two Americans got off the
underground.*

If understood from the context, the noun (and any attached particle) preceding the counter is omitted, leaving the combination numeral+counter on its own (again without particle):

– Kyō shī dī o kaimashita.

– Watashi mo sanmai
kaimashita yo.

– I bought some CDs today.

– I bought three, too.

Note that *hitori*, *futari* ... are also used as nouns, with particles attached:

Futari wa takusan nonda.

The two/both drank a lot.

8 Cost per unit

In combination with the numeral *one* only, counters are used to indicate cost per unit in the following way.

Kono meron	wa	hito-tsu/ik-ko	sanzen-en	desu.
(melon)				
Banana	wa	ichi-kiro	happyaku-en	desu.
Kohi	wa	ip-pai	ikura	desu ka?

(The meanings of the above sentences are as follows: *These melons are ¥3,000 each. Bananas are ¥800 a kilo. How much is a cup of coffee?* (lit. *How much is coffee per cupful?*)

9 De with ii

With ii (here used in its basic meaning *is good*), de indicates sufficiency:

Yasui no de ii desu.
Ashita de ii desu.
Sen-en de ii desu.

*At the cheap one will suffice.
Tomorrow will do.
1,000 Yen will be fine.*

Exercises

1 Describe the contents of the picture below, using the pattern:
B ga [numeral+counter] arimasu/imasu

Example: Isu ga mitsu arimasu.

- | | |
|---------------------------|------------------------|
| a Kodomo (<i>child</i>) | d Tori (<i>bird</i>) |
| b Neko | e Pen |
| c Hon | |

Then, in the same order, and preferably with a friend, practise asking questions about the contents of the picture, using the pattern: B ga [question word + counter] arimasu ka?/imasu ka?

Example: Isu ga ikutsu arimasu ka?

2 Ask how much *one* of each of the following items is:

- | | |
|-----------------------------------|---------------|
| a Shinbun | f Aka enpitsu |
| b Kan-biru (<i>can of beer</i>) | g Neko |

- | | |
|-------------------------------------------------------|----------------------------------------------------------------|
| c Kōhī | h Kono manshon (<i>'mansion'</i>
<i>luxury apartment</i>) |
| d Kodomo no shatsu | |
| e Fuji-san no e-hagaki
(<i>picture postcard</i>) | |

Example: Orenji wa hitotsu ikura desu ka?

This time, ask the question as before and then reply as indicated, using no. (Do this with a friend if possible).

Example: orenji (ōkii, ¥100)

Q Orenji wa hitotsu ikura desu ka?

A Ōkii no wa hitotsu hyaku-en desu.

- | | |
|----------------------------------------------|------------------------------------------|
| i Shinbun (Furansugo,
¥1,000) | l Fuji-san no e-hagaki
(chisai, ¥120) |
| j Kan-biru (tsumetai, ¥600) | m Neko (sono genki na,
¥10,000) |
| k Kodomo no shatsu (Itaria-
sei, ¥20,000) | |

3 Complete by supplying the appropriate counter:

Example: Ringo o (4) kudasai. Ringo o yottsu kudasai.

- | |
|------------------------------------------------------------------------------------------------|
| a Supotsuka (<i>sports car</i>) o (5) kaimashita. |
| b Kitte o (10) kaimashita. |
| c Kino hon o (3) yomimashita. |
| d Maiasa tōsuto (<i>toast</i>) o (2) to yude-tamago (<i>boiled egg</i>)
o (2) tabemasu. |
| e Sore kara, kōhī o (1) nomimasu. |

4 How would you say the following in Japanese? (If in difficulty, search the dialogue for clues.)

- | |
|--------------------------------------------------------------------------------------------------------------------------------------|
| a Excuse me, but where is the camera sales counter? |
| b Do you have lenses (<i>renzu</i>) by themselves? |
| c How much is this small one? – This one? It's ¥35,000. |
| d How much are the apples? – ¥50 each. |
| e In that case, I'd like five please. – That will be ¥250. |
| f Yesterday, Tarō-kun ate four hamburgers (<i>hanbagā</i>)
and six ice-creams. Last night he fell ill (<i>byōki ni naru</i>). |

Language and society

1 Counting floors

Ik-kai (ground floor) literally means *first floor*, as Japanese follows American usage. When converting British English floor numbering into Japanese, it is therefore necessary to add one number, e.g. second floor becomes *san-gai*.

2 Speech levels

In Japanese, levels of speech play an important role in differentiating people's status in society. Customers, for instance, are treated as superiors by sales personnel, who will use very polite language towards them. Conversely, some customers, in particular rural males, will speak down to the persons serving them.

Such a customer might use (not necessarily consistently) *ikura?* without the ending *desu ka* that is used between equals in normal polite conversation, whereas salespeople will often employ the very polite ending *de gozaimasu* instead of *desu*. Another example is the assistant's use of *kashikomarimashita*; this form would never be used by a customer.

The difference in status is also obvious in that sales personnel will thank customers very politely for any purchase, while customers will not normally say 'thank you' at all; if they do, they are likely to use a less polite expression such as *dômo* or *arigato*, or perhaps the combination *dômo arigato*.

3 Negative questions and their answers

Komakai no wa arimasen ka? (*Haven't you anything smaller?*) is a question containing a negative (*arimasen*). In English, if the answer to such a question uses a positive verb, it will begin with *Yes*; if the answer uses a negative verb, it will begin with *No*. In Japanese, however, the use of *Yes* or *No* depends on whether the reply agrees, or disagrees, with the assumption behind the question:

- | | |
|----------|-------------------------------------------------------------------------|
| Question | <i>Komakai no wa gozaimasen ka? Haven't you any change?</i> |
| Answer | <i>Hai/ê, arimasen. Yes, you're right, I haven't (= No, I haven't).</i> |
| Answer | <i>Iie, arimasu. No, you're wrong, I have (= Yes, I have).</i> |

Thus, if the answer also contains a negative (*arimasen*, etc.), it is introduced by *hai* (or the less formal *ê*) in the sense of *Yes, you are correct in what you suggest*; if, on the other hand, the answer diverges from what has been suggested in the question, it is introduced by *iie* (*No, what you are suggesting is not correct*). Such answers are normally accompanied (or replaced) by nodding (*hai*, *ê*) or shaking (*iie*) of the head.

Invitations/offers that are made in the form of a negative question are answered differently:

- | | |
|---|------------------------------------------------------------|
| A | <i>Eiga ni ikimasen ka? How about going to see a film?</i> |
| B | <i>Arigatô gozaimasu. Thank you (for inviting me).</i> |

To decline the offer, one normally gives some excuse (*isogashii*, etc.), but it is also very common just to intimate vaguely that you cannot go by using an unfinished sentence like: *Sumimasen, kyô wa chotto ...* (on *chotto*, see below).

4 Ê, chotto ... to soften a refusal

This is an unfinished answer. Ken's answer to the salesperson's negative question would in full be:

Ê, chotto arimasen.

Chotto (*a bit; somehow*) is commonly used in this way to turn down requests, invitations, etc. without being too abrupt.

5 Uses of hai and naruhodo

Apart from its meaning of (formal) *yes*, *hai* is also used to indicate that one understands a question or follows what is being said. It does not necessarily signal agreement, so beware, particularly in business negotiations! This use is especially common on the telephone, where it is not possible to rely on other signals of being 'with it', such as nodding. In informal conversation, *ê* and (u)n are widely used instead of *hai*, again accompanied by frequent nods.

Another way of chiming in with others' remarks is by saying *naruhodo* (*I see, indeed*; see Unit 14, dialogue). It can be used instead of *hai* for the sake of variety.

Hai (*dôzo*) is also used informally in the sense of *here you are* when handing over things.

6 The use of O-azukari shimasu: a formal acknowledgement in shops, etc.

This is a formal expression used to acknowledge that you take custody of some object or person. In particular it is used by sales personnel as a verbal confirmation that you have paid and that some change is due. Compare this to *chôdo itadakimasu*, which is used to acknowledge that you have paid the exact amount.

10

**bīru mo wain
mo reizōko ni
ireta?**
did you put both the beer and the
wine in the fridge?

In this unit you will learn

- the various uses of the particles *wa*, *ga*, and *mo*, including some new uses as how to say *both ... and* and *neither ... nor*
- how to become familiar with a way of linking nouns in the sense of *among others*
- some information about the way Japanese entertain their guests

Dialogues

Doyōbi no gogo, Anzai-sensei no kazoku wa Hādo-san-tachi o shokuji ni shōtai shita. Sore de, Anzai-sensei no okusan to Michiko-san wa ima yūhan no yōi ni isogashi.

Okusan Biru mo wain mo reizōko ni ireta?

True or false?

- Tomu-san wa kita koto ga nai.
- Anzai-san wa Hādo-san ni denwa shita.

Structures

1 [noun] ya [noun] (nado): linking nouns

In Unit 8, we saw that **to** implies that every relevant item has been mentioned. **Ya** also links nouns in the meaning of *and*, but the implication is that not all relevant items have been mentioned. **Ya** does not come after the last item, which can, however, be followed by **nado** (*and others*), which serves to reinforce the meaning of **ya**:

Biru ya wain (nado) o kaimashita.	I bought beer, wine and such like.
Orenji ya ichigo (nado) ga arimasu.	There are oranges, strawberries and other fruit.

Tōkyō ya Kyōto (nado)
ni/e ikimashita.

We went to Tokyo and
Kyoto, among other places.

Nado can also be used on its own:

Biru nado o kaimashita. I bought beer, among other things.
Orenji nado ga arimasu. There are oranges and such like.

2 More on **mo** (including summary of its uses)

Unlike **to**, which can be attached to the last noun in a sequence, and **ya**, which cannot, **mo** *must* be repeated after each noun.

When **mo** is used after one noun only, it is equivalent to English *also, too* in positive sentences (see Unit 1), whereas in negative sentences it means (*not*) *either*. Recall the following example from the Unit 6 dialogue:

Ha mo migakanakatta deshō? You didn't brush your teeth
either, did you?

When **mo** is used with more than one noun, the meaning is *both* and in a positive sentence, and *neither ... nor* in a negative one:

Tarō-kun mo	Michiko-san mo	kimashita.	Both Tarō and Michiko came.
		kimasen deshita.	Neither Tarō nor Michiko came.
Orenji mo	ichigo mo	kaimashita.	We bought oranges as well as strawberries.
		kaimasen deshita.	We bought neither oranges nor strawberries

Mo replaces **wa** and **ga** and, usually, **o**:

Watashi	wa	ikimashita →	Jiru-san	mo	ikimashita.
Tomu-san	ga	kita. →	Michiko-san	mo	kita.
Biru	o	katta. →	Wain	mo	katta.

De, ni etc. combine with **mo** as **de mo, ni mo**, etc. Below are some examples:

Rajo (radio)	de	mo kikimashita. I heard it on the radio, too.
Michiko-san	ni	mo aimashita. I met Michiko-san, too.
Yokohama	e	mo ikitai desu.
Tomu-san	kara	mo denwa ga arimashita.

Resutoran	de	mo	bā	de	mo	bīru o nomimashita.
Doyōbi	ni	mo	nichiyōbi	ni	mo	uchi ni imasu.

Recall also the use of *mo* after question words in negative sentences (Unit 6 Structures 8).

3 [noun] demo to soften invitations and suggestions

Demo is distinct from the combination *de mo* and can therefore be attached to other particles, such as *ni* (although it replaces *wa*, *ga* and *o*). *Demo* has a similar effect to English expressions like *or something*, making an invitation or suggestion less direct:

O-cha demo nomanai? *How about a cup of tea or something?*
Doyōbi ni demo ikimashō. *Let's go on, say, Saturday.*

4 Uses of wa and ga

Let us briefly review the uses of *wa* and *ga* that we have encountered thus far:

a In the pattern *A wa B desu*, *wa* signals that *B desu* is a statement about *A*.

Kore	wa	shinbun	desu.
Kono shinbun	wa	Nihon no	desu.
Watashi no shinbun	wa	Nihon no	de wa arimasen.

As we have noted in Unit 3, *A* is already known or understood; the focus is therefore on *B desu*. The pattern *A ga B desu*, on the other hand, focuses on *A*. Question-words like *nani*, *dare* cannot take *wa*, as this would contradict their role of asking about focal information, for example when talking about photos:

Kore ga Michiko-san desu. *This is Michiko-san.*
Dore ga Tomu-san desu ka? *Which one is Tom?*

b In Unit 3, we saw that *wa* can also signal a contrast; this distinction depends on the context, in other words, *another* noun *C*, which contrasts with *A*, must be either present or implied. In this use, *wa* replaces *ga* or *o*, while it combines with other particles as *ni wa*, *de wa*, etc.

Wain wa aru ga, bīru wa arimasen.	<i>We have wine but no beer. (replacing ga)</i>
Wain wa katta ga, bīru wa kaimasen deshita.	<i>I bought wine, but not any beer. (replacing o)</i>

Tōkyō ni wa itta ga, Kyōto ni wa ikimasen deshita.	<i>I went to Tokyo, but not Kyoto.</i>
Tōkyō de wa mita ga, Rondon de wa mimasen deshita.	<i>I saw (some) in Tokyo, but not in London</i>
Kyōto ni wa ikimashita.	<i>I did go to Kyoto. (implying that there are places where you didn't go)</i>

Wa is often found in negative sentences (negatives express some kind of contrast in Japanese – perhaps there is an implicit contrast to positive situations):

Kinō wa ikimasen deshita.	<i>I didn't go yesterday.</i>
Tako wa suk. ja arimasen.	<i>I don't like octopus.</i>
Komakai no wa arimasen ka?	<i>(Unit 9) Don't you have anything smaller?</i>

c We also met *wa* and *ga* in the patterns *B (ni) wa A ga aru* (Unit 3) and *A wa X ga hoshii* (Unit 8), which indicate possession and desire, respectively. In either case the object of possession/desire is marked by *ga*, whereas the person possessing or desiring is marked by *wa*.

Similar to these is the pattern *A (ni) wa B ga wakar.u/ir.u A understands/needs B*; the object of understanding/need is marked by *ga*, and the person understanding/needing by *wa*:

Ken-san wa Nihongo ga wakarimasu.	<i>Ken understands Japanese.</i>
Watashi ni wa ano hito ga wakarimasen.	<i>I don't understand that person.</i>
Watashi wa o-kane ga iru.	<i>I need money.</i>

See also Unit 14 Structures 5 (*A (ni) wa B ga dekuru*).

NOTE: Whenever you have both *wa* and *ga*, *wa* will always come first.

d Another *wa – ga* pattern that came up in Unit 8 is *A wa B ga [adjective]* or *A wa B ga [noun] desu*. Here are some further examples:

Uchi no kasan	wa	kioku	ga	warui desu.	<i>Mother has a bad memory.</i>
Michiko-san	wa	me	ga	ōku desu.	<i>Michiko-san has large eyes.</i>
Kono sētā	wa	iro	ga	kirei desu.	<i>This sweater is a pretty colour.</i>
Kanojo	wa	otōsan	ga	sensei desu.	<i>Her father is a teacher.</i>

These sentences are an extension of the basic **A wa B desu** pattern with **B desu** becoming **B ga** [adjective]/[noun] **desu**. In this pattern, **B** is something that belongs to **A**, and you might therefore expect **no** instead of **wa**:

Uchi no kasan no kioku wa warui desu.
Kanojo no otosan wa sensei desu.

In fact, these sentences are acceptable, but the **wa - ga** way of putting this is more natural, idiomatic Japanese (see Unit 8, Structures 6).

e As we saw above, **A wa** signals that a considered statement/comment is about to be made (about **A**). If, for instance, you make a well-considered comment about Tarō, having long been aware of his good looks, you would say:

Tarō-kun wa hansamu desu.

When some situation is, however, perceived spontaneously (by the five senses), **ga** is normally used; imagine, for instance, that it suddenly occurs to you that Tarō (because of the light, the way he is dressed, etc.) is really quite handsome. If you pass this observation straight on to your friend, you would say:

Tarō-kun ga hansamu desu ne!

Recall also the following sentences, both spontaneous expressions:

Kimochi ga ii desu. (Unit 7)

Hito ga ōi ne. (Unit 8)

Adjectives like **suki na**, **kirai na** and **iya na**, too, are generally concerned with the spontaneous expression of like/dislike, and therefore mostly take **ga** rather than **wa**. Here are some more examples:

A, densha ga kita.	<i>Oh, the train is coming.</i>
Mizu ga tsumetai!	<i>The water is cold!</i>
Ano hito ga kirai desu.	<i>I hate that person.</i>

f **Ga** and **wa** in subordinate sentences. Recall that **ga** is normally used in subordinate sentences if they have a different subject from the main sentence:

Tenki ga ii kara, oyogi ni ikimashō.	<i>Let's go for a swim because the weather is nice.</i>
Rōrusu-roisu ga takai kara, watashi wa kaimasen.	<i>The Rolls Royce is expensive so I am not going to buy it.</i>

When there is a sense of contrast, however, **wa** is used:

Rōrusu-roisu wa takai kara, watashi wa kaimasen.	<i>Rolls-Royces (unlike some other cars I can think of) are expensive, so I shan't buy one.</i>
--------------------------------------------------	-------------------------------------------------------------------------------------------------

See also Unit 14 Structures 1 about the use of **ga** in relative clauses.

Exercises

1 It's Sunday, but you don't feel like doing anything (including staying at home!). Make unenthusiastic suggestions to your girlfriend based on the cues:

Example: Disuko ni ikimashō ka? → Disuko ni demo ikimashō ka?

- a Terebi o mimashō ka?
- b Ginza e ikimashō ka?
- c O-sake o nomimashō ka?
- d Yakyū o mi ni ikimashō ka?

2 You have been out shopping; tell your friend what you have bought by using **mo**, **ya** (nado) or **to** as shown in brackets to join the listed items.

Example: binsen, fūtō, pen (mo) → Binsen mo fūtō mo pen mo kaimashita.

- a Remon, orenji, painappuru, ichigo (to)
- b Zasshi, shinbun (ya)
- c Bīru, wain, usuki, igusuri (mo)
- d Tako, sakana (ya, nado)

3 Fill in the blanks, choosing between **wa** and **ga**.

- a Kinō ____ kaisha ni ikimasen deshita.
- b Okāsan, tomodachi ____ kimashita.
- c Rondon ____ kōen ____ ōi desu.
- d Orenji ____ katta ga, painappuru ____ kaimasen deshita.
- e Ken-san ____ se ____ takai desu.
- f Kyo ____ totemo kimochi ____ ii desu.

Language and society

1 Entertaining guests in Japan

The Japanese go to great lengths to entertain guests. Partly because of the restricted space at home and the difficulties of preparing a proper banquet in the kitchen, most entertaining takes place outside in specialist establishments (sushiya, tenpuraya, etc.) or in Japanese, Chinese or Western restaurants.

Occasionally, however, one receives the honour of being invited to a Japanese home. There one is likely to be plied with a great variety and quantity of food and drink, all prepared by your hostess, although it is also quite common to supplement the home fare by home-deliveries (*demae*) of delicacies like sushi or *unagi* (broiled eel).

When invited to a meal by someone, at home or in a restaurant, it is normal to say *itadakimasu* before starting to eat, and *gochisōsama deshita* as an expression of thanks directly afterwards, but also again when leaving. When meeting your host next time, it is customary to acknowledge the favour again by saying *Yūbe [senjitsu] wa gochisōsama deshita* (*thank you for last night's [the other day's] meal*), something that is easily forgotten by us Westerners as we do not have such a custom!

2 Negative questions used as emphatic statements

Imagine that your husband/wife tries to stop your child from watching a film on TV, whereas you think that it's perfectly OK. The Japanese equivalent of reactions like *come on, don't be so fussy/surely it's all right* will often take the form of a negative question:

Ii ja nai ka! (lit. *It's all right, isn't it?*)

Or you might try and stop your partner from buying a new outfit; the reply may well be a defiant:

Yasui ja nai! Oh really, it's not expensive!

The same pattern is often used when someone has failed to notice the obvious, as when Mrs Anzai forgets that the dessert has already been taken care of; it would also be used when someone is looking for his spectacles, when they are in a very obvious place:

Tēburu no ue ni aru ja nai!

*Really, they're on the table,
right in front of you!*

Yamada-san ga matte iru

Yamada-san is waiting

In this unit you will learn

- how to express the idea of continuous action
- other uses of the -te form of the verb
- the conjunctive form of adjectives
- about working in Japanese companies

- 4 Suzuki-san wa yûbe repôto o zenbu yonda.

Structures

1 The -tari form

The -tari form of a verb is made by adding *ri* to the plain past form of the verb(s) in question. It is possible to have only one verb in the -tari form, or a whole series, but the sequence must finish with *suru*, or less often *da*, in the appropriate tense and level of politeness.

Terebi o mirari, hon o yondari shimashita/deshita. *I watched television, read a book ...*

There is no straight English equivalent for -tari; it implies that the verb to which it is attached represents merely one activity

out of several that actually took place. (Nado performs a similar function with nouns, see Unit 10 Structures 1.) Thus, in the sentence earlier, the two verbs in the -tari form are examples of what I did; they represent the sort of activities in which I was involved, but are not an accurate and exhaustive list. It is possible to string more than two verbs together in this way, and it is also possible to give just one verb:

Doyôbi wa tomodachi ni attari shimasu. *On Saturdays, I meet friends (and so on).*

The -tari form can also be used for two actions taking place alternately. In this case, the two verbs in question are

a opposites

ittari kitari (suru) to go and come, i.e. to go to and from
 naitari warattari (suru) to laugh and cry (nak.u to cry; wara.u to laugh note that in this phrase the verbs combine in the opposite order from English)

OR b sets of positive and negative pairs

ittari ikanakattari (suru) to sometimes go and sometimes not go
 benkyô shitari shinakattari (suru) to sometimes study and sometimes not (note that it is not necessary to repeat benkyô)

Tarô-kun wa tattari suwattari shimashita.

Tarô kept on standing up and then sitting down. (tats.u to stand)

Michiko-san wa Ken-san ni attari awanakattari shimasu.

Michiko-san goes through phases of meeting Ken, and then not meeting him.

2 Uses of [verb]-te i.ru

This combination of the -te form of verbs and the verb *iru* is used in three ways. Note that it can have inanimate as well as animate subjects despite the presence of *iru*, and that *da*, *aru* and *iru* itself, have no -te *iru* form.

a Habitual actions

This overlaps with the use of the present form to describe habitual action (Unit 4 Structures 1), but puts more stress on the repetition of the action. It will often occur when describing what

someone does for a living, or with words like *itsu mo* or *mainichi*:

Watashi wa Nihon de Eigo *I teach English in Japan.*
o oshiete imasu.
Suzuki-san wa maiban o-sake *Suzuki-san drinks every*
o nonde imasu. *evening.*

b Continuous actions

Here *-te iru* is equivalent to *is/was -ing* in English, describing actions which are actually going on in the present, or which were going on at some time in the past:

Nani o shite imasu ka? *What are you doing?*
A Dôshite konakatta n' *Why didn't you come?*
desu ka?
B Terebi o mite ita kara. *Because I was watching*
television.

It can also refer to what you will be doing in the future. For example, you arrange to wait until a friend has finished clearing up at work:

Asoko de matte imasu. *I'll be waiting over there.*

(See also the humble equivalent *O-machi shite imasu* in Unit 10 dialogue.) As would seem logical, only actions which do in fact occur continuously take the *-te iru* form in this sense. As we shall see in c, however, some actions which English thinks of as occurring continuously are thought of in Japanese as involving an immediate change of state.

c States resulting from actions

This sense of *-te iru* has no single English equivalent, but it is probably nearest to the 'present in the past' tense formed with *have*. It conveys the idea that while the action of the verb has already taken place, the state which it has brought about is still in existence. It is often used in conjunction with the adverbs *mô* and *mada* (Structures 6).

-te iru in this sense often occurs with a group of verbs which in Japanese, as mentioned above, are thought of as involving an immediate change of state rather than happening over time. Take, for example, the verb *kekkon suru*, to get married:

Honda san wa ashita kekkon *Honda-san is getting*
shimasu. *married tomorrow.*
Miura-san wa kyônen kekkon *Miura-san got married last*
shumashita. *year.*

In the *-te iru* form, however, it refers to the state that Miura-san is in now, as a result of getting married.

Miura-san wa kekkon *Miura-san is married.*
shite imasu.

We can use this form in the negative too, as follows:

Honda-san wa kekkon *Honda-san is not married.*
shite imasen.

There are some other verbs of this type. Many of them are intransitive (Unit 12 Structures 1) i.e. they do not take objects. *Aku*, for example, means *to open* in the sense of a door opening of its own accord, not *to open* in the sense of someone opening a door.

<i>aku</i> (intrans.) <i>to open,</i> <i>become vacant</i>	<i>aite iru to be open, vacant</i>
<i>shimar.u</i> (intrans.) <i>to close,</i> <i>shut</i>	<i>shimatte iru to be closed,</i> <i>shut</i>
<i>hajimar.u</i> (intrans.) <i>to begin</i>	<i>hajimatte iru to have</i> <i>begun, be under way</i>
<i>owar.u</i> (trans. & intrans.) <i>to end</i>	<i>owatte iru to be ended,</i> <i>over</i>
<i>futor.u</i> (intrans.) <i>to become</i> <i>fat</i>	<i>futotte iru to be fat</i>
<i>yase.ru</i> (intrans.) <i>to become</i> <i>thin</i>	<i>yasete iru to be thin</i>
<i>deki.ru</i> (intrans.) <i>to be</i> <i>made, prepared</i>	<i>dekite iru to be ready,</i> <i>completed</i>
<i>ki.ru</i> (trans.) <i>to put on,</i> <i>wear</i> (for items worn from the shoulders, e.g. shirts, dresses)	<i>kite iru to have on, be</i> <i>wearing</i>
<i>hak.u</i> (trans.) <i>to put on,</i> <i>wear</i> (for items worn from the waist downwards, e.g. skirts, shoes)	<i>haite iru to have on, be</i> <i>wearing</i>
<i>obo.e.ru</i> (trans.) <i>to learn,</i> <i>memorize</i> (rather than study)	<i>oboete iru to remember</i> <i>(i.e. not forget, as</i> <i>opposed to omoidasu to</i> <i>remember something</i> <i>forgotten)</i>
<i>shin.u</i> (intrans.) <i>to die</i>	<i>shinde iru to be dead</i>
<i>tsukare.ru</i> (intrans.) <i>to get</i> <i>tired</i>	<i>tsukarete iru to be tired</i>

- Asa-gohan ga dekite imasu yo. *Breakfast is ready.*
- A Ano nomiya o oboete imasu ka? *Do you remember that bar?*
- B O-sake o takusan nonda kara, nani mo oboete imasen. *I drank so much, I don't remember anything.*

Also note the following expressions:

- | | |
|--------------------------------------------------------------------|--------------------------------------|
| nodo ga kawak.u to get
thirsty | nodo ga kawaite iru to be
thirsty |
| o naka ga suk u to get
hungry (lit. (my) stomach
gets empty) | o-naka ga suite iru to be
hungry |

With these verbs which involve an immediate change of state, there is very often little difference in actual meaning between the past tense and the -te iru form:

- | | |
|---------------------|-----------------------------------------------------------------------------|
| Ä, tsukaremashita! | <i>I'm tired! (lit. I got tired)</i> |
| Ä, tsukarete imasu! | <i>I'm tired! (lit. I am in the state which results from getting tired)</i> |

In the case of the former, you have just finished doing something which has made you tired – perhaps you have just been carrying something heavy. In the case of the latter, you are in a general state of tiredness – you are having a busy week at the office.

The verbs of motion *iku, kuru, hairu, deru, dekakeru, ochuru*, but not *aruku* and *oyogu*, belong to this group. In the -te iru form they therefore refer to where you are after moving. For example, Honda-san was in the same room as you, but has just gone to the bank (*ginkō*). If someone comes in and asks:

Honda-san wa doko ni imasu ka?

you can, of course, just reply:

Ginko ni ikimashita.

However, you will also hear:

Ginkō ni itte imasu.

in the sense of *He/she is the state which results from going to the bank i.e. He/she has gone to the bank/is at the bank*. Similarly, note:

- | | |
|-----------------------------|---------------------------------------------|
| Tomodachi ga kite imasu yo. | <i>A friend of yours has come/ is here.</i> |
|-----------------------------|---------------------------------------------|

- Su misu-san wa Igrisu ni
kaette imasu.
Handobaggu ni nani ga
haite imasu ka?
Nani ka ochite imasu yo.

Mr/Ms Smith has gone back to/is back in England. What is in your handbag?

Something has fallen./ There's something on the floor./You've dropped something.

Naru behaves in a similar way:

- | | |
|----------------------------|-----------------------------|
| Shizuka ni natte imasu ne. | <i>Hasn't it got quiet?</i> |
|----------------------------|-----------------------------|

The -te iru form of these verbs cannot be used in the sense introduced in b above, but in fact, in English, the *is -ing* form of many of them does not refer to continuous action, but to the future. The Japanese equivalent of *He's coming in a second* is therefore *Sugu kimasu*. Similarly:

- | | |
|-------------------------------|--------------------------------------------------------|
| Ginkō wa nanji ni akimasu ka? | <i>When is the bank opening?</i> |
| Doa ga shimarimasu. | <i>The doors (doas) are closing. (station warning)</i> |

Finally, note some verbs which are more likely to be used in the -te iru form than in the present form:

- | | |
|-----------------------------------------------------------------------------|---------------------------------------------------------------------------------|
| mots.u to hold, take | motte iru to be holding, possess, have |
| Mochumashō ka?
Nani o motte imasu ka? | <i>Shall I carry it (for you)?
What are you holding/have you got there?</i> |
| Watashi wa kamera o motte imasen. | <i>I haven't got/don't own a camera.</i> |
| (place) ni sum.u to take up residence | sunde iru to be settled, live in a place |
| Italia ni sumitai desu.
Anzai-san wa Yokohama ni sunde imasu | <i>I want to live in Italy.
Anzai-san lives in Yokohama.</i> |
| shir.u to get to know | shitte iru to know (things, people) |
| Ken-san o doko de shirimashita ka?
Suzuki-san wa Furansu o shitte imasu. | <i>Where did you get to know Ken?
Suzuki-san knows France.</i> |

I don't know does not usually occur in the *-te iru* form, but is simply *shirimasen*:

Michiko-san no denwa bango o shitte imasu ka?

Iie, shirimasen.

The verb ([company] ni) *tsutome.ru*, *to work (for a firm)*, is also normally found only in the *-te iru* form.

Suzuki-san wa Yamanaka
Māketingu ni tsutomete
imasu.

*Suzuki-san works for
Yamanaka Marketing.*

In informal situations, the *i* of the *iru/imasu* in *-te iru* constructions is often lost:

Nani o nonde 'ru no?

Yasete 'masu ne

3 [verb]-te kara after/since doing [verb]

We have already met [noun] *kara* meaning *from/after/since* in a temporal sense (Unit 7 Structures 3). If you want to use *after* with a verb rather than with a noun, you put the verb into the *te* form:

Sore	kara	doko e ikimashita ka? <i>Where did you go after that?</i>
Gohan o tabete	kara	dekakemashō. <i>Let's set out after having our meal.</i>

If the subject of the *-te kara* part of the sentence is different from that of the main sentence, it will take *ga* (Unit 10 Structures 4):

Eiga ga owatte kara kissaten
ni hairimashita. *After the film was over we
went into a coffee shop*

Honda-san ga kekkon shite
kara rokunen ni narimasu. *It's six years since Honda-
san got married.*

Notice that, as with many European languages, if the situation in the main sentence after *-te kara* is still going on in the present (in other words, where *since* rather than *after* would be used in English) Japanese will use the present tense of adjectives, of *da*, *iru*, and *aru*, and the *-te iru* form of other verbs, where English uses the past tense with *have*:

Gakki ga hajimatte kara
mainichi isogashii desu.

*Since the term (gakki),
started I have been busy
every day.*

Nihon ni kite kara jikan ga
amari arimasen.

Kesa eki de soba o tabete
kara nani mo tabete imasen.

*Since coming to Japan I
haven't had much time.
I haven't eaten anything
since having some
noodles (soba) at the
station this morning.*

This use of the *-te* form with *kara* must not be confused with *kara* meaning *because* following the final forms of verbs (Unit 6 Structures 4).

4 The appositional no

In this variation of the X no B pattern (Unit 1 Structures 6), X, a general noun, tells us who or what, B, a proper noun, is:

tomodachi no Jon
ha-isha no Anzai-sensei
shūten no Ueno-eki

*my friend John
Anzai-sensei, the dentist
Ueno station, the terminus
(shūten)*

5 The conjunctive form of adjectives

The conjunctive form of *na* adjectives is made by turning *na* to *de*; in the case of *i* adjectives, *-kute* is substituted for *-i*. Note that *ii* becomes *yokute*. In the case of adjectives in the negative, *nai* becomes *nakute* (*wa* is sometimes omitted from the negatives of *na* adjectives):

shizuka na
taka.i

shizuka de
takakute

shizuka de (wa)/ja nakute
takakunakute

This form has functions similar to the *-te* form of verbs. One use, for example, is in joining two adjectives together, or in joining a sentence which ends in an adjective to one which ends in a verb:

Kore wa shizuka de kirei na
resutoran desu.

*This is a quiet, clean
restaurant.*

Ken-san wa se ga takakute
hansamu desu.

Ken is tall and handsome.

Rondon wa samukunakute,
honto ni yokatta desu.

*London wasn't cold, and I
really liked it/It was
really good as London
wasn't cold.*

Suzuki-san wa o-sake ga suki
de takusan nomimasu.

*Suzuki-san likes sake and
drinks a lot.*

Often, as in the last two or three sentences, the conjunctive form contains the implication that the first half of the sentence is the reason for the second half (Unit 13 Structures 4):

Kono kasa wa benri de ii desu.	<i>This umbrella is wonderfully convenient.</i>
O naka ga itakute, nani mo tabemasen deshita.	<i>I didn't eat anything because I had a stomach ache.</i>
Hādo-san wa amari genki ja nakute, zannen desu ne.	<i>Isn't it a shame that Herd-san isn't very well?</i>

(Also see Unit 10 Dialogue.)

6 Mō and mada already/not any more and still/not yet

Mō and mada are both adverbs. Mō conveys the idea of completion, or near completion, and mada, its opposite, the idea of non-completion. This is so regardless of whether they are in positive or negative sentences, although their English equivalents will differ accordingly.

a mō in positive sentences: already/yet

In this sense, mō is usually found in the past:

Mō owarimashita.	<i>I have already finished.</i>
Mō tabemashita ka?	<i>Have you eaten yet?</i>

It will also be found with the *-te iru* form of verbs in the c sense, mainly with verbs involving an immediate change of state:

Mō o-furo kara dete imasu.	<i>I am already out of the bath.</i>
Suzuki-san wa mō dekakete imasu.	<i>Suzuki-san has already set out.</i>

With such verbs in the *present* form and with darō, mō (often joined to sugu) will refer to something which is nearly completed, or just about to happen:

Mō sugu owarimasu.	<i>I'm nearly finished.</i>
Tanaka-san wa mō kuru desho.	<i>Tanaka-san should be coming any minute.</i>

In addition, as one would expect, mō is found with positive adjectives, and with nouns:

Mō osoi desu.	<i>It's too late now.</i>
Mō iya desu.	<i>I can't stand any more.</i>

Mō jikan desu.
Mō aki no o-tenki desu ne.

It's time.
The weather is already autumnal, isn't it? (aki autumn)

b mō in negative sentences: not any more/no longer

In the negative, mō still conveys its basic idea of completion: the situation or event is over, and will not occur any more. When the speaker is the subject, there is often the idea of negative intention:

Mō ano nomiya e wa ikimasen.	<i>I'm not going/will not go to that bar any more.</i>
Konban mō benkyō shitakunai desu.	<i>I don't want to study any more this evening.</i>
Watashi wa mō sonna ni wakaku arimasen	<i>I'm not that young any more</i>
O-kane ga mō nai deshō.	<i>I don't suppose you have any money left.</i>
Jiru-san wa mō asoko de wa Eigo o oshiete imasen.	<i>Jill isn't teaching English there any more.</i>

c mada in positive sentences: still

In the positive, mada is used with situations or events which are uncompleted and therefore still going on (for mada da by itself, however, see d below):

Taro-kun wa mada chīsai kodomo desu.	<i>Tarō-kun is still a small child.</i>
Kēki ga mada arimasu.	<i>There is still some cake/ There is some cake left.</i>
Mada tabete iru n' desu ka?	<i>Are you still eating?</i>
Mada nani ka tabemasu ka?	<i>Will you eat something more?</i>

d mada in negative sentences: not yet

In the negative, mada is used with situations or events which are not yet completed; it is often found with *-te iru* in the c sense, here referring to the state you are in as a result of not doing something!

Kore wa mada kirei ni natte imasen!	<i>This isn't clean yet!</i>
Michiko-san wa mada kimasen ka?	<i>Hasn't Michiko-san come yet?</i>
Tomu-san wa mada dekakete imasen.	<i>Tom has not left yet.</i>

Watashi wa mada nani mo
yonde imasen.

*I haven't read
anything yet.*

Note that when *mada* is followed directly by *da* or a form of *da* it has the meaning of *not yet*.

A Tabemashita ka?

B Iie, mada desu.

Notice what happens in the following exchanges, remembering that *mo* and *mada* are opposites:

A Mō shashin o torimashita ka?

A *Have you taken the photo yet?*

B Iie, mada totte imasen.

B *No, I haven't yet.*

A Mada Michiko-san to dēto shite imasu ka?

A *Are you still dating (dēto suru) Michiko-san?*

B Iie, mō shite imasen.

B *No, not any more.*

7 [-masu base]-nagara while doing [verb]

This is used when the *same* person is simultaneously doing two different actions over the *same* length of time. The less important action goes before *-nagara* and is in the *-masu* base form whatever the tense at the end of the sentence:

Tomu-san wa maiasa uta o utai-nagara shawā o abimasu.
Every morning Tom showers (shawā o abi.ru) while singing.

Anzai-san wa Tarō-kun to asobi-nagara terebi o mimashita.
Anzai-san watched television while playing with Tarō-kun.

Exercises

1 Here is a list of the favourite activities of some of our characters:

Jiru: shashin o toru; hirune o suru (*hirune afternoon nap*)
Tomu: gitā o hiku; uta o utau
Michiko: tomodachi to asobu; Tarō-kun to kenka suru (*kenka quarrel*)
Tarō: terebi o miru; chokorēto o taberu (*chokorēto chocolate*)
Anzai: uisuki o nomu; tabako o suu (*tabako tobacco, cigarette; suu to breathe in, smoke*)

a It is Sunday. Our characters have gathered in the Herds' minute garden and are all engaged in the first of their favourite activities. Use the *-te iru* form to describe the scene.

Example: Jiru-san wa shashin o totte imasu.

b By the end of the day, they have been able to engage in both their favourite activities, and fit in other things as well. Use *-tari* *tari suru* to describe what they each did.

Example: Jiru-san wa shashin o tottari, hirune o shitari shimashita.

2 Join the following sentences, using the conjunctive forms of *jectives*.

Example: Kono kamera wa chisai desu. Benri desu.
Kono kamera wa chisakute benri desu.

- a Kono biru wa tsumetai desu. Oishi desu.
- b Koko wa karē (*curry*) ga yumei desu. Yoku tabe ni kimasu.
- c Rondon wa ame ga okatta desu. Iya deshita.
- d Michiko-san wa atama ga ii desu. Kirei desu.
- e Atsukunakatta desu. Kimochi ga yokatta desu.

3 A stranger comes up, clearly out of breath. Reply to his/her questions in the affirmative or the negative as indicated, using *mō* or *mada* as appropriate.

Example: Eiga wa mō Hai, mo hajimatte imasu.
hajimarimashita ka? Iie, mada desu/hajimatte imasen.

- a Ginko wa mō shumarimashita ka? (Hai)
- b Depāto wa mō akimashita ka? (Iie)
- c Tokkyū wa mō kimashta ka? (Hai)
- d Tokkyū wa mō demashita ka? (Iie)

4 Compare the reasonably relaxed daily schedule of Tom Herd, the typical Western businessman, with the frenzied schedule of Suzuki-san, the typical (?) Japanese businessman by combining the pairs of activities, first with *-te kara*, then with *-nagara*.

Example: ha o migaku; shawā o abiru
Hādo-san wa ha o migatte kara shawā o abimasu.
Suzuki-san wa ha o migaki-nagara shawā o abimasu.

- a shinbun o yomu; shatsu o kiru
- b hisho to hanasu; memo o kaku
- c keiyaku o musubu; o-sake o nomu (*keiyaku contract; musubu tie, sign [a contract]*)
- d terebi o miru; neru

5 Put the following conversations into *-masu* form Japanese.

- a A Do you know Miura-san?
- B Yes, I know (her). She lives in the flats (*manshon*) next to the bank.

- b C You don't look well.
 D I was writing a report until late last night. I'm still tired.
 c E Kimura-san is clever and pretty, but she isn't married.
 F Perhaps she doesn't want to get married.

Language and society

1 Working in Japanese companies

Japanese companies have branches abroad and employ foreign nationals, both in their countries of origin and in Japan. Japanese companies used to be known for their system of lifetime employment (*shushin koyō*) and promotion of people according to age rather than ability (*nenkō joretsu*), although only the most able ever got right to the top. Change is occurring in these areas, however, and a new word *risutora* (*downsizing*) has entered the vocabulary. If you work in a Japanese company you need to be prepared to do a lot of overtime (*zangyō*), and give the company an important place in your life, but holidays (*kyūka* or *yasumi*) are becoming more acceptable. Salaries may seem low, but remember that you will get a commuting allowance (*tsūkin teate*) to cover your travel expenses and a bonus (*bōnasu*) twice a year, which in good times may amount to as much as five or six times your normal monthly salary (*kyūryō*).

The following additional words and phrases might prove useful:

<i>kaisha ni shūshoku suru to</i>	<i>to join a company</i>	<i>yushutsu (suru)</i>	<i>export</i>
<i>kaisha kara o taishoku suru to</i>	<i>to retire from a company</i>	<i>yunyū (suru)</i>	<i>import</i>
<i>sarariman</i>	<i>white-collar worker</i>	<i>tsūkin (suru)</i>	<i>commuting to work</i>
<i>shain</i>	<i>company employee</i>	<i>kyūryō ga takai</i>	<i>to have a good salary</i>
<i>buchō</i>	<i>department head</i>	<i>kyūryō ga hikui/yasui</i>	<i>to have a bad salary</i>
<i>kachō</i>	<i>section head</i>	<i>suto o suru</i>	<i>to strike</i>
<i>shōsha</i>	<i>a trading firm</i>		
<i>shōken-gaisha</i>	<i>a securities firm</i>		

wareta n' ja
 nakute, watta n'
 deshō?
 it didn't get broken, you broke it,
 didn't you?

In this unit you will learn

- how to evade responsibility for a blunder by using intransitive verbs
- how to take credit for a positive action by means of transitive verbs
- how to form impersonal sentences with *-te aru*
- how to describe openly displayed emotions
- about Japanese sound symbolism

Dialogues

Michiko-san wa Hādo-san-tachi to o-hiru o tabeta ga, sono ato de sara-arai o tetsudatte iru. Michiko-san wa sara o aratte, Ken san wa fuite iru.

- Ken Kitchin-taoru wa?
 Michiko Hora soko ni kakete aru deshō
 Ken A, hontō da. Ēpuron wa?
 Michiko Ush ro no tēburu ni oite aru ja nai no koko wa Ken-san no uchi no daidokoro deshō?
 Ken Demo itsu mo no tokoro ni o te nai kara.

sono ato de	after that	kitchin-taoru	wiping-up cloth
sara-arai	dish-washing, washing up	kake.ru (transitive)	to hang up
[activity] o tetsudau	to help with [activity]; [person] o tetsuda.u	kakete aru	to be hung up
sara	dish, plate	• S1	
fuk.u	to wipe	ēpuron	apron
		ok.u	to put place
		daidokoro	kitchen
		oite nai	negative of oite aru

True or false?

- 1 Ken-san wa Michiko-san no uchi de o hiru o tabeta.
- 2 Ēpuron wa itsu mo no tokoro ni oite nai.

Michiko Igrisu-jin no shufu wa shiawase desu ne, otoko no ko ga kōshite daidokoro no shigoto o tetsudattari suru kara Nihon ja kangaerarenai wa.

Ken Mukashi kara narete iru kara ne. Sore ni, kozukai mo fueru shi ne. (Te ga subette, sara ga ichimai yuka ni ochite wareru) Ara ... okāsan, sara ga wareta yo!

(Jiru-san ga tonari no beya kara kuru)

- Jiru Ara, ichiban ii o-sara ja nai no. Dōshita no, Ken?
 Ken Och ta n da yo
 Jiru Och ta n' ja na deshō?! Otoshita n deshō!
 Ken E, mā
 Jiru Sore kara, wareta n' ja nakute, watta n' deshō? Motto ki o tsuke nasai yo! Kongetsu wa o-kozukai nashi! (Daidokoro o deru)
 Ken (Unzari shite) Da kara Nihon no otoko wa sara-arai o iyagaru n' darō ..

shufu housewife
 shiawase na lucky
 otoko no ko boy, young man
 kōshite in this way

 iyagar.u to show dislike • S4

True or false?

- 3 Nihon no otoko no ko wa amari daidokoro no shigoto o tetsudawanai.
- 4 Sara ga nimai wareta.

Structures

1 Intransitive and transitive verbs

We have already seen some examples of intransitive verbs in Unit 11, noting that they differ from transitive verbs in that they do not take objects. This is a distinction that exists with many English verbs, too:

- a John broke the cup.
 b The cup broke.
 a The stagehand raised the curtain.
 b The curtain rose.

The a sentences have an object, and the b sentences do not, but a more important difference is that in the a sentences the person responsible for the action of the verb is stated, whereas in the b sentences the same action is presented as a natural occurrence. This applies in Japanese, too.

Like English *break/break* or *rise/raise*, Japanese verbs often come in pairs of intransitive/transitive, distinguished by regular correspondences in their endings:

intransitive		transitive	
-iru		-osu	
oki.ru	to rise, get up	okos.u	to rouse
ori.ru	to get off/down	oros.u	to take (something) down
ochi.ru	to fall, be dropped	otos.u	to drop (something)
-eru		-u	
ware.ru	to break, get broken	war.u	to break (something)
nuke.ru	to come/fall out	nuk.u	to pull out
-eru		-yasu	
fue.ru	to increase	fuyas.u	to increase (something)
hie.ru	to become cool	hiyas.u	to cool (something)
-eru		-su	
koware.ru	to break, get broken	kowas.u	to break (something)
kakure.ru	to hide	kakus.u	to hide (something)
taore.ru	to collapse	taos.u	to knock down
-aru		-eru	
hajimar.u	to begin	hajime.ru	to begin (something)
kakar.u	to hang	ake.ru	to hang (something) up
shimar.u	to close	shime.ru	to close (something)
tomar.u	to stop	tome.ru	to stop, turn off
u		-eru	
ak.u	to open	ake.ru	to open (something)
tsuk.u	to be switched on; to be attached	tsuke.ru	to switch (something) on; to attach (something)

intransitive		transitive	
-ru		-su	
naor.u	to get fixed, heal	naos.u	to fix, heal (something)
u r.u	to pass through	tôs.u	to pass (something) through
-u		-asu	
ugok.u	to move	ugokas.u	to move (something)
kawak.u	to get dry	kawakas.u	to dry (something)

Since there are many other pairs of verbs which conform to these patterns it is useful to become familiar with them. There are also some irregular pairs:

hair.u	to enter	irc.ru	to insert
kawar.u	to change	kae.ru	to change (something)
kie.ru	to go out (fire etc.)	kes.u	to put out, extinguish
mie.ru	to be seen	mi.ru	to see
nor.u	to ride	nose.ru	to load, place (something) on

Unlike English (*break/break* etc.), Japanese has hardly any identical pairs of intransitive/transitive verbs. One exception is *owar.u* (*to end*), which is used both ways, although a 'specialized' transitive verb *oe.ru* (*to end something*) does exist:

Shigoto ga owarimashita. The job is finished.
Shigoto o owarimashita/
oemashita. I/we (etc.) finished the job.

Below are some examples of sentences with intransitive/transitive verbs:

Ken-san wa mo okimashita ka? Iie, mada okite imasen. Is Ken up yet? No, not yet.
Ja, okoshite kudasai ne. Well, please wake him,
won't you.

Kono biru wa amari hiete
imasen ne. Reizōko de
hiyashimashō.

Doa ga aite imasu yo.
Ē, atsui kara, mado mo akete
kudasai.

Ara, tokei ga naorimashita ne.

Watashi ga naoshimashita yo!

Tokei ga kowaremashita ka?
Tarō-kun ga kowashita n'
desu yo!

*This beer isn't cold, is it?
Let's cool it in the fridge.*

*The door's open, you know.
Yes, please open the
window too, as it's hot.*

*Hey, the clock's been
mended, I see.*

I mended it, you know!

*Is the clock broken?
Taro-kun broke it, you
know!*

It should be obvious from the last example above, and from some of the dialogue sentences, that transitive verbs can conveniently be used to make someone responsible for accidental or wilful damage, while intransitive verbs may be used to evade such responsibility by pretending that things came about naturally. Transitives can, of course, also be employed to take credit for a positive occurrence, as in the second from last example.

2 Impersonal sentences with -te aru

In Unit 11, we saw the use of *-te iru* after both intransitive and transitive verbs; *-te aru* is used after transitive verbs only.

Transitive verbs on their own indicate that someone is responsible for the action of the verb, even if that person is not mentioned (thus *kowashita* means *I/you/we/he/she/they broke it*); when *-te aru* is used with a transitive verb, the implication is that someone *unspecified* has performed the action, i.e. the sentence is 'impersonal'. In fact the person responsible for the action of the verb *cannot* be mentioned in a *-te aru* sentence.

Doa ga akete arimasu. *The door has been opened.*
Biru ga hiyashite arimasu. *The beer has been cooled.*

Sentences such as these indicate the state brought about by some unspecified person in opening the door/cooling the beer, etc. Compare the above examples with the following sentences, which use intransitive verbs:

Doa ga akimashita. *The door opened.*
Biru ga hiemashita. *The beer became cold.*
Doa ga aite imasu. *The door is open.*
Biru ga hiete imasu. *The beer is cold.*

In the past tense, the intransitive sentences merely say that an action occurred naturally, while the *-te iru* sentences indicate the state of affairs resulting from that happening. The *-te aru* sentences, on the other hand, imply that someone is responsible for the situation, without, however, telling us who that someone is.

In the negative, *-te aru* becomes *-te nai* (plain) or *-te arimasen* (polite):

Biru ga hiyashite nai
Kono tegami ni wa kaite arimasen.

3 Signalling an addition with shi

As we saw in Unit 5 Structures 4 and Unit 11 Structures 5, the basic use of both the *-te* form and the conjunctive form of adjectives is to connect sections of a sentence that could themselves be independent sentences, where English would use *and*:

Anzai-sensei wa tabako o sutte, o-sake mo nomimasu.	<i>Anzai-sensei smokes, and drinks, too.</i>
Kore wa takakute, amari suki ja nai n' desu.	<i>This is expensive, and I don't fancy it that much.</i>
Sono resutoran wa yasukute, oishii desu.	<i>That restaurant is cheap and good.</i>
Kanojo wa kirei de, atama mo ii desu.	<i>She is pretty and intelligent too.</i>

Shi also connects sentences, in the sense of *for one thing ... and besides, and moreover*. In this use, *shi* is normally attached to the plain form of verbs and adjectives:

Anzai-sensei wa tabako o suu shi, o-sake mo nomimasu.	<i>Anzai-sensei smokes, and what's more, he drinks.</i>
Kore wa takai shi, amari suki ja nai n' desu.	<i>For one thing this is expensive and besides I don't fancy it that much.</i>
Sono resutoran wa yasui shi, oishii desu.	<i>That restaurant is cheap, and good too.</i>
Kanojo wa kirei da shi, atama mo ii desu.	<i>For one thing she is pretty, and besides she is intelligent, too.</i>

Compare the following examples, which all express the idea that Kyoto has hot summers and cold winters, making it a disagreeable place in the view of the speaker:

Kyôto wa natsu wa atsukute, fuyu wa samukute, suki ja nai desu.

Kyôto wa natsu wa atsukute, fuyu wa samui kara, suki ja nai desu.

Kyôto wa natsu wa atsui shi, fuyu wa samui shi, suki ja nai desu.

Kyôto wa natsu wa atsui shi, fuyu wa samui kara, suki ja nai desu.

Kyôto wa natsu mo atsui shi, fuyu mo samui kara, suki ja nai desu.

Note the use of contrasting *wa* with *natsu* and *fuyu*, and that while you can have more than one conjunctive form or *shi* in a sentence, *kara* can occur only once, at the end of the part expressing the reason.

Shi can also be used to add a further reason as an afterthought, as a separate sentence:

Kyôto wa natsu ga atsui kara,

Kyôto wa natsu ga atsukute, suki ja nai desu. Fuyu mo samui shi.

I don't like Kyoto because the summers are hot. What's more, the winters are cold, too.

Shi can be reinforced by introducing the afterthought with *sore*

4 [adjective]-garu: indicating someone else's feelings

This suffix (which itself works like an *-u* verb) is attached to certain adjectives which are connected with the expression of emotion. In the case of *-i* adjectives, *-garu* replaces the final *-i*; with *na* adjectives, it replaces *na*:

samu	i	samu garu	to feel/look cold
hoshi	-i	hoshi garu	to show signs of wanting something
ita	-i	ita garu	to feel/look in pain
isogashi	-i	isogashi garu	to feel/look busy
iya	na	iya garu	to feel/show disgust
fushigi	na	fushigi garu	to feel mystified/find something mystifying
mysterious)			

-garu indicates that the feeling is being openly displayed or acted out, normally by someone other than the speaker. If a child, for example, is making a big fuss about some little scratch, its mother may say:

Sonna ni itagaranaide kudasai!

Here are some more examples. (Note that the *-garu* forms take *o*, just like any other verb).

Michiko-san wa yube zuibun samugatte imashita yo.

Michiko-san was (showing signs of) feeling the cold last night.

Tarô-kun wa itsumo asukurimu o hoshigatte imasu.

Tarô-kun is always clamouring for ice-cream.

Ken-san wa amari sara-arai o iyagarimasen ne.

Ken doesn't show much aversion to washing up

The number of adjectives to which *-garu* can be attached is limited, but it can also be attached to *-tai* (Unit 8); like *tai*, *-tagaru* (to show signs of wanting to do) can be attached freely to any verb, and is one way of referring to the wishes of someone other than the speaker:

Tarô-kun wa gakkô ni ikitagaranai n' desu.

Tarô-kun doesn't show any inclination to go to school (gakkô).

Dôshite sonna ni ha o migakitagaranaï n' desu ka?

Why are you so averse to brushing your teeth?

In some cases, the noun form *-gari* (with the optional addition of *-ya* (Unit 2 Language and society 3)) can be used to characterize a person who habitually engages in the sort of conduct indicated by the adjective:

Michiko-san wa samugari desu ne.

You are sensitive to the cold, aren't you, Michiko-san?

Boku wa atsugariya da kara ne. *I feel, the heat, you see.*

Exercises

1 Ingratiate yourself with your mum/dad by taking credit for the positive domestic occurrences, while blaming your younger sister An (Anne) for the negative ones as shown in brackets below.

Example: Ringo ga ochite imasu (An) → An ga otoshita n' desu.

- a Yatto otōsan ga okimashita ne. (Watashi)
- b Mado ga aite imasu ne! (An)
- c Bīru ga yoku hiete iru ne (Watashi)
- d Terebi ga kowarete imasu ne! (An)
- e Reizoko ga tomatte imasu ne! (An)

2 Put the following into Japanese, using *-te aru*.

Example: The report is placed on the table. → Repōto wa rēburu ni oite aru.

- a It was written in this morning's paper.
- b The luggage is unloaded.
- c The beer is in the fridge.
- d The outside light has been turned off.
- e Everything has been eaten.

3 Join the sentences, using *shi*.

Example: Sono resutoran wa yasui desu. → Oishii desu. Sono resutoran wa yasui shi, oishii desu.

- a Bīru mo arimasu. Wain mo arimasu.
- b O-sushi mo tabetai desu. Sutēki (*steak*) mo tabetai desu.
- c Kono kodomo wa genki desu. Atama mo ii desu.
- d Michiko-san wa ikimasen. Ken-san mo ikimasen.
- e Kono bīru wa yoku hiete imasu. Oishii desu.

4 You are trying to do some work in the same room with people who keep voicing their complaints and desires; tell them to shut up according to the example.

Example: Ā, isogashii isogashii! → Sonna ni isogashigaranaide kudasai.

- a Ā, shigoto ga iya da iya da iya da!
- b Ā, aisukurīmu ga hoshii. Ā, aisukurīmu ga hoshii ...
- c Ā, atsui, nā, atsui nā ...
- d Ā, bīru ga nomitai, bīru ga nomitai!
- e Ā, kaeritai nā! Ā, kaeritai na!

Language and society

1 Unzari suru and some similar expressions

Japanese has a large stock of words that characterize an action or a state by imitating a sound or a motion. These words tend to contain sound combinations such as double consonants or syllabic *n*, and/or endings like *to* (often doubled) or *ri*:

kitto, chotto (Unit 9)
chanto (Unit 10), unto (*a lot*)
hakkiri (*clearly*), yukkuri (Unit 8)
mizu, don'yori (*dull* [of the sky, etc.])

They are used as adverbs, but some are used with *suru* (or occasionally, *da*) as predicates:

Utau tabeta.	I ate lots.
Yukkuri itte kudasai.	Please say it slowly.
Hakkiri mimashita.	I saw it clearly.
Koto de hakkiri shimashita	It has become clear now.
Yukkuri shite kudasai	Please take your time/make yourself at home.
Unzari shimashita/desu	I am fed up
Kyō mo don'yori shite imasu ne.	It's another gloomy day today, isn't it?

Some of these expressions are created by repeating a sound:

noro-noro (*slowly, loiteringly*): Noro-noro arukanaide kudasai.
zuri-zuri (*walk briskly*): Zuri-zuri ikimasho

13

Jiru-san wa dō omoimasu ka? what do you think, Jill?

In this unit you will learn

- how to report what people say
- how to give your own opinion
- a way of asking how to say something in Japanese
- a form of the verb for trying to do things and thinking of doing them
- more on the -te form of verbs and the conjunctive forms of adjectives
- about marriages in Japan
- how to congratulate people

Dialogues

1. Mō Tanaka-san ga yoru osoku Jiru-san
denwa o kakete, tsugi no hi Jiru-san
atte, itiroo hanashitai to itta. Sore de
Merushī to iu kissaten de issho ni hirugohan o taberu koto ni shita.

 [verb] • S8
 A de wa nakute B not A but B
 • Unit 17 S5
 kangaeru to think, consider
 dō omoimasu ka? what do you
 think?

True or false?

- 3 Tanaka-san wa ima no shigoto o yametai to itta.
 4 Tanaka-san wa Sugiura-san ni jōdan o iwanakatta.

Structures

1 [Sentence] to [verb of saying]: reporting what people say

In Japanese you report what someone says by adding the quoting particle *to* and the appropriate verb of saying at the end of the sentence. This *to* is equivalent to English *that*, and different from the *to* which joins nouns (Unit 8 Structures 3). It is the most common verb of saying, but you will also find, for example, *kik.u* (to ask, hear), *kotae.ru* (to reply), *kotowar.u* (to refuse), *okor.u* (to get angry), *sakeb.u* (to shout), *yorokob.u* (to rejoice), and, in the case of letters etc., *kaku* (to write).

As in English, it is possible to quote people's words directly. While English here omits *that*, however, Japanese must use *to*:

Doutsujin wa asa 'Gūten
 Morugen' to iimasu.
 Jiru-san wa 'Hayaku tabe
 nasai' to Ken-san ni imashita.
 'Issho ni Dizunirando e
 ikimasen ka?' to Yamada-san
 ga kikimashita.
 'Shigoto o yametakunai
 desu' to Tanaka-san ga
 kotaemashita.

*In the morning Germans
 say 'Guten Morgen'.
 Jill said to Ken, 'Eat it up
 quickly'.
 'Won't you come to
 Disneyland with me?'
 asked Yamada-san.
 'I don't want to give up
 my job,' replied Tanaka-
 san.*

When reporting people's words indirectly, Japanese is more straightforward than English, since the tense of the original statement is unchanged. All that happens is that any verbs or adjectives in the polite form go into the plain form. Note that even though English can omit *that* here as well, Japanese must always use *to*:

'Mada kekkon shitaku
 arimasen.'
 W. tashi wa itsu mo mada
 kekkon shitakunai to iimasu.
 Watashi wa mada kekkon
 shitakunai to Sugiura-san
 ni imashita.
 'Ikimasen deshita'.
 Ken-san ni wa ikanakatta
 to iimasu.
 Michiko-san wa ikanakatta
 to Ken-san ni kotaemashita.

*'I don't want to marry yet.'
 I always say that I don't
 want to get married yet.
 I told Sugiura-san that I
 didn't want to get
 married yet.
 'I didn't go.'
 I will tell Ken that I didn't
 go.
 Michiko-san replied to Ken
 that she hadn't gone.*

Indirect reporting of questions and commands will be dealt with in Unit 17 Structures 4.

The person doing the quoting will be followed by *wa* or *ga* as appropriate, but note that [person] *wa* will normally come at the beginning of the sentence, while [person] *ga* will come just after the quoting *to*:

Tomu-san wa mō tabeta to
 umashita.
 Ganjin da to chisa na kodomo
 ga sakebimashita.

*Tom said that he had already
 eaten.
 A small child shouted that
 there was a foreigner.*

When it is clear from the context who is speaking, the speaker will usually be omitted:

Tomu-san ga juuchiji sugi ni
kaceta. 'Tsukareta,' to itta

Tom came home after 11
o'clock. 'I'm tired,' he
said.

Note the following:

a When quoting the words of a specific third person in the present, it is usual to put the verb of saying into the *-te iru* form:

Tarō-kun wa o-naka ga suite
to .tte imasu.

Tarō-kun says he's hungry.

Doitsu no bīru wa oishii to
Suzuki-san ga Kerun kara
kaite imasu.

Suzuki-san writes from
Köln that German beer
tastes good.

b What did he/she say? Is Nan to iimashita ka? Also notice:

Michiko-san wa nani mo
imasen desh ta.

Michiko-san didn't say
anything

Watashi wa so imashita.
Kō itte kudasai.

I said so/that.
Please say this.

2 [noun] to iimasu/[noun] to iu [noun]: labelling things

If you want to ask the Japanese for a word, or explain how to say something in English, you should use sentences based on the pattern A o X to iu, which literally means *We call A 'X'*:

Eigo de Rondon o London to
imasu.

In English we call 'Rondon'
'London'.

Kore wa Nihongo de nan to
imasu ka?

What do you call this in
Japanese?

As we saw in Unit 1 (Dialogue; Language and Society 1), with the humble form of *iu*, *mosu*, this is also a common way of introducing yourself to someone:

Hado to mōshimasu.

Japanese often uses this pattern in front of general nouns, as a way of explaining what, or who, X, a proper noun (e.g. the name of a restaurant) is:

Kiku to iu Nihon ryōriya

a Japanese restaurant
called Kiku

Jiru to iu Amerikajin

an American named Jill

Tamuzu to iu Igirisu no shinbun

the British newspaper, The
Times

Suzuki-san wa Yamanaka
Māketingu to iu kaisha ni
tsutomete imasu.

Suzuki-san works for a
company called
Yamanaka Marketing.

3 [verb] (present plain form)] koto ni suru/naru: deciding to do things

We have already met a construction involving [verb] (past plain form)] *koto* (Unit 5 Structures 3), and the pattern [noun] *ni suru/naru* (Unit 8 Structures 2). The new structure has points in common with both. Note, however, that in this case the verb before *koto* is in the present plain form, either positive or negative

a koto ni suru

This refers to conscious decisions, either positive or negative

Kaeru koto ni shimashō ka.

Shall we decide to go
home?

Kekkon shi nai koto ni
shimashita.

I decided not to get
married.

With *suru* in the *-te iru* form, it refers to something which you consciously make a habit of doing:

Watashi wa maiasa goji ni
okiru koto ni shite imasu.

I am in the habit of getting
up at five every morning.

b koto ni naru

This, on the other hand, conveys the idea of an impersonal decision which is not under the control of the speaker. It might not be clear who took the decision or it might just be more polite not to say who did, particularly in situations where the speaker is clearly being honoured in some way. The nuance is not always easy to convey in English:

Kanai wa Nihon no kaisha ni
tsutomeru koto ni
narimashita.

(It has been decided that,
my wife is to work for a
Japanese company.

Ôsutoraria e ikanai koto ni
narimashita.

I am not to go to Australia

With *naru* in the *-te iru* form, it refers to an impersonal state of affairs, to the way things are:

Josēi wa koko kara hairu
koto ni natte imasu.

Women (josei) are meant to
enter from here/use this
entrance.

4 Using the -te form to imply a reason

Like the conjunctive form of adjectives (Unit 11 Structures 5), the -te form of verbs can be used to imply a reason:

Nodo ga kawa te jushu o takusan nomimashita.	Becoming thirsty, I drank lots of juice
Tomodachi to nanashite, Tanaka-san wa densha ni noriokuremashita.	Talking to a friend, Tanaka-san was late for the train.

The same guidelines for the use of wa and ga apply as with kara (Unit 6 Structures 4).

Together with the conjunctive form of adjectives, the -te form is particularly common when giving reasons for an apology, and in front of certain verbs and adjectives, such as komaru (to get into difficulties), and yokatta (I'm glad).

Osoku natte dōmo sumimasen	I'm sorry for being (lit. becoming) late.
Shigoto ga ōkute komatte imasu.	There is a lot of work and so I'm in difficulties, i.e. There's so much work I don't know what to do.
Nihon e kite nonto ni yokatta desu.	I'm really glad (because) I came to Japan.

5 [sentence] to [verb of thinking]: reporting what you think

Virtually the same principles apply here as in indirect reporting of what people say (Structures 1), but note the following:

a In the ordinary present tense, you can report your own thoughts or opinions and ask about those of the person you are talking to, but not make statements about what a third person thinks.

Omoshiroi eiga datta to omoimasu.	I think it was an interesting (omoshiroi) film.
Nihon no ringo wa oishii to omoimasu ka?	Do you find Japanese apples tasty?

In the following sentence it is therefore clear that we are talking about the likelihood of Michiko's coming, not about what Michiko thinks:

Michiko-san wa kuru darō to omoimasu.	I think that Michiko-san will probably come.
------------------------------------------	-------------------------------------------------

As with reported speech, to relate what Michiko is thinking in the present, you should use the -te iru form.

Michiko-san wa omoshiroku- nai to omotte imasu.	Michiko-san finds it uninteresting.
----------------------------------------------------	----------------------------------------

This is not necessary, however, when talking about what someone else thought in the past:

Ken-san wa Michiko-san ga konai daro to omoimashita.	Ken thought that Michiko- san probably wouldn't come.
---------------------------------------------------------	-------------------------------------------------------------

b Where English says 'I don't think ...', Japanese will usually say -nai to omoimasu:

Hādo-san wa amari genki de wa nai to omoimasu.	I don't think Mr Herd is very well
Suzuki-san wa oboete inakatta to omoimasu.	I don't think Suzuki-san remembered.

If you want to give the sense of a strong denial, however, to (wa) omoimasen can be used:

Watashi wa Tanaka-san ga kekkon suru to wa omoimasen.	I don't think in the slightest that Tanaka-san will get married.
-------------------------------------------------------------	------------------------------------------------------------------------

c To omoimasu is often added to verbs in the -tai form as a polite, more adult way of expressing one's wishes, and asking about the wishes of the person you are talking to:

Ken-san no tomodachi ni naritai to omoimasu.	I would like to become Ken's friend.
Watashi wa rainen Yōroppa o ryokō shitai to omotte imasu.	I would like to travel in Europe next year.
Higa o mi ni ikitai to omoimasen ka?	Wouldn't you like to go and see a film?

d To ask someone's opinion, you should use dō:

Suzuki-san wa dō omoimasu ka?	What do you think, Suzuki- san?
----------------------------------	------------------------------------

Also note:

Watashi wa kō omoimasu ... Tanaka-san mo so omoimasen ka?	This is what I think ... Don't you think so too. Tanaka-san?
-----------------------------------------------------------------	--------------------------------------------------------------------

c When deeper thought, consideration rather than feeling, is involved, *kangaeru* may be used in place of *omou*.

Ima no Nihon wa dame da *I think that present-day*
to *omotte/kangaete imasu.* *Japan is no good.*

To ask what someone is thinking, rather than what their opinion is, you should say:

Nani o kangaete imasu ka? *What are you thinking?*
Nani mo kangaete imasen *I'm not thinking of anything.*

6 The plain form of [verb]-mashō

As with other plain forms, this is used in written-style Japanese, and when speaking in informal situations, to children, or to oneself. (For the *-mashō* form itself, see Unit 4 Structures 2.) With *-iru/-eru* verbs, you just add *-yo* to the *-masu* base.

mimashō	m..ru	mi, yo
tabemashō	tabe.ru	tabe yō
okimashō	oki.ru	ok. yō

With *-u* verbs, the final *-u* of the present plain form is changed to *ō*:

ikimashō	ik u	ik ō
kaerimashō	kaer.u	kaer ō
nomimashō	nom.u	nom ō
asobimashō	asob u	asob ō
hanashimashō	hanas.u	hanas ō
aimashō	a u	a o

Note what happens to verbs like *matsu* and the two irregular verbs:

machimashō	mats u	mat o
shimashō	suru	sh. yō
kimashō	kuru	ko yō

sa, sukoshi benkyo shiyo ka?

Iga o mi ni ikō.
Takushī ni norō.

(to oneself) Well, perhaps I should get down to a little studying

Let's go and see a film.
Let's take a taxi.

In the next sections, you will find two patterns which use the plain *-mashō* form.

7 [verb]-(y)ō to omou/omotte iru: contemplating an action

This pattern is used when you are thinking of doing something but not sure that you will actually do it, or to refer to something which you thought of doing in the past but did not do. It is normally only used when the speaker is the subject:

Konban oishi tokoro de *I feel like eating at a good*
tabeyō to omoimasu ga, *restaurant (place) tonight*
issho ni ikimasen ka? *won't you come too?*
Mada hayai desu kara, mo *It's still early, so I think I'll*
sukoshi mato to *wait a little longer.*
omoimasu.

Shashin o torō to *I thought of taking a*
omoimashita ga, kamera ga *photograph, but I didn't*
arimasen deshita. *have a camera.*

When *omotte iru* is used, the implication is that you have been thinking of doing whatever it is for some time:

Ra nen Tai e iko to omotte *I am thinking of going to*
imasu. *Thailand (Tai) next year*
Igo no sensei ni narō to *I am thinking of becoming*
omotte imasu. *an English teacher*

Note the following:

a Inserting the question particle *ka* before *to* makes the idea even more tentative:

Atarashii kuruma o kaō ka *I am wondering whether to*
to omotte imasu. *buy a new car.*

b If you are thinking of doing something which requires weighty consideration, *kangaeru* can be used in place of *omou*:

Yamanaka Māketingu o *I'm thinking of leaving*
yamete jibun no kaisha o *Yamanaka Marketing*
tsukurō to kangaete imasu. *and building my own*
(jibun no) company.

c [verb]-(y)ō to (wa) omowanai is similar to English *I have no intention of*:

Anna tokoro e ikō to wa
omoimasen.

*I have no intention of going
to a place like that.*

8 [verb]-(y)ō to suru: attempting an action

This is used:

a For actions which you try to do but in which you may fail or, in the past tense, for actions which actually failed:

Ima tegami o kakō to shite
iru kara, ato de ikimasu.

*I'm just trying to write a
letter, so I'll come later
(ato de).*

Hairō to shumashita ga, doa
ga shimatte imashita.

*I tried to go in, but the door
was shut.*

b For actions which are about to take place:

Sakura wa mō sako to shite
imasu.

*The cherry blossom (sakura)
is already on the point of
blooming (sak.u).*

Chōdo o-furo ni hairō to shite
imasu.

*I'm just about to have a
bath.*

Exercises

1 Here is a list of original statements:

- A 'Rondon wa samukatta desu.'
- B 'Shushō (prime minister) ga shinimashita.'
- C 'Koko no tako wa totemo oishii desu.'
- D 'Ken-san wa kyō kimasen.'
- E 'Anzai-sensei wa shinsetsu na ha-isha-san desu.'

Put them into indirect speech and fit them into the following sentences as in the example.

Example: A + Tanaka-san ga kakimashita.

Rondon wa samukatta to Tanaka-san ga kakimashita.

- a B + nyūsu de imashita.
- b C + Itariajin ga yorokobimashita.
- c D + Michiko-san ga denwa de imashita.
- d E + Tomu-san ga koraemashita.

2 Select one word from each of the columns to make meaningful sentences according to the pattern in the example. It should be possible to use each word once only. Make sure you use the right particles!

Example: Sakura to iu resutoran de tabeta koto ga arimasu ka?

Maria	machi (town)	au
Okkusufōdo	depāto	yunyū suru
Mangō	itariajin	taberu
Sakura	kudamono	tomaru
Mitsukoshi*	resutoran	iku

(*Mitsukoshi = Japanese equivalent of Harrods)

3 Use the same patterns to express decisions which a you have made consciously, and b have been made for you:

Example: a Sakura to iu resutoran de taberu koto ni shumashita.

b Sakura to iu resutoran de taberu koto ni narimashita.

4 Tom is looking at his diary and going over his plans for next week with Yamada-san. Using [verb] (y)ō to omoi, work out what he actually says.

Example: (getsuyōbi) repōto o kaku

Getsuyōbi ni repōto o kakō to omoimasu.

- a (kayōbi) Ōsaka ni iku
- b (suiyōbi) keiyaku o musubu
- c (mokuyōbi) Ōsaka kara kaeru
- d (kinyōbi) osoku made neru

大阪 ōsaka

5 Put the following conversations into -masu form Japanese.

- a A I'm sorry I forgot the salad.
B It's all right (ii) I don't like salad very much.
- b C I think Ken is ill.
D Why?
C It's because he says he doesn't want to eat anything.
- c E This telephone is no good.
F Did you put in (ire.ru) (any) money?
E I tried to, but it didn't go in (hair.u).

1 Getting married in Japan

Vast amounts of money can be spent on getting married in Japan, as the lavish advertising by hotels and specialized wedding establishments in trains and other public places indicates. In recent years however, small-scale, inexpensive weddings called *jimikon* (literally *plum weddings*) have become quite popular. *Ren'ai kekkon* (*love matches*) are increasingly common, but *miai kekkon* (*arranged marriages*) are still frequent. In the latter case, the families first exchange photographs and *irekisho* (*curricula vitae*), which give information about the family as a whole as well as about the actual cand date. Even in the case of an arranged marriage, the couple will be given an opportunity to get to know each other, and to say no, before any final arrangements are made. Their first formal meeting is known as the *o-miai* (*o-miai o suru* being the verb), and they will be accompanied by the person who is arranging the marriage, the *nakodo* (*go-between*). Since the *nakodo* is an important figure during the wedding festivities, even couples who have met without the aid of a go-between will ask someone (e.g. the bridegroom's professor at university) to act in an honorary capacity.

2 Congratulating people

The stock phrase used in congratulating people is o-medetō gozaimasu;

Tanjōbi o-medetō gozaimasu	<i>Happy birthday (tanjōbi,</i>
Go-shussan o-medetō gozaimasu	<i>Congratulations on the</i>
	<i>birth (shussan) of</i>
	<i>your baby</i>

Nyūgaku o-medetō gozaimasu (nyugaku (suru) to enter school/university)

Sotsugyō o-medetō gozaimasu (sotsugyō (suru)
to graduate from
school/university)

Nyusha o-medetō gozaimasu (nyusha (suru)
to enter a company)

The Japanese celebrate New Year rather than Christmas. The customary greeting when meeting an acquaintance for the first time in the new year is (Akemashite) o-medetō gozaimasu. In informal situations, gozaimasu is usually omitted from all these greetings.

True or false?

- 3 Se no hikui otoko wa megane o kakete iru.
- 4 Tanaka-san wa mada kekkon shitakunai.

Structures

1 Modifying a noun with a sentence-like sequence

As we have seen in Unit 2, it is possible to give further information on a noun by modifying it with an adjective:

Hon desu; takai desu → Takai hon desu.

Kore wa inu desu; genki desu → Kore wa genki na inu desu.

This is also possible with sentence-like elements:

Kinō hon o kaimashita; omoshiroi desu → Kinō katta hon wa omoshiroi desu. *The book I bought yesterday is interesting.*

Kinō watashi wa hon o kaimashita; mimashita ka? → Kinō watashi ga katta hon o mimashita ka? *Did you see the book that I bought yesterday?*

The bold parts in the above sentences have the same meaning as English relative clauses; to form them, the order of the modifying section needs to be changed so that the verb comes before the noun and is put into the plain form (which is the usual form for verbs in front of nouns). Where *wa* is present, it needs to be converted to *ga*, as subordinate clauses use *ga* rather than *wa* (recall Unit 10).

The differences that exist between *who*, *whom*, *to whom*, *with whom*, etc. in English relative clauses are expressed by the context in Japanese (although in the last example below, *with* is expressed by *issho ni*):

- 1 Kinō hito ga kimashita. Hansamu deshita. → Kinō kita hito wa hansamu deshita. *The man who came yesterday was handsome.*
- 2 Kinō hito o mimashita. Hansamu deshita. → Kinō mita hito wa hansamu deshita. *The man whom I saw yesterday was handsome.*
- 3 Kinō hito to hanashimashita. Hansamu deshita. → Kinō hanashita hito wa hansamu deshita. *The man to whom I talked yesterday was handsome.*
- 4 Kinō hito to issho ni ikimashita. Hansamu deshita. → Kinō issho ni itta hito wa hansamu deshita. *The man with whom I went yesterday was handsome.*

Depending on the context, the second sentence could also mean *The man who saw (something not mentioned) ...*, the third one, *The man who talked ...*, and the last one *The man who went*

with me ..., however, the sentences they are based on would be different: 2 Kinō hito ga (watashi-tachi o etc.) mimashita; 3 Kinō hito ga hanashimashita (*gave a talk*); 4 Kinō hito ga issho ni ikimashita.

Where *ga* occurs inside the relative clause, it is normally changed to *no*:

Sode no nagai shatsu ga kaitai desu. *I want to buy a shirt with long sleeves (sode).*

(*But*: [Kono] shatsu wa sode ga nagai desu.)

Nihongo no wakaru hito wa imasu ka? *Is there anyone here who understands Japanese?*

(*But*: [Kono] hito wa Nihongo ga wakarasu – recall Unit 10 Structures 4 c.)

Relative clauses can also modify nouns of a general meaning such as *mono*, *koto* and *no*:

Kinō katta mono wa kore desu. *This is what (the thing which) I bought yesterday.*

Kinō itta koto o wasuremashita. *I forgot what (the thing which, I said) yesterday.*

Kinō katta no wa doko desu ka? *Where is the one I bought yesterday?*

Here, *mono/koto/no* are used instead of a more specific noun; in this use, *mono* and *no* refer to actual objects (or sometimes persons), whereas *koto* means *matter*, referring to more abstract deeds or happenings.

2 Converting sentences into nouns with *koto* and *no*

In the following examples, *koto* and *no* serve to convert whole sentences into nouns, so that they can be the subject, object, etc. of a new sentence. (Note that here they cannot be replaced by other, specific nouns.)

Kono eiga o mita koto o wasurete imashita. *I had forgotten (the fact) that I had seen this film.*

Eiga o miru no o wasuremashita. *I forgot to watch the film.*

Ano hito no atama no warui koto/no o shitte imasu. *I know that that person is stupid.*

Koto and *no* differ in that *koto* generally refers to the abstract idea of factual knowledge, whereas *no* concerns the workings of one's feelings. Thus, the first of the above examples can be

paraphrased as *I forgot about the fact that I had seen it before*, whereas in the second one the speaker absent-mindedly forgot to switch on the TV, or perhaps change channels. The third example implies factual knowledge when *koto* is used, and impressionistic knowledge with *no*. Not surprisingly, verbs like *miru* or *kiku*, having to do with the workings of the senses, are always used with *no* rather than with *koto*:

Michiko-san ga piano o hiku no o kikumashita. *I heard Michiko-san play the piano.*
Ken-san ga o-sake o nomu no o munashita. *I saw Ken drink alcohol.*

However, *koku* can also be used in the sense of *hear about some fact*; in this case, obviously *koto* is required.

Michiko-san ga piano o hiku koto o kikumashita. *I heard that Michiko-san plays the piano.*

Apart from verbs, this structure is also used with certain adjectives:

Nihongo o kaku koto/no wa muzukashii desu. *Japanese is difficult to write.*
Demo, hanasu koto/no wa yasashii desu. *But it is easy to speak.*
Ano hito wa hashiru no ga hayai desu. (*hashiru to run*) *He is a fast runner.*
Michiko-san wa oyogu no ga jōzu desu. *Michiko-san is good at swimming.*

3 Expressing permission with -te mo ii

When asking for permission to do something, you attach *mo ii (desu) ka?* (*is it all right if?*) to the *-te* form of the verb:

- 1 Tabako o sutte mo ii desu ka? *Is it all right if I smoke?*
- 2 Issho ni itte mo ii desu ka? *May I come with you?*

If you remove the final *-i* from the negative plain form of verbs and add *kute*, you get a form which can be used to ask for permission *not* to do something (*is it all right if I don't ...*):

- 3 Zenbu tabenakute mo ii desu ka? *Is it all right if I don't eat it all?*

In questions, the subject is always *I* (or *we*), but in the case of statements giving permission, the subject becomes *you*:

Eiga ni itte mo ii desu. *It is all right if you/You may go to the movies.*

Mada kaeranakute mo ii desu. *It is all right if you don't/You needn't/don't have to come back yet.*

Affirmative answers to the original questions 1–3 would be:

- 1 Hai, (sutte mo) ii desu.
- 2 Ē, (itte mo) ii desu.
- 3 Ē, (tabenakute mo) ii desu.

(For ways of *withholding* permission, i.e. prohibiting, see Unit 15.)

The *-te mo ii* form can also be used with adjectives of both types, and with nouns, as follows:

I adjectives	
Heya wa chiisakute mo ii desu ka?	<i>Is it all right if the room is small?</i>
O-furo wa atsukunakute mo ii desu ka?	<i>Does it matter if the bath isn't hot?</i>
no adjectives	
Tenisu wa heta de mo ii desu ka?	<i>Is it all right if I am no good at tennis?</i>
Hoteru wa shizuka ja nakute mo ii desu ka?	<i>Is it all right if the hotel isn't quiet?</i>
nouns	
Ashita de mo ii desu ka?	<i>Is tomorrow all right?</i>
Nihongo ja nakute mo ii desu ka?	<i>Is it all right if it's not Japanese?</i>

With nouns, a verb is normally implied, so the meaning understood is *Is it all right if we (go, etc.) tomorrow?/Do you mind if I don't (speak/write, etc. in) Japanese?*

4 Recommending what to do using [sentence] hō ga ii

In Unit 8, we saw how the noun *hō* is used in comparisons after nouns and adjectives; after verbs in their plain past tense, the combination *hō ga ii* is used to advise a course of action (*you'd better/you should*):

Hayaku kaetta hō ga ii desu. *You'd better go home quickly.*
Benkyō shita hō ga ii desu. *You'd better do some studying.*

To tell someone what course of action is best *avoided*, *hō ga ii* is attached to verbs in the plain present tense negative form.

Kore o tabenai *hō ga ii* desu. *You'd better not eat this.*
Amari nomanai *hō ga ii* desu yo. *You shouldn't drink too much.*

5 Expressing ability to do things with [verb] *koto ga deki.ru/[verb]-re.ru/rare.ru*

There are two ways of expressing the idea *to be able to (do)* in Japanese.

a (A wa) [verb (present plain form)] *koto ga dekiru*
This is another [verb] *koto* pattern, now linked to the verb *dekiru*, which here means *to be possible*. Literally, therefore, the pattern means *As for A, [doing] is possible, i.e. A is able to [do]*.

Nihongo o hanasu | *koto ga dekimasu ka?* *Can you speak Japanese?*
Oyogu | *Can you swim?*

Negatives are formed by using the negative form of *dekiru*, *dekinai*.

Sonna ni hayaku aruku | *koto ga/wa dekimasen.* *I can't walk so fast.*

Jiru-san wa tako o taberu | *Jill can't eat octopus.*

(NOTE: either *ga* or *wa* is possible after *koto* in negative sentences.)

b [verb]-reru/rareru

As the *koto ga dekiru* forms are rather lengthy, a special verb form known as the potential is usually preferred, although the former expression is sometimes used for greater emphasis. Potential forms are obtained in the following way:

i With *-iru/-eru* verbs, replace the final *-ru* with *-rare.ru*:

tabe ^u ru	tabe ^u rare.ru (→ <i>taberaremasu, taberareta, etc.</i>)
oki ^u ru	oki ^u rare.ru
mi ^u ru	mi ^u rare.ru

ii With *-u* verbs, replace the final *-u* with *-e.ru*:

aruk ^u	aruk ^u e.ru (→ <i>arukemasu, aruketa, etc.</i>)
oyog ^u	oyog ^u e.ru
yom ^u	yom ^u e.ru
ka ^u	ka ^u e.ru
hanas ^u	hanas ^u e.ru
mats ^u	mat ^u e.ru

(Verbs like *matsu* are again slightly irregular in that they drop the *e* in *s*. See Unit 4.)

iii *Suru* and *kuru*

suru	dekiru
kuru	korareru

(NOTE: all potentials act like *-iru/-eru* verbs.)

Before going on to see how these forms are used in sentences, it may be useful to point out that *kuru* and many *-iru/-eru* verbs are developing alternative potential forms that are similar to the potentials of *-u* verbs, e.g. *mire.ru, okire.ru, kore.ru*. These non-standard forms are becoming increasingly acceptable (see for example the second example sentence below).

Here are some examples of sentences with potential forms. Note that if the potential verb has an object, it can generally be marked by either *ga* (wa for contrast) or *o*.

Mō sukoshi iraremasu ka? *Can you stay a little longer?*
Ashita hayaku okiremasu ka? *Can you get up early tomorrow?*
Watashi wa tako wa taberaremasen. *I can't eat octopus.*
Raishū issho ni ikemasu ka? *Can you come with us next week?*
Nihongo o hanasemasu ka? *Can you speak Japanese?*
Watashi wa piano ga hikemasen. *I can't play the piano.*

Occasionally, the subject is marked by *ni wa* instead of *wa*, which serves to emphasize the ability/non-ability on the part of the subject. In negative sentences, this can be reinforced by using *totemo* ((not) at all):

Watashi ni wa totemo kono shigoto ga/wa dekimasen.

Or, in a different word order:

Kono shigoto wa watashi ni wa totemo dekimasen.

In the case of verbs of the type **benkyo** (o) **suru**, the lengthy **suru koto ga dekiru** is hardly ever used; instead, **suru** is replaced with **dekiru**. Note that before **dekiru**, **tenisu** etc. take **ga** (or **wa**, if contrastively used).

Sumisu-san wa tenisu ga dekimasu ka?

Watashi wa dansu wa dekimasen.

(Kuruma no) unten ga dekimasu ka?

This job is quite beyond my capabilities.

Can you play tennis, Smith-san?

I cannot dance (although I can do a host of other things!).

Can you drive (unten (suru),)?

The reason why **kuruma no** (rather than **o**) is used in the last example is that **unten** here is acting as a noun rather than as a verb.

Exercises

1 You are scrutinizing a set of photographs of girls with a Japanese acquaintance, who takes the opportunity to inform you about his preferences regarding girlfriends. As he is a domineering character of violent disposition, you are in no mood to disapprove of his tastes, choosing instead to voice approval using relative clauses according to the model.

Example: Kono onna wa karada ga ôkii kara kirai da.
Watashi mo karada no ôkii onna ga kirai da.

- a Kono onna wa me ga chusai kara kirai da.
- b Kono onna wa kami ga nagai kara suki da.
- c Kono onna wa iro ga kuroi kara kirai da. (kuroi (here) *dark-skinned*)
- d Kono onna wa ashi (legs/feet) ga futoi (fat) kara kirai da.
- e Kono onna wa zubon (trousers) o haku kara kirai da.

2 Using **koto** or **no**, produce Japanese sentences matching the meaning of the English sentences:

- a I forgot to bring the book.
- b I saw Michiko-san drive a car.
- c I know that Kyoto summers are hot.
- d I heard Anzai-sensei sing.
- e I heard that Anzai-sensei sings.
- f I am a fast reader.

3 Your Japanese boyfriend has a tendency to indulge in various hobbies, but you, his health-conscious girlfriend, have other ideas. Give **ho ga ii**, provide positive or negative alternatives as required by the cues to your boyfriend's cravings.

Example: Terebi ga mitai. (jogingu suru to go jogging) - Jogingu shita ho ga ii desu yo!

- a Keki ga tabetai. (yasai (vegetable) o taberu)
- b Wain ga nomitai. (arukôru (alcohol) o nomu NEG)
- c Pati ni ikitai. (hayaku neru)
- d Tabako ga suitai. (suu NEG)

4 Reply to the requests/offers/invitations using the words in brackets to explain that you are unable to comply or accept.

Example: Soko ni jûsho o kaite kudasai. (Nihongo; kaku)
Watashi wa Nihongo ga kakemasen.

- a Kuruma de kite kudasai. (kuruma; unten suru)
- b Nihongo de hanashite kudasai. (Nihongo; hanasu)
- c Kono oishii tako o dôzo. (tako; taberu)
- d Umi e itte, oyogimashô. (oyogu)
- e Doyôbi ni issho ni tenisu o shimasen ka? (tenisu suru)
- f Ba e nomi ni ikumasho. (sake; nomu, see LS2)

Language and society

1 Idiomatic uses of **dekiru**

One idiomatic use of **dekiru** as a potential is seen in the following examples, which are concerned with having/lacking skills:

Nihongo ga dekimasu ka? Do you know any Japanese?
Watashi wa piano ga dekimasen. I can't play the piano.

These expressions may be said to be alternatives to **Nihongo ga hanasemasu ka?**/**Watashi wa piano ga hikemasen.**

Apart from its use in potentials, **dekiru** is also commonly used often in combination with **mada/mô** in the sense of *to get a job done*:

Gohan wa mô dekimasu ka? Will dinner be ready soon?
Hai, mô dekimashita yo. Yes, it's just ready.
Mô dekite imasu yo. It's already prepared.
Shukudai (homework) ga dekimashita. I've finished my homework.

Nekutai ga dekite imasu ka? *Is the tie ready? (At the cleaners)*

The expression *yoku dekiru* means *to be very able* (*ano hito wa shigoto/benkyō ga yoku dekiru*), whereas *yoku dekimashita* normally means *well done!* In the *-te iru* form, the same expression has a somewhat different meaning again:

Kono isu wa yoku dekite imasu. *This chair is well made.*

Kono hanashi wa yoku dekite imasu. *This story-line is well thought out.*

2 Use of potential forms with Japanese food and drink

Japanese people will often enquire about your *ability* to eat things like raw fish (*sashimi*) and to drink sake, rather than asking whether you like them. This may have something to do with the idea that the Japanese way of life is unique and incomprehensible to the Westerner. Note the following common exchanges:

O-sashimi ga taberaremasu ka?

Ē, taberaremasu./Ē, daijōbu desu./Ē, daisuki desu.
Iie, taberaremasen./Iie, o-sashimi wa chotto ...

Nihon no o-sake ga nomemasu ka?

Ē, nomemasu. (etc.)
Iie, nomemasen.

Structures

1 [statement] yō da *it seems ...*

This is one of several endings that can be attached after statements (Structures 4; Unit 17 Structures 3 and 6). Yō da is very close to *it seems*. A speaker uses it to imply that he/she is making a statement based not upon actual knowledge, but on objective deductions made on the basis of the available evidence. This is often visual, but not necessarily so. Yō da and the other sentence endings are often used when describing the state of mind of someone other than oneself. In the following examples, note the forms which nouns, adjectives and verbs take before yō da, both in the present tense and in the past. They are the forms which would normally be found in front of nouns.

na adjectives		
Anzai-sensei wa dōmo byōki no	yō desu.	<i>Anzai-sensei somehow seems ill.</i>
Mukashi, koko wa resutoran datta	yō desu.	<i>Formerly, this seems to have been a restaurant.</i>
/ adjectives		
Michiko-san wa Ken-san ga suki na	yō desu.	<i>Michiko-san seems to like Ken.</i>
Saikin made koko wa shizuka datta	yō desu.	<i>It seems that until recently it was quiet here.</i>
verbs		
Ano mise wa totemo takai	yo desu.	<i>That shop looks very expensive.</i>
Kinō no pāti wa tanoshikatta	yō desu.	<i>It seems that the party yesterday was enjoyable (tanoshi.i).</i>
Jiru-san wa tsukarete iru	yō desu.	<i>Jill appears to be tired.</i>
Tomu-san wa genki ni natta	yō desu.	<i>Tom appears to have recovered.</i>

When there is a negative, it will normally come before yō da:

Koko wa mō resutoran de wa nai	yō desu.	<i>This doesn't appear to be a restaurant any more.</i>
Ano ringo wa amari oishikunai	yō desu.	<i>That apple doesn't look very tasty.</i>

In the examples given above where there was a past tense before yō da, the speaker was giving his/her *present* impression of something which had already happened. When recalling *past* impressions, however, where English would use *seemed* rather than *seems*, yō datta is used, and the statement preceding it does not go into the past:

Tomu-san wa senshū byōki no	yō deshita.	<i>Tom seemed ill last week.</i>
Kinō Jiru-san wa tsukarete iru	yō deshita.	<i>Jill seemed to be tired yesterday.</i>

Before nouns, yō da takes the form yō na:

tako no yō na aji	<i>a taste (aji) like octopus</i>
tsukarete iru yō na me	<i>eyes which look tired</i>
Kyō wa fuyu no yō na tenki desu.	<i>Today the weather is like winter.</i>
Koko wa daremo sunde inai yo na tokoro desu.	<i>This is the sort of place which seems to have no one living in it.</i>

A common pattern is [proper noun (A)] no yō na [general noun (B)]. Here the meaning is similar to *B such as/like A*:

Tomu-san no yō na Igrisujin	<i>an Englishman/Englishmen like Tom</i>
Furansu no yō na kuni	<i>a country/countries (kuni) such as France</i>
Aisukurīmu no yō na tsumetai mono o tabemashō.	<i>Let's eat something cold such as ice-cream.</i>
Kyōto no yō na furui machi ni sumitai desu.	<i>I want to live in an old town such as Kyoto.</i>

2 The adjective *onaji* same

Onaji works like a *na* adjective at the end of sentences and in forming the negative, but goes straight in front of nouns like an *-i* adjective. The Japanese equivalent for *same as [noun]* is [noun] to *onaji*.

Kore wa watashi no kasa
to *onaji* desu.

*This is the same as my
umbrella.*

Onaji da.

Onaji de wa nai deshō!

Michiko-san no wanpisu
to *onaji* ro desu

*It's the same colour as
Michiko-san's dress
(wanpisu).*

3 [statement] *sō da* apparently

Sō da is a sentence ending similar to *yō da*. It implies that the statement is not the speaker's own opinion, but something which he/she has heard or read. It is equivalent to English *apparently/I hear/they say that ...* Like *yo da*, it is often used in talking about the feelings/intentions of other people. In the following examples, note the forms which nouns, adjectives, and verbs take in front of *so da*, both in the present tense and in the past. They are in fact the plain forms that you would expect to see at the end of sentences in informal speech.

nouns		
Hado-san no okusan wa Amerikajin da	<i>sō</i> desu	<i>Apparently Mr Herd's wife is an American</i>
Kinō koko wa sugoi ame datta	<i>sō</i> desu.	<i>Apparently there was terrific rain here yesterday</i>
na adjectives		
Hado-san no husho wa totemo kirei da	<i>sō</i> desu.	<i>They say that Mr Herd's secretary is very pretty.</i>
Kuruma wa dame datta	<i>sō</i> desu.	<i>Apparently the car was ruined.</i>
-i adjectives		
Anzai-sensei wa ima taihen isogashu	<i>sō</i> desu.	<i>Apparently Anzai-sensei is very busy at the moment.</i>
Tarō-kun mo ikitakatta	<i>sō</i> desu.	<i>I hear that Tarō-kun wanted to go too.</i>

verbs

Tanaka san wa rainen
nikkon sara

sō desu.

*I hear that Tanaka san
is getting married next
year.*

Suzuki san wa densha
ni kōtokureta

sō desu.

*Apparently Suzuki san
missed his train.*

As with *yo da*, negatives tend to precede *so da*.

Tomu-san wa hyōryō de wa nakatta *sō* desu.

Ken san wa sakana ga suki ja nai *so* desu.

Jiri san wa ano eiga ga mitakunai *sō* desu.

Sentences ending in *sō da* often begin with [noun] *ni yoru* (to/yoreba, *according to [noun]*), or some other form of words giving the source of your knowledge:

Shinbun ni yoru to, Igirisu
no shusho ga rainichi suru
sō desu.

*According to the
newspapers, the British
prime minister is going
to visit Japan (rainichi
suru).*

Tomodachi kara kuta no
desu ga, Tomu-san wa
tabako o yameta *so* desu.

*I heard from a friend that
Tom has given up
smoking.*

4 *toki* when

Toki is a noun meaning time (e.g. *ano toki* at that time), but it is most commonly found where English would use *when/whenever*. The time, or *when*, part of the sentence before *toki*, and the action of the main part of the sentence after *toki*, occur more or less contemporaneously. Nouns, adjectives and verbs occurring before *toki* take the forms which it is usual for them to take before nouns. *Toki* can be followed by *ni* to give a sense of greater precision, and by *wa* to give a sense of contrast, or even by both.

nouns			
Ame no	<i>toki</i>	takushi ni norimasu	<i>When it rains, I take a taxi.</i>
Kodomo no	<i>toki</i> wa	yoku benkyō shimashita.	<i>When I was a child I studied hard (but I don't now).</i>

Michiko-san ga piano o hite
iru aida, Tarō-kun wa
terebi o mite imashita.

*While Michiko-san was
playing the piano, Tarō-
kun was watching the
television.*

In the above examples, the part before aida (X) has the same duration as the part afterwards (Y). With aida *ni*, however, the implication is that Y is of shorter duration, and takes place within the time span of X:

Natsu-yasumi no aida ni
Ken-san wa manga o issatsu
yomimashita.

*During the summer
holidays, Ken read one
comic book (manga).*

Michiko-san ga piano o hite
iru aida ni, Tarō-kun wa
chokorêto o zenbu
tabemashita.

*While Michiko-san was
playing the piano, Tarō-
kun ate all the chocolate.*

With verbs, aida (but not aida *ni*) clearly overlaps with *nagara* (Unit 11 Structures 7), but unlike *-nagara* it can be used with different subjects in each part, as in the example above and in the second example below:

Tomodachi o matte iru aida
shinbun o yomimashita.

*I read a newspaper while
waiting for a friend.*

Kodomo ga nete iru aida
wa totemo shizuka deshita.

*It was very quiet while the
children were asleep.*

The verb in front of aida is usually in the *-te iru* form, but this is not possible with *iru* since it has no *-te iru* form anyway:

Igirisu ni iru aida ni, Babarī
o kaō to omoimasu

*I think I'll buy a Burberry
coat (Bābarī) while I am
in Britain.*

Jill-san ga inai aida Tomu-
san wa tabako o takusan
sumashita.

*Tom did some heavy
smoking while Jill was
not there.*

Note also the use of the *-i* adjective *nagai* in front of aida:

Suzuki-san wa nagai aida
Furansu ni imashita.

*Suzuki-san was in France
for a long time.*

You will also come across *kono aida*, which means *the other day/recently*, and *sono aida*, *during that time/meanwhile*.

7 [verb]-te wa ikenai/dame da must not [verb]

This construction literally means *[verb]-ing will not do/is no good*. *Ikenai/ikemasen* is a form of a verb *iku*, to go, which

literally means *cannot go*. As in the dialogue, it can be used with the sentence-ending particle *ne* as an expression of sympathy, but when pronounced in more authoritarian tones it functions as a fairly brusque way of forbidding something:

A Tabako o sutte mo ii desu ka? *Is it all right if I smoke?*
B Iie, ikemasen. *No, you must not.*

In similar contexts *dame da/desu* will have the same effect; you are likely to hear mothers admonishing naughty children with the words, *Dame, dame, dame!* Preceded by *[verb]-te wa*, *[noun] de wa* and *[adjective]-te/de wa*, both *ikenai* and *dame da* therefore enable you to make prohibitions

Mite wa dame desu! *You mustn't look!*
Kono saki e hatte wa *No entry beyond this point*
ikemasen. *(kono saki).*
Yasui wain de wa dame desu. *Cheap wine won't do.*
Iieya ga konna ni *I won't have the room this*
kitanakute wa ikemasen! *dirty (kitana.i)!*

It is often advisable to avoid this construction, however, as it sounds rather brusque; a softer alternative for verbs would involve the use of *-naide kudasai*, for example.

Note that in informal speech, *-te wa* is contracted to *-cha*, and *de wa* to *-ja*:

Itcha (= itte wa) dame! *You mustn't tell!*
Koko de asonja (= asonde *You can't play here!*
wa) ikenai!

8 [verb]-nakute wa/nai to/-nakereba... must [verb]

The idea of *you (etc.) must* is expressed in a rather roundabout way in Japanese, by a cluster of patterns. One way is really the opposite of the *-te wa ikenai/dame da* construction introduced above, and literally means *not doing [verb] will not do/is no good*:

Ashita wa rokuji ni *I must get up at six o'clock*
okinakute wa ikemasen *tomorrow*
Motto benkyo shinakute wa *You must study more.*
dame desu.

The other ways all basically mean *if you (etc.) do not [verb], it won't do*. For the first part of these patterns, you need the negative form of either of two constructions which both mean *if*, and which we will meet later in more detail (Unit 19 Structures 1). For the negative of the *te* form, which is different again from both the *and to* (Unit 8 Structures 3) and the quoting *to* (Unit 13 Structures 1), you simply add *to* to the present plain negative:

minai to tabenai to	kakanai to hanasanai to	konaï to shinai to
------------------------	----------------------------	-----------------------

To make the negative *-eba* form of any verb, start with its present plain negative, drop the final *i*, and add *-kereba*:

miru muna i muna kereba	kaku kakanai i kakana kereba
taberu tabena i tabena kereba	hanasu hanasana i hanasana kereba
kuru kona i kona kereba	suru shina i shina kereba

In the case of *-eba*, the pattern is completed by the addition of *ikenai/ikemasen, dame da/desu, or naranai/narimasen*, which also has a meaning equivalent to *it won't do*. With *to*, you will only find the first two:

Kusuri o { nomanakereba } ikemasen. *You must take your medicine.*
 { nomanai to }

Watashi wa mō ikanakereba narimasen. *I must go now.*

Michiko-san ni { iwanakereba } dame desu. *You must tell Michiko-san.*
 { iwanai to }

Note that these constructions can also be adapted to function with nouns and adjectives:

Kyō ja nakute wa/ja nakereba ikemasen ka?	<i>Must it be today?</i>
O-furo wa konna ni atsukunakute wa/-nai to dame desu ka?	<i>Does the bath have to be this hot?</i>
Bōi-furendo wa hansamu ja nakute wa/ja nakereba ikemasen ka?	<i>Does a boyfriend (boy-furendo) have to be handsome?</i>

In informal speech, these patterns are frequently reduced to a contracted form of *-nakute wa, -nakucha*, with or without a final *ikenai* etc.:

Mō ikanakucha (= ikanakute wa) (ikenai). *I've got to go now.*

Isoganakucha (= isoganakute wa) (dame da). *You must hurry.*

Exercises

1 Jill and Mrs Anzai are having a gossip. Add *yō desu* to their comments to make it clear that they are just going by appearances.

Example: Tanaka-san wa hontō ni kekkon shimasu.

→ Tanaka-san wa hontō ni kekkon suru yō desu.

- Ano atarashii resutoran wa oishii desu.
- Suzuki-san wa kimasen deshita.
- Asoko de urte iru konpyūta wa totemo benri desu.
- Ano wakai Doitsujin wa yūmei na kaisha no shachō desu.

2 Later, Jill and Mrs Anzai repeat each other's gossip to their respective husbands. They therefore add *sō desu* rather than *yō desu*.

Example: Tanaka-san wa hontō ni kekkon shimasu.

→ Tanaka-san wa hontō ni kekkon suru sō desu.

3 The doctor is asking Tom questions. Use the words in brackets to construct his possible answers.

Example: Itsu seki o shimasu ka? (asa okiru/toki; neru/mae ni)

Asa okiru toki seki o shimasu.

Neru mae ni seki o shimasu.

- O-naka ga itsu itaku narimasu ka? (Hiru-gohan/toki; Nihongo o benkyō suru/mae ni)
- Itsu undo shimasu ka? (Genki na/toki ni; terebi o mite iru/aida)
- Itsu tabako o suimasu ka? (Shigoto/mae ni; hataraitte iru/aida)
- O-sake o itsu nomimasu ka? (Tsukarete iru/toki; shigoto ga owaru/kara)

4 Using the *-te mo ii* construction, Tom then asks for permission to continue some of his favourite activities. Unfortunately the doctor uses *must not* constructions in order to refuse permission:

Example: tok.doki tabako o suu

*Tokidoki tabako o sutte mo ii deshō ka?

lie, sutte wa ikemasen/dame desu.

- a maiban terebi o miru
- b atsui o-furo ni hairu
- c hanbāgā o taberu
- d yoru osoku made hon o yomu

5 This time Jill has suddenly started to feel ill while at work. Using the *-nakute mo ii* construction, a Japanese colleague tries to persuade her that she doesn't have to fulfil all her commitments. Using *must* constructions, however, Jill refuses to accept this.

Example: kyō wa gogo oshieru

→Kyō wa gogo oshienakute mo ii deshō.

lie, oshienakereba narimasen/oshienai to dame desu (etc.)

- a Ginza de Tanaka-san ni au
- kaimono ni iku
- ban-gohan o tsukuru (ban-gohan *dinner, evening meal*)
- d ashita dekakeru

6 Put the following dialogue between two business colleagues into Japanese.

- A Where is Mr Suzuki, I wonder?
- B He rang up ten minutes ago – apparently he is not feeling well.
- A Is that so? Perhaps he ought to see a doctor.
- B Anyway we must finish that report.

Language and society

Being ill in Japan

Health is taken extremely seriously in Japan, as the high status of doctors would suggest. Even minor ailments such as colds are treated with care. In cold weather, it is common for people to gargle (*ugai suru*) on returning home from outside, and some still wear gauze masks (*masuku o kakeru*) for the same reason when outside in the winter. There is also a considerable preoccupation with stomach ailments (*benpi (suru) to be constipated; geri (suru) the opposite!*). The traditional medical system of Chinese origin known as *kanpo* exists alongside the

Western one, and it is not unusual to consult both with regard to the same problem.

Chemists in Japan are able to sell quite powerful drugs (such as sleeping pills – *suiminyaku*) without a prescription. If a doctor gives you a prescription, however, you might get it made up at the hospital or surgery rather than at the chemist's. (Note that it is not unusual for medicine in Japan to come in powdered form.) To call an ambulance (*kyūkyūsha*), dial 119.

Note the following additional useful words and phrases:

byōki da	to be ill	shujutsu o ukeru	to undergo an operation
daun suru	to fall ill (colloquial)	chūsha (suru)	injection
kufuku (suru)	to recover	chūsha o shite morau	to be injected
netsu ga aru	to have a temperature	kangofu	nurse
byōin	hospital	[person] noko mimai ni iku	to visit someone who is ill
nyūin (suru)	to enter hospital	kusuriya	chemist
tai'in (suru)	to leave hospital		
shujutsu (suru)	operation		

tetsudatte agemashō ka?

shall I help you?

- In this unit you will learn
- how to form imperatives
 - how to make indirect requests
 - how to express the 'giving' and 'doing' of favours
 - how members of the family are addressed and referred to, not only within the family but also when speaking to outsiders

Dialogues

Ken-san to Michiko-san wa mae kara no yakusoku de kassaten de atta ga, Michiko-san wa ochitsukanai.

- Michiko** Ken-san warui kedo, yōji ga yama hodo atte, amari jikan ga nai no yo.
- Ken** Nani ka atte no?
- Michiko** Uchi wa kazoku zen'in byōki da kara, nan demo watashi ni yatte kure to tanomu no. Chichi wa Supo-nichi o katte koi to iu shi, haha ni wa nagai kaimono no risuto o moratte iru shi, otōto made chumon shite aru gēmu sofuto o totte kuru yō ni iu n' da kara, taihen na no yo.
- Ken** Mina-san dō shita n' desu ka?
- Michiko** Otōto ga saisho ni kaze o hite, sore ga haha ni utsutte, soshite ima wa chichi made daibu warukute, shigoto o yasunde iru no yo.
- Ken** Michiko-san wa yoku daijōbu da ne.
- Michiko** Mainichi bitamin-zai o abiru hodo nonde iru no yo!

mae kara from before, from earlier on
yakusoku (suru) promise, date
[noun] de (here) because of [noun]
ochitsuk.u to settle down, calm down
yōji things to do
yama hodo heaps (lit to the extent of mountains)
nani ka atte no? is something wrong?
uchi at home, we
zen'in everyone

[noun] dake at least [noun]
kanban (suru) to spare, let off
kushan sound of sneezing
kushami a sneeze

True or false?

- 3 Michiko-san wa otōto-san no gēmu sofuto o totte kite morau.
- 4 Ken no gēmu sofuto wa amari takakunai.

Structures

1 Giving/receiving and doing favours with ([verb]-te) age.ru/kure.ru/mora.u

In Japanese, there is no single equivalent of the English *to give*; instead, there are two basic verbs of that meaning which are used depending on whether the giving is outgroup (away from the speaker and/or those associated/identified with him) or ingroup (towards the speaker and/or those associated/ identified

with him). The notion of outgroup/ingroup is not fixed; 'ingroup' can range from one person (the speaker versus the listener) to a whole nation (e.g. Japan versus another country).

The in/outgroup distinction means that the choice of verb will generally make clear who is giving to whom, especially in exchanges between speaker and listener (see below). For this reason the use of personal pronouns such as *watashi* or *anata* is even more redundant with these verbs than is usually the case in Japanese.

Ageru is used when the action of giving is taking place in the direction ingroup → outgroup, that is when the giver is either the speaker or someone associated/identified with him.

Ken-san ni purezento o agemashita. *I gave Ken a present.*
Suzuki-san wa Ken-san ni purezento o agemashita. *Suzuki-san gave Ken a present.*

The same principle applies when you are giving actions rather than things, in other words when you are doing an action for someone. *Ageru* is here attached to the -te form of the action (verb) in question:

Ken-san ni o-kane o kashite agemashita. *I lent Ken some money.*
Suzuki-san wa Ken-san ni purezento o katte agemashita. *Suzuki-san bought a present for Ken.*

Notice that the use of -te *ageru* implies that you are doing the other person a favour; for this reason, it may at times be more appropriate, or tactful, to use the verb without -te *ageru*:

Ken-san ni Eigo o oshiete imasu. *I teach Ken English.*
Tetsudaimashō ka? *Shall I help?*

This is particularly the case when you are doing something for someone of higher social standing (see Unit 9 Structures 5; Unit 18 Structures 1):

O mochi shimasho ka? *Shall I carry it (for you)?*

Kureru is used when the giving/doing of a favour takes place in the direction outgroup → ingroup, that is when the receiver is the speaker or someone associated/identified with him:

O-kane o kashite kuremasu ka? *Will you lend me (some) money?*

Ken-san wa purezento o
kuremashita.

Suzuki-san wa Ken-san ni
purezento o kuremashita.

Ken gave me a present

*Suzuki-san gave Ken a
present.*

Ageru can never be used when the speaker is the receiver or when the listener is the giver; conversely kureru can never be used when the speaker is the giver or when the listener is the receiver. When giving takes place between third persons, however, either ageru or kureru may be used, depending on which side the speaker identifies with. Compare two sentences (of identical factual content) given above and repeated here: in the first one, the speaker 'sides' with Suzuki-san, thus treating Ken as outgroup, whereas in the second example the situation is reversed.

Suzuki-san wa Ken-san ni purezento o agemashita.

Suzuki-san wa Ken-san ni purezento o kuremashita.

Morau, on the other hand, means to *receive* an object or a favour; in other words, the action of giving is perceived from the receiving end. The receiver here is ingroup, and the giver, who is marked by either ni or kara, outgroup:

Haha ni/kara tokei o
moraimashita.

Ken-san wa Suzuki-san ni
purezento o moraimashita.

*I received a watch from
my mother.*

*Ken received a present from
Suzuki-san.*

Depending on the context, morau can also mean to *get* in the sense of asking for something (or influencing the giver in some way):

Suzuki-san ni/kara tokei o
morai-nasai.

*Get a watch from Suzuki-
san.*

When used after [verb]-te form, morau again has two possible meanings. In other words, depending on the context, the following sentence, which literally means *I received Ken mending my watch*, is equivalent either to *I had my watch fixed by Ken* or to *I got Ken to fix my watch*:

Ken-san ni tokei o naoshite moraimashita.

To convey the former meaning only, -te kureru could also be used:

Ken-san ga tokei o
naoshite kuremashita.

Ken fixed my watch for me.

The choice of -te morau or -te kureru here will often depend on whether the giver or the receiver is the focus of the discourse. The -te morau sentence above centres on the receiver *I* (the speaker, ingroup), whereas in the -te kureru sentence the same speaker treats Ken (another person, outgroup) as the main protagonist. In the -te morau sentence, therefore, the person actually performing the action of the -te verb is indicated by ni/kara, not wa/ga.

Here are some more examples involving -te morau:

Suzuki-san ni/kara kuruma
o kashite moraimashita.

Nihonjin ni/kara Nihongo o
oshiete moratte imasu.

Tomodachi ni kaimono
shite moraimashita.

*I got Suzuki-san to lend me
his car.*

*I am being taught Japanese
by a Japanese.*

*I had a friend do my
shopping for me.*

2 Imperative forms

Imperative verb forms are arrived at as follows:

a -iru/-eru verbs: replace the final -ru with -ro

ne ru	→	ne ro
tabe ru	→	tabe ro
i ru	→	i ro
oki ru	→	oki ro

b -u verbs: replace the final -u with -e

ka u	→	ka e
kak u	→	kak e
hanas u	→	hanas e
mats u	→	mat e
shin u	→	shin e
yom u	→	yom e
yar u	→	yar e

c irregular formations

suru	→ shiro
kuru	→ koi
kudasaru	→ kudasai
nasaru	→ nasai
irassharu	→ irasshai

d plain negative imperatives

These are formed by attaching *na* to the plain present form:

okiru	na	<i>don't get up!</i>
kau	na	<i>don't buy it!</i>
kuru	na	<i>don't come!</i>

You are unlikely to use these forms yourself in direct speech, as they are too brusque for normal use between adults. You may, however, hear them used, e.g. by husbands addressing their wives or children, or among schoolboys, who may soften their impact by adding *yo*: *hayaku okaro yo!* (*get up, quick!*); *naku na yo* (*don't cry!*). Females generally avoid these forms, using [verb]-*te* (Unit 8 Structures 5) instead, often with *yo*: *hayaku okite yo!*/*nakanaide yo!* Imperative forms are, however, commonly used in indirect requests, and it is mainly for this reason that you need to become familiar with them.

3 Direct and indirect requests

In Unit 8 Structures 5 we saw how to make formal requests using *-te kudasai*; less formal requests can be made by using *kure* instead of *kudasai*, and 'orders' are given by using the imperative form:

katte kudasai	<i>please bury (it) for me</i>
katte kure	<i>buy (it) for me</i>
kae	<i>buy (it)</i>

Kudasai and *kure* are in fact imperative forms themselves, the former an irregular formation from *kudasaru*, the latter a regular imperative of *kureru*. Requests using *kudasaru*/*kureru* always carry the implication that the speaker would like something done for his/her benefit, whereas imperatives not involving *kudasaru*/*kureru* plainly tell another person what to do.

Indirect (or 'reported') requests are used to inform a third person about what you have been asked, told, or requested to do by someone else, or what you have asked other people to do. You already know how to report others' statements by means of *to iu* (Unit 13 Structures 1), and in fact *iu* (and occasionally some other verbs, such as *tanomu*) can also be used to report indirect requests when attached to the request, either positive or negative, with the help of the 'quoting' *to*:

Haha wa watashi ni katte kure to iimashita.	<i>Mother asked me to buy it.</i>
Haha wa watashi ni ochitsuke to iimashita.	<i>Mother told me to calm down.</i>
Haha wa hairanaide kure/ nairu na to umashita.	<i>Mother told me not to go in.</i>

Note that *kiku* cannot be used, since it only means *ask a question*, not *ask* in the sense of *request*.

The actual request made by your mother may well have been *katte kudasai* or *ochitsuki nasai* or perhaps, *katte kite* in the imperative, or *hairanaide kudasai*, etc. in the negative, but in reported requests we are concerned with reporting the gist of what was said rather than the actual words. (If necessary, that can be rendered by means of a direct quote.) For this reason it is customary to 'reduce' the request itself to its simplest form by discarding any elements that may have been originally present for reasons of politeness only.

Indirect requests can also be formed by using [verb (present plain form)] *yō ni* in front of verbs of requesting such as *iu*, thus *to iu* without the particle *to*:

Haha wa watashi ni iku yō ni iimashita.	<i>Mother told me to go</i>
Haha wa watashi ni ikanai yō ni iimashita	<i>Mother told me not to go</i>
Jill san wa Ken san ni hayaku kaeru yō ni iimashita.	<i>Jill told Ken to come home early/quickly.</i>
Watashi wa tomodachi ni o kane o kashite kureru yō ni tanomimashita.	<i>I requested a friend to lend me some money.</i>
Watashi wa tomodachi ni ikanai yō ni tanomimashita.	<i>I requested my friend not to go.</i>

Note that again *kureru* is used if the implication is one of doing the speaker a favour.

4 Fine-tuning verbs by attaching *oku* to [verb] -te

Oku is one of several verbs, such as *ageru* etc. in Structures 1 (see Unit 17 Structures 2 for others), that can be attached to the -te form of verbs to provide extra shades of meaning. *Oku* on its own means *to put/place*, but used after other verbs it indicates that the action of the verb is performed in preparation or readiness. Note the effect of adding *oku* in the following:

O-kane o watashimashita.	<i>I handed over the money.</i>
O-kane o watashite okimashita.	<i>I gave him the money (for future use, i.e. to enable him to pay the bill with it).</i>

Similarly:

Nihon no tomodachi ni denwa o shite okimashita.
Ashita no keki o tsukutte okimashita. (<i>tsukur.u</i> to make)
Karisumasu no purezento o mina katte okimashita.

The first sentence implies, for instance, that you rang your Japanese friend to inform him of someone's impending visit to Japan, the second that you have already organized the cakes for tomorrow's party, and the third, that you have already bought all your Christmas presents. Sentences ending in *te oku* are often highly dependent on the context for their interpretation, but perhaps not as much as is the case in English, where one would often say *I rang my Japanese friend, I have made tomorrow's cake, or I have bought all the Christmas presents*, without giving any indication that this is done in preparation or readiness. In other words, *-te oku* makes the situation more explicit than is normally the case in English.

Exercises

1 Taking consideration of the meaning, use appropriate forms of *ageru*, *kureru* or *morau* to complete the sentences below.

Example: Chichi wa watashi ni nekutai o ____ mashita. → *kure*

- Kono hon wa chichi ga katte ____ ta n' desu yo.
- Warasu ga tetsudatte ____ mashō.
- Chichi kara Rōrusu-roisu o ____ nasai
- Nihonjin kara Ego o oshiete ____ te imasu.
- Kodomo ni kono rajio o naoshite ____ mashō.
- Michiko-san ga o-kane o kashite ____ mashita.

2 Your friend takes an unusual degree of interest in other people's affairs; to satisfy his curiosity, tell him about various requests that have been made to you during the course of the day, using first the *to iu*, then the *yō ni iu* pattern.

Example Chichi: 'Hayaku oki nasai'

→ Chichi ga hayaku okiro to/okiru yō ni iimashita.

- Haha: 'Asa-gohan o amari takusan tabenaide kudasai.'
- Ja na: 'Daidokoro o tetsudai nasai.'
- Sensei: 'Nōto (*notebook*) o wasurenaide kudasai.'
- Tarō: 'Motto nome yo.'
- Taro: 'Mada kaeranaide kure.'

3 Fill in the appropriate kinship terms in the following exchanges between an ingroup and outgroup person (read Language and Society first!):

Example: ____ wa unasu ka? – Iie, ____ wa chotto dekakete imasu. (Father) → Orosan; chichi.

- (Photo) Kono kata wa ____ desu ka? – Iie, ____ ja ar masen. Ototo desu. (Elder brother)
- (Photo) Kore ga ____ desu. – Hē, ____ ja na. n' desu ka? Wakai desu ne! (Mother; elder sister)
- ____ mo issho ni ikimasu ka? – Iie, ____ wa benkyō ga atte, ikenai n' desu. (Younger brother)
- ____ wa o-genki desu ka? – E, ____ wa genki desu ga, ____ wa amari genki ja ar masen. (Grandmother; grandfather)

Language and society

1 Kinship terms of address and reference

In Unit 1 Language and society 2 we saw some examples of terms of address and reference, noting that *okusan*, for instance, can be used for both referring to and addressing someone else's wife (outgroup), whereas for one's own wife (ingroup) *kanai* is used in conversation with outgroupers. For husbands, there is a similar distinction between *go-shujin* and *shujin* or *otto*.

Different forms are also used in addressing and referring to those members of the speaker's family who are senior to him/her:

relation	address	reference (in speech with outgroupers)
grandfather	(o-)ji san	sofu
grandmother	(o-)ba san	sobo
father	(o-)tō-san	chichi
mother	(o-)kā san	haha
elder brother	(o-)ni-san	ani
elder sister	(o-)nē-san	ane
younger brother	name	otōto
younger sister	name	imōto

It is obvious that a hierarchical relationship exists between oneself (the speaker) and senior members of one's family; hence, such members are addressed by a kinship term with -san attached. Junior members, however, are addressed by their personal name. If the speaker is male, the address is likely to be by name only (e.g. Tarō), but females may use Tarō-san (or the diminutive Tarō-chan). When you refer to members of your own family in speech with outsiders, any such distinctions become obliterated in that everyone is referred to without -san. Towards outsiders, then, members of one's own family are referred to in a uniformly modest fashion. This is, incidentally, also true for reference to the company president by an employee when talking to outsiders: shachō is used, without -san (company presidents are, however, also addressed as shachō by their subordinates). For reference in conversation with ingroupers, the same forms as those used for address are generally used; below are some examples:

Onēsan, nanu ka tabemono wa nai ka?	<i>Isn't there anything to eat Mary? (ingroup address)</i>
Ane wa mada kaette kite imasen.	<i>Mary's not back yet. (outgroup reference)</i>
Otōsan, onēsan wa doko desu ka?	<i>Dad, where's Mary gone? (ingroup address and reference)</i>

When addressing or referring to members of an outgroup family, the corresponding terms are as follows (in formal situations, -san is replaced by -sama; okusan too becomes okusama and go-shujin becomes go-shujin sama):

relation	address	reference (in speech with outgroupers)
grandfather	o-ji-san	oji-san
grandmother	oba-san	oba-san
father	otō-san	otō-san
mother	okā-san	okā-san
elder brother	oni-san	oni-san
elder sister	onē-san	onē-san
younger brother	otōto-san	otōto-san
younger sister	imōto-san	imōto-san

In other words, the most formal set of terms is used throughout, regardless of considerations of seniority.

2 O-negai shimasu and some related expressions

In Unit 4 Structures 3 we saw that [noun] o o-negai shimasu indicates that one asks for the object the noun refers to. (Yoroshiku) o-negai shimasu can also be used in reply to someone's offer to help, and o-negai da/desu (kara) to reinforce a request:

Tetsudaimashō ka? +	
(Yoroshiku) o-negai shimasu.	<i>Yes, please.</i>
O-negai desu. Issho ni kite kudasai.	<i>Please/I implore you, come with me.</i>
O-negai da kara, katte kudasai.	<i>Please buy it for me.</i>

(Yoroshiku) o-negai shimasu is also used on its own to confirm a request that has been made, or help that has been offered earlier. Sometimes it is repeated again when the person who made the request or was offered help leaves.

Note that dōzo can be used in the sense of *please*, as in Dōzo, koko ni o-namac o kaite kudasai (*please, write your name in this space*), but cannot be used in the same way as yoroshiku o-negai shimasu, as it tends to be with offers rather than requests:

O-cha o dōzo.	<i>Please have some tea.</i>
Issho ni itte mo ii desu ka?	<i>May I come with you?</i>
- Dozo.	<i>- Please do</i>

Dōzo also often accompanies gestures, such as a waiter showing you the way (*this way, please*), or someone letting you through the door first.

家族

ka

zoku

Suzuki-san wa
hikōki ni
noriozure-sō
desu
it looks as if Suzuki-san will miss
the plane

In this unit you will learn

- how to express intention and conviction
- some more uses of the -te form
- how to form indirect questions
- more sentence endings with the idea of *seems*
- some words and phrases to do with airports and air-travel

Dialogues

Tomu-san to Suzuki-san wa kokusai-kaigi de Honkon e iku koto ni natte iru. Hisho no Yamada-san wa Tomu-san o miokuru tsumori de issho ni Narita made kita. Futari wa chekku-in kauntā no chikaku de Suzuki-san o matte iru.

True or false?

- 1 Suzuki-san wa Tomu-san ni renraku shiyō to shita.
- 2 Tomu-san wa Suzuki-san o matanaide chekku-in suru koto ni shita.

Structures

1 [verb (plain present form)] tsumori da: expressing intentions

Tsumori is a noun meaning *intention*. In the pattern A wa [verb (present plain form)] tsumori da, it is generally used as a way of

expressing one's own intentions, and asking questions about the intentions of the person you are talking to. Intentions expressed in this way are stronger and less tentative than intentions expressed using [verb] (y)ô to omou (Unit 13 Structures 7).

Watashi wa rainen Nihon e iku tsumori desu.	<i>I intend to go to Japan next year.</i>
Dô suru tsumori desu ka?	<i>What do you intend to do?</i>

To express past intentions, simply put *da* into the past tense. In the past, the intentions of other people can also be described:

Kinô haba ni denwa suru tsumori deshita ga, wasaremashita.	<i>I meant to ring my mother yesterday, but I forgot.</i>
Sugiura-san wa Tanaka-san to kekkon suru tsumori datta keredomo, dame deshita.	<i>Sugiura-san intended to marry Tanaka-san, but it didn't work out.</i>

This construction is often found in the middle of sentences in the form **A wa [verb] tsumori de** (the *-te* form of *da*), with a meaning equivalent to *with the intention of*.

Bô-furendo ni ageru tsumori de, takai nekutai o kaimashita.	<i>I bought an expensive tie, with the intention of giving it to my boyfriend.</i>
-------------------------------------------------------------------	--------------------------------------------------------------------------------------------

Also note the use of *sono* in front of *tsumori*, as in the following:

A Kore o zenbu taberu n' desu ka?	<i>Are you going to eat all of this?</i>
B Ee, sono tsumori desu.	<i>Yes, that is my intention./ Yes, I am.</i>

2 More fine-tuning of verbs using the *-te* form

In Unit 16 Structures 1 and 4, various patterns were introduced which involved the verbs *ageru*, *kureru*, *morau* and *oku* following the *-te* form of other verbs. *Shimau*, *miru*, *kuru*, and *iku* can function in a similar way.

a [verb]-te shimau to [verb] completely

By itself, *shimau* is usually used in the sense of to put away (e.g. *Futon o shimaimashita ka?* *Have you put away the futon?*), and is also found in the plain past as an expletive used by men when they realize that they have made a mistake of some kind: *Shimatta! Damn!* With the *-te* form of other verbs it basically emphasizes the fact that the action of the other verb is (or soon

will be) completed. In its most straightforward use, it is therefore equivalent to *do something completely/finish doing it/*end up doing it:

Shigoto ga owatte shimatta!	<i>The job's done!</i>
Hayaku tabete shimai nasai!	<i>Hurry up and finish your meal!</i>
Ato ichijikan de zenbu tsukutte shimau kara, sore made matte kudasai.	<i>I will finish making them all in an hour, so please wait till then.</i>
Suzuki-san wa o-sake o nomi-sugite nyuin shite shimaimashita.	<i>Suzuki-san drank so much that he ended up in hospital.</i>

Shimau is also used after the *-te* forms of actions which have been (or soon will be) completed with startling speed or with inconvenient/dramatic results. In all these cases, there is no fixed English equivalent since the nuance is likely to be conveyed by intonation as much as by any particular word.

Mô zenbu nonde shimaimashita ka?	<i>Have you already drunk it all?</i>
Shachô ni itte shimaumasu yo!	<i>I'll tell the boss!</i>
Ken-san wa sara o otoshite shimaimashita.	<i>Ken went and dropped a plate.</i>
O-kane o zenbu tsukatte shimaimashita.	<i>I've gone and used (tsuka.u) all the money.</i>
Kyô no shinbun mo sutete shimatta n' desu ka?	<i>Have you thrown away (sute.ru) today's newspaper as well?</i>
Satô-san wa mô dekakete shimaimashita.	<i>Satô-san has already left.</i>
Suzuki-san wa pasupôto no koto o sukkari wasurete shimaimashita.	<i>Suzuki-san completely (sukkari) forgot about his passport.</i>

In informal situations, you will often hear *-te shimau* contracted to *-chau*, or *-jau* in the case of verbs whose *-te* form ends in *-de*:

Sensei ni misechau (= misete shimau) yo!	<i>I'll show it to teacher!</i>
Ara, mata machigatchatta (= machigatte shimatta)!	<i>Oh no, I've gone and made another mistake (machiga.u)!</i>
Are o mô yonjatta (= yonde shimatta) no?	<i>Have you finished reading that already?</i>

b [verb]-te miru to try doing [verb]

This pattern is used when the action of the verb in the -te form is performed in order to find out what the result will be; in other words, when English uses *try doing* rather than *try to do* (-(y)o to suru, Unit 13 Structures 8):

Ano o-mise de kute mimasu.	<i>I'll try asking at that shop (to see if they know/to see if they have any).</i>
Denki o tsukete mite kudasai.	<i>Try switching on (the power/lights denki) (to see if it will work).</i>

Note the use of combinations such as *tabete miru* and *kite miru* where English is likely to use *try* by itself:

Kore wa tako desu ga, tabete mimasen ka?	<i>This is octopus – won't you try eating some/won't you try it (to see whether you like it or not)?</i>
Michiko-san no kimono o kite mimashita.	<i>I tried wearing/trying (on) Michiko-san's kimono (to see what it felt like/if it fitted).</i>

The appropriate form of -te miru is often used in front of -tai and -(y)o to omou to make the speaker's expression of his/her wishes or intentions seem more tentative, and therefore less assertive:

Ichido Yōroppa e itte mitai to omoimasu.	<i>I should like to visit Europe once/one day (ichido).</i>
Kono Nihongo no hon o yonde miyō to omoite imasu.	<i>I am thinking of reading this Japanese book.</i>

c [verb]-te kuru and [verb]-te iku

The two basic verbs of motion join with the -te forms of other verbs in three different ways, *kuru* being used when the action is going on in the direction of the speaker, and *iku* when it is going on in a direction away from the speaker, as is normally the case with *kuru* and *iku*

i Describing the direction of the action

In this use *kuru* and *iku* are combined mainly with other verbs involving movement, and serve to indicate the direction of the movement:

Inu ga hashitte kimashita.	<i>A dog came running up.</i>
Nanji ni kaette kimasu ka?	<i>What time will you be back?</i>

Kaidan o nobotte ikimasho.

*Let's climb (nobor.u) the
stairs (kaidan).*

Note the way in which they combine with *motsu* to form *motte kuru/iku*, to *bring/take (something)*, and with *tsure.ru* to form *tsurete kuru/iku*, to *bring/take (someone)*:

Kamera o motte kimashita ka?	<i>Have you brought your camera?</i>
Wain o motte ikimasho.	<i>Let's take some wine.</i>
Tomodachi o tsurete kite kudasai.	<i>Please bring a friend.</i>
Otōto o tsurete itte mo ii desu ka?	<i>Is it all right if I bring my (younger) brother along?</i>

Also note *totte kuru*, to *fetch (something)*:

Ken-san wa Tarō-kun no gēmu sofuto o totte kite kuremashita.	<i>Ken fetched Tarō-kun's game software (for Michiko).</i>
--------------------------------------------------------------------	--------------------------------------------------------------------

Also note the expression *denwa ga kakatte kuru* (to receive a telephone call) in which -te kuru is combined with *denwa ga kakaru* (a telephone call is made, the intransitive equivalent of *denwa o kakeru*):

Denwa ga kakatte kimashita yo.	<i>There was a telephone call for you.</i>
-----------------------------------	------------------------------------------------

Other verbs of motion, *kaeru* in particular, will combine with the -te form of verbs in a similar way:

Kodomo ga hashitte kaerimashita.	<i>The child ran home.</i>
Michi o aruite watarimashita.	<i>I walked across the road (watar.u to cross).</i>
Imōto o tsurete kaerimashita.	<i>I took my (younger) sister home.</i>

ii Doing something and then coming/going

You have already met the combination with *kuru* in the phrase *itte kimasu* (Unit 3 Language and society 1) and in commands in Unit 16. The idea is that the speaker, or someone else, performs the action of the verb in the -te form, and then comes to where the speaker is now. In the present, it is usually equivalent to English *go and do something*:

Sugu itte kimasu.	<i>I'll be back in a second.</i>
Chotto tegami o dashite kimasu.	<i>I'll just go and post a letter.</i>

Matchi o katte kite kudasai. *Please go and buy some matches (matchi)*

In the past, it is used to refer to something which you did before coming to where you are now:

Senshū wa chotto Pari e irte kimashita. *I made a quick trip to Paris last week.*
Gohan o tabete kimashita. *I ate a meal before I came/I've just eaten. (A useful way of refusing an offer of food!)*

Kippu o wasurete kimashita! *I've forgotten my ticket/I've left my ticket behind!*

With *iku*, however, the idea is that the speaker, or someone else, does something and then goes away from where the speaker is now:

Gohan o tabete ikimashō. *Let's have a meal and then go/Let's eat before we go.*

Ara, otosan wa pasupōto o wasurete ikimashita! *Oh dear, father's forgotten his passport (and gone)! left his passport behind!*

iii Describing actions which take place over time

With *kuru* this combination is used to indicate either that something has begun, or that an event which started to come about some time before is still going on. Often the implication is that you have only just noticed it. *Kuru* is usually in the past tense.

Ame ga futte kimashita. *It has started raining.*
O-naka ga suite kimashita. *I've started to feel hungry.*
Kyū ni samuku natte kimashita. *It's suddenly turned cold.*

With *iku*, it is rarer, and refers to an event which will start in the present and go on from there. *Iku* is likely to be in the present tense.

Kore kara dandan atatakaku natte iku deshō. *I expect that it will gradually (dandan) grow warmer from now on.*

3 [statement] hazu da: expressing convictions

Hazu da is used to express convictions/expectations with regard to past, present or future situations which have some objective backing (as opposed to *darō*, which tends to be more subjective,

see Unit 6 Structures 2). The speaker is not sure about the statement but has, or had, evidence that it is, or was, likely to be so or to occur. The statement might concern a natural occurrence, something which happens regularly, or something which is scheduled to happen. *Hazu da* is therefore equivalent to English *is likely/supposed/meant/should/ought to (happen/have happened)*. It is found after nouns, adjectives, and verbs in the forms which these generally take in front of nouns:

nouns

Ken-san wa juroku-sai desu kara, kokosei no hazu desu	<i>Ken is sixteen (years old -sai) so he should be a high school student (kokosei).</i>
Kinō wa yasumi datta hazu desu ga, kaisha ni ikanakereba narimasen desh ta.	<i>Yesterday should have been a holiday, but I had to go to the office/to work.</i>

na adjectives

Tomu-san wa Nihon ni nagaku sunde iru kara, Nihongo ga jōzu na hazu desu ga . . .	<i>Tom has been living in Japan for a long time so his Japanese ought to be good but . . .</i>
Koko wa shizuka datta hazu desu ga . . .	<i>This place was supposed to be quiet . . .</i>

-i adjectives

jūnigatsu desu kara, Igrisu wa mō samui hazu desu. Motto yasukatta hazu desu.	<i>It's December, so Britain is likely to be cold by now. It should have been much cheaper.</i>
-------------------------------------------------------------------------------	-------------------------------------------------------------------------------------------------

verbs

Tanaka-san wa kyō Yōroppa kara kaette kuru hazu desu.	<i>Tanaka-san is meant to be coming back from Europe today.</i>
Machiko-san wa ima gakkō de benkyō shite iru hazu desu.	<i>Machiko-san is supposed to be studying in school now.</i>
Kono hon wa mō yonda hazu deshō.	<i>You are meant to have read this book already, aren't you?</i>

Also note the use of *sono* and *sonna* in front of *hazu*:

- | | |
|----------------------------------------------------------------------|--------------------------------------------------------------|
| A Hado-san wa ashita kara
Honkon e iku koto ni
natte imasu ne. | Mr Herd is going to Hong
Kong from tomorrow,
isn't he? |
| B Hai, sono hazu desu. | Yes, that is what is meant to
be happening. |
| A Tanaka-san wa kaisha o
yameta sō desu. | They say that Tanaka-san
has left her job. |
| B Iie, sonna hazu wa arimasen! | Surely that can't be right! |

4 Reporting questions

In reporting questions, the same basic principles are followed as in reporting statements (Unit 13 Structures 1), with the original question going into the plain form. *Kiku* is the most straightforward verb for asking questions, but *tazuneru*, which has a similar meaning, is also used. Note that the quoting *to* can be omitted after *ka*:

- | | |
|---------------------------------------------------------------|------------------------------------------------------|
| 'Nanji ni dekakemasu ka?' | 'What time are you setting
out?' |
| → Nanji ni dekakeru ka (to)
Yamada san ni kute
okimasu. | I'll ask Yamada-san what
time she is setting out. |
| 'Ikura haraimashita ka?' | 'How much did you pay?' |
| → Ikura haratta ka (to)
Anzai-san ni tazunete
kudasai. | Please ask Anzai-san how
much she paid. |

Japanese adopts the same strategy whenever a question is buried in a sentence. With verbs other than *kiku* and *tazuneru*, however, the quoting *to* is never used after *ka*:

- | | |
|-----------------------------------------------|-----------------------------------------------|
| Dare ga denwa o kaketa ka
shitte imasu ka? | Do you know who
telephoned? |
| Pasupōto o doko ni oita ka
oboete imasen. | I don't remember where I
left my passport. |

When there is no question word in the sentence, such as *nanji*, *dare*, etc., *ka dō ka* (*whether or not*) is often used instead of *ka* by itself:

- | | |
|---------------------------------------------------|----------------------------------------------------------------|
| Michiko-san ga iku ka dō
ka kikumashita ka? | Did you ask whether
Michiko-san was going or
not? |
| Tanaka-san ga kekkon suru
ka dō ka shirimasen. | I don't know whether
Tanaka-san will get
married or not. |

Eiga ga omoshirokatta ka dō
ka oshiete kudasai.

Please tell me whether the
film was interesting or not.

Finally, note that it is usual to omit *da* (but not *datta*) before *ka*:

- | | |
|--------------------------------------------------------------------|--------------------------------------------------------------------------------------------------|
| Sugiura-san wa donna hito
ka shitte imasu. | I know what sort of person
Sugiura-san is. |
| Sore wa hontō ka dō ka
shirabemasho. | Let's investigate whether or
not that is true. |
| Kyōnen wa howaito
Kurisumasu datta ka do
ka oboete imasu ka? | Do you remember whether
or not we had a white
Christmas (howaito
Kurisumasu) last year? |

6 [verb]-nakute/-naide: two negative -te forms

All verbs have two negative *-te* forms, except for *aru*, which has only *nakute*. (The negative *-te* form of *da* is *ja/de (wa) nakute*, see dialogues, Units 12 and 13.) In Unit 8 Structures 5 you were introduced to the *-naide* form. In addition to its use in expressing negative requests, this form is used in the middle of sentences, usually with a meaning equivalent to *without -ing* in English:

- | | |
|-------------------------------------------------------------------|------------------------------------------------------------------|
| Yūbe nenaide benkyō
shimashita. | Last night, I studied
without sleeping. |
| Tarō-kun wa sensei ni nani
mo iwanaide uchi e
kaerimashita. | Tarō-kun went home
without saying anything
to the teacher. |

You met the other, *-nakute*, form in Unit 14 Structures 3 and Unit 15 Structures 8. In addition to its use in the *-nakute mo ii* and *-nakute wa ikenai* patterns, this form is also used in joining sentences. The subjects of the two sentences can be different, and the first one often gives the reason for the second (Unit 13 Structures 4):

- | | |
|-------------------------------------------------------|-----------------------------------------------|
| Motto mae ni renraku
shinakute, dōmo
sumimasen. | I am sorry I did not contact
you earlier. |
| Ikan ga nakute komatte
imasu. | I'm in trouble because I
haven't any time. |
| Dare mo minakute yokatta
desu. | I'm glad no one saw. |

6 [statement] rashii it seems/apparently

Rashii is an *-i* adjective which is added onto statements and has implications similar to both *yō da* (Unit 15 Structures 1) and *sō da* (Unit 15 Structures 3); in other words, *rashii* is used by a

speaker to indicate that what he or she is saying is based on information obtained visually and/or from what has been heard or read. In the following examples, note the forms which nouns, adjectives, and verbs take before *rashii*, both in the present tense and in the past.

nouns	
Koko wa kanari L hoteru rashii desu. Suzuki-san no otōsan wa yūmei na haiyū datta rashii desu.	<i>This looks like quite (kanari) a good hotel. Apparently, Suzuki-san's father was a famous actor (haiyū).</i>
na adjectives	
Kono terebi wa dame rashii desu. Wakai toki kanojo wa kirei datta rashii desu.	<i>It looks as if this television is no good. They say she was pretty when she was young.</i>
-i adjectives	
Ano eiga wa totemo omoshiroi rashii desu. Kyonen no fuyu wa samukatta rashii desu.	<i>That film seems very interesting. It appears that the winter was cold last year.</i>
verbs	
Tomu-san wa asatte Hong-kon kara kaette kuru rashii desu. Suzuki-san wa yatto pasupōto ga mitsukatta rashii desu.	<i>It seems that Tom will return from Hong Kong the day after tomorrow (asatte) It seems that Suzuki-san has at last found his passport.</i>

When there is a negative, it will normally come before *rashii*:

Soto wa amari atatakakunai rashii desu. Suzuki-san wa hikōki ni norenakatta rashii desu.	<i>It doesn't look very warm outside (soto). Apparently Suzuki-san was unable to get on the aeroplane.</i>
---------------------------------------------------------------------------------------------	----------------------------------------------------------------------------------------------------------------

7 [adjectives/verbs]-sō da it seems (to me)

When added to adjectives and verbs, *-sō da* indicates that what you are saying is based on a personal, primarily visual, impression which may or may not be shared by other people. It is distinguished from *sō da* meaning *apparently* (Unit 15 Figures 3) by the fact that it combines with non-final forms of both adjectives and verbs, to make what are pronounced as single words.

With adjectives, *-sō da* is equivalent to *it seems/looks (to me)* in English. *Na* adjectives drop *na* in front of *-sō da*, the most common combination being with *genki na*:

Kyō wa genki-sō desu ne. Ano torakku wa totemo jōbu-sō desu.	<i>You look well today. That lorry (torakku) looks really strong (jōbu na).</i>
-----------------------------------------------------------------	-------------------------------------------------------------------------------------

i adjectives drop their final *-i*:

Kono sūpu wa hontō ni oishi-sō desu. Sono obā wa atataka-sō desu ne!	<i>This soup looks really delicious. Your overcoat (ōbā) looks warm!</i>
-------------------------------------------------------------------------	------------------------------------------------------------------------------

-sō da is particularly common with adjectives of emotion, such as *ureshi.i* (*happy*), *kanashi.i* (*sad*), *sabishi.i* (*lonely*), and *genki na* (which can mean *cheerful*), when used in describing the feelings of others. Such descriptions must be based on the personal evaluation of the speaker, since we can never know what someone else is really feeling.

Ureshi-sō desu ne! Michiko-san ga inai kara, Ken-san wa chotto sabishi-sō desu.	<i>You're looking happy! Ken seems a little lonely because Michiko-san isn't there.</i>
---------------------------------------------------------------------------------------	---------------------------------------------------------------------------------------------

It and *nai*, the negative plain form of *aru*, have similar, irregular, forms when combined with *-sō da*. *yosa-sō da* and *nasa-sō da*.

Jiru-san wa atama ga yosa-sō desu. Ano gakusei wa o-kane ga amari nasa-sō desu.	<i>Jill looks intelligent. That student (gakusei) doesn't seem to have very much money.</i>
------------------------------------------------------------------------------------	-------------------------------------------------------------------------------------------------

With verbs, *-sō da* tends to be used when you detect signs that an action is about to occur; it is therefore equivalent to *it looks (to me) as if it is likely to/about to*. *-sō da* follows the *-masu* base of verbs.

Ame ga furi-sō desu ne.
Ki o tsukete yo! Hon ga
zenbu ochi-sō desu!
Michiko-san mo korare-sō
desu.

*It looks like rain.
Look out! The books are all
about to fall!
It looks as though Michiko
will be able to come too.*

To refer to past impressions, -sō da becomes -sō datta.

Ano resutoran wa taka-sō
datta kara, hairimasen
deshita.

*That restaurant looked
expensive, so we didn't go
in.*

Tomu-san wa kaze o
hiki-sō deshita.

*It looked as if Tom was
going to catch a cold.*

To form the negative with combinations with adjectives, it is possible simply to turn -so da into -sō de wa nai/nakatta:

Tomu-san wa genki-sō de
wa arimasen deshita.

Tom didn't look well.

Kono hon wa amari
omoshiro-sō de wa
arimasen.

*This book doesn't look
interesting.*

It is possible to use their usual negative forms and turn nai into nasa-so da:

Tomu-san wa genki ja
nasa sō deshita.

Tom didn't look very well.

Kono hon wa amari
omoshirokunasa-sō desu.

*This book doesn't look very
interesting.*

Tarō-kun wa tanjōbi ni
purezento o iroiro moratta
keredomo, amari ureshiku
nasa-sō deshita.

*Taro-kun got all sorts of
presents on his birthday,
but he didn't look very
happy.*

In the case of verbs, however, the negative is formed by turning -sō da into -sō mo nai/nakatta, the resultant combination being fairly emphatic: *there's no sign of/no way that.*

Kyō wa owari-sō mo nai
kara, kaerimashō.

*There's no sign of our
finishing today, so let's go
home.*

Zenbu tabe-sō mo arimasen.

*There's no way we're going
to eat it all.*

-sō da can also occur in front of nouns, in the form -sō na, and adverbially, in the form -sō ni:

genki-sō na kodomo
ame ga furi-sō na hi

*a healthy-looking child
a day which looks like rain*

Tarō-kun wa ureshi-sō ni
asukurimu o tabemashita.
Repōto ga owari-sō ni
narimashita.

*Tarō-kun happily (looking
happy) ate the ice-cream.
The report is nearly
finished.*

Exercises

1. The following are extracts from conversations. Complete the replies by using the words in brackets, providing an appropriate verb, and adding tsumori desu.

Example: A Nanji ni dekakeru n' desu ka?

B (rokuji) → Rokuji ni dekakeru tsumori desu.

a A Itsu Sapporo e ikimasu ka?

B (raishū)

b A Ashita nani o suru n' desu ka?

B (eiga)

c Jiru Konban benkyō suru deshō?

Ken (Iie, Michiko)

d Anzai-san no okusan Konban Ken-san ni au n' desu ka?
Michiko (Iie (hon))

e Put the verbs into the -te form and add shimaui, miru, kuru or iku as appropriate:

Example: Kore wa oishii desu yo. Tabemasen ka?

→ Tabete mimasen ka?

a A Biru o zenbu nomimashita!

B Kaimashō ka?

b Sukiyaki o uchi de tsukurita desu.

c Yamada-san wa mainichi eki made arukimasu.

d Hado-san wa mo hikoki ni norimashita.

e Kore kara dandan samuku naru deshō.

f Indicate that the following statements have some objective basis in fact by substituting hazu desu for deshō etc.

Example: Tanaka-san wa rainen kekkon suru deshō.

*Tanaka-san wa rainen kekkon suru hazu desu.

a Kyō wa nigatsu nijū kunichi deshō.

b Kono hanbāgā wa oishi sō desu.

c Ano hoteru wa shizuka ka mo shiremasen.

d Pasupōto ga mō mitsukatta deshō.

e Kaigi wa raishū deshō.

4 Change the following into indirect questions by adding the sentence endings indicated in the brackets. Remember to use *ka dō ka* where necessary.

Example Suzuki-san wa doko ni imasu ka? (kute kudasai)
→ Suzuki-san wa doko ni iru ka kiite kudasai.

- a Kinō nan-bon nomimashita ka? (oboete imasen)
- b Michiko-san ga mada matte imasu ka? (shitte imasu ka?)
- c Sukiyaki ni satō (*sugar*) o iremasu ka? (wasuremashita)
- d Hikōki wa nanji ni tsukimasu ka? (shirabemashō)
- e Hado-san ga tabako o yamemashita ka? (wakarimasen)

5 Put the verb in brackets into the appropriate negative *te* form.

Example: Mado o (akeru) kudasai. → Mado o akenaide kudasai.

- Pen o (tsukau) mo ii desu.
- b O kane o (watasu) heya o demashita.
- c Kaze o (hiku) yokatta desu.
- Takushi ga nakanaka (kuru) aruku koto ni shimashita.
- e Uchi e (kaeru) kaisha de nemashita.

6 Tanaka-san has been looking unwell recently. Complete these snippets of worried gossip about her by adding *rashii desu* or *-sō desu* etc. as indicated.

Example: (Sugiura-san to kekkon shimasen) rashii desu.
→ Tanaka-san wa Sugiura-san to kekkon shinai rashii desu.

- a (amari genki de wa arimasen) -sō desu.
- b (kao-iro ga amari yoku arimasen) rashii desu.
- c (saikin nakimashita) -sō ni narimashita.
- d (yube neraremasen deshita) rashii desu.
- e (itsumo kanashii) -sō desu.

Language and society

Airports and air-travel in Japan

More and more Japanese are using air-travel to go abroad every year, but the relatively long distances between Tokyo and the two extremes of the Japanese archipelago mean that domestic flights are also heavily used: the Tokyo–Sapporo route is one of the busiest, if not *the* busiest, air route in the world. It is very common for a traveller to be accompanied to the airport and seen off (*miokuru*), and also to be met (*mukaeru*) on his/her

return. English will, of course, be spoken on international flights (*kokusai-bin*, as opposed to *kokunai-bin* (*domestic flights*)) and at international airports, but here are some more words and phrases which might be of use:

muchuādesu air hostess
[number]-bin flight [number]
chakuriku (suru) landing (of
 airplane)
ririku (suru) taking-off (of
 airplane)
nyū(koku)kan(ni) immigration
 control
zeikan customs
nyūkan/zeikan de tsukamaru
 to be caught by immigration
 control/customs

jisa time difference
[number]-jikan no jisa a time
 difference of [number] hours
jisa-boke o shite iru to be
 suffering from jet lag
jisa-boke ga naotte iru/naotta
 to be/have recovered from jet
 lag

18

irashite itadakemasen deshō ka?

might you be able to come?

In this unit you will learn

- about honorific and humble speech levels, and how to use them in telephone conversations
- some more expressions of contrast and purpose
- about when and how Japanese people enjoy having parties

Dialogues

Iiru-san no seito datta Tanaka-san kara mukashi no kurasu no ierubā no dōsō-kai no koto o shiraseru tame ni denwa ga kakatte kita.

Structures

1 Honorific and humble forms

Honorific and humble expressions are largely concerned with verbs, i.e. people's actions. The actions of people who are perceived as being of high social status are customarily expressed by using 'honorific' verb forms, whereas the same speaker will use 'humble' forms with regard to his own actions when conversing with such people. In Unit 16 we saw how the in/outgroup distinction accounts for the choice between ageru and kureru, the same distinction may be applied to the choice between honorific and humble forms: humble forms are used for ingroup actions (i.e. when the speaker and member of his group are the subject), honorific forms for outgroup actions (i.e. when the listener and his group, or persons talked about, are the subject). If the humble verb is transitive, the object will either be the outgroup person himself or something associated with him.

One of the effects of this distinction is therefore to clarify the subject and/or object of the verb, which are often not made explicit in any other way.

Like ageru/kureru, honorific and humble forms are very much like two sides of a coin in that a speaker who uses honorific forms towards someone else will normally also employ humble forms about himself. Note, however, that the person being addressed will often talk back at a different level of speech (for instance, without using honorific/humble forms) where there is a marked difference in social status, etc. There has already been

some information on speech levels between shop attendants and customers in Unit 9 Language and society 2, and we saw some instances of humble forms there and elsewhere (Units 10 and 11).

Apart from social status (in Japan, medical doctors and teachers of any kind are typical groups with high status), other factors such as seniority, social distance (lack of intimacy) and the degree of formality of the situation also contribute to the choice of speech levels. In Japan, telephone conversations are perceived as being fairly formal situations (except when they take place between people who are very intimate) – so people will sound more formal on the telephone than when conversing otherwise.

There are a number of regular processes by which honorific and humble forms of verbs may be obtained.

a Regular humble forms

In Unit 9, we saw that the combination o [masu base] suru produces a humble form. To make the expression even humbler, itasu can be used instead of suru. Note that, although never the subject, the action involves the outgroup person in some way, often as the beneficiary of the action (occasionally, as in the first example below, as the benefactor):

o-kan-shimasu/itashimasu	(I) will borrow (it, from you, etc.)
o-yobi-shimashō/itashimashō	Let (me) invite (you)
o-mise shimasu/itashimasu	(I) will show (you)

Most [noun] (suru) verbs, in particular those derived from Chinese rather than Western languages, have go-[noun] suru as their humble form:

go-renraku shimasu/itashimasu	(I) will contact (you)
go-chūmon shimashō/itashimasnō ka?	Shall (I) order (it, for you)?

Some, however, use o- rather than go-:

o-denwa shimasu/itashimasu	(I) will ring (you)
o-yakusoku shimasu/itashimasu	(I) promise (you)

b Regular honorific forms

There are two regular processes available. The more formal of these involves o-[masu base] ni naru, or go-[noun] ni naru for most (noun) suru verbs:

o-machi ni narimasu ka?	Will (you) wait?
mō o-kaeri ni narimasu ka?	Are (you) leaving already?
o-yomi ni narimashita ka?	Have (you) read (it)?
go-chūmon ni narimasu ka?	Will (you) order it?

It is also possible to use nasaru instead of ni naru. This is less common, and used mainly by women:

o-machi nasaimasu ka?
o-yomi nasaimashita ka?
go-chūmon nasaimasu ka?

Desu can sometimes, but not always, replace ni naru/nasaru. Often it is equivalent to a -te iru form:

o-machi desu ka?/o-machi ni natte imasu ka?	Are (you) waiting?
o-kaeri desu ka?/o-kaeri ni natte imasu ka?	Are (you) back?/Are (you) leaving? (in the latter meaning only with desu)
o-dekake desu ka?/o-dekake ni natte imasu ka?	Is he/she out?/Are (you) going out? (in the latter meaning only with desu)

The second, less formal process involves passive forms and will therefore be introduced in Unit 21.

c Irregular humble and honorific forms

Some common verbs, such as suru, have special humble and honorific equivalents, as in the following chart (regular forms used where no special forms exist are given in brackets). Note that some humble and honorific forms have more than one meaning, while there is a choice of humble/honorific equivalents for the same verb in some cases.

verb	humble	honorific	meaning
au aru	o-me ni kakaru (motte oru)	(o-ai ni naru) (o-ari da) (o-mochi da)	to meet to be there/ to have to be there
iru	oru	irassharu/ o-ide ni naru/ orareru	
iku	mairu	irassharu/ o-ide ni naru	to go
kuru	mairu	irassharu/ o-ide ni naru	to come
suru u	itasu mōsu/ mōshiageru*	nasaru ossharu	to do to say, be called
miru kari.ru kuru	haiken suru haishaku suru	go-ran ni naru (o-kari ni naru) o-meshi ni naru	to see, look at to borrow to put on (clothes)
taberu/ nomu omou shiru	itadak.u zonji.ru zonjiage.ru*/ zonji.ru	meshiagaru/ agaru (o-omoi ni naru) go-zonji da	to eat/to drink to think to know

*Being the politer of each pair, *mōshiageru* and *zonjiageru* are used only in the sense of to say to someone and to know a person, respectively, whereas *mōsu* can also refer to one's own name, and *zonjiru* to the knowledge of facts.

Note that *nasaru*, *irassharu* and *ossharu* are like *kudasaru* in that their *-masu* form is not *nasarimasu* etc. but *nasaimasu*, *irasshaimasu* and *osshaimasu*, and their imperative forms are *nasai*, *irasshai* and *osshai*.

As seen from the example in the dialogue, the *-te* form of *irassharu* (*irasshatte*) is sometimes shortened to *irashite*, especially by women.

Following are some typical question-answer exchanges between people of equal standing involving some of the above pairs.

Watashi no shashin o goran ni narimashita ka? Have you seen my photo?
Hai, haiken shimashita. Yes, I have.
Nan to osshaimasu ka? What is your name (lit.

Tanaka to mōshimasu.

Dōzo, meshiagatte kudasai.
Hai, itadakimasu.

Okāsama wa irasshaimasu ka?
Hai, orimasu.

Ashita nanji ni irasshaimasu ka?

Sanji ni mairimasu.

Unlike the *o-go-[masu base]* *suru* humble forms, the action of many of the above humble verbs does not have to involve an outgroup person: e.g. *oru* is mostly used in the sense of *I/he/she/we* (ingroup) *am/is/are here*, without implying that *I/he etc.* are at the house of a person of high status. The exceptions are *o-me ni kakaru*, *mōshiageru*, *haiken suru*, *haishaku suru*, and *zonjiageru*, which are limited in the same way as regular humble forms.

As *oru/irassharu* and *orareru* are the humble/honorific equivalents of *iru*, and *mairu/irassharu* those of *kuru/iku*, it is possible to increase the formality of a sentence involving *te iru* or *-te kuru/iku* by substituting their respective humble/honorific forms, as appropriate:

Junigatsu yokka o kangaete orimasu.

Shujin wa kaette orimasu.
Suzuki-san o go-zonji desu ka?

Hai, zonjiagete orimasu.
Sensei wa o-kaeri ni natte irasshaimasu ka?

Yonde mairimasu.
Kaimono ni itte mairimasu
Hayaku kaette irasshai.

what are you called)?
My name is Tanaka.

Please have some food.
Thank you, I will.

Is your mother at home?
Yes, she is.

What time will you come tomorrow?

At three o'clock.

I have December 4 in mind.

My husband is back.
Do you know Suzuki-san?

Yes, I do.
Is sensei back?

I will call her.
I'm going out shopping.
Please come home soon.

There are a few irregular expressions that are essentially euphemisms; some of these verbs can be used for the actions of both ingroup and outgroup persons (in case of ingroup, in their *-masu* form; for outgroup, often in their *o-[masu base] ni naru* form; or for ingroup only, with humble forms being unavailable in most cases):

ingroup examples:

neru	yasumu (rest)	o-yasumi ni naru
kuru	mieru (become visible) (outgroup only) This expression is only used for third persons (for addressing outgroup, irassharu is used) ukaga.u (call) (ingroup only) agaru (visit, come) (ingroup on y)	o-mie ni naru
kiku	ukagau; o-ukagai suru (humble) (both ingroup only)	
shinu	nakunaru (pass away)	o-nakunaru ni naru

Shujin wa mo yasumimashita.	My husband has already gone to bed.
Yūbe nakunarimashita.	She died last night.
Ashita ukagaimasu.	I shall call upon you tomorrow.
Chotto o-ukagai shitai desu ga ...	I hope you won't mind my asking you, but ...
O-shirase suru tame ni agarimashita.	I have come to inform you.
Outgroup examples.	
Yukkuri o-yasumi ni natte kudasai.	Please have a good night's sleep.
Kyō o kyaku san ga miemasu.	A guest (kyaku) is coming today.
O-mie ni narimashita.	They are here.
Sensei ga sengetsu o-nakunari ni narimashita.	Sensei passed away last month.

d Humble and honorific forms of ageru/kureru/morau

As we saw in Unit 16, ageru and morau are used by ingroup only; they can therefore be expected to have humble equivalents for formal situations:

ageru	sashiageru
morau	itadaku (the humble form for taberu/nomu is therefore in fact the humble form of morau to receive)
Kono hon o sashiagemasu.	I would like to give you this book.

Sensei kara tegami o itadakimashita.

I have had a letter from sensei.

Expressions involving -te ageru/morau can also be made more formal by substituting these humble forms.

kite moraitai desu → kite itadakitai desu → irasshatte itadakitai desu I would like you to come.

Ageru is used towards a listener of equal or slightly lower status; intimate people and people of clearly lower status, as well as flowers etc., yaru is used (hana ni mizu o yarimashita I watered the flowers). Witness the following examples in rising order of formality:

oshiete yaru/yarimasu → oshiete agemasu → oshiete sashiagemasu I will teach/show you

When asking politely if the listener would do something for you or join you in some activity, the potential form of itadakimasu is generally used in question form, with the literal meaning *can you give your doing ...?*. To make this even politer, itadakemasu deshō ka or itadakemasen deshō ka may be used:

Kono hon o kashite itadakemasu ka?	Could you possibly lend me this book?
Issho ni kite itadakemasu ka?	Would you mind coming with me?
O-namae to go-jūsho o koko ni kaite itadakemasu deshō ka?	Would you be so kind as to write your name and address here?
Nichiyōbi ni irashite itadakemasen deshō ka?	Could you perhaps come on Sunday?

At a less polite level, moraeru can be used.

O-kane o kashite moraemasu ka?	Can you lend me some money?
--------------------------------	-----------------------------

As we saw in Unit 16, kureru has kudasaru as its formal equivalent. This is an honorific form. Because kureru is used with outgroup subjects only, it has in fact no humble form.

• An idiomatic expression: o-denwa mōshiageru

Although you will usually hear (o-)denwa o shimasu/itashimasu/ sashiagemasu, also note o-denwa mōshiageru, a very formal humble equivalent of denwa (o) suru. Note that it is not possible to use mōsu instead of mōshiageru.

Although o can be used after o-denwa, it is more often omitted;

this is characteristic of formal language and occurs with other particles such as *wa*, as in the dialogue: *Jiru sensei irasshaimasu ka?*/Watakushi Tanaka to mōshimasu ga, . . .

2 Other formal expressions

Humble and honorific expressions are clearly distinguished by the fact that the former are used only with regard to the speaker and his group, and the latter with regard to the listener or to third persons.

Recall that in Unit 2 Language and society 1 we saw that *o-/go-* can also indicate this distinction (*o-tegami* your letter), but at other times will simply give the conversation a politer, more formal ring (*o-sake*).

a *Desu* and *de gozaimasu*

The use of *desu* and *-masu* (rather than using plain forms) at the end of a sentence etc. also has a formal effect (recall also the use of *deshō* instead of *desu* to make very polite questions – Unit 6 Structures 2); this can be heightened further by using *de gozaimasu* instead of *desu* (*-masu* does not have a more formal equivalent; instead, the verb to which it is attached is converted to a humble/honorific one where possible)

Kyō wa nichiyōbi de gozaimasu.

De gozaimasu is used in expressions such as *sō de gozaimasu ka* or *sayō de gozaimasu ka?* (indeed?). It is also common in statements about ingroup members:

Tanaka de gozaimasu. I am Tanaka.
Shujin de gozaimasu. This is my husband.

It is, however, never used with regard to an outgroup person; for such cases, *de irasshaimasu* (the honorific equivalent of *desu*) is sometimes used in formal situations, such as on the telephone.

Hādo-sensei de irasshaimasu ka? Is that Herd sensei?
Okasama wa taihen o genki de irasshaimasu. His/your mother is very energetic

b *Arimasu* and *gozaimasu*

When referring to objects, *gozaimasu* may be used for both in- and outgroup as a very formal equivalent of *arimasu* (although for outgroup, the honorific *o-ari desu/deshō* can also be used):

Atarashi o-sakana ga gozaimasu yo.
Ima o-jikan gozaimasu/o-ari desu ka?

We have some fresh fish.
Would you have time now?

Formal equivalents of nouns: *bito*→*kata*; *dō*→*ikaga*; *watakushi*→*watakushi*; *koto*→*ken* etc.

This may be divided into three types: nouns such as *kata* can be used only about outgroup and are therefore honorific (much like referring to outgroup relations, see Unit 16 Language and society 1), whereas *watakushi* is a humble expression. *Ikaga* and *ken* are expressions that are used in formal situations without necessarily referring to any person (in practice, however, *ikaga*, being a question word, almost invariably refers to outgroup).

Gaikoku no kata mo irasshaimasu ka? Are there any foreigners, too?
Kono kata ga Hādo-san no okusama desu. This lady is Mr Herd's wife.
Watakushi Tanaka to mōshimasu. My name is Tanaka.
Biru wa ikaga desu ka? Would you like some beer?
Ko ryokō no ken de I am contacting you about your trip.
go-renraku o mōshiagete orimasu ga.

3 Indicating purpose and reason with *tame* (ni)

We saw in Unit 7 Structures 2 that before *iku/kuru* etc., purpose can be expressed by [*-masu* base] *ni*. In a more general way, however, purpose is expressed by the noun *tame* (ni) after both the present plain form of verbs and [noun] *no*:

Nihongo o narau tame ni I will go to Japan in order to learn (nara.u) Japanese.
Nihon ni ikimasu. I got up early to do my jogging.
Jōgingu o suru tame ni hayaku okimashita. Please take off your shirt for the examination.
Shinsatsu no tame ni shatsu o nuide kudasai. I have come to Japan to work.
Shigoto no tame ni Nihon ni kimashita.

When attached to nouns referring to people and countries etc., *tame ni* means *for* (the benefit of) [noun]:

Sensei no tame ni purezento o kaimashō. Let's buy a present for sensei.

Ken san no tame ni pāti ga
shitai desu.
Kuni no tame ni shita koto
desu.

*I'd like to throw a party
for Ken.
It's something I did for my
country.*

Note that before *desu*, *tame* is used without *ni*:

Nan no tame ni kita n' desu
ka?

What have you come for?

Ryokō no uchiawase no
tame desu/ryokō no
uchiawase o suru tame desu.

*In order to make travel
arrangements (uchiawase).*

When *tame ni* is attached to adjectives, and verbs that indicate a state (*aru/iru*) or are in the *-te iru* or *-ta* form, it indicates a reason; *tame* here has a more formal/official ring than *kara*:

Dōshite konna ni osoi n'
desu ka? Densha ga
okureta tame desu.

*Why are you so late? On
account of the train
running late.*

Yotte ita tame ni oboe ga
arumasen.

*Because I was drunk I don't
remember.*

Ii gakkō ga chikaku ni aru
tame ni koko ni sunde
masu.

*We live here because there
is a good school nearby.*

Kurasa ga ōkii tame ni
amari renshu dekimasen.

*I don't get much practice
(renshu (suru)) because
the class is big.*

4 [statement] no ni to indicate contrast

In Unit 5 Structures 4 we saw that *ga* can signal a contrast (*but*); *no ni* is stronger in that it expresses a pronounced contrast (*although/despite*). *No ni* is attached to the same forms as *n' da/desu* (Unit 7 Structures 5). Compare the meanings of the pair of sentences below:

Kēki ga atta ga, kaimasen
deshita.

*There was some cake, but I
didn't buy any.*

Kēki ga atta no ni, kaimasen
deshita.

*Although there was some
cake, I didn't buy any.*

Here are some more examples with *no ni*:

O-kane ga amari nai no ni,
eiga ni itta.

*Although I haven't got
much money, I went to
the cinema*

Kanojo wa kirei na no ni,
dare mo kekkon
shitagaranaï.
Yotte ita no ni, yoku
oboete iru.

*Despite her beauty, no one
wants to marry her.*

*Although he was drunk, he
remembers well.*

Sometimes the order of the two sections is reversed (this can also be done in English):

Yoku oboete iru nē, yotte
ita no ni.

*You remember well, don't
you, despite having been
drunk.*

Because of its stronger impact *no ni* can be used at the end of a sentence in emphatic past tense statements lamenting a missed opportunity:

Minna mo tanoshimi ni
shite ita no ni.
Ikitakatta no ni.
Atakatta no ni.

*Everyone was hoping so
much that you'd come!
I really wanted to go!
I wanted to see you so
much!*

Exercises

1 Conduct a telephone conversation with a senior friend/colleague (Tanaka Yōji-san, male, or Yōko-san, female) using the following prompts. If possible, get a friend to play the other part; swap parts once you are fluent and confident in the first one.

- Ring up and confirm that you are connected to the right people – His/her mother answers.
- Identify yourself and ask if your friend/colleague is home. He/she is, and the mother calls him/her.
- Thank the mother (in advance) for calling him/her to the phone.
- He/she comes to the phone, saying his/her given name. You identify yourself to him/her, and say hello. Then ask if he/she is free to join you in going to see a film on Saturday.
- He/she thanks you for your invitation and asks you to wait because he/she needs to check his/her diary.
- He/she thanks you for holding the line. He/she is unfortunately not free on Saturday.
- You suggest Sunday as an alternative. – On Sunday, he/she is free.

h You say that you will pick him/her up at his/her place on Sunday at 5 o'clock, and ask how that suits him/her. – Yes, he/she will be waiting for you.

i You say goodbye. – He/she says goodbye.

2 You (Clive Baker) are having a conversation with a stranger at a party celebrating the publication of a book by your sensei. Fill in the blank sections of the questions or replies for the exchanges below.

Example: Sensei no hon (o) o-mochi desu ka? – Hai, _____.
→Hai, motte orimasu.

- a Shinbun de sensei no shashin (o) go-ran ni narimashita ka? Hai, _____.
- b (Tanaka-san o) _____ ka? – Iie, zanjite orimasen.
- c Shitsurei desu ga, Sumisu-san de irasshaimasu ka? – Iie, watashi wa _____.
- d Beka-san wa raishu no pati ni mo _____ ka? – Hai, mairu tsumori desu.

3 You have recently arrived in Urawa (near Tokyo), and your inquisitive landlady is determined to find out all about your reasons in deciding to come to Japan, and anything else that incites her curiosity. Answer her cross-examination-type questions using *tame ni* or *tame desu*.

Example: Nan no tame ni Nihon ni kita n' desu ka (Nihongo o narau)

→Nihongo o narau tame desu./Nihongo o narau tame ni kumashita.

- a Nan no tame ni Nihongo o narau n' desu ka? (Nihon no kaisha ni tsutomeru)
- b Dōshite Nihon no kaisha ni tsutometai n' desu ka? (O-kane ga ii)
- c Nan no tame ni Urawa ni kita n' desu ka? (Nihonjin no tomodachi ga sunde iru)
- d Nan no tame ni itsu mo sonna ni hayaku okuru n' desu ka? (Shichiji no nyūsu (news) o miru)
- e Dōshite yūbe anna ni osoku kaette kita no desu ka? (Tomodachi to nonde ita)
- f Dōshite watashi to hanashitagaranai n' desu ka? (Urusai! (annoying!))

4 Form a catalogue of missed opportunities/unwise decisions by linking the *no ni* sections with the appropriate sections to complete the sentences.

- 1 Sono kimono wa takai no ni _____
- 2 Jikan ga atta no ni _____
- 3 Omoshiroi eiga na no ni _____
- 4 Hayaku kippu o kai ni _____
- 5 Yūbe hayaka neta no ni _____

- a arimasen deshita.
- b kaimashita.
- c pāti ni ikimasen deshita.
- d okiraremasen deshita.
- e mimasen deshita.

Language and society

1

Such gatherings are generally held away from the home, at eating or drinking places. Apart from class reunions (*kurasu-kai* or *doso-kai*), common occasions are gatherings called *konpa* (from English *company*!) where university students eat and drink with their teachers (who will often foot the major part of the bill). Company employees often go out in the evenings in small groups, but large-scale company gatherings mostly take place within the framework of large-scale outings.

In addition, there are two or three occasions in the year when most Japanese go out to get drunk with their colleagues. These are:

Hanami (*cherry-blossom viewing*) in spring, when hordes of Japanese get drunk at the weekend under the blossoms, leaving behind tons of rubbish and empty bottles.

Bonen-kai, the end-of-year parties, which take place in November/December, when most drinking places of decent size are booked solid for the purpose.

Shinnen-kai, the New Year parties that take place after the New Year holidays in January.

Of course, there is a great deal of singing on all these occasions.

2 Some expressions used in formal language

One feature of Japanese language used on formal occasions is the 'roundabout' expression; this is of course also found in English (e.g. *Would you mind if I open the window?*).

Such expressions are felt to be more considerate because they are vaguer and less direct, and therefore do not unduly narrow down the addressee's choice. Instead of *itsu/nanji?*, *ikura?* and *ato de*, for instance, expressions like *itsugoro/nanjigoro?* (*about*

when?), *ikura hodo/ikahodo?* (*about how much?*) and *nochi hodo* (*later*, lit. *some time after*) are used:

Nanjigoro o ukagai	<i>When would you like me to</i>
shumasho ka?	<i>come?</i>
Nochi hodo o-ai shumashō.	<i>I'll see you later.</i>

It is helpful to be able to employ some stock phrases that are used on formal occasions. When someone calls another person to the telephone for you, for instance, it is customary to say *osoreirimasu*; before hanging up *shitsurei (ita)shimasu*; and when ringing someone you haven't talked to for some time, *go-busata shite (or)imasu* (*Sorry I haven't been in touch*). *O-hisashiburi (desu)* (see Unit 2 Language and society 2) can be used in reply to *go-busata shite imasu*, especially by people of higher status.

**moshi o-kane
ga attara, igirisu
e itte mitai wa**
if I had the money, I'd like to go to
Britain

In this unit you will learn

- various ways of expressing the conditional (*when/if* in English)
- related patterns for giving and requesting advice
- how to express hope and regret
- another use of *-te mo*
- various ways of saying *only*
- about the weather in Japan and the Japanese yearly cycle

Dialogues

ame

 4 Anzai-sensei wa hitori de Tarō-kun no sewa ga shitai rashii.

Structures

1 [verb/noun/adjective] to, -tara, nara and -eba: the conditional

a [verb/noun/adjective] to

This pattern has already come up in relation to ways of expressing the idea of *must* in Japanese (Unit 15 Structures 8). The verb or, more rarely, adjective in front of *to* is in the present plain form, either positive or negative, whatever the tense of the main clause. (Nouns and *na* adjectives before *to* take *da*.)

When the main clause is in the present tense, *to* indicates that the main clause is the natural, inevitable, or habitual consequence of the situation/action in front of *to*:

Migi e magaru to, ginkō ga arimasu.

Hayaku netai to, ashita nebō shimasu yo.

O-sake o nomu to, dō narimasu ka?

Shikake ga ōi to, kabi ga sugu haemasu ne.

If you turn (magaru) right (migi), you'll find a bank.

If you don't go to bed early, you'll oversleep tomorrow.

What happens to you when you drink (alcohol)?

When humidity is high, things soon get mouldy don't they?

To is generally used in making objective statements of fact, and not when the main clause involves the will of the speaker, or the making of suppositions, requests and commands.

When the main clause is in the past tense, *to* indicates that the action in the main clause took place immediately after the action in the *to* clause. It is more common in written than in spoken Japanese:

Beddo ni hairu to, sugu nemashita.

Michiko-san no hanashi o kiku to, Hādo-san-tachi wa yorokonda.

No sooner had I got into bed (beddo) than I went to sleep.

On hearing what Michiko-san had to say, the Herds were overjoyed.

b [verb/noun/adjective]-tara

This is formed by adding *-ra* to the plain past forms (negative as well as positive) of both adjectives and verbs (and nouns):

<i>na</i> adjectives (and nouns)	genki da shizuka da	→ genki dattara/de nakattara → shizuka dattara/de nakattara
<i>i</i> adjectives	atsui ii mitai	→ atsukattara/atsukunakattara → yokattara/yokunakattara → mitakattara/mitakunakattara
<i>iru/eru</i> verbs	miru taberu	→ mitara/minakattara → tabetara/tabenakattara
<i>u</i> verbs	kaku hanasu	→ kaitara/kakanakattara → hanashitara/hanasanakattara
irregular verbs	kuru suru	→ kitara/konakattara → shitara/shinakattara

In more formal situations, you will also come across *-tara* forms of verbs which are made from the *-mashita* form, such as *mimashitara*.

The use of *tara* indicates that the action or situation in the *when/if* clause will be finished or complete before the action or situation in the main clause takes place. The relationship between the two clauses is temporal rather than logical. Unlike *to*, *-tara* can therefore be used in subjective situations, and when making requests or commands. Here are some examples when the main clause is in the present tense:

Koko made kitara, hitori de kaeremasu.

Ashita ame dattara, uchi de terebi o mimasho.

Samukattara, mado o sh.mete kudasai.

Yokattara, kore o dōzo.

Once I have got this far, I can get back by myself.

If it rains tomorrow, let's watch television at home.

If you feel cold, please shut the window.

Please take this if you would like it.

Hontō ni benkyo sh.takattara, mata kite kudasai.

Michiko-san ga konakattara, omoshirokunai desho.

Please come again when you really want to study.

It won't be any fun, will it, unless Michiko-san comes.

-tara with the main verb in the past implies that the situation or action in the main clause followed the -tara clause in time, but was not an intended consequence, and may have come as a surprise:

Michiko-san wa chi o
mitara, kyu ni ki o
ushinaimashita
Kesa okitara, yuki ga futte
imashita.
Uchi ni kaettara, dare mo
imasen deshita.

*When she saw the blood (chi),
Michiko-san suddenly
fainted (ki o ushinau).
When I got up this morning,
it was snowing.
When I returned home,
there was no one there.*

c [verb/noun/adjective] nara

Verbs and -i adjectives take the plain form in front of nara, while nouns and na adjectives drop desu. The part of the sentence before nara usually involves an assumption or supposition about something actual in the present, or about something which may occur in the future. The equivalent in English would be *If it is the case that/If as you say...* The main clause involves a statement, request, command or question which depends on the part in front of nara being true:

Tomu-san ga Igrisujin nara,
kuriketto ga wakaru hazu
desu.
Sore ga hontō nara, komaru
deshō ne.
Sonna ni muzukashii nara,
tetsudatte agete mo ii
desu yo.
Tarō-kun ga iku nara,
watashi wa ikimasen.

*If Tom is British, he should
understand cricket
(kuriketto).
If that's true, we'll be in
trouble, won't we.
If it's that difficult, I don't
mind helping you.
If Tarō-kun is going, I
won't go.*

Unlike -tara (and to), with nara the main clause does not have to follow the *if/when* clause in terms of time:

O furo ni hairu nara,
hayaku hairi nasai.
Konban karē o taberu nara,
igusari o nonde okimashō.
Nihonjin to kekkon suru
nara, mazu Nihongo o
benkyō shinakereba
kemasen.

*If you're going to have a
bath, have it quickly.
If we're going to eat curry
this evening, let's take
some digestive tablets
beforehand.
If you're going to marry a
Japanese, you must first
study the language.*

With nouns nara sometimes acts as an emphatic *wa*:

Watashi nara hitori de anna
tokoro e ikimasen.
Michiko-san nara daijōbu
deshō.

*I wouldn't go to such a
place alone (if I were you).
(If it's) Michiko-san (she),
will be all right.*

Sore nara is often equivalent to *in that case*:

Sore nara, ashita Hādo-san
tachi ni denwa o shamashō.

*In that case, let's telephone
the Herds tomorrow.*

d [verb/noun/adjective]-eba

The positive -eba form of verbs is made by dropping the final *i* and adding -eba:

-iru/-eru verbs	miru → mireba taberu → tabereba
-u verbs	kaku → kakeba hanasu → hanaseba
irregular verbs	kuru → kureba suru → sureba

Note what happens to verbs ending in -tsu, such as *matsu*:

matsu → mateba

The negative -eba form of verbs has already come up in connection with *must* (Unit 15 Structures 8); the -eba form of *i* adjectives (negative as well as positive) is made in the same way, by dropping the final *i* and adding *kereba*:

minai → minakereba
kakanai → kakanakereba

atsui → atsukereba/atsukunakereba
oishi → oshikereba/oshikunakereba
mitai → mitakereba/mitakunakereba

Note that *ii* becomes *yokereba*. With nouns and *na* adjectives, *da* becomes *de areba/de nakereba*:

ame da → ame de areba/de nakereba
shizuka da → shizuka de areba/de nakereba

-eba indicates the circumstances under which the situation or action in the main clause will be possible:

Ame ga fureba, suzushiku naru deshō.	<i>If it rained, it would get cooler.</i>
Jikan ga areba, mata kite kudasai.	<i>Please come again if you have the time</i>
Ano hon ga omoshirokereba, watashi mo yomu ka mo shuremasen.	<i>If that book is interesting, I may read it too.</i>

In modern spoken Japanese, it is less common than the other conditional forms, and occurs mainly in more formal speech and in certain set constructions, the most common of these being **-nakereba narimasen/ikemasen**.

e More uses

-tara and **-eba** are often used in asking for and giving advice, with the literal meaning *If it/you . . . , then . . .*:

Do shitara/sureba, kaze ga naorimasu ka?	<i>What should I do for my cold to get better?</i>
Shibaraku uchi o denakattara/denakereba, naoru deshō.	<i>It should get better if you don't leave the house for a while.</i>
Kono hon o yondara/ yomeba, waku deshō.	<i>You would understand if you read this book.</i>

-tara/-eba, ii deshō ka? (lit. *If . . . , do you suppose it is good?*) and **-tara/-eba, dō deshō ka?** (lit. *If . . . , how would it be?*) are also used in asking for/offering advice (see also **hō ga ii** Unit 14 Structures 4):

Dō shitara/sureba, ii deshō ka?	<i>What should I do?</i>
Kusuri o nondara/nomeba, dō deshō ka?	<i>How about taking some medicine?</i>

In informal situations, you will also come across suggestions phrased like Mrs Anzai's in the dialogue:

Tarō no sewa demo sureba/shitara?	<i>How about looking after/ Why not look after Tarō or something?</i>
-----------------------------------	-----------------------------------------------------------------------

In polite situations, the **-tara/-eba** form of **yoroshii**, an honorific form of **ii**, is fairly common when you are urging someone to do something:

Yoroshikattara/ Yoroshikereba, kochira de shibaraku o-yasumi ni natte kudasai.	<i>Please rest here for a little if it would please you.</i>
--------------------------------------------------------------------------------	--------------------------------------------------------------

You will also come across polite suggestions consisting of **-tara/-eba dō/ikaga deshō ka?**:

O sawari ni nattara/ narimashitara/nareba dō deshō ka?	<i>How about sitting down?</i>
Mo sukoshi meshiagattara/ meshiagarimashitara/ meshiagareba ikaga desho ka?	<i>How about a little more?</i>

.. to/-tara/-eba ii desu is also used to express hopes, again with the literal meaning *If . . . , it will be good*.

Pisupōto ga hayaku mitsukaru to/mitsukattara/ mitsukareba ii desu ne.	<i>I hope the passport turns up quickly.</i>
Hontō ni Igrisu ni ikeru to/iketara/ikereba ii desu ne.	<i>Wouldn't it be lovely if I really was able to go to Britain!</i>
Hikoki ni noriokurenai to/ noriokurenakattara/ noriokurenakereba ii desu ga ne.	<i>I hope he's not late for the plane.</i>

Another pattern in which **-eba**, or **-tara**, can be found is given in Structures 5.

f Summary

Clearly all four conditional forms overlap to a certain extent, **nara** being the most easily distinguished, and **-tara** being the most common. The difference between **to**, **-tara** and **-eba** might best be illustrated by a comparison of the following:

- 1 Yukkuri hanasu to, wakarimasu.
- 2 Yukkuri hanashitara, wakarimasu.
- 3 Yukkuri hanaseba, wakarimasu.

1 describes my general competence in Japanese: *When you speak slowly, I understand*. 2 refers to a specific situation. You have asked me if I understand you, and I reply that *If you speak slowly I will understand*. In 3 you have asked what you should do to me to understand you. I tell you that *Provided you speak slowly, I'll understand*.

Finally, note that **moshi** used with any of these conditional words, normally right at the beginning of the sentence, will emphasize the idea of *if*:

Moshi yukkuri hanashitara, wakaru deshō	<i>If you were to speak slowly, I would probably understand.</i>
-----------------------------------------	------------------------------------------------------------------

2 bak(k)ari, dake and shika only

These three particles are often, but not always, equivalent to English *only*. *Shika* is probably the closest to English usage since [noun] *shika* implies *only [noun] and nothing else*, even though more was expected. *Shika* always takes a negative verb. The particles *wa*, *ga* and *o* are usually omitted with *shika*, but other particles precede it:

Tomodachi ga futari shika kite kuremasen deshita.	Only two friends came.
Hyaku-en shika arimasen.	I have only 100 yen (but I need more).
Suzuki-san wa Nihongo shika dekimasen.	Suzuki-san can only speak Japanese.
Pan shika tabemasen deshita.	I ate only bread.
Tomodachi ni shika imasen deshita.	I told only my friends.

Note the pattern [verb (present plain form)] *shika nai*:

Matsu shika arimasen	All we can do is wait. (lit. There is only waiting)
----------------------	-----------------------------------------------------------

Shika is never found in front of *da/desu*, and cannot be used where the final verb is going to be in the negative anyway.

The basic meaning of *dake* is *extent*, and it is used where *only* refers more to an exact limit which has not been exceeded. It is less emphatic than *shika*, and often translates as *just* as well as *only*. With counters and amounts in general, *dake* means *only* in the sense of *just/exactly*:

Hyaku-en dake kudasai.	Please give me just 100 yen (that is all I need).
Sukoshi dake tabemashita.	I ate just a little.

After nouns, *dake* is equivalent to *just/only/at least*; *o* and *ga* are replaced, and other particles follow:

Tomodachi dake kureba, ii desu.	I hope that only friends will come.
Kono shigoto dake shite kaerimasho.	Let's do just this job and then go home.
Tabako dake wa yamete kudasai.	Please give up smoking at least.

Unlike *shika*, *dake* can be used in front of *da/desu*, and when the verb is already in the negative:

Ioshit. no wa kimi dake desu.

You are the only thing I
want.

Jiri-san wa tako dake
tabemasen.

The only thing Jiri doesn't
eat is octopus.

Note that either present or past plain forms of verbs can precede *dake*:

Kaze o hite iru dake da
kara, shinpai shinakute mo
ii desu.

There's no need to worry
since it's only a cold.

Tomodachi to eiga o mi ni
itta dake desu.

I simply went to see a film
with a friend.

I will also find [noun] *dake no* [noun]:

Kore wa tomodachi dake
no pāti desu.

This is a party for friends
only.

O kane dake no mondai
de wa arimasen.

It's not a problem of money
alone.

Bakari refers to an approximate extent or limit. With counters, it implies that a rough guess is being made, and is therefore equivalent to *about*:

Tomodachi ga jūnin
bakari kimashita.

About ten friends came.

Nijikan bakari machimashita.

I waited about two hours.

With nouns, *bakari* (and the more emphatic *bakkari*) overlaps with *dake* and has connotations of *exclusively/nothing but/only/just*. *O* and *ga* are usually replaced, and other particles follow:

Suzuki-san wa konogoro
o-sake bakari nonde imasu.

Recently Suzuki-san has
been drinking nothing but
alcohol.

Kore wa kami bakari de
tsukurimashita.

I made this with paper only.

Like *dake*, *i* can be used where *shika* cannot:

Watashi bakari de wa
arimasen.

It's not only me.

The pattern [verb (past plain form)] *bakari da* means *I (etc.)
have just [verb]*:

Kaette kita bakari desu.

I have just got back.

Taro-kun wa o-furo ni hatta
bakari desu.

Taro-kun has just got into
the bath.

3 hitori de by oneself

Hitori, *one person*, can mean *alone*:

- A Issho desu ka? *Are you with someone (together)?*
 B Iie, hitori desu. *No, I'm alone.*

However, when you are *doing* something alone, in other words, when an adjective or verb comes at the end of the sentence, *de* must be added:

- Hitori de daijōbu desu ka? *Are you all right by yourself?*
 Yūbe hitori de terebi o mimashita. *Yesterday evening I watched television alone.*

Note a similar use of *de* in *futari de*, *sannin de*, etc., for doing things in a twosome, threesome, etc.; *minna de*, for doing things all together, as at the end of this dialogue; and *zenbu de* for giving the price of everything together (Unit 9, dialogue):

- Sannin de takushī ni norimashita. *The three of us got in a taxi.*

4 More on -te mo

In Unit 14 Structures 3, we met *-te mo ii* as a way of giving and asking permission. *Te mo* is found with other adjectives, and with verbs as well, with the meaning *even if*:

- Mado o akete mo atsui desu. *It's hot even if we open the window.*
 Ken-san ga itte mo watashi wa ikimasen. *I won't go even if Ken goes.*
 Tomodachi ga nakute mo heik. desu. *I don't mind (heiki na, even if I have no friends.*
 Takakute mo kaimasu. *I'll buy it even if it's expensive.*

When there is an interrogative, such as *dare* or *nani*, in the *-te mo* clause, it has a meaning equivalent to [question word]-*ever* . . .

- Dare ga kite mo watashi wa kamaimasen. *I don't care (kamaimasen) whoever comes.*
 Nani o tabete mo Michiko-san wa futorimasen. *Michiko-san doesn't get fat whatever she eats.*
 Kono biru wa kura nonde mo oishii desu. *This beer tastes delicious however much you drink.*

5 [verb/noun/adjective]-tara/-eba . . . no ni if only

A *no ni* clause (Unit 18 Structures 4) preceded by *-tara* or *-eba* can be used to express regret, in a pattern which literally means something like *Although X would happen/would have happened if . . . , (it won't/didn't)*, and which is equivalent to English *If only . . .*:

- Motto renshū shitara/sureba, *If only you practised more,*
 sugu jōzu ni naru no ni. *you would soon improve.*
 Kuru mae ni tegami o *If only you had written a*
 kataru/kakeba, mondai ga *letter before you came,*
 nakatta no ni. *there wouldn't have been*
any problem.
 Tabako o sawanakattara/ *If only you didn't smoke,*
 suwanakereba, seki ga *your cough would soon*
 sugu naoru no ni. *get better.*
 Genki dattara, watashi mo *If only I hadn't been ill, I*
 minna to issho ni iketa *would have been able to*
 no ni. *go with everyone too.*

-eba ii/yokatta no ni, literally *Although it would be/would have been good if . . .*, is equivalent to *If only . . .* with no main clause, or a plaintive *I wish . . .*:

- Ieba, ii no ni. *If only/I wish you would tell me.*
 Denwa sureba, yokatta *If only/I wish you had*
 no ni. *telephoned.*
 Michiko-san no tanjōbi o *If only/I wish I hadn't*
 wasurenakereba, yokatta *forgotten Michiko-san's*
 no ni. *birthday.*

Exercises

1 Using the conditional *to* for objective statements of fact, Jill explains various aspects of life in Britain to Mrs Anzai. Complete her sentences as shown by the example.

Example: Ichigatsu no Rondon wa (yoru ni naru) (samui)
 Ichigatsu no Rondon wa yoru ni naru to, samui desu.

- a (takushī de iku) (Tokyo yori takai)
 b (Igisujin ni michi o kiku) (shinsetsu ni oshiete kureru) [michi o kiku ask the way]
 c Igirisu de wa (kurejitto kado ga aru) (benri da) [kurejitto kado credit card]

- d (oto o tate-nagara sūpu o nomu) (shitsurei da) [oto o tateru
make a noise; shitsurei na rude]
e (hajimete hito ni au) (akushu suru) [akushu suru to shake
hands]

2a Tom has just returned from his trip to Hong Kong. Yamada-san has a list of things he must do, but Tom has already planned his day. Using the conditional -tara with its temporal sense, he informs her of his schedule, which starts with his customary cup of coffee. Complete his sentences as shown in the example.

Example: (kōhi o nomu) (kaigi no repōto o kaku)
Kōhi o nondara, kaig. no repōto o kakumasu.

- 1 (kaigi no repōto o kaku) (sore o Igirisu ni okutte morau)
- 2 (repoto o Igirisu ni okutte morau) (hiru-gohan o taberu)
- 3 (hiru-gohan o taberu) (gorufu ni iku)
- 4 (gorufu kara kaette kuru) (Igirisu ni denwa o suru)
- 5 (Igirisu ni denwa o suru) (uchi ni kaeru)

b Yamada-san, however, has other plans. Using -eba do deshō ka? she offers Tom useful advice on how he can, in fact, fit much more into his day. Construct her sentences as in the example.

Example: (kōhi o nomi-nagara repōto o kaku)
Kōhi o nomi-nagara repōto o o-kaki ni nareba do
deshō ka?

- 1 (hiru-gohan o hayaku taberu)
- 2 (kyo no gorufu o yameru)
- 3 (yoru osoka made shigoto suru)
- 4 (ashita hayaku kaisha ni kuru)

3 Put the adjectives/verbs in brackets into appropriate conditional forms.

Example: Shigoto ga (owaru), asobi ni kite kudasai.
Shigoto ga owattara, asobi ni kite kudasai.

- a Massugu (iku), eki ga arimasu. [massugu straight ahead]
- b Tenki ga (ii), doko ka e ikumashō.
- c Denwa o (kakeru), ima kaketa hō ga ii desu.
- d Motto (hansamu na), Satō-san to kekkon shita ka mo shiremasen.
- e Michiko-san ga mitai to (iu), misete agete mo ii desu yo.

4 In the course of a drinking session, Anzai san has become rather maudlin. Using [verb/adjective]-tara/-eba . . . no ni patterns, he sees his life as a series of disasters. (When the second part of the sentence is not specified, use ii/yokatta as appropriate before no ni.)

Example: Chichu ga kanemochi (da), kodomo no seikatsu ga motto (raku na) [kanemochi rich (man); raku na comfortable]

Chichi ga kanemochi dattara, kodomo no seikatsu ga motto raku datta no ni.

- a Supōtsu ga (jōzu na), gakkō de ninku ga (aru) [ninku ga aru to be popular]
- b Daigaku de motto benkyō (suru)
- c Terebi ga motto (omoshiroi), maiban nomiya de sake o (nomanai)
- d Kanai ga itsumo monku bakari (iwanai) [monku o iu to complain]

5 Add bakari, dake or shika as appropriate to the gaps indicated by brackets in the following sentences:

Example: Gofun () machimasen deshita.
Gofun shika machimasen deshita.

- a Taro kun wa benkyō shinaide, terebi () mite imasu.
- b Hitotsu () de ii desu.
- c Ano kodomo wa hiragana () kakemasen.
- d Muzukashii no wa kono hon () de wa arimasen.
- e Tabako o yameru () arimasen.

天気 ten
気 ki

Language and society

1 The Japanese and their weather

The weather (tenki) is a convenient topic of conversation among strangers and acquaintances in Japan. The differences between the seasons are sharp. Spring (haru) and autumn (aki) are the most pleasant, the first being associated with the cherry blossom (sakura), and the second with the autumn leaves (kōyō/nomiji). These, and other seasonal signs, will feature in general conversation, and in news broadcasts, etc. The Japanese summer (natsu) is less pleasant: first comes the rainy season (tsuyu) in June/early July, then comes a period of hot and humid weather, described as mushiatsu.i, about which everyone

complains and which lasts until early September. Summer and early autumn also coincide with the typhoon (taifu) season. The winter (fuyu) is short and mild in the south of Japan but grows longer and more severe as you go north. Note that the word *tenki* itself refers to weather rather than temperature, so that it is described as *ii/warui*, etc. but not *atsui/samui*, etc.

Here are some useful expressions:

ame/yuki ga furu/yamu
rain/snow falls/stops
ōame/ōyuki heavy rain/snow
tsumetai/ii kaze ga fuku a
cold/pleasant wind blows
kumori/hare (desu) (it is)
cloudy/sunny

tsuyu-iri/tsuyu-ake the
beginning/end of the rainy
season
tenki ni naru to turn fine
Kyō wa ii/ya na o-tenki desu ne!
What lovely/terrible weather it
is today!

2 The Japanese yearly cycle

References to this have already come up in various Language and society notes. Every area has its own festivals (*matsuri*), but the major yearly celebrations fall at the beginning of the year (*o-shōgatsu*) and in mid-August (*o-Bon*). At the New Year everyone has about a week off, which would traditionally be spent at home, with visits to relatives, one's seniors at work, and a Shinto shrine or Buddhist temple. Increasingly, however, families are choosing to spend this period at hotels, and the young are going abroad. At New Year, children are given *o-toshidama*, gifts of money in small envelopes, by their parents and visitors to the house, and by those whom they go to visit. In April come the cherry blossoms, and the start of the financial and school years. This is also the time when school and university graduates enter companies. At the end of April/beginning of May there is Golden Week. *O-Bon*, when the ancestors are thought to come back to the family home, is a time for people to travel back to their ancestral home and visit their family graves. Increasingly it too is being used as an ordinary holiday. Autumn has its autumn leaves, and December the preparations for New Year and Christmas. Late June/early July and December, which coincide with the two bonus payments of the year, are also times for ritual gift-giving, to teachers of one's children, to one's superiors at work, and, increasingly, to relatives. The summer gifts are known as *o-chūgen* and the winter ones as *o-seibo*, but the contents are the same: gift-wrapped boxes of towels, soap, tinned food, whisky, etc., which are often not delivered personally but by the store where they are ordered.

Structures

1 The causative (or permissive): [noun] wa [noun] ni [causative verb] and [noun] wa [noun] o [causative verb]

These patterns are used when making, or allowing, someone to do something.

a Formation of causative/permissive verbs

i -iru/-eru verbs: replace the final -ru with -saseru

ki	iru	→	kasaseru
oki	iru	→	okasaseru
ne	ru	→	neasaseru
tabe	ru	→	tabesaseru

ii -u verbs: replace the final -u with -ase.ru (note the irregular forms with verbs such as *matsu* and *kau*, and recall the formation of the negative)

kak	u	→	kakasaru
oyog	u	→	oyogaseru
hanas	u	→	hanasaseru
mats	u	→	matasaru
shin	u	→	shinasaru
yom	u	→	yomasaru
kaer	u	→	kaerasaru
ka	u	→	kawaseru

iii Irregular verbs:

kuru	→	kosaseru
suru	→	saseru

All plain causative forms thus end in -(s)ase.ru; this ending changes like any other regular -iru/-eru verb.

Causative structures have two protagonists, a 'causer' (or 'permitter') marked by *wa* or *ga*, and a 'causee' (or 'permittee'), marked by *o* or *ni*. In Japanese, these are both almost always animate, mostly human. English expressions like *the wind made*

the windows clatter are therefore not generally found. As indicated above, there are two basic causative structures; in their full, unabbreviated form they are distinguished according to the use of either *ni* or *o* to mark the person who is caused or permitted to do something. Let us call them *ni*- and *o*-causatives, although in actual speech these particles are often not present, being 'understood' from the context.

b Causatives of intransitive verbs

With the causative of an intransitive verb, it is normally possible to use either *o* or *ni* to indicate the causee; when *o* is used, the implication is that the causee is being *forced* to do something; when *ni* is used, the implication is that he is *allowed* to do something.

Sensei wa	gakusei o/ni	kacrasemashita.
Okāsan wa	musume o/ni	kaimono ni ikasemashita.

The differences in meaning can be captured in English translations:

The teacher sent the student home/allowed the student to go home.

The mother made/let the daughter (musume) go shopping.

With certain situations, however, it is unusual to find *ni*:

	Kodomo o	hayaku neasemashō. <i>Let's put the children to bed early.</i>
Watashi wa	hito o	shinasete shimaimashita. <i>I caused someone's death/killed someone (e.g. in a traffic accident).</i>
Okāsan wa	musuko o	juku ni ikasete imasu. <i>The mother is sending her son to a crammer.</i>

All the above situations are, under normal circumstances, understood to take place against the will of the causees, although there may be children who do want to go to bed early on nights when their parents go out).

c Causatives of transitive verbs

With transitive verbs, *ni* rather than *o* is used to indicate the causee, regardless of whether it is a question of permitting or forcing. This is because such verbs will already have an object, followed by *o*, as in the following examples:

Watashi wa	musume ni	ryōin o	tsukurasete imasu. <i>I am getting/allowing my daughter to do the cooking.</i>
O-isha-san wa	shujin ni	o-sake o	nomasemasen. <i>The doctor won't allow my husband to drink.</i>

The first sentence could be interpreted in two ways, *allowing her to cook* or *making her cook*; only the context can reveal which of the two is intended.

Below are some pairs of examples. Note that the follow-up sentence or answer omits the causer, or the causee, or, more usually, both of them, since they are understood.

Watashi wa kodomo ni miruku o takusan nomasete imasu.
Demo, niku o/wa amari tabasemasen.
I feed the child lots of milk, but not much meat.

Botchan ni mainichi terebi o nan ikan misasete imasu ka?
Terebi wa amari misasemasen ga, hon o yoku yomasemasu.
How many hours a day do you let your boy watch TV?
I don't let him watch much TV, but I give him a lot to read.

Ano ko no ryōshin wa kodomo ni zenzen atarashii omocha o kawasemasen ne.

Ē, demo, amai mono wa yoku kawasete iru yō desu yo.
Those parents never let their children buy any new toys (omocha), do they?
No, but they frequently seem to let them buy sweets (amai sweet).

Konya kodomo ni nani o tabasemasu ka?
Piza o tabasaseyo to omotte imasu ga ...
What are you going to feed the children tonight (konya)?
I'm thinking of giving them pizza (piza).

Note that the use of the causative/permisive is usually only appropriate where the causer/permitter is in a position of authority over the causee/permittee. When the causee is someone of higher status than the causer, for instance if you have got a teacher to come to your party, or persuaded your dad to buy you a Rolls Royce, **te morau/itadaku** should be used:

Sensei ni pāti ni k.te itadakimashita
Chichi ni Rōrusu-roisu o katte moraimashita.

[Causative]-te kudasai is used to offer your services in the sense of *allow me to* ... Because you are asking for permission, **ni** is clearly the appropriate particle to indicate the causee (i.e. the speaker), if mentioned, here:

Watashi ni unten sasete kudasai.	<i>Allow me to drive. (usual driver tired, drunk etc.)</i>
Watashi ni harawasete kudasai.	<i>Please let me pay (hara.u). (restaurant)</i>

The same form is used in asking for permission to have/do something:

Watashi ni mo hitotsu tabesasete kudasai.	<i>May I have one, too?</i>
Watashi ni mo yomasete kudasai.	<i>Please let me read it, too.</i>
Sukoshi yasumasete kudasai.	<i>Can I rest a little?</i>
Kangaesasete kudasai.	<i>Let me think about it. (Note that this can be a polite way of saying No!)</i>

2 Yō ni suru and yō ni naru do one's best to do and be sure to make someone do/not do something

Like **koto ni suru** (Unit 13 Structures 3), **yō ni suru** is also used after verbs (i.e. actions) in their present plain form; the meaning is *do one's best to do, make a point of doing*:

Konban hayaku neru yō ni shite kudasai.	<i>Be sure to go to bed early tonight.</i>
Jūji made ni kaeru yō ni shite kudasai.	<i>Be sure to be back by 10.</i>
Konban amari nomanai yo ni shimasu.	<i>I'll try not to drink too much tonight</i>
Hayaku owaru yō ni shimasho ne.	<i>Let's make a point of finishing early.</i>

Yō ni suru can also be attached to verbs in their causative forms, meaning *be sure to make someone do/not do something*:

Kodomo ni terebi o misasenai yo ni shite imasu.	<i>I'm trying to prevent the children from watching TV.</i>
Kodomo ni yoku undō saseru yō ni shite kudasai.	<i>Try and get the children to take regular exercise.</i>
Kodomo ni mainichi sankai ha o migakaseru yō ni shimasho.	<i>Let's get the children to brush their teeth three times a day.</i>

Unlike *suru*, which implies a conscious effort, *naru* implies that something comes about naturally (see *koto ni naru* Unit 13 Structures 3). With the present plain form of verbs *yō ni naru* indicates that the activity to which it is attached has come about as a result of a natural development (such as children's growing up):

Kodomo ga gakkō ni iku yō ni narimashita.	The children are going to school now.
Musume ga tsutomeru yō ni narimashita.	Our daughter works now.

When attached to a potential form, the implication is that the ability or skill has been acquired over some length of time (through effort, practice, etc.):

Akachan ga arukeru yō ni narimashita.	Baby (akachan) can walk now.
Oyogeru yō ni narimashita.	I can swim now.
Nihongo no shinbun ga yomeru yō ni naritai.	I want to get to the stage where I can read a Japanese newspaper

3 Signalling an addition with *ni/sore ni*

When items are enumerated, they can be joined by *to* (which indicates that each and every one is being mentioned) or *ya* (*nado*), which signals that only a representative selection is given. *Ni* implies that you are making a mental list of items, which will not necessarily be exhaustive (when listing items in this way, Japanese will often count using the fingers of one hand, bending them from the thumb down for 1 to 5, and unbending them again for 6 to 10):

A Dezato wa nan' datta n' desu ka?	What was for dessert?
B Kōhī ni chīzu ni kēki ni chokorēto . . . tabesugite shumaimashita yo.	Coffee, cheese, cake, chocolates – I ate far too much.
A Kino no pati ni wa dare ga kita n' desu ka?	Who came to yesterday's party?
B Jiru sensei ni Tomu-san ni Anzai-san-tachi . . . takusan kimashita yo.	Jill, Tom, the Anzais – lots of people.

As with *shi* (Unit 12 Structures 3), by using *sore ni* to start a new sentence, it is possible to extend an enumeration over two sentences (to make it more dramatic, or as an afterthought).

A Yūbe nomisugite, atama ga itai desu.	I've a headache, having had too much to drink last night.
B Nani o nonda n' desu ka?	What did you have?
A Biri ni wain ni usukī . . . Sore ni shanpen (champagne) deshita yo.	Beer, wine, whisky . . . and champagne, too!

Exercises

1 You are a Japanese boy who is as lazy as they come, although not everyone is aware of this trait of yours as you are very skilful in delegating others to do your chores. In reply to your mother's questions, make sentences with causative forms or *-te morau* as appropriate to the status of your 'victim'.

Example: Heya o sōji shimashita ka? (Onesan) – Onēsan ni shite moratta.

- Gyūnyū o chanto kai ni ikimashita ka? (Imoto)
- Shukudai o shimashita ka? (Karei-kyōshi)
- Watashi no tabako o katte kimashita ka? (Otōto)
- Gakkō ni tegami o kakimashita ka? (Otōsan)
- O-sara o araimashita? (Tomodachi *junior/same age*)

2 A recent medical check-up requires your husband to take better care of his health; as he is rather weak of will, your Japanese doctor is putting you in charge, telling you the things you should encourage him to do/prevent him from doing. Change the statements as shown in the model to causative requests, using either *-te/-naide kudasai* or *yō ni suru*:

Example: O-sake o nomanai. – O-sake o nomasenaide kudasai.
or O-sake o nomasenai yō ni shite kudasai.

- Mainichi sanpo suru (to stroll).
- Tabako o suwanai.
- Amai mono o tabenai.
- Yasai ya sakana o yoku taberu.
- Asa made terebi o minai.

3 Put the following into Japanese, using *yo ni naru/suru*, as appropriate

- Be sure to get up early tomorrow morning.
- Grandpa eats a lot now. (after illness)
- I can speak a little Japanese now.
- Be sure not to be late tonight.
- I want to get to the stage where I can buy a Rolls-Royce.

Language and society

1 The use of *botchan* and *ojōsan*

These are used to address and refer to outgroup sons and daughters. It is possible to make them even more formal by using *botchama* and *ojōsama*, or less formal with *musuko-san* and *musume-san*. For reference only, you can use *musuko* and *musume* about your own offspring, although for sons humble expressions such as *segare* are available. Such forms reflect the tendency to act in a self-abasing manner towards outgroupers on formal occasions. Compare expressions such as *tsumaranai mono desu ga* . . . *this is something insignificant/trifling* when giving a present, or *nani mo arimasen ga* . . . *there is nothing at all* when asking a guest to start eating a meal you have spent many hours preparing).

Ojōsan is also used to address young, unmarried women in the sense of *Miss*: like *okusan*, it is always used on its own, never attached to a name.

Note also that both *botchan* and *ojōsan* can be used in comments about sons and daughters to indicate that they were brought up in sheltered circumstances, knowing little about the harsh conditions of the real world.

2 *Uchi/o-taku* for in/outgroup

These expressions literally mean *our house* and *your house*:

Uchi ni kaeritai.	<i>I want to go home.</i>
Uchi ni kimasen ka?	<i>How about coming to my/our place?</i>
O-taku wa atarashii desu ne.	<i>Your house is new, isn't it.</i>
O-taku ni kura (air-conditioner) ga arimasu ka?	<i>Do you have air-conditioning?</i>

They can also be used in the sense of *you* and *I/we*:

Uchi wa sonna o-kane wa arimasen.	<i>We don't have that kind of money.</i>
O-taku wa sono hon o yomimashita ka?	<i>Have you read that book?</i>

Uchi and *o-taku* can also be linked to other nouns with *no* to indicate the idea of *my/our* and *your*:

Uchi no kuruma wa furui desu.	<i>Our car is old.</i>
Uchi no musuko wa supōtsu ga tokui desu.	<i>Our son is good at sports.</i>

O-taku no inu wa yoku taberu ne!	<i>Your dog eats lots!</i>
O-taku no ojōsan wa kirei desu ne?	<i>Your daughter is pretty, isn't she?</i>

3 Female use of *-(i)te(yo)* after statements or questions

This use of the *-te* (doubled to *-tte* in the case of *-i* adjectives, including *nai*) form where a man would use an ordinary *desu/masu* or plain form ending is one of the most noticeable characteristics of stereotype female role-playing expected from (or assumed to be expected from) a well-bred Japanese lady, along with high-pitched intonation and the use of slightly emphatic endings such as *wa* and *no*. *Yo* can be attached for emphasis.

Watashi wa sonna o-kane ga nakutte.	<i>I don't have that sort of money.</i>
Sonna hima wa nakutte yo.	<i>I don't have that much time!</i>
Issho ni itte mo yokutte?	<i>Is it all right if I come with you?</i>
Anata, dansu ga dekite?	<i>Can you dance?</i>

N1

**boku wa saifu o
toraremashita**
I've had my wallet taken

In this unit you will learn

- the passive and causative passive forms of verbs
- another way of expressing

- about the police and crime in Japan

- 3 Ken-san wa sentaku o saserareta.

Structures

1 The passive: [noun] wa [noun] ni [passive verb]

In Japanese, the passive works in two distinct ways, only one of which is similar to the passive in English. Its basic function is the same, however, in that it allows an event to be seen from the point of view of the person or thing affected by it (the 'patient') rather than from the point of view of its actual instigator (the 'agent').

The passive is formed by replacing the final -u of both -iru/-eru and -u verbs with -are.ru. Note that in the case of -iru/-eru verbs, the passive is in fact identical in form to the potential (Unit 14 Structures 5), and that verbs such as matsu and kau again have irregular forms.

taberu:u	→	taberu	areru
oshieru:u	→	oshieru	areru
miru:u	→	miru	areru

kak	u →	kak	areru
hanas	u →	hanas	areru
mats	u →	mat	areru
shin	u →	shin	areru
yom	u →	yom	areru
kaer	u →	kaer	areru
ka	u →	kaw	areru

The passive of the two irregular verbs are formed as follows:

kuru	→	korareru
suru	→	sareru

It may seem strange that verbs such as shinu, kaeru, and kuru should have passive forms since to die, to return and to come certainly do not in English, but this related to the 'indirect' or 'adversative' passive, which is not found in English. Like causatives, passive endings behave like normal -eru verbs.

a 'Direct' passives

These function similarly to the passive in English.

i The passive is used in order to avoid mention of the agent, either so that the sentence can be framed in an impersonal way, or because the agent is not known:

Kono hon wa hiroku yomarete imasu.	<i>This book is being widely (hiroku) read.</i>
Kuruma ga nusumareta!	<i>The car has been stolen!</i>

ii The passive is used because the event is seen not from the point of view of the agent, but from the point of view of the patient. Very often the patient will have been inconvenienced in some way. (When the event involves the receiving of a favour, *-te morau* is likely to be used instead, see Unit 16 Structures 1.) The agent is indicated by *ni* or, if inanimate, by *de*:

Watashi wa ano kodomo ni warawaremashita.	<i>I was laughed at by that child.</i>
Tarō-kun wa sensei ni homeraremashita.	<i>Tarō-kun was praised (home.ru) by the teacher.</i>
Ano tsukue wa enpitsu de rakugaki sarete iru.	<i>That desk has had graffiti (rakugaki [suru]) written on it in pencil.</i>

Note that, as in English *I was sent a present*, it is possible for passive verbs in Japanese to have objects:

Haha wa Nihon kara hon o okararemashita.	<i>My mother was sent a book from Japan.</i>
Tomu-san wa saifu o nusumaremashita.	<i>Tom had his wallet stolen.</i>
Anzai-sensei wa dare ka ni michi o kikarete, okurete shimaimashita.	<i>Anzai-sensei was late because he got asked the way by someone.</i>

Note also that there is a tendency to avoid passive constructions where the patient would be inanimate. Alternative patterns would be:

- the use of an intransitive verb (Unit 12 Structures 1)

Kono ie wa itsu dekimashita ka?	<i>When was this house built?</i>
Terebi ga naotte imasu.	<i>The television has been mended.</i>
- the use of *-te aru* (Unit 12 Structures 2)

Doa ga shimete arimasu.	<i>The door has been shut.</i>
Taro-kun no purezento wa kakushite arimasu.	<i>Taro-kun's presents have been hidden.</i>

- the use of an *A wa B ga* type construction, where *wa* replaces *o*, making the sentence into a statement about *A*, the patient of the (active) verb (Unit 10 Structures 4d).

Kono terebi wa chichi ga naoshimashita.	<i>This television was mended by my father.</i>
Kono shashin wa watashi ga torimashita.	<i>This photograph was taken by me.</i>

b The 'indirect' or 'adversative' passive

This has no straightforward English equivalent. The action of the passive verb is not aimed directly at the patient, which is always animate, but is perceived to affect the patient in some way. The agent of the passive, indicated by *ni*, must be mentioned in the sentence unless clear from the context.

In most cases, these 'indirect' passives involve intransitive verbs. In the dialogue we have *ame ni furarete* instead of *ame ga futte*, to express the fact that Jill accidentally got caught in the rain, and subsequently became ill; later on, we have *okusan ni byōki ni narareru* to instead of *okusan ga byōki ni naru* to because Yamada-san is focusing on the inconvenience caused by Japanese husbands when their wives become ill, rather than on the suffering of the wives themselves; and finally *dorobō ni hairarete* instead of *dorobō ga haitta*, although it is Tom's house which has been entered by the burglar rather than Tom himself. The following examples involve similar cases of 'indirect' inconvenience and suffering on the part of the subject of the passive verbs:

Michiko-san wa tomodachi ni korarete, Ken-san ni aemasen deshita.	<i>Michiko-san was unable to meet Ken because some friends had come.</i>
Kodomo no toki, Suzuki-san wa otōsan ni shinaremashita.	<i>Suzuki-san's father died when Suzuki-san was still a child.</i>
Yūbe tonari no akachan ni nakarete, zenzen neraremasen deshita.	<i>I was kept awake last night by (unable to sleep because of) the crying of the baby next door.</i>

This pattern is also possible with transitive verbs:

Imōto ni piano o hikarete, tegami o kaku koto ga dekimasen deshita.	<i>I couldn't write a letter because my younger sister was banging away on the piano.</i>
---------------------------------------------------------------------------	-------------------------------------------------------------------------------------------------------

Michiko-san wa Ken-san no
tame ni tsukatta kēki o
Tarō-kun ni taberaremashita.

*Tarō-kun ate the cake
which poor Michiko-san
had made for Ken.*

c The passive as an honorific

As was stated in Unit 18 Structures 1b, the passive form of the verb can also function as an honorific. In this use the passive form behaves just like an active form. Since it is less formal than the o-[masu base] ni naru form, it is used more frequently by men than by women:

Itsu Nihon ni koraremashita
ka?
O sushi o taberaremasu ka?
Mainichi shinbun o
yomaremasu ka?

*When did you come to
Japan?
Do you eat sushi?
Do you read a newspaper
every day?*

Orareru, one of the irregular honorifics of iru, is in fact the passive of the irregular humble form oru:

Kasa o motte oraremasu ka? *Do you have an umbrella?*

2 [noun A] dake de/da wa/ja naku(te), [noun B] (mo) not only [noun A], but also [noun B]

This tends to occur more often in Japanese than in English, nakute being more colloquial than naku. A can be an adjective or verb as well as a noun. Nouns follow straight in front of dake; adjectives and verbs take the forms which they generally have in front of nouns:

Jiru-san wa Eigo dake de
naku, Furansugo mo
oshiemasu.

*Jill teaches French as well as
English.*

Ken-san wa hansamu na
dake ja nakute, atama mo
u desu.

*Ken is not only handsome
but also intelligent.*

Tomu-san wa suri ni satfu o
torareta dake de wa naku,
dorobō ni mo hairareta
no desu.

*Not only did Tom have his
wallet stolen by a
pickpocket; he was also
burgled.*

Note that dake can be replaced by bakari.

3 Linking sentences with no de: because/and so

This works in a similar way to kara (Unit 6 Structures 4), but tends to be more limited in its use, since it should really only be used to refer to objective situations. The reason part, that is the part before no de, should be an actual fact, so that you will be

unlikely to find darō/desho no de. The final part of the sentence is unlikely to involve requests (e.g. itte kudasai), suggestion (e.g. ikimashō), or wishes (e.g. ikitai desu). Nouns, adjectives and verbs in front of no de take the same forms as they would in front of ni desu/da; in other words, da in front of no de becomes na. In very formal situations, masu forms will be found.

Michiko-san wa byōki na no
de, nanimo tabenai deshō.

*Since Michiko is ill, she
probably won't eat
anything*

Tenki ga totemo yokatta no
de, sanpo ni ikimashita.

*I went for a walk because it
was such nice weather.*

Ame ga futte iru no de, mada
dekakenai hō ga u desu.

*It is raining, so we had
better not set out yet.*

Unlike kara, it is unusual to find a no de clause by itself, in reply to a question for example.

4 The causative passive: [noun] wa [noun] ni [causative passive]

This is used when an animate subject is made to do something against his/her will. The causative passive is formed simply by turning the causative form of the verb (Unit 20 Structures 1) into the passive:

a -iru/-eru verbs: the causative ending -aseru is converted to -aserare.ru, and replaces the final -ru as before:

tabe ru	→	tabe	saserareru
oshie ru	→	oshie	saserareru
mi ru	→	mi	saserareru

b -u verbs: the causative ending -aseru becomes -aserare.ru, and replaces the final -u as before:

kak u	→	kak	aserareru
hanas u	→	hanas	aserareru
mats u	→	mat	aserareru
yom u	→	yom	aserareru
kaer u	→	kaer	aserareru
ka u	→	kaw	aserareru

For all -u verbs except those like *hanasu*, there is an alternative, shorter, causative passive ending formed by replacing the final -u with -asareru.

kak u	→	kak asareru
mats u	→	mat asareru
yom u	→	yom asareru
kaer u	→	kaer asareru
ka u	→	kaw asareru

c Irregular verbs.

kuru	→	kosaser	areru
suru	→	saser	areru

The causative passive functions like any normal 'direct' passive:

Ken-san wa muri ni Igrisu
no uta o utawasaremashita.

*Ken was forced to sing a
British song against his
will (muri ni).*

Tarō-kun wa okāsan ni
gakko e ikaseraremashita.

*Tarō-kun was made to go to
school by his mother.*

Michiko-san wa okāsan ni
yasai o tabesaseraremashita.

*Michiko-san was made to
eat the vegetables by her
mother*

5 Being given/asking for permission to do something: [causative]-te morau

In Unit 20 Structures 1, we saw that [causative] *te kudasai* could be used in offering one's services or in asking for permission to do something:

Pen o tsukawasete kudasai. *Please let me use (your) pen.*

[causative] *te morau* (lit. *to receive being allowed to [verb]*), is really an extension of this use of the causative:

Pen o tsukawasete
moraimashita.

*I was allowed to use
(someone's) pen.*

Toshokan de furui hon o
yomasete moraimashita.

*I was allowed to read old
books at the library
(toshokan).*

The person from whom you receive permission is indicated by *ni*:

Tomodachi ni atarashii pen
o tsukawasete
moraimashita.

*I was allowed by a friend to
use his/her new pen → A
friend let me use his/her
new pen.*

Hado-san ni shitsumon o
takusan sasete
moraimashita.

*I was allowed by Mr Herd
to ask/Mr Herd let me ask
lots of questions
(shitsumon o suru).*

This pattern is often used to express a sense of gratitude for favours received even if you did not actually ask for permission:

Hādo-san-tachi no uchi de
Igrisu-ryōri o tabesasete
moraimashita.

*I was given the opportunity
to taste British cooking at
the Herd's house.*

Hado-san-tachi to issho ni
Yoroppa e ikasete
moraimashita.

*The Herds kindly let me go
to Europe with them.*

It is also used in formal situations as a way of informing the listener that you are going to do something, often by way of confirming something that has already been discussed:

De wa, asu made
kangaesasete moraimasu.

*(With your permission) I'll
think it over till tomorrow
then.*

Mata o denwa sasete
moraimasu.

I shall telephone again.

It can also be used to indicate that you will accept someone's offer. In such cases, the more humble *itadaku* may well replace *morau*:

Ja, o-saki ni o-furo ni
hairasete itadakimasu.

I'll use the bath first then.

A Kore o dozo.

Please have some.

B Ja, sukoshi tabesasete
moraimasu.

Thank you, I'll have a little.

A O-agari kudasai.

Please come in.

B De wa, agarasete
itadakimasu.

Thank you, I will.

Note also the use of [causative] *te moraitai/itadakitai desu* (lit. *I want to receive being allowed to [verb]*) and [causative]-*te moratte/ itadaite mo ii/ yoroshii desu/deshō ka?* (lit. *May I receive being allowed to [verb]? as indirect ways of asking for permission:*

Chotto o-tearai ni ikasete
itadakitai n' desu ga . . .

Shashin o torasete moratte
mo ii deshō ka?

Ashita mata denwa o sasete
itadaite mo yoroshii
deshō ka?

*I wonder if it would be all
right if I just went to the
toilet? (usually
abbreviated to Chotto o-
tearai ni)*

*Is it all right if I take a
photograph (of you, or
something belonging to
you)?*

*Would it be all right if I
were to telephone you
again tomorrow?*

6 [noun]-chō in the middle of/during [noun]

When -chū is added to nouns which indicate some sort of action, it means that the action is in progress. Here are some common occurrences:

cigyō-chū open (lit. in the middle of operation)
junbi-chū closed (lit. in the middle of preparations)
(Both of the above are signs used by restaurants etc.)
hanashi-chū engaged/on the telephone
shiyō-chū engaged/in use (of a toilet etc.)
kōji-chū work in progress (frequent road sign etc.)
koshō-chū out of order (sign on machines)

dōro kōji-chū roadworks, work in progress

Exercises

1 In talking to the husband or wife of Katō-san, a colleague, you use -te kudasaru to describe with seeming gratitude the various ways in which he or she has been interfering in your

affairs. Later on, in talking to a friend, you complain about the very same activities, using the [passive]-te komarimashita.

Example: senshu uchi ni kita

→Katō-san wa senshū uchi ni kite kudasaimashita.

*Katō-san ni senshū uchi ni korarete komarimashita.

- a kinō tegami o yonda
- b o-miai no shashin o mita
- c yūbe denwa o kaketa
- d pātī no toki itsumo soba ni ita (soba ni by (my) side)
- e nomiya de tonari ni suwatta

2 Select the appropriate reason in the first column for each sentence in the second column and join them using kara or, when appropriate, no de.

Example: D+U

→Tokyō wa kuruma ga ōi (desu) kara/ōi no de, takushi yori chikatetsu no hō ga hayai desu.

- | | |
|-------------------------------|------------------------------------------------|
| A O-kane ga arimasen deshita. | U Takushī yori chikatetsu no hō ga hayai desu. |
| B Kore wa benni desu. | V Nonde mite kudasai. |
| C Ame ga futte imasu. | W Takusan tsukutte okimashita. |
| D Tōkyō wa kuruma ga ōi desu. | X Nanimo kaimasen deshita. |
| F Kore wa oishii desu. | Y Yoku tsukaimasu. |
| F Kodomo wa yoku tabemasu. | Z Takushī de ikimashō. |

3a Help Tom to complain about the terrible life of the Tokyo businessman, by using the causative passive to talk about what they are forced to do, as in the example.

Example: asa hayaku kaisha e iku

→Asa hayaku kaisha e ikaseraremasu/ikasaremasu.

- 1 osoku made hataraku
- 2 nagai repōto o yomu
- 3 fukuzatsu na sofuto o tsukan (fukuzatsu na complicated; sofuto software)
- 4 atsukute mo sūtsu o kiru (sūtsu suit)
- 5 gogo tokidoki gorufu o suru

b As revision practice, now help him to complain by using one of the must constructions to talk about what they have to do.

Example: asa hayaku kaisha e iku

→Asa hayaku kaisha e ikanakereba narimasen/ikanakute wa ikemasen.

4 You are telling an acquaintance about a trip to Japan where you visited a factory to which he/she had introduced you. To indicate your sense of the favour received, use [causative]-te morau in describing what you were allowed to do rather than what you did.

Example: Kōjō-chō no o-taku de Nihon-ryōri o tabemashita.
(kōjō *factory*; [noun]-cho *head of [noun]*)
→ Kōjō-chō no o-taku de Nihon-ryōri o tabesasete moraimashita.

- a Heya o tsukaimashita.
 - b Kōjō o jiyū ni mimashita. (jiyū ni *freely*)
 - c Kojo no setsumei o kikimashita. (setsumei (suru) *explanation*)
 - d Bideo o torimashita. (bideo *video*)
- 5 Put the following sentences into **masu** form Japanese.
- a Suzuki-san didn't have an umbrella so he got caught in the rain.
 - b Tarō-kun was made to drink some bitter tasting medicine by the doctor
 - c Jill teaches not only English but also German.

The police and crime in Japan

Japan is famous for the safety of its streets at night, although it is equally famous for its organized crime and gangsters (yakuza). The police are fairly visible. Police boxes (koban) will be found at regular intervals on major streets, particularly near crossroads, and are good places to ask for directions if you are lost. Policemen (keikan) and women (fujin-keikan) are colloquially referred to as o-mawari-san or, by the more ruffianly, as porikō. To telephone the police in an emergency, you should dial 110 (hyakutō-ban o mawas.u).

Foreigners are expected to carry their passport or alien registration card (in the case of longer residents) with them at all times, and you may be asked to show this to a police officer if you are walking alone at night, for example. Also remember that in Japan pedestrians as well as cars have to obey traffic lights!

Here are some more useful words and phrases:

keisatsu o yonde kudasai	hannin criminal
please call the police	tsukamae.ru to catch
keisatsu-sho police station	taiho (suru) arrest
patokā police (i.e. patrol) car	suru to pick pockets
(colloquial)	yūzai guilty
kelmu-sho prison	muzai not guilty
kelmu-sho ni hairu to go to jail	muzai desu to be not guilty

22

chotto tetsudatte yo give me a hand, won't you?

In this revision unit you will learn

- to review the main characteristics of informal Japanese
- to revise and expand known structures
- to practise converting formal sentences into informal ones and vice versa
- about dialects (and their use in informal Japanese) and common insults

Dialogues

- 4 Karupisu no koppu wa chisai.

Structures

1 More on informal Japanese

Informal language is used in a variety of situations between people of various relationships. It is very common between pupils at school, in the family (recall Unit 8) and between males (and, to a lesser degree females) who are engaged in informal types of work or are intimate. Apart from these reciprocal uses, there are also situations where it tends to be applied in one direction only, such as between customer and sales personnel (Unit 9), adult and child, superior and inferior (Unit 11, Tom

and his secretary), and, with traditional-minded couples, husband and wife!

Characteristics of informal language include the omission of particles such as *o* and *wa*, and of *da* after *na* adjectives and *no* (*da*), the use of contracted forms like *hott' oku* instead of *hōtte oku*, of certain sentence-final particles (*zo*, *ze*, *kai*, etc.), of informal or rough personal pronouns (*ore* etc.), informal variants of *hai/ie*, the phrasing of questions without the final *ka?* and in inverted order, and the use of forms like *-ttara* and *mitai* (*da*). Below, we will look at these phenomena one by one, while in Language and society 1 and 4 there will be some information on insults and dialect forms, which are also occasionally found in informal language.

a Omission of particles

Refer back to Unit 8 Language and society 3.

Tabako katte kite.	<i>Go and buy some cigarettes.</i> (omission of <i>o</i>)
Sore takai ne.	<i>That's expensive, isn't it?</i> (omission of <i>wa</i>)
Nēsan sono aida nani suru n' da?	<i>What are you going to do during that time?</i> (omission of <i>wa</i> and <i>o</i>)
Watashi iku.	<i>I'll go.</i> (omission of <i>wa</i>)
Ba ikō ka?	<i>Shall we go to the bar?</i> (omission of <i>ni/e</i>)

O and *wa* are more likely to be omitted than other particles, especially in shorter sentences. Recall also (Unit 18 Structures 1e) that when announcing one's name on the telephone in formal situations *watakushi* is used without any particle.

b Omission of *da/desu*

In informal talk, this is often left out after *na* adjectives and *no*, especially by women (recall Unit 8 Language and society 3):

Asoko wa totemo shizuka yo.	<i>That place is very quiet.</i>
Anata kirai!	<i>I hate you!</i>
Minna de iku no yo.	<i>We are all going.</i>
Kono nekutai takakatta no yo.	<i>This tie was expensive.</i>

c Contracted forms

We have already seen examples of contracted forms in Unit 17 Structures 2 (*-te shimanu* becoming *-chau/-jau*); a similar contraction is *jā/chā* instead of *de wa/-te wa* (Unit 15 Structures 7 and 8). For example, *[verb]-te oku/iku* is shortened to *[verb]-t' oku/iku*:

Hott' oite!

Pan katt' oita.

Tabet' ettara?

Ano hito ga mott' etta.

Leave me alone!

I bought some bread.

Why not eat before you go?

He took it with him.

Recall also that *-te iru* is often contracted to *-te 'ru* (Unit 11 Structures 2); similarly, *-te ita* often becomes *-te 'ta*:

Densha ga totemo konde

'ta yo!

Ame ga futte 'ta.

The train was really

crowded!

It was raining.

Before *no/n'*, the *-ru* ending of verbs often becomes 'assimilated' to *n'*.

Nan ni su' n' no?

Itsu owa' n' da yo?!

What will you have?

When are you going to

finish?!

Men and boys often contract the *-eba* form in the following way:

• Verbs: *-eba* becomes *-yd*

Ikyā yokatta no ni!

Takushī ni noryā hayai yo.

You should have gone!

It'll be quick if you take a cab.

Motto benkyo surya
yokatta.

I should have studied more.

• *-i* adjectives: *-kereba* becomes *-keryā* or *kyā*

Kane ga nakeryā ikenai.

Ikitakeryā ike!

Sonna ni takakyā kaenai.

I can't go without money.

Go if you want to!

I can't buy it if it's that dear.

Note that instead of *-kereba ikenai* (Unit 15 Structures 8), *-kya* (or *-kereba*) is often used on its own:

Motto renshū shinakyā.

Mō kaeranakyā.

I/you must practise more.

I must go.

d The sentence-final particles *zo/ze/kai?*

These are mostly used by men, and convey the following shades of meaning:

• *Zo* Emphasis (stronger than *yo*), ranging from approval through warning to threat.

Ii zo!

Futte kita zo!

Kyō kaeranai zo!

Naguru zo!

Great/You're doing fine!

It's started raining!

I'm not going home tonight!

I'm going to hit you!

- **Ze** This is also a stronger version of *yo*, used when giving some sympathetic advice/warning about a proposed course of action, or alerting the listener about some situation, without any threatening overtones.

Mītingu (<i>meeting</i>) ni deta hō ga ii ze.	You'd better attend the meeting.
Ano mise wa takai ze.	Be careful, that place is expensive.
Samui kara, attakaku shit' oita hō ga ii ze.	It's cold, so you'd better put on something warm! (attaka.i= atatakai)
Taihen datta n' da ze.	Let me tell you, this was no easy job.

- **Kai?** This is an intimate-sounding variant of *ka?*, used when asking permission or enquiring about others' intentions or feelings. It can have a slightly condescending ring, and is often used by men when talking to women, or adults to children.

Itte mo ii kai?	Is it all right if I come?
Eiga wa omoshirokatta kai?	Did you enjoy the film?
Kore katte hoshu kai?	Would you like me to buy it?

e Informal expressions for 'I' and 'you'

Boys and men use *boku* (Unit 1) or *ore* (Unit 19) in informal situations; the former is in fact acceptable in a variety of situations, for instance in classroom interaction between male pupil and teacher at school and university, whereas the latter is much more limited, being used by some men within the family, and more generally by uneducated men (or by educated men in situations where they want to play up their masculinity). The word for *you* corresponding in level to *boku* is *kimi*, and to *ore*, *omae*. The former is often used by boys to address their girlfriends, the latter mainly by boys between themselves.

Boku wa kaeru kedo, kimi wa dō suru?	I'm going back – what about you?
Omae no nōto kashite kure.	Let me borrow your notebook.

Girls/women often use *atashi* for *I* in informal or intimate situations; for *you*, they will use mostly *anata*, but with many different kinds of intonation, ranging from cold to coquettish; older women sometimes use *anta*, which can sound rather angry or bossy.

Atashi ni mo tabesasete!
Anata, kono yōfuku katte.

I want some too!
*Darling, will you buy me
this dress (yōfuku)?*
You are late again!

Anta, mata osoi no ne!

You will also hear girls (and sometimes women) use their given name (sometimes in diminutive form) where English would use *I*:

Michiko mo ikitai!	<i>I want to go, too!</i>
Junko mo issho ni tsurete 'tte!	<i>Take me along, too!</i>
Jun chan mo tabetai!	<i>I want some too!</i>

A word that can be used for *I* by either sex is *kotchi*, which originally (like the much more formal *kochira*) means *here*, and can be paired with *sotchu* for *you*:

Kotchi ni mo Karupisu tsukutte!	<i>Make some Calpis for me, too!</i>
Sotchi wa sōji shit' oite!	<i>You get the cleaning done!</i>

f Informal variants of *hai/ē* and *ie*

Instead of *hai* and *ē*, *un* and *ā* (male) are widely used, while instead of *ie* (and the less formal *ie*), *ūn* and *iya* (male) are common. *Un* and *ūn* are clearly distinguished by intonation: the former goes down as with *hai/ē*, and the latter down and up again as with *ie*. Note also that men often use *-n* instead of the plain negative ending *-nai*.

Taberu? – *Un*, tabetai wa!

Kono enpitsu karite mo uz? – *Ā*, ii yo.

Ashite no pāti iku? – *Ūn*, ikanai.

(Shashin) Kono hito shitte 'ru? – *Iya*, shiran.

g Questions without *ka?* and with *ka?/kai?*

Questions without *ka?* may end in plain forms of verbs or adjectives, or they may end in *no* (Unit 5 Language and society 4). The latter gives the question a more familiar or insistent tone. Note that when questions end in verbs/adjectives, or *no*, rising intonation is normally used; when, however, question words such as *dō?* or *dare?* come at the end of the sentence, the intonation falls briefly and goes up again.

i Iku?	<i>Will you go?</i>
Dare ga iku?	<i>Who is going?</i>
Oishii?	<i>Is it good?</i>
Mō kaeru no?	<i>Are you leaving already?</i>

- ii Kono shashin dō? *How is this photo?*
 Mō ippai dō? *How about another?*
 Kore dare na no? *Who is this?*
 Kono shukudai dō na no? *How is this homework?*

After question words, *yo* can be used to finish a question; rising intonation makes for an emphatic question, but when falling intonation is used, the tone becomes impatient or aggressive.

- iii Nēsan wa sono aida ni *What are you going to do*
 nani suru n' da yo? *during that time?*
 Itsu gohan ga dekiru n' *When is dinner going to be*
 da yo! *ready?!*
 Nani su' n' da yo! *What are you doing?!*

Ka/kai (with question intonation) can be attached to the end of the question in the i examples, *kai?* being the more intimate.

In informal male conversation, *da/dai* (falling intonation) is often attached to the question, *dai* being the more intimate-sounding version. *Dai* can also be used in iii instead of *da*, with the effect of softening the tone.

h Questions in inverted order

In Unit 5 Language and society 2 we saw that statements can be inverted, with the information at the end being added in the form (and with the intonation) of an afterthought. This is also common with questions. The raised question intonation is on the part where the question (a complete sentence) would normally end; the afterthought then follows in a lower tone:

- (Sore wa itsu dasareta shukudai na no?) Itsu dasareta shukudai na no, sore (wa)?
 (Kono koppu wa nan' dai?) Nan' dai, kono koppu wa?
 (Ima sōji de isogashii n' da kara, dame yo!) Dame yo, ima sōji de isogashii n' da kara!
 (Sonna no (wa), dare ga shinjiru ka?) Dare ga shinjiru ka, sonna no (wa)!
 (Sonna no (wa), ya da yo.) Ya da yo, sonna no (wa).
 (Ashita iku no ka?) Iku no ka, ashita?
 (Mō kaeru no?) Kaeru no, mō?

Inversion is not restricted in use to the informal style, but is not heard quite as often in the politer styles.

i The use of -ttara

This is distinct from the conditional *-tara*, and serves to reiterate a request or refusal. Another expression that can be used in this way is *-tte(ba)*; both are informal expressions.

- | | |
|--------------------------|------------------------------------------------|
| Iranai-ttara! | <i>I tell you, I don't want it!</i> |
| Kōri ga nai-ttara! | <i>I tell you, there isn't any ice!</i> |
| Watashi wa ikanai-tte! | <i>Don't you understand, I'm not going.</i> |
| Kaeru no ga ya da-tteba! | <i>Can't you see, I don't want to go home!</i> |

| An informal variant of *yō da/sō da: mitai (da)*

Mitai is widely used in colloquial Japanese (often without *da* in the present tense). It can replace *yo da* and *sō da* in all the uses that we saw in Unit 15 Structures 1 and 3, but note that it comes directly after *na* adjectives (without *na*), and that with past appearances the past tense generally comes before *mitai (da)*:

- Michiko-san wa Ken-san ga suki mitai.
 Tomu-san wa senshū byōki datta mitai.
 Kinō Jiru-san wa tsukarete ita mitai.
 Anzai-sensei wa ima taihen isogashii mitai.
 Hado-san no hisho wa totemo kirei mitai.
 Kinō wa sugoi ame datta mitai.

Mitai acts like a *na* adjective in that it takes the form *mitai na* before nouns, and *mitai ni* before verbs and adjectives:

- | | |
|----------------------------------------------|--------------------------------------------------------------------------------------------|
| Kyo wa fuyu mitai na tenki da. | |
| Kyōto mitai na furui machi ga suki. | |
| Ken san mitai na baka wa mita koto ga nai. | <i>I've never seen a fool like (i.e. anyone as foolish as) Ken.</i> |
| Nēsan mitai ni zurui yatsu mita koto nai yo. | <i>I've never seen anyone as crafty as you!! I've never seen such a cheat as you, sis!</i> |
| Kono koppu wa bakemono mitai ni dekai. | <i>This glass is monstrously big.</i> |
| Kyō wa fuyu mitai ni samui. | <i>It's as cold as winter today.</i> |

2 Relative clauses and the use of *jibun*

In Unit 4 we saw an example of a relative clause involving *watashi*:

- Kinō watashi ga katta hon o mimashita ka?

Naturally, it is also possible to have relative clauses involving the second or third persons (anata, kare/kanojo, etc.):

Anata ga/no kaita hon o yomimashita.	<i>I read the book you wrote.</i>
Kanojo ga/no tsukutte kureta kēki wa totemo oishikatta.	<i>The cake that she made was excellent.</i>

In English it is possible to say things like *Tarō, who had been studying in his room . . .*, but in Japanese, *kare* no cannot be used in this case (unless *kare* refers to someone other than Tarō); when the meaning is *his/her (own)*, *jibun* no must be used instead. Similarly, *jibun* must be used in relative clauses about first or second persons where the meaning is one of *self* (note that *jibun* has an honorific variant, *go-jibun*):

Jibun no heya de benkyō shite ita Tarō-kun wa shukudai ga umaku itte imai.	<i>The homework of Tarō-kun, who had been studying in his room, is not going well. i.e. Tarō-kun had been studying in his room, but his homework is not going well.</i>
Jibun no ie de nete ita Tomu-san wa nyūin shimashita.	<i>Tom, who had been in bed at home, was hospitalized.</i>
Watashi wa jibun de tsukutta kēki shika tabenai.	<i>I only eat cakes that I have made myself.</i>
Kore wa (anata ga) go-jibun de kaita tegami desu ka?	<i>Is this a letter that you wrote by yourself?</i>
Kanojo wa, jibun no o-kane de katta yōfuku ga daisuki desu.	<i>She loves the dress she bought with her own money.</i>

The use of *jibun* depends on similar factors when used in other types of sentences:

Jibun no shukudai wa jibun de yarinasai!	<i>It's your homework - do it by yourself!</i>
Jibun no o-kozuka de kaimashita.	<i>I bought it from my pocket money.</i>
Kono kēki wa jibun de tsukutta n' desu ka?	<i>Did you make this cake yourself?</i>

3 Kurai/gurai after expressions not indicating amount (and more on hodo)

Recall the following sentence from Unit 20:

Piano to tennis gurai desu yo.	<i>Just piano and tennis, no more.</i>
--------------------------------	----------------------------------------

Here, *kurai/gurai* indicates a small degree; for this reason it is conveniently used in expressions of (real or feigned) modesty:

Gaikokugo ga takusan hanaseru deshō?	<i>No doubt you can speak many foreign languages?</i>
lie, Doitsugo to Furansugo to Supeingo gurai desu yo.	<i>Oh no, just German and French and Spanish.</i>

In the dialogue example in the present unit, *kurai/gurai* indicates an implicit degree, too. Michiko is so busy that Tarō should be helping *her*, rather than the other way around. Similarly, the following examples:

A O-kane o kashite kure.	
B Kotchi ga kanitai gurai da yo!	<i>(I'm so short that) I'd like to borrow some myself!</i>
Nakitai gurai datta.	<i>(I was so disappointed etc.) I felt like crying.</i>

Kurai/gurai is also used in sentences indicating degree overtly:

Kare gurai Nihongo no jōzu na gaijin wa shiranai.	<i>I don't know any foreigner who is as good at Japanese as he.</i>
---------------------------------------------------	---------------------------------------------------------------------

In the last two sets of examples, *kurai/gurai* is interchangeable with *hodo*, which we saw in Unit 16 in idiomatic expressions such as *yama hodo* and *abiru hodo*:

Kare hodo Nihongo no jōzu na gaijin wa shiranai.

Hodo has a slightly more formal flavour than *kurai/gurai*. It has a similar effect when used instead of *gurai/kurai* after amounts:

Isshūkan hodo yasumimashita.	<i>I took about a week off.</i>
Tomodachi o gonin hodo tsurete kimashita.	<i>He brought along about five friends.</i>

Note that *hodo* cannot be replaced by *gurai* in expressions like *nochi hodo* or *ikahodo* (Unit 18), whereas it is possible to say *ikura gurai*:

Kono wanpīsu wa ikura gurai shimasu ka?	<i>(About) how much is this dress?</i>
-----------------------------------------	----------------------------------------

4 The use of *nante* and *nanka*

Nante can be used to express disbelief, with expressions such as *jōdan jā nai* or *tonde mo nai* (here meaning *that's absurd*) normally implied after *nante*:

Sonna ni tōi tokoro made aruku <i>nante</i> . . .	<i>What?! Walk that far?</i>
Zenbu taberu <i>nante</i> , <i>jōdan</i> ja nai yo.	<i>What? Eat all of this? You must be joking.</i>

Both *nante* and *nanka* (and *nado*) are commonly used in expressions of modesty (when referring to oneself) or depreciation:

Watashi <i>nanka</i> , heta desu.	<i>I am hopeless.</i>
Omae <i>nanka</i> ni wa dekinai yo.	<i>You can't do it.</i>
O-kane <i>nante</i> , hoshiku arimasen.	<i>I am not interested in money.</i>
Tōkyō <i>nanka</i> kirai da.	<i>I hate Tokyo.</i>

5 More on double negatives

In Unit 15 Structures 8 you came across combinations like *nakute wa naranai/nakereba ikenai* expressing the idea of *must*. This type of expression in Japanese uses two negative forms, the first being a conditional, with the literal meaning of *it won't do if not/unless*. Double negatives are much more common in Japanese than in English, so it will be useful to look at some further examples:

Ashita ni naranai to wakarimasen.	<i>I won't know until tomorrow.</i>
Kore wa supūn ga nai to taberarenai.	<i>I can't eat this without a spoon (supūn).</i>
Kimi ga inai to ikite irarenai!	<i>I can't live without you!</i>

6 Formal and informal style conversations

Let us look at some (slightly modified) dialogue sentences and consider what form they would take in more formal situations.

Tarō to Michiko: Nesan, chotto tetsudatte yo.
Anzai to Tom: Hādo-san, chotto tetsudatte kudasai/itadake-
masu ka?

Tarō to Michiko: Nani suryā ii no kai?
Anzai to Tom: Nani/donna koto o shitara u n' desho ka?

Michiko to Tarō: O-cha ireru kara, yasunde ne.

Tom to Anzai: O-cha o iremasu kara, dōzo, yasunde kudasai.

Using the reverse operation, let us look at some formal expressions from Unit 18 Structures and see what their informal equivalents might be. Naturally, there is a certain amount of variation in the informal equivalents depending on the speaker's sex (and other factors). Females, for example, are more likely to attach *no* to the end of a question or statement (although young men use *no* much more than older men), and to use the politer version where there are alternatives (recall Unit 5 Language and Society 4).

O-yakusoku itashimasu. – Yakusoku suru. (Unit 18 S1a)
Mō o-kaeri ni narimasu ka? – Mō kaeru? (Unit 18 S1b)
Go-chūmon ni narimasu ka? – Chūmon suru?
Suzuki-san o go-zonji desu ka? – Suzuki-san shitte 'ru? (Unit 18 S1c)
Hai, zonjiagete orimasu. – Un, shitte 'ru (yo).
Kaimono ni itte mairimasu. – Kaimono ni itte kuru.
Hayaku kaette irasshai. – Hayaku kaette koi/kite.
Shujin wa mō yasumimashita. – Shujin wa mō neta no.
Chotto o-ukagai shita! n' des ga . . . – Chotto kukitai n' da ga. . .
O-mie ni narimashita. – Irashita/kita.

Exercises

1 You (a male) are playing with the eight-year-old child of a friend. Using *kai?* questions and the *-te* form as the imperative, change the *italicized* sections to produce informal/intimate style equivalents to the sentences below:

Example: Kōen de sukoshi *asobimasu ka?* → *asobu kai?*
a Sanpo ni *ikimasu ka?*
b Aisukurimu *tabemasu ka?*
c Hayaku *tabe nasai!*
d Bōru (ball) o *nagete* (throw) *kudasai yo!*
e Mō uchi ni *kaerimasu ka?*

2 At a low-life establishment, a male Japanese stranger of your age has started talking to you (male), using informal language. Using the hints, talk back to him in matching style. If possible, do this with a friend.

Example: Doko kara kita no? (Eng.and) → Igrisa kara kita yo.

- a Nihongo ga jōzu da ne! Daibu naratten' no? (about a year)
- b Doko de benkyō shita? (in both England and Japan)
- c Nihon no biru oishu? (Yes, it's tasty)
- d O-sake wa dame na no? (I don't drink it much – too sweet)
- e Amakunai no mo aru yo. (but not in this place, I suppose)

3 A Japanese girlfriend of your age is talking to you (Jane) after you saw a new movie together. Reply to her comments and questions in matching style, using the English hints. If possible, practise this with a friend.

Example: Zuibun hito ga haitte 'ta wa ne! (it was full) → Ē, ippai datta wa!

- a Eiga wa do omotta? (Hmm, not that interesting)
 - b Ara, dōshite? (Just lots of action (akushon), there seemed not much else)
 - c Jēn-san wa donna eiga ga suki na no? (Films with deeper meaning – fuka.i)
 - d Tatoeba (for instance) donna no? (For instance, films like Rashōmon)
 - e Furui ne (how old-fashioned)! Motto atarashii no de wa nani ga suki? (Among new films, there are hardly any good ones!)
- 4 Gossip is rife among Michiko's classmates concerning Ken and Michiko. Make sentences out of the hints, using mitai.

Example: Michiko-san likes Ken → Michiko-san wa Ken-san ga suki mitai.

- a There aren't many boys who are handsome like Ken
- b Michiko-san doesn't study much these days
- c I'd like a boyfriend like Ken, too
- d They went to see a baseball match together last month
- e Michiko-san will go to England with Ken and his family

Language and society

1 Insults

Although Japanese has a rich vocabulary of slang, it lacks the abundance of insults that is found in many neighbouring countries. The most potent and widely used insult is *baka* stupid, which can also be used as a *na* adjective. Although this appears rather tame to us, it has been pointed out that in a country where academic performance is given enormous importance, it might be more insulting to impugn someone's

intelligence than to call them all sorts of spicier names. *Kono yarō! You brute!* is also common, and there are various expressions coined by replacing *yarō*, which is not suitable for insulting women, with other nouns. *Kono . . .* can be used on its own, implying any suitable noun, while *yaro* can be attached to *baka* for a more emphatic version, *bakayarō*.

Instead of *kono baka*, the name or kinship term of the person addressed can also be included in the insult; this is done by joining the name or kinship term to *baka* etc. by means of *no*, in a similar way to *hisho no Kimura-san* (Unit 11 Structures 4)

Tarō no baka!
Nēsan no kechi!

Tarō, you fool!
You miser/how mean you
are!

2 O-tsukare-sama and some other stock greetings

You have already come across many of the greetings and stock phrases that are so important (and stereotyped) in Japan. Among others, Unit 2 gave everyday greetings, Unit 3 phrases used when entering/leaving people's homes, Unit 10 phrases used at table, Unit 13 congratulations, and Unit 18 phrases useful for the telephone.

Here are some more phrases that are widely used at work and in everyday life.

O-tsukare-san/sama (desu) is used as a form of greeting after some work-type activity has been completed – it is ubiquitous among company workers at the end of their working day, performers and technicians, etc. after a show or broadcast, or just to acknowledge that someone has done a job.

Go kuro-san/sama (desu) (thank you for your trouble) is also sometimes used to acknowledge a well-done job, but unlike *o-tsukare-san* it can be used to greet someone who has just arrived for a meeting etc. Whereas *o-tsukare-san* is essentially an expression used among colleagues, *go-kuro-san* is typically used towards outsiders.

The above two expressions are often used instead of *konnichi wa*, *sayonara*, etc., although if you are leaving the workplace earlier than your colleagues, you will also use *o-saki ni (shitsurei shimasu)*. To thank someone for having done things for you, *o-sewa-sama* (thank you for your help) is often used (instead of *arigatō* etc.).

By way of reply to such greetings, *o-tsukare-san* is used both ways among colleagues, but *go-kurō-san* and *o-saki ni* are generally answered with *domo* (and/or a bow). Like other expressions of thanks, *o-sewa-sama* is often acknowledged with *ie* or *do itashimashite*. The same goes for *o-machidō-sama deshuta* (*sorry I've kept you waiting*).

3 The use of *māmā*

Calling someone names such as *baka* can easily lead to a fight, and in such situations it is common for third persons to intervene and try to stop people from attacking each other by saying, often repeatedly, *māmā!* The same expression is used to calm down someone who is overexcited, or about to burst into tears.

Māmā is also used when trying to prevent someone from doing something prematurely; it is used, for instance, to urge a guest who is trying to leave to stay a little longer, or a friend/guest who tries to imply that he has had enough food or sake:

- | | | |
|---|---------------------------------------|-------------------------------------------------------------|
| A | Sorosoro shitsurei shimasu. | <i>If we must be leaving soon.</i> |
| B | <i>Māmā, mada ii ja arimasen ka?</i> | <i>Come, come, surely it's still all right!</i> |
| | <i>Māmā, mō ippai gurai ii deshō?</i> | <i>Oh, do have another (bowl of rice/cup of sake, etc.)</i> |

4 Informal speech and Tokyo dialect

There is an abundance of dialects (*hōgen*) in Japan, ranging from Okinawa in the south to the dialects of northeastern Japan (Tōhoku) in the north. The northern island Hokkaidō itself has no specific Japanese dialect, having been colonized only around the end of the nineteenth century, mainly by people from the Tokyo and Tōhoku areas, so the dialects of these regions are heard there. (Hokkaidō also has a dwindling population of Ainu, whose language is unrelated to Japanese.) The major groups of dialects are those of western Japan (Kansai, the old cultural centre including Osaka and Kyoto), of eastern Japan (Kantō, including Tokyo), of Tōhoku and of the island of Kyūshū in the southwest.

The Tokyo dialect, which is one of the Kantō dialects, has some features distinguishing it from Standard Japanese (*hyōjun-go*), and these are often heard as part of informal speech in Tokyo. Apart from vocabulary such as *dekai*, a major characteristic of Tokyo/Kantō dialects is the pronunciation of *ē* instead of standard *ai/ae*, so forms like *itē* (*itai*) and *omē* (*omae*) are typically heard as part of informal language, too.

Appendix 1: Numbers and counting

This chart lists some common counters (see Unit 9 about use of counters) and the way they combine with numerals. Only those combinations which involve sound change, irregular formation, or involve only one of two regular ways of formation are listed (the remainder is predictable, consisting of the numeral (*ichi*, *ni*, etc.) given at the top plus the form of the counter given in the vertical left column). Note, however, that the pronunciation, especially of the syllabic *n*, varies according to its phonetic environment; for instance, before *b* and *m*, it is pronounced as *m* (see Introduction, pp. xv–xvi). Combinations with *nan-* *how many* are the same as those with *san* *three*.

counter	ichi	ni	san	shi	go
fun (minutes)	ippun		sanpun	yonpun	
hon (bottles, etc.)	ippon		sanbon	yonhon	
ko (small things)	ikko			yonko	
mai (flat objects)				yonmai	
nen (years)				yonen	
nichi (days)	ichinichi	futsuka	mikka	yokka	itsuka
hitori (humans)	tsuitachi*			yonin	nin
pēji (pages)	ippēji			yonpēji	
pondo (lb or £)	ichipeji			yonpondo	
satsu (bound objects)	issatsu			yonsatsu	
shū (weeks)	isshū			yonshū	
to (large animals)	ittō			yonto	
wa (birds)			sanba	yonwa	

*Only used in the meaning of *the first of the month*.

With counters expressing time (*fun*, *nen*, etc.), the suffix *-kan* can be added (optionally in the case of *byō*, *fun*, *nen*, *nichi* and *shū*) to indicate *duration of time*. For instance, *goji* on its own means *five o'clock*, whereas *gojikan* means *five hours*. Note, however, that whereas the months of the year (January–December) are counted *ichigatsu*, *nigatsu*, etc., *one month* is *ikkagetsu*, to which *-kan* can be added. The days of the month from the 11th onwards are as follows, insofar as they are irregular: 14th *juyokka*; 19th *jukunichi*; 20th *hatsuka*, 24th *juyokka*.

roku	shichi	hachi	kyū/ku	jū
roppun	nanafun	happun	kyūfun hachifun	juppun
roppon	nanahon	happon	kyūhon	juppon jippon
rokko	nanako	hakko	kyūko kyūmai	jukko jukko
muika	nanoka nanuka	yoka	kokonoka	tōka
roppēji rokupen	nanapēji nanapondo nanasatsu	happēji hachipeji hassatsu	kyūpēji kyūpondo kyūsatsu	juppēji jippēji juppondo jussatsu jissatsu jushu jishu juttō jittō juppa jippa
	nanashu nanatō	hasshū hattō	kyushū kyūtō	

Appendix 2: Basic noun and adjective forms (including *da* and *nai*)

	[noun] <i>da</i>	<i>na</i> adjectives

The best way in which to build upon this book is through constant practice and revision. Do not worry about making mistakes; the Japanese whom you encounter will be only too pleased that you are making the effort to learn their language. The next obvious step is to start learning the written language. Although this requires much time and a high degree of motivation, it will make life in Japan easier, and more enjoyable. In addition, it will often help the learning of vocabulary items, since you will recognize the basic meanings of the kanji with which they are written.

To learn the hiragana and katakana syllabaries, we would recommend P.G. O'Neill's *Kana Workbook* (Kodansha) or *Self-Study Kana Workbook: Learning through Listening and Writing* (3A Corporation). The latter comes with a CD containing the pronunciation of letters and example sentences. For basic kanji, *Teach Yourself Beginner's Japanese Script: an introduction to reading and writing Japanese* is a useful course, which apart from some 150 kanji also includes hiragana and katakana. *Basic Kanji Book series* (C. Kano et al.) is a fun way of learning kanji through games and short reading passages. For comprehensive coverage of the official list of characters, *Kanji and Kana: an introduction to the Japanese writing system* (Tuttle) is useful, and will also act as a kanji dictionary.

Dictionaries of Japanese and English using romanized script include the Japan Foundation's *Basic Japanese-English Dictionary*, available from Oxford University Press. For a copyright-free Japanese-English (and English-Japanese) dictionary without romanization, try Jim Breen's EDICT dictionary (<http://www.csse.monash.edu.au/~jwb/wwwjdic.html>). You may have to download software to be able to read the Japanese script.

japanese

helen ballhatchet & stefan kaiser

- Do you want to cover the basics then progress fast?
- Do you want to communicate in a range of situations?
- Do you want to learn Japanese in depth?

Japanese starts with the basics but moves at an energetic pace to give you a good level of understanding and speaking. You will have lots of opportunity to practice the kind of language you will need to be able to communicate with confidence and understand Japanese culture.

Helen Ballhatchet is a professor in the Faculty of Economics, Keio University, Tokyo. **Stefan Kaiser** is a professor at the Institute of Literature and Linguistics, University of Tsukuba, Japan.

- Visit www.books.mcgraw-hill.com to see our complete range of books.
